| No. of portfolio managers | 1 |
| Size of research staff | 4 |

Amerindo U.S. Advisors Inc. is a small-cap equities manager.

Its emerging growth equity approach focuses on companies at the forefront of applied science and technology. A top-down approach determines the degree of commitment to the sector while original fundamental research is used to identify attractive companies.

Albert W. Vilar, president, is chief investment officer. The client contact is James C. Vogelzang, Vogelzang & Associates Inc., 600 17th St., Suite 2325S, Denver, Colo., 80202; (303) 629-1900.

## AmeriTrust Co.

900 Euclid Ave., Cleveland, Ohio 44101; (216) 687-4089

| | |
|---|---|
| Total assets managed | $10,687,000,000 |
| Tax-exempt assets managed: | |
| Total | $6,438,000,000 |
| Commingled | $891,000,000 |
| Separate | $4,225,000,000 |
| 401(k)/457 assets managed | $1,945,000,000 |
| 401(k)/457 clients | 92 |
| Real estate assets managed | $27,000,000 |
| Dedicated assets managed | $82,000,000 |
| Minimum separate account | $3,000,000 |
| Tax-exempt clients: | |
| Commingled | 200 |
| Separate | 196 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 11 |
| Size of research staff | 11 |

AmeriTrust Co. is an equity, fixed-income, balanced, real estate and convertible securities manager.

Its value-driven equity approach uses broadly diversified portfolios consisting of low p/e issues when dividend return and fundamental value will provide superior long-term returns while limiting downside risk. Its fixed-income approach is based upon interest rate anticipation, and stresses quality and maturity structure so portfolios will generally have low volatility.

Its real estate approach provides current yield plus protection against inflation. Property selections are based on the adequacy of the current return.

The asset mix Jan. 1 was 62% stocks, 21% bonds, 8% cash and 9% convertible securities; it had $11 million in equity real estate and $16 million in mortgage-backed securities.

The parent company is AmeriTrust Corp.

Richard C. Hyde is executive vice president and chief investment officer; Gary W. Queen, senior vice president, is client contact.

## Amherst Investment Management Co.

1414 Main St., Springfield, Mass. 01144; (413) 784-6804

| | |
|---|---|

## AmSouth Bank

P.O. Box 11426, Birmingham, Ala. 35202; (205) 326-5512

| | |
|---|---|
| Total assets managed | $4,500,000,000 |
| Tax-exempt assets managed: | |
| Total | $2,200,000,000 |
| Commingled | $300,000,000 |
| Separate | $1,900,000,000 |
| Minimum separate account | $2,000,000 |
| Tax-exempt clients: | |
| Commingled | 800 |
| Separate | 200 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 16 |

AmSouth Bank is an equity, fixed-income and balanced manager.

Its equity approach concentrates on undervalued, out-of-favor stocks, focusing on low p/e and using Graham & Dodd analysis. The bank seeks to capitalize on cyclical movements in stock prices and target stocks that are mispriced relative to their long-term value. Its fixed-income approach uses interest rate anticipation, capitalizing on broad, cyclical movements.

The asset mix Jan. 1 was 40% stocks, 50% bonds and 10% cash.

The firm follows 200 stocks closely and 1,000 generally; 35% of research is generated internally.

John H. Goff Jr., senior vice president and senior trust investment officer, is chief investment officer; James M. Groom, trust investment officer, is client contact.

## Analytic Investment Management Inc.

2222 Martin St., Suite 230, Irvine, Calif. 92715; (714) 833-0294

| | |
|---|---|
| Total assets managed | $1,169,000,000 |
| Tax-exempt assets managed | $1,088,000,000 |
| 401(k)/457 assets managed | $1,000,000 |
| 401(k)/457 clients | 2 |
| Real estate assets managed | $11,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 32 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 9 |
| Size of research staff | 3 |

Analytic Investment Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach is quantitative and uses growth stocks. The firm constructs diversified portfolios, hedging them with options, futures and convertible securities to reduce market volatility and increase long-term return.

Its fixed-income approach uses portfolios of federal government issues and related derivative securities, including futures, options and options on futures. Hedged positions are used to limit risk and boost return.

The asset mix Jan. 1 was 92% stocks, 4% bonds, 3% cash and 1% mortgage-backed securities; $11 million was in mortgaged-backed securities. The firm follows 260 stocks closely and 593 generally; all research is generated internally.

The parent company is United Asset Management.

Clients include Eastman Kodak, Central Laborers, Houston Police and Vanderbilt University.

Sheen T. Kassouf is the chief investment officer; Kevin Hamilton is the client contact.

## Anchor Capital Advisors Inc.

1 Post Office Square, Boston, Mass. 02109; (617) 423-9336

| | |
|---|---|
| Total assets managed | $170,000,000 |
| Tax-exempt assets managed | $107,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 78 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Anchor Capital Advisors Inc. is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented using low p/e and Graham & Dodd principles to analyze the market. Emphasis is given to deep value securities and reduction of downside risk.

Its fixed-income approach combines sector analysis and interest rate anticipation.

Clients include Rhode Island Painters, Providence YMCA and Massachusetts State Carpenters.

Mark V. Rickabaugh is chief investment officer; William P. Rice, president, is client contact.

## Anhalt/O'Connell Inc.

345 S. Figueroa St., Suite 303, Los Angeles, Calif. 90071; (213) 622-0066

| | |
|---|---|
| Total assets managed | $858,000,000 |
| Tax-exempt assets managed | $843,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 8 |
| Types of accounts managed | CG |
| No. of portfolio managers | 2 |

Anhalt/O'Connell Inc. is a fixed-income manager.

Its approach uses fundamental data to identify interest rate trends and appropriate maturities. Put and call options are used as enhancements. Its active style uses Treasury securities exclusively.

All assets were invested in fixed income Jan. 1.

All research is generated internally.

Paul Anhalt and Michael O'Connell, principals, are the chief investment officers; Ross B. McAdam, managing director, is client contact.

## Argus Investment Management

330 E. Canon Perdido Suite C, Santa Barbara, Calif. 93101; (805) 963-3558

| | |
|---|---|

| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 49 |
| Types of accounts managed | CF |
| No. of portfolio managers | 3 |
| Size of research staff | 1 |

Argus Investment Management is an equity and balanced manager.

Its equity approach is geared toward fundamental value. It seeks signs of opportunities such as insider accumulation, favorable technical profiles and modest institutional ownership.

Its fixed-income approach anticipates trends in interest rates, using U.S. government and high-quality corporate securities.

James Alphier and Jon Bull are chief investment officers; Timothy R. Alward is client contact.

## Argus Investors' Counsel

17 Battery Place, 18th Floor, New York, N.Y. 10004; (212) 425-7500

| | |
|---|---|
| Total assets managed | $526,000,000 |
| Tax-exempt assets managed | $476,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 12 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 2 |
| Size of research staff | 20 |

Argus Investors' Counsel is an equity, fixed-income and balanced manager.

Its equity approach is highly diversified, oriented toward large-cap and quality stocks. It has a strong buy/sell discipline. Options are used.

Its fixed-income approach uses quality bonds with diversified, well-spaced maturities. Average maturity is 14 to 18 years.

The parent company is Argus Research Group.

Clients include United Mineworkers and the Ritter Foundation.

Herman I. Roseman, president, is chief investment officer; Michael J. Bonner, director of marketing, is client contact.

## Ariel Capital Management

307 N. Michigan Ave., Suite 2014, Chicago, Ill. 60601; (312) 726-0140

| | |
|---|---|
| Total assets managed | $263,000,000 |
| Tax-exempt assets managed | $255,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 37 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 1 |
| Size of research staff | 2 |

Ariel Capital Management Inc. is an equity manager.

Its approach uses Graham & Dodd analysis to seek undervalued companies with p/es of less than 11 and the potential to grow at 15% or more annually.

Clients include Detroit Police and Fire, University of Michigan and Kraft Foundation.

John W. Rogers Jr., president, is chief investment officer; Darice Wright, senior vice president, is client contact.

## Ariston Capital Management

12301 N.E. 10th Place Suite 250, Bellevue, Wash. 98005; (206) 454-1600

| | |
|---|---|
| Total assets managed | $42,000,000 |
| Tax-exempt assets managed | $28,000,000 |
| Minimum separate account | $100,000 |
| Tax-exempt clients | 54 |
| Types of accounts managed | CFG |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Ariston Capital Management Corp. is a balanced and convertible securities manager.

Its investment approach combines growth and emerging growth and low p/e stocks with sector rotation and long-term market forecasting. The firm uses undervalued convertibles as a low-risk alternative to the equity market. Its fixed-income approach is driven by interest rate anticipation.

Richard B. Russell, president, is chief investment officer; Frederick L. Denman is client contact.

## Arnold Investment Counsel

700 N. Water St., Milwaukee, Wis. 53202; (414) 271-2726

| | |
|---|---|
| Total assets managed | $450,000,000 |
| Tax-exempt assets managed | $300,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 200 |
| Types of accounts managed | CEF |
| Size of research staff | 6 |

Arnold Investment Counsel Inc. is an equity, fixed-income and balanced manager.

For equity investment, it takes a patient, disciplined, low-risk, contrarian approach to undervalued, large-cap, liquid issues. Cash is raised when necessary.

Its fixed-income commitments vary with the firm's perception of changes in inflation. Investments are limited to highly liquid, investment-grade securities.

James R. Arnold Sr. is chief investment officer and client contact.

## Aronson & Fogler

230 S. Broad St., 20th Floor Philadelphia, Pa. 19102; (215) 546-7500

| | |
|---|---|
| Total assets managed | $150,000,000 |
| Tax-exempt assets managed | $150,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 5 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 4 |

Aronson & Fogler is an equity manager following a value-oriented, quantitative and super-diversified approach. The model-driven philosophy emphasizes classical security analysis; decision-making is computerized with the goal of pure stock selection.

All assets were in stocks Jan. 1.

The firm follows 1,500 stocks closely and 6,500, generally.

Clients include the University of Southern California, The Common Fund, Bell Atlantic and Agway.

Theodore R. Aronson and H. Russell Fogler are the chief investment officers. Mr. Aronson is the client contact.

## ASB Capital Management

655 15th St. N.W. Suite 800, Washington, D.C. 20005; (202) 383-6395

| | |
|---|---|
| Total assets managed | $5,474,000,000 |
| Tax-exempt assets managed | $4,983,000,000 |
| 401(k)/457 assets managed | $17,000,000 |
| 401(k)/457 clients | 2 |
| Real estate assets managed | $514,000,000 |
| Index funds managed | $423,000,000 |
| Minimum separate account | $2,000,000 |
| Tax-exempt clients | 379 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 13 |
| Size of research staff | 9 |

ASB Capital Management Inc. is an equity, fixed-income, balanced, GIC and cash manager.

Its equity approach is oriented toward relative value; attractive securities are identified by quantitative ranking of value and fundamental factors. Sector emphasis is made accordingly.

Its fixed-income approach combines interest rate anticipation, maturity and sector shifts, swaps and arbitrage and timely selection of issues.

For real estate, the firm invests in high-quality, income-producing proper-

ties constructed with union labor, through participating and covertible mortgages and joint ventures.

The asset mix Jan. 1 was 47% stocks, 34% bonds, 10% cash, 3% equity real estate and 6% mortgage-backed securities. As of the same date, $423 million was in equity indexed funds.

The parent is American Security Corp.

Terence W. Collins is president and chief investment officer; Jesse L. Sternberger, vice president and director of marketing, is the client contact.

### Ashfield/Pacific Asset Management

750 Battery St. Suite 700, San Francisco, Calif. 94111; (415) 391-4747

| | |
|---|---|
| Total assets managed | $472,000,000 |
| Tax-exempt assets managed | $191,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 46 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 5 |
| Size of research staff | 5 |

Ashfield/Pacific Asset Management is an equity, fixed-income and balanced manager.

Its equity approach emphasizes growth stocks with investments concentrated in small- and midsize companies with accelerating earnings trends and consistently high returns on assets and equity. Buy/sell disciplines emphasize relative p/e ratios.

Its fixed-income approach is passive and based upon relative value in attractive market sectors. Strategy emphasizes economic and interest rate cycles, liquidity and the yield curve.

J. Stephen Thornborrow is the chief investment officer; J. Stephen Lauck and Andrew F. Mathieson are the client contacts.

### Ashland Management

26 Broadway, New York, N.Y. 10004; (212) 425-2803

| | |
|---|---|
| Total assets managed | $718,000,000 |
| Tax-exempt assets managed | $585,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 105 |
| Types of accounts managed | CEFJG |

Ashland Management, an equity manager, seeks quality growth, low p/e stocks. It uses Graham & Dodd analysis.

The asset mix Jan. 1 was 96% stocks and 4% cash.

The firm follows 90 stocks closely and 1,200, generally; 90% of the research is generated internally.

Charles C. Hickox is the chief investment officer; Minot Amory, director, is the client contact.

Associated Capital Investors, formerly BA Investment Management Corp., is an equity, fixed-income, asset allocation and money market manager. Its equity approach emphasizes value-oriented situations with above-average S&P total expected return potential with a bias toward companies that exhibit superior growth and profit characteristics.

Its active fixed-income management consists of moderate adjustments in duration accompanied by an emphasis in security and sector shifts. For passive accounts, it offers dedication, immunization and index programs; it is based on interest rate anticipation.

Money market and limited risk management targets preservation of capital through credit quality control, adding value within sector and maturity shifts.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 50% stocks and 50% bonds.

Monarch Capital Corp. has a majority interest in the firm.

Thomas B. Kelley is chairman and chief investment officer; Richard A. Frodsham, senior vice president/director of marketing, is client contact.

### Astrop Advisory Corp.

5 Piedmont Center Suite 417, Atlanta, Ga. 30305; (404) 239-0707 or (800) 237-7073

| | |

Atlanta Capital Management Co. is an equity, fixed-income and balanced manager.

Its equity approach focuses on high-quality companies with above-average profitability and a growing stream of earnings. The firm uses a disciplined approach for comparing company worth to stock price.

Its approach to fixed income is highly disciplined, using A or better securities and maturity optimization, which uses a set of interest rate forecasts.

The asset mix Jan. 1 was 63% stocks, 27% bonds, 5% cash and 5% mortgage-backed securities.

The firm follows 150 stocks closely and 400, generally; 70% of research is generated internally.

Clients include American Airlines, Northeast Utilities, Miami and Procter & Gamble.

Frederick L. Muller, president, is the chief investment officer; R.M. Varn, managing director, is the client contact.

### August-Am Cal Advisors Inc.

4730 Woodman Ave. Suite 220, Sherman Oaks, Calif. 91423; (818) 990-3250

| | |
|---|---|
| Total assets managed | $450,000,000 |
| Tax-exempt assets managed | $450,000,000 |
| Real estate assets managed | 450,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 8 |
| Types of accounts managed | J |
| No. of portfolio managers | 5 |
| Size of research staff | 3 |

August-Am Cal Advisors Inc., formerly Am Cal Co., is a real estate manager.

Its investment approach emphasizes cash-on-cash return to exceed 12-year Treasuries and 150 basis points with preservation of capital through appreciation in value to exceed the inflation rate by 3%.

The parent is August Financial Corp.

Clients include Hawaii Masons; Albuquerque Pipes; Sheet Metal Workers of Southern California, Arizona and Nevada; and Southern Electrical.

James B. McKenna is chief investment officer; S.Q. Dellagrotta is client contact.

### Avatar Associates

900 Third Ave., New York, N.Y., 10022; (212) 753-7710

| | |
|---|---|
| Total assets managed | $1,400,000,000 |
| Tax-exempt assets managed | $1,000,000,000 |
| 401(k)/457 assets managed | $50,000,000 |
| 401(k)/457 clients | 3 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 80 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 5 |
| Size of research staff | 4 |

Avatar Associates is an equity and balanced manager.

Its equity approach is active asset allocation; the firm alters the portfolio mix to reflect changes in stock market risk. The primary objective is capital preservation during falling markets. Accounts use individual stocks and cash for defensive management; an index fund and cash fund for "swing" management; or stock index futures only to hedge other equity assets.

The fixed-income portions of balanced accounts use primarily U.S. government securities of short to intermediate maturities; maturities are based on interest rate trends.

The asset mix Jan. 1 was 85% stocks and 15% cash.

It follows 80 stocks closely and 150, generally; 80% of equity research and 100% of asset mix research is generated internally.

Clients include K mart, Chrysler and Public Service Electric and Gas.

Edward S. Babbit Jr., president, is chief investment officer; Bruce L. Poliquin, vice president, is client contact.

### Axe-Houghton Management

Axe Castle, 400 Benedict Ave., Tarrytown, N.Y. 10591; (914) 631-8131

| | |
|---|---|
| Total assets managed | $1,274,000,000 |
| Tax-exempt assets managed | $479,000,000 |
| International assets managed | $107,000,000 |
| Index funds managed | $343,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 16 |
| Types of accounts managed | CFJG |
| No. of portfolio managers | 5 |
| Size of research staff | 8 |

Axe-Houghton Management Inc. is an equity, fixed-income, balanced, international, GIC and index fund manager.

It offers both active and passive equity approaches. Its active approach emphasizes low p/e, growth and emerging growth stocks and sector rotation. It also offers domestic and international indexed equity management. Options and stock index futures are used.

In fixed-income, interest rate risk exposure is based on a multiscenario interest rate outlook; credit risk exposure is based on the size of available quality spreads and analysis of individual credits.

The parent is USF&G Corp.

John L. Schroeder is the chief investment officer; Stephen J. Darby Jr. is the client contact.

### J.H. Ayres & Co. Inc.

2016 Condor St., Colorado Springs, Colo. 80909; (303) 635-1414

| | |
|---|---|
| Total assets managed | $1,800,000,000 |
| Tax-exempt assets managed | $1,800,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 160 |
| Types of accounts managed | C |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

J.H. Ayres & Co. Inc. is a mutual fund manager.

For equities, the firm employs monetary timing based on changes in the Federal Reserve's monetary policy. Assets are rotated between equity mutual funds and money market mutual funds. Using interest rate anticipation and bond timing, fixed-income assets are shifted between bond mutual funds and money market mutual funds.

As of Jan. 1, the assets were 100% cash.

James H. Ayres, president, is chief investment officer and client contact.

Master trust: Aug. 22.

## B

### David L. Babson & Co. Inc.

1 Memorial Drive, Cambridge, Mass. 02142; (617) 225-3800

| | |
|---|---|
| Total assets managed | $2,223,000,000 |
| Tax-exempt assets managed | $527,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 82 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 15 |
| Size of research staff | 6 |

David L. Babson & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes growth and emerging growth stocks. Emphasis is on selection of reasonably valued, high-quality companies with the potential for above-average earnings growth.

Its fixed-income approach uses sector analysis, emphasizing high-grade, special value bonds, controlled maturity risk and active trading. Portfolios are actively managed to maximize total return.

The asset mix Jan. 1 was 65% stocks, 30% bonds and 5% cash.

The firm follows 200 stocks closely and 625, generally; 85% of research is generated internally.

Peter C. Thompson, president, is chief investment officer and client contact.

### Badgley & Phelps Inc.

1301 Fifth Ave. 3206 Rainier Tower, Seattle, Wash. 98101; (206) 623-6172

| | |
|---|---|
| Total assets managed | $400,000,000 |
| Tax-exempt assets managed | $100,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 60 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 7 |

Badgley & Phelps Inc. is an equity, fixed-income and balanced manager.

Its equity approach is focused on high-quality growth stocks. Its fixed-income approach is passive, using a stepped schedule of high-quality bonds coming due each year to be reinvested at current rates.

The firm follows 80 stocks closely and 200, generally.

Warren Bell is chief investment officer; Pat Sullivan and Kevin Callaghan are client contacts.

### Julius Baer Investment Management Inc.

330 Madison Ave., New York, N.Y. 10017; (212) 949-9055

| | |
|---|---|
| Total assets managed | $571,000,000 |
| Tax-exempt assets managed | $571,000,000 |

| Tax-exempt clients | 11 |
| Types of accounts managed | CFG |
| No. of portfolio managers | 5 |
| Size of research staff | 28 |

Julius Baer Investment Management Inc. is an international manager.

Its equity approach uses growth stocks and sector rotation. Country allocations are based on expected total return, and stock selection emphasizes large, stable growth companies and industry trends.

In fixed income, it uses interest rate anticipation, sector analysis and currency mix. Currency weightings are based on total return forecasts, with or without hedging. Bond selection emphasizes government and high-quality issues with medium maturities.

The asset mix Jan. 1 was 10% stocks and 90% bonds.

The parent is Baer Holding Ltd.

Clients include Owens-Illinois and Kansas Public Employees.

Peter Widmer is chief investment officer; Jay Dirnberger is client contact.

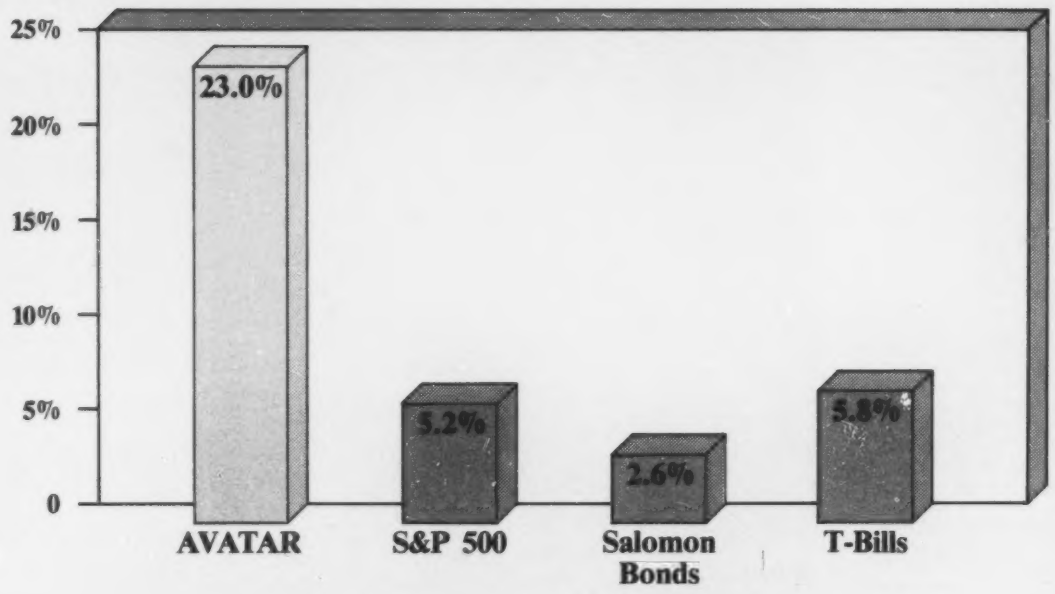
900 Market Street Mall • Wilmington, Delaware 19801

This is how our ASSET ALLOCATION STYLE performed in 1987. Call us for the other 16 years of REAL-TIME performance.



Performance is the mean time-weighted total rates of return of all discretionary tax-exempt accounts over $1 million. Past performance is no guarantee of future results.

■ EQUITY PORTFOLIO MANAGEMENT. Active stock selection (large capitalization issues) combined with the critical portfolio stocks/cash mix shifts.

■ TACTICAL ASSET ALLOCATION. Same asset mix shifts cost-efficiently implemented with an index fund and cash fund. Or, use stock index futures as an "invisible" hedge overlay to actively/passively managed equities.

dend, capitalization, return on equity, p/e and debt/equity. Its fixed-income approach is technical, based on U.S. Treasury price trends.

The parent company is Bank of Delaware Corp.

Gerhard M. Okhuysen, assistant vice president, is the chief investment officer; John LeBourgeois is client contact.

## Bank IV Wichita

P.O. Box 4, Wichita, Kan. 67201-0004; (316) 261-4555

| | |
|---|---|
| Total assets managed | $634,000,000 |
| Tax-exempt assets managed: | |
| Total | $276,000,000 |
| Commingled | $43,000,000 |
| Separate | $233,000,000 |
| Real estate assets managed | $13,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients: | |
| Commingled | 74 |
| Separate | 263 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 12 |

Bank IV Wichita is an equity, fixed-income, balanced and real estate manager.

Its equity approach is value-driven with a renewed reliance on a dividend discount model.

Its fixed-income approach combines a risk-averse style with active management to preserve capital from risk of loss and to achieve a rate of return in excess of the respective index.

The parent company is Fourth Financial Corp.

Clients include General Dynamics, Kansas Gas & Electric, Physician Clinic of Kansas and St. Francis Medical Center.

Michael R. Ritchey is chief investment officer; Roger A. Ramseyer, trust officer and marketing manager, is client contact.

## The Bank of New York

48 Wall St., New York, N.Y. 10286; (212) 495-1626

| | |
|---|---|
| Total assets managed | $13,800,000,000 |
| Tax-exempt assets managed: | |
| Total | $3,500,000,000 |
| Commingled | $900,000,000 |
| Separate | $2,600,000,000 |
| Real estate assets managed | $125,000,000 |
| International assets managed | $5,000,000 |
| Indexed assets managed | $50,000,000 |
| Dedicated assets managed | $10,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients: | |
| Separate | 75 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 60 |
| Size of research staff | 11 |

The Bank of New York is an equity, fixed-income and balanced manager.

Its equity approach uses portfolios individually structured to meet client objectives. After identifying major economic and political forces, portfolios are constructed using the appropriate approach: growth, earnings momentum and yield.

Its fixed-income approach uses individually structured portfolios to satisfy client return objectives and tolerance for short-term volatility. The portfolio is constructed using interest rate anticipation, sector analysis and credit quality changes.

Options are used.

The asset mix Jan. 1 was 57% stocks, 35% bonds and 8% cash; $125 million was in mortgage-backed securities, $5 million in foreign stocks and $50 million in bond index funds.

Charles L. Booth, executive vice president, is chief investment officer; Jeannette Gadomski, vice president, is the client contact.

## Bank One, Indianapolis

101 Monument Circle, Indianapolis, Ind. 46277; (317) 639-8151

| | |

| Total | $3,504,000,000 |
| Commingled | $28,000,000 |
| Separate | $3,476,000,000 |
| Real estate assets managed | $280,000,000 |
| Dedicated assets managed | $250,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients: | |
| Commingled | 132 |
| Separate | 384 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 13 |
| Size of research staff | 5 |

Bank One, Indianapolis is an equity, fixed-income and balanced manager.

In equities, the bank takes a value-oriented approach. Stock selection focuses on a bottom-up approach involving analysis of cash flow, revenue and current vs. historical price.

The bank actively manages fixed-income portfolios. Emphasis is given to controlling maturity and duration of a portfolio given the economic outlook and its implications for the trend in interest rates.

Options are used.

The asset mix Jan. 1 was 10% stocks, 70% bonds, 10% cash, 8% mortgage-backed securities and 2% GICs.

The bank follows 250 stocks closely and more than 6,000, generally; 80% of research is generated internally.

Clients include Hallmark Cards, Indiana Teachers and Texas Eastern.

The parent is Banc One Corp.

Leif E. Nulsen, senior vice president, is chief investment officer; Phillip E. Chambers, vice president and investment officer, is the client contact.

## Bank of Tokyo Trust Co.

100 Broadway, New York, N.Y. 10005; (212) 766-3400

| Types of accounts managed | CEFJG |
| No. of portfolio managers | 7 |

Barrow, Hanley, Mewhinney & Strauss is an equity, fixed-income and balanced manager.

Its equity approach emphasizes low p/e, high dividend yield and low price/book ratios.

Its fixed-income approach uses sector analysis and looks for high yield to maturity, high current yield, high quality and conservative maturity structure. Portfolios have a structural advantage vs. the market, regardless of interest rate movement and additional value is gained through investing in undervalued securities generating a high yield to maturity.

The asset mix Jan. 1 was 88% stocks, 8.5% bonds, 3% cash and 0.5% mortgage-backed securities.

It follows 250 stocks closely and 750, generally; 50% of research is generated internally.

The parent is United Asset Management.

Clients include Vanguard, GM, Federal Reserve and American Airlines.

Bryant M. Hanley Jr., president, is chief investment officer; Peter F. Bridge, vice president, is client contact.

| Tax-exempt clients | 159 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 7 |
| Size of research staff | 8 |

BEA Associates is an equity, fixed-income, balanced and international manager offering low-risk arbitrage and enhanced index fund management.

The firm uses a value-oriented equity approach, seeking situations where it disagrees with consensus estimates of cash flows and discount rates.

It structures fixed-income portfolios to resemble client-specified benchmarks, adding value through issue selection, sector selection and swapping.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 50% stocks, 25% bonds, 5% cash and 20% other; $267 million was in foreign stocks, $96 million in foreign bonds, $553 million in equity index funds and $377 million in bond index funds.

Clients include Central States Teamsters, Oregon and Unisys.

Albert L. Zesiger, president and chairman, is chief investment officer; Timothy T. Taussig, director of client development, is client contact.

## Beacon Capital Management

2 World Trade Center, Suite 8546, New York, N.Y. 10048; (212) 912-6900

| | |
|---|---|
| Total assets managed | $740,000,000 |
| Tax-exempt assets managed | $704,000,000 |
| Dedicated funds managed | $31,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 17 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 5 |
| Size of research staff | 1 |

Beacon Capital Management is an equity, fixed-income and balanced manager.

Its dual equity approach uses Graham & Dodd analysis to assess value while controlling market risk through adjustment of cash reserves. It invests in quality, undervalued companies with positive fundamentals.

Its fixed-income approach is based on interest rate anticipation and is implemented through the timely adjustment of the maturity and duration of U.S. Treasury and agency issues.

The asset mix Jan. 1 was 50% bonds and 50% cash.

The parent company is The Bank of New York Co. Inc.

Samson Wang, president, is chief investment officer; Thomas F. Murphy, director of marketing, is the client contact.

## Bear Stearns Asset Management

245 Park Ave., New York, N.Y. 10167; (212) 272-2814

| | |
|---|---|
| Total assets managed | $2,702,000,000 |
| Tax-exempt assets managed | $2,515,000,000 |
| 401(k)/457 assets managed | $100,000,000 |
| Real estate assets managed | $297,000,000 |
| Index funds managed | $160,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 106 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 9 |

Bear Stearns Asset Management is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented, focusing on low p/e stocks. The firm uses a set of proprietary screens to isolate companies with strong fundamental characteristics whose prices are below market or industry levels. It then identifies those with strong upside price potential.

Its fixed-income approach is conservative, investing primarily in U.S. government securities. Portfolio average maturities are adjusted according to interest rate trends.

The asset mix Jan. 1 was 35% stocks, 50% bonds, 4% cash and 11% mortgages. As of the same date, the firm had $297 million in mortgages and $160 million in bond index funds.

The parent is Bear, Stearns & Co. Inc.

Clients include Chrysler, Wake Forest University and New York City.

Peter N. Marron is chief investment officer; Milton B. Rubin, chief executive officer, and John F. Boneparth, director of marketing and client services, are the client contacts.

## P.E. Becker Inc.

2185 Pacwest Center, Portland, Ore. 97208; (503) 223-1720

| | |
|---|---|
| Total assets managed | $325,000,000 |
| Tax-exempt assets managed | $207,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 55 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 4 |
| Size of research staff | 2 |

P.E. Becker Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses strong fundamental research to identify companies with low expectations, low p/e multiples and strong financials. Careful attention is given to the price paid for a stock. Its active fixed-income approach focuses on sector analysis, seeking the best values at a given time relative to risk.

It follows 150 stocks closely; 50% of research is generated internally.

Clients include University of Portland and Washington Water Power.

Patrick E. Becker, president, is chief investment officer and client contact.

## Becker Williams & Co.

250 S. Wacker Drive, Chicago, Ill. 60606; (312) 993-4120

| | |
|---|---|
| Total assets managed | $10,000,000 |
| Tax-exempt assets managed | $10,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 1 |
| Types of accounts managed | C |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Becker Williams & Co. provides fixed-income overwrite and hedge programs. It uses stock index futures/options to hedge equity portfolios using proprietary timing programs. The firm is a yield enhancement specialist, developing programs that increase yields on passive fixed-income portfolios by 200 to 400 basis points. It also has a sector analysis overwrite program.

H. Phillip Becker, president, is the chief investment officer; William Eichengreen Jr., executive vice president, is the client contact.

## Bell Capital Management

1945 The Exchange Suite 235, Atlanta, Ga. 30339; (404) 952-7039

| | |
|---|---|
| Total assets managed | $125,000,000 |
| Tax-exempt assets managed | $90,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 150 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 5 |

Bell Capital Management Inc. is an equity and fixed-income manager.

Its equity approach uses growth stock and market timing. Equity accounts own varying combinations of common stocks, straight and convertible bonds, and money market instruments.

Its fixed-income approach is driven by interest rate anticipation.

The firm follows 50 stocks closely and 80, generally; 50% of the research is generated internally.

Ron H. Bell, president, is chief investment officer and client contact.

## Bennett & Kahnweiler Realty Advisors

9700 W. Bryn Mawr, Rosemont, Ill. 60018; (312) 671-7911

| | |
|---|---|
| Total assets managed | $356,000,000 |
| Tax-exempt assets managed | $275,000,000 |
| Real estate assets managed | $275,000,000 |
| Minimum separate account | $25,000,000 |
| Tax-exempt clients | 2 |
| Types of accounts managed | G |

Bennett & Kahnweiler Realty Advisors, a real estate manager, creates entrepreneurial, value-oriented customized portfolios emphasizing Midwest properties.

The parent company is Bennett & Kahnweiler Inc.

Clients include Illinois Teachers and Ohio Teachers.

James S. Smith is chief investment officer and client contact.

## Berg Capital Corp.

600 Madison Ave., New York, N.Y. 10022; (212) 308-4705

| | |
|---|---|
| Total assets managed | $77,000,000 |
| Tax-exempt assets managed | $32,000,000 |
| Minimum separate account | $2,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | CF |
| No. of portfolio managers | 2 |

Berg Capital Corp. is an equity and balanced manager.

The firm invests in equities for growth and cash for protection of value. Bonds are purchased when opportunity warrants. Fundamental analysis is the basis of its approach.

The firm follows 100 stocks closely and 200, generally; 25% of research is generated internally.

Clients include Kidde, Interstate Brands and Giant Cement.

Jonathan A. Berg, president, is the chief investment officer; Deborah C. Foord, vice president, is the client contact.

## Sanford C. Bernstein & Co.

767 Fifth Ave., New York, N.Y. 10153; (212) 486-5800

| | |
|---|---|
| Total assets managed | $10,100,000,000 |
| Tax-exempt assets managed | $8,600,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 1,509 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 20 |
| Size of research staff | 40 |

Sanford C. Bernstein & Co. is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented, using Graham & Dodd analysis to seek extreme mispricings. Value is defined by the relationship of price to long-term earnings and dividends. Sector rotation is used.

Using sector analysis, the firm is a value-oriented, intermediate-term bond manager. Quantitative research evaluates relationships between and within sectors and along the yield curve, and also values the components of a bond (call, sector, quality, etc.). A disciplined buy/sell process is used.

Fixed-income futures are used.

The asset mix Jan. 1 was 72% stocks, 25% bonds and 3% cash.

The firm follows 544 stocks closely and 544, generally; 90% of research is generated internally.

Clients include New York State Teachers, Johnson & Johnson, Ralston Purina and Allegheny Power System.

Peter Carmen, chairman of the investment policy group, is chief investment officer; Richard S. Abramson, director-pension asset advisers, is the client contact.

## Bernstein-Macaulay Inc.

410 Park Ave., New York, N.Y. 10022; (212) 906-2900

| | |
|---|---|
| Total assets managed | $14,732,000,000 |
| Tax-exempt assets managed | $637,000,000 |
| Real estate assets managed | $25,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 8 |
| Size of research staff | 3 |

Bernstein-Macaulay Inc. is primarily a fixed-income manager.

In equities, the firm uses a systematic approach based on the premise the volatility of individual securities can be used to improve overall portfolio returns while increasing diversity and methodically reducing portfolio risk.

The firm specializes in fixed-income portfolios emphasizing active sector management, moderate maturity/duration adjustments and credit analysis on individual issues.

Options and fixed-income futures are used.

The asset mix Jan. 1 was 80% stocks, 6% bonds, 7% cash and 4% mortgage-backed securities.

The parent company is Shearson Lehman Hutton, a unit of American Express Co.

Robert G. Moore, president, is chief investment officer; Joseph Griffin, senior vice president, is client contact.

## Bessemer Trust Co.

630 Fifth Ave., New York, N.Y. 10111; (212) 708-9100

| | |
|---|---|
| Total assets managed | $5,279,000,000 |
| Tax-exempt assets managed | $636,000,000 |
| International assets managed | $367,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 75 |
| Types of accounts managed | CEFG |
| Size of research staff | 8 |

Bessemer Trust Co. is an equity, fixed-income, balanced, international and real estate/oil and gas direct investment manager.

Its equity approach focuses on market cycle and market theme analysis, taking greater risks in stock selection in rising markets and employing defensive strategies to preserve capital in bear markets. Its fixed-income approach uses interest rate anticipation and sector analysis. Portfolios are actively managed to preserve capital. Options and stock index futures are used.

Real estate and oil and gas investments are determined by client objectives and risk parameters.

The asset mix Jan. 1 was 51% stocks, 31% bonds, 14% cash and 4% other.

The parent is Bessemer Group Inc.

John R. Whitmore, chief executive officer, is chairman of the investment policy and strategy committee; Robert C. Elliott, senior executive vice president, is client contact.

## Beutel, Goodman Capital Management Ltd.

2030 Texas Commerce Tower, Houston, Texas 77002; (713) 221-1790

| | |
|---|---|
| Total assets managed | $781,000,000 |
| Tax-exempt assets managed | $761,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 17 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 4 |
| Size of research staff | 8 |

Beutel, Goodman Capital Management Ltd. is an equity and balanced manager.

Its equity approach uses sector rotation and Graham & Dodd analysis. The firm seeks companies selling at a discount to their book or asset value, or companies selling at a low relative p/e multiple, given their investment characteristics and forecasted earnings growth. Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 90% stocks and 10% cash.

The parent company is Beutel, Goodman & Co.

Clients include New York State Teachers and CPC International.

Robert F. McFarland, president, is chief investment officer; J. Philip Ferguson, vice president, is client contact.

## Beutel, Goodman International PLC

37-39 St. Andrew's Hill, London, EC4V 5BY U.K.; 011-44-1-489-0218

| | |
|---|---|
| Total assets managed | $347,000,000 |
| Tax-exempt assets managed | $242,000,000 |
| International assets managed | $242,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 1 |
| Types of accounts managed | C |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Beutel, Goodman International PLC is a global/international fixed-income manager.

Its investment approach uses interest rate anticipation and relative value analysis across countries to identify opportunities. The focus is on active country allocation in liquid markets. The firm principally uses the highest quality securities with the longest maturity available.

Olaf Rogge, principal, is the chief investment officer and client contact. The U.S. marketing representative is Fairfield Capital Associates Inc., Westport, Conn., (203) 254-1215.

## The Beyreuther Co.

1616 17th St. Suite 469, Denver, Colo. 80202; (303) 628-5554 or (312) 790-0333

| | |
|---|---|
| Total assets managed | $3,000,000 |
| Tax-exempt assets managed | $3,000,000 |
| Tax-exempt clients | 1 |
| Types of accounts managed | C |
| No. of portfolio managers | 1 |

The Beyreuther Co. is an equity manager that emphasizes growth stock and quantitative research combined with passive management. Its customized passive equity product, designed to beat the S&P 500, is based on a universe of fast-growing and fundamentally strong, domestically traded equities.

It follows 100 stocks closely and 1,700 generally; all research is generated internally.

Its client is Associates in Gynecological Surgery and Obstetrics.

Paul A.R. Beyreuther is chief investment officer and client contact.

## BHI Realty Advisors

4701 Von Karman Ave., Newport Beach, Calif. 92660; (714) 476-7060

| | |
|---|---|
| Total assets managed | $240,000,000 |
| Tax-exempt assets managed | $0 |
| Minimum separate account | $25,000,000 |
| No. of portfolio managers | 2 |

BHI Realty Advisors, primarily a real estate manager, takes a passive approach in other areas. Its real estate approach focuses on the purchase of new, institutional-quality properties.

The parent company is Bonutto-Hofer Investments.

Harold C. Hofer, president, is chief investment officer and client contact.

## Bigler/Crossroads

1 State St., Hartford, Conn. 06103; (203) 527-7666

| | |
|---|---|
| Total assets managed | $350,000,000 |
| Tax-exempt assets managed | $318,000,000 |
| Minimum separate account | $20,000,000 |
| Tax-exempt clients | 20 |
| Types of accounts managed | CG |

Bigler/Crossroads is a venture capital manager.

Harold E. Bigler Jr., is the chief investment officer and client contact.

## Birtcher Real Estate Cos.

27611 LaPaz Road, Laguna Niguel, Calif. 92677; (714) 831-8031

| | |
|---|---|
| Total assets managed | $1,000,000,000 |
| Tax-exempt assets managed | $500,000,000 |
| Real estate assets managed | $500,000,000 |
| Minimum separate account | $35,000,000 |
| Tax-exempt clients | 20 |
| Types of accounts managed | CJG |

Birtcher Real Estate Cos. offers real estate investment management.

Through Smith Barney Birtcher Realty Advisors, a joint venture with Smith Barney Inc., separate accounts and closed-end funds concentrate on

middle-market properties in suburban and secondary markets. The focus is on office, industrial, commercial and retail. All real estate services offered are 100% proprietary.

All assets were fully invested in equity real estate Jan. 1.

Albert Nagy, executive vice president, is chief investment officer; Ralph E. Heckert, senior vice president, is client contact at (800) 233-2353.

### George D. Bjurman & Associates

10100 Santa Monica Blvd. Suite 2300, Los Angeles, Calif. 90067; (213) 553-6577

| | |
|---|---|
| Total assets managed | $714,000,000 |
| Tax-exempt assets managed | $698,000,000 |
| 401(k)/457 assets managed | $5,000,000 |
| 401(k)/457 clients | 3 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 42 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 4 |

George D. Bjurman & Associates is an equity, fixed-income and balanced manager.

For equities, the firm employs a value-oriented investment approach with emphasis on high quality companies with strong earnings and dividend growth prospects.

Fixed-income assets are strategically invested using an active bond management approach, emphasizing shifts in maturity, sector, quality and coupon structure.

The asset mix Jan. 1 was 55% stocks, 38% bonds and 7% cash.

The investment committee is made up of George D. Bjurman, chairman; G. Andrew Bjurman, president and chief executive officer; O. Thomas Barry III, senior executive vice president and director of investments; and Stephen K. Kent Jr., senior executive vice president and director of research. Mr. Barry is client contact.

### William Blair & Co.

135 S. LaSalle St., Chicago, Ill. 60603; (312) 236-1600

| | |
|---|---|
| Total assets managed | $1,897,000,000 |
| Tax-exempt assets managed | $947,000,000 |
| 401(k)/457 assets managed | $19,000,000 |
| 401(k)/457 clients | 28 |
| Real estate assets managed | $9,000,000 |
| Minimum separate account | $1,500,000 |
| Tax-exempt clients | 130 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 14 |
| Size of research staff | 13 |

William Blair & Co. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes emerging growth and growth stocks. The firm identifies stocks where stable growth, conservative finances and established quality managements should lead to long-term capital appreciation.

Its fixed-income approach uses sector analysis to find high-quality, intermediate-maturity instruments to produce current income with little capital risk.

The asset mix Jan. 1 was 69% stocks, 20% bonds, 10% cash and 1% mortgage-backed securities.

Clients include Toys "R" Us, Kresge Foundation, Morton Thiokol and Purdue University.

Conrad Fischer is chief investment officer; Rocky Barber, partner and manager-investment management department, is client contact.

### BMI Capital Corp.

| Types of accounts managed | CEFJG |
| No. of portfolio managers | 26 |
| Size of research staff | 18 |

The Boston Co. Inc. is an equity, fixed-income, balanced, real estate and international manager.

Its active equity management approach uses quantitative value-oriented screening and emphasizes stocks undervalued in earnings and dividend growth, with appreciation potential. Its index funds track the S&P 500, Wilshire 5000 and MSCI indexes.

Its active fixed-income approach emphasizes interest rate anticipation, avoiding extreme strategies. Portfolios are positioned with the best relative value as to industry and quality sectors. Its passive approach uses debt securities to meet client needs, tracking the Shearson-Lehman Aggregate index or its components. Options and stock index futures are used.

In real estate, most assets are managed on a separate account basis by The Boston Co. Real Estate Council Inc., with the primary investment vehicle equity-oriented debt.

The asset mix Jan. 1 was 40.5% stocks, 23.9% bonds, 0.5% cash, 13.8% equity real estate and 21.3% short-term money market investments.

The parent company is Shearson Lehman Hutton, an American Express Co. unit.

James Von Germeten, president, is chief investment officer; John L. Carty, vice president and director of marketing and client relations management, is client contact.

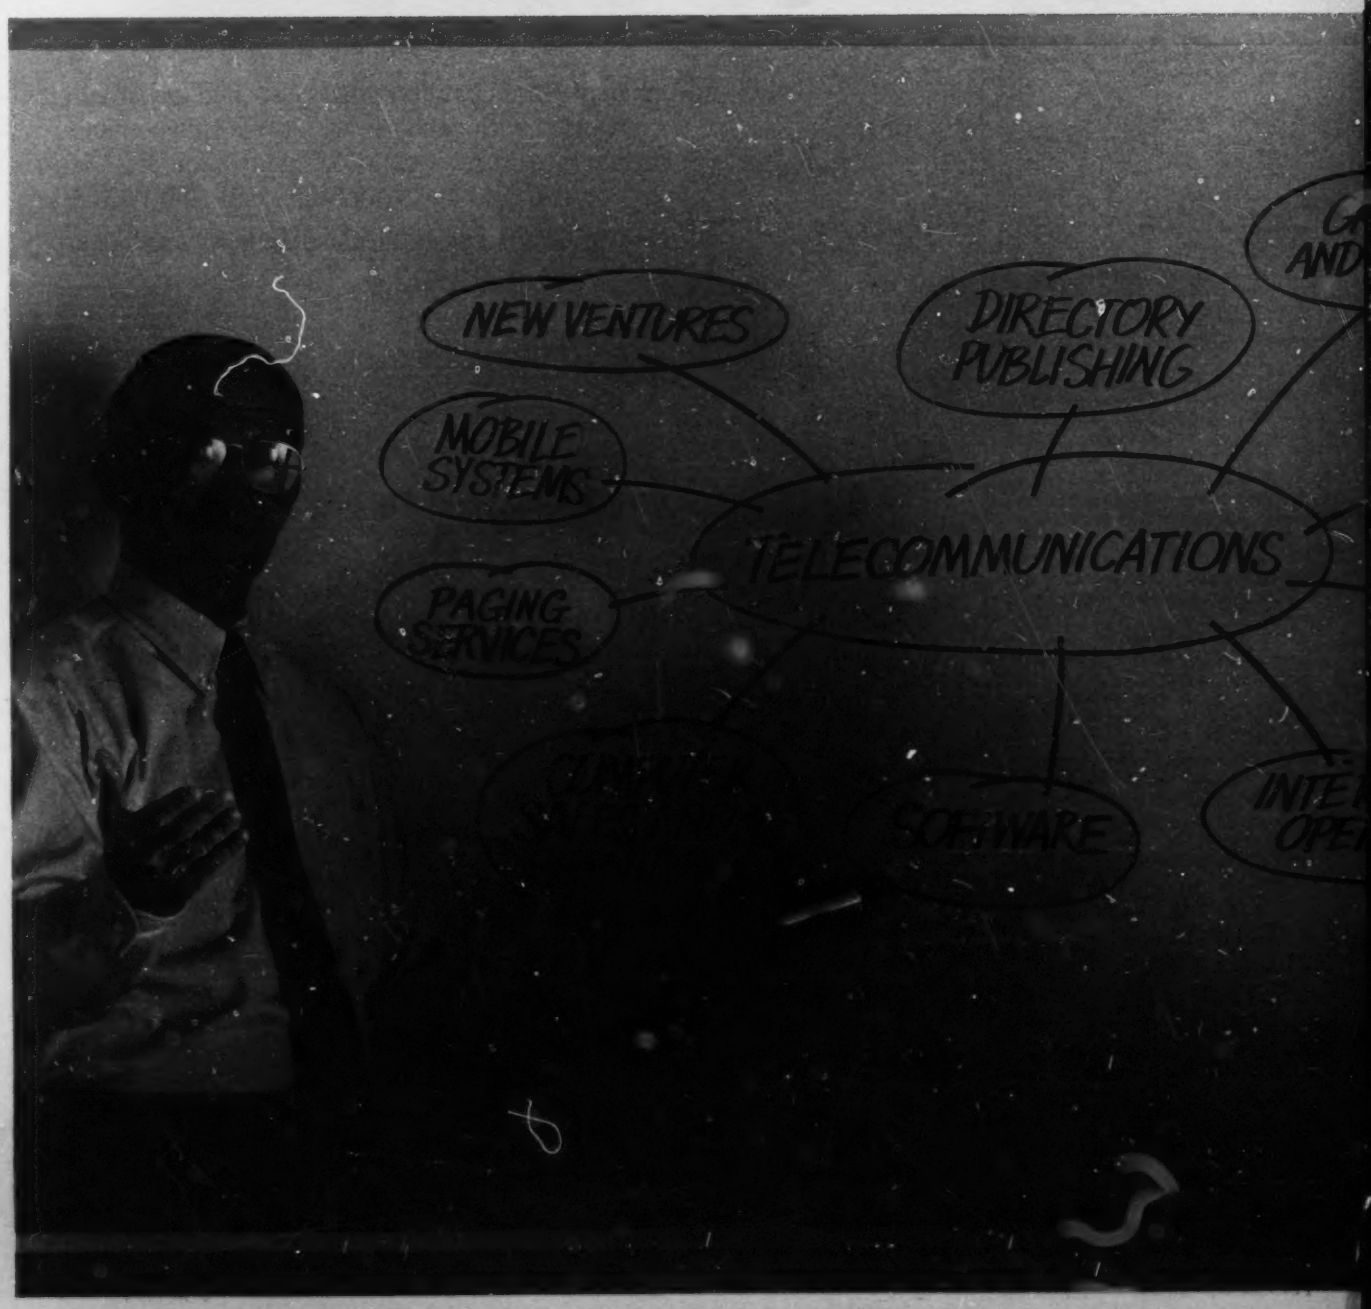
Boston International Advisors Inc., an international equity manager, uses quantitative value techniques to allocate among the EAFE markets and to

BellSouth



select stocks within those markets. The firm also manages custom index funds — EAFE, GDP and South Africa-free. Stock index futures are used.

Clients include Connecticut and Federated Department Stores.

Lyle H. Davis, managing director, is chief investment officer; Jennifer Dunning, managing director, is client contact.

### Boston Security Counsellors

60 State St., Boston, Mass. 02109; (617) 742-9858

| | |
|---|---|
| Total assets managed | $450,000,000 |
| Tax-exempt assets managed | $180,000,000 |
| Real estate assets managed | $9,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 40 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 5 |
| Size of research staff | 2 |

Boston Security Counsellors Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses both Graham & Dodd and quantitative techniques in selecting growth, emerging growth and low p/e stocks based on criteria measuring value, growth and financial strength. Using interest rate anticipation, the firm selects fixed-income securities with the objective of maintaining high yield and enhancing market value. Options and fixed-income futures are used.

The parent is Advest Group.

Edward B. White is chief investment officer; Lisa Castellano, director of managed account marketing, is client contact.

### Bounty Management Corp.

The Bedford Building, 99 Bedford St., Boston, Mass. 02111; (617) 357-8285

| | |
|---|---|
| Total assets managed | $110,000,000 |
| Tax-exempt assets managed | $72,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 78 |
| Types of accounts managed | CE |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Bounty Management Corp. is an equity and balanced manager.

Its equity strategy is quantitative, combining momentum and value investing based on a contrarian approach.

In fixed income, it swings in and out on the Treasury yield curve based on year-to-year interest rate forecasts for long-term investments only.

Clients include Crozer Theological Seminary and The Charlton School.

Raymond N. Bligh, president, is chief investment officer and client contact.

### Bowen, Hanes & Co. Inc.

100 Galleria Parkway, Suite 670, Atlanta, Ga. 30339; (404) 951-8891

| | |
|---|---|
| Total assets managed | $550,000,000 |
| Tax-exempt assets managed | $410,000,000 |
| Real estate assets managed | $5,000,000 |
| Minimum separate account | $1,000,000 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Bowen, Hanes & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses low p/e and growth stocks. The firm uses a conservative, quality-oriented, top-down approach.

Its fixed-income approach is based on interest rate anticipation.

In real estate, it seeks capital gains opportunities in undeveloped land.

The firm follows 50 stocks closely and 200, generally; 90% of research is generated internally.

Clients include Tampa Firefighters & Police Officers, University of the South Endowment Fund and Classic Leather.

Harold J. Bowen is chief investment officer; Jay Bowen is the client contact.

### Bowman Financial Management Co. Inc.

1013 N. Calvert St., Baltimore, Md. 21202; (301) 685-0234

| | |
|---|---|
| Total assets managed | $94,000,000 |
| Tax-exempt assets managed | $50,000,000 |
| Minimum separate account | $400,000 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Bowman Financial Management Co. Inc. is an equity, fixed-income, balanced and real estate manager.

Its equity approach uses Graham & Dodd analysis, focusing on growth, emerging growth and low p/e stocks.

The fixed-income approach uses interest rate anticipation and qualitative analysis.

Its real estate approach is trend management analysis.

The firm follows 200 stocks closely and 200 generally; 50% of the research is generated internally.

Donald E. Bowman, president, is the chief investment officer and client contact.

### G. Waring Boys Co. Inc.

P.O. Drawer 5255, Asheville, N.C. 28813; (704) 274-1542

| | |
|---|---|
| Total assets managed | $153,000,000 |
| Tax-exempt assets managed | $72,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 53 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

The G. Waring Boys Co. Inc. is an equity, fixed-income and balanced manager.

Emphasizing low p/e and growth stocks and market timing, its equity approach is value-oriented, fundamental and disciplined.

Its fixed-income approach is driven by interest rate anticipation, emphasizing high quality, liquidity and sector and maturity diversification.

G. Waring Boys, president, is chief investment officer; John B. Kuhns is client contact.

### Brandes Investment Management Inc.

12760 High Bluff Drive Suite 160, San Diego, Calif. 92130; (619) 755-0239

| | |
|---|---|
| Total assets managed | $100,000,000 |
| Tax-exempt assets managed | $38,000,000 |
| International assets managed | $13,000,000 |
| Minimum separate account | $400,000 |
| Tax-exempt clients | 180 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 4 |
| Size of research staff | 2 |

Brandes Investment Management Inc., an equity and international manager, takes an approach that is global and value-oriented, using Graham & Dodd analysis to identify undervalued securities.

The firm follows 50 stocks closely and 100 generally; all research is generated internally.

Charles H. Brandes, president, is chief investment officer; W. Roberts Wood is client contact.

### Brandywine Asset Management

The Pennsylvania Building Suite 400, 110 S. French St., Wilmington, Del. 19801; (302) 654-6162

| | |
|---|---|
| Total assets managed | $340,000,000 |
| Tax-exempt assets managed | $318,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 13 |
| Types of accounts managed | CEJG |
| No. of portfolio managers | 5 |

Brandywine Asset Management, an equity manager, invests exclusively in the lowest 20% of the p/e spectrum, producing consistent returns in excess of the market with controlled volatility.

The firm follows 160 stocks closely; 70% of research is generated internally.

Clients include Westinghouse, University of Richmond, Pittsburgh Symphony Society and Eastern Airlines.

W. Anthony Hitschler is chief investment officer; Frank G. Frey and M. Andrew Sheffler are the client contacts.

### Stacey Braun Associates

377 Broadway Eighth Floor, New York, N.Y. 10013; (212) 226-7707

| | |
|---|---|

| Tax-exempt assets managed | $1,110,000,000 |
| Real estate assets managed | $222,000,000 |
| International assets managed | $5,000,000 |

# 1S growing by design.

BellSouth's telephone operating companies, Southern Bell and South Central Bell, continue their remarkable growth, offering new products and services to an expanding customer base of over 14 million homes and businesses.

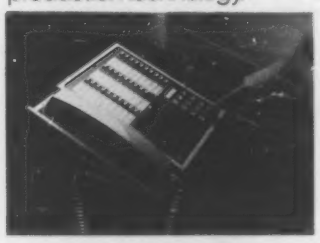
At the same time, BellSouth is committed to growth through developing new businesses that are a natural outgrowth of BellSouth's telecommunications expertise.

On January 1, 1986, BellSouth Enterprises was formed. Its purpose: To direct all BellSouth subsidiaries in businesses other than regulated services provided by Southern Bell and South Central Bell.

Today BellSouth Enterprises consists of three groups comprising a rapidly growing number of companies and joint ventures operating throughout the U.S. and around the world.

**An Industry Leader In Directory Advertising And Publishing**

The companies of the BellSouth Advertising and Publishing Group include the leading publisher of traditional and specialized directories. In addition, these vertically integrated companies also offer expertise in advertising sales, computer-based pre-press production and photocomposition, graphics, printing and binding, and are on the leading edge of four-color print production technology.



**Helping Companies To Manage Information**

The BellSouth Communications Systems Group markets the products and services that keep BellSouth in the forefront of the telecommunications industry. Throughout the U.S. and Europe, the Group offers a range of products from office automation equipment to computer leasing and maintenance.

**Focusing On The Booming Cellular Market**

The companies of the BellSouth Mobile Systems/International Group focus primarily on the rapidly growing mobile telephone market. Already in many major American cities, BellSouth companies and joint ventures are quickly penetrating cellular phone markets in England, Western Europe and Australia.

In the years to come, BellSouth Enterprises will continue to play an important role in BellSouth's commitment to maintain high service standards, to emphasize telecommunications and to pursue orderly corporate growth. With such a strategy, it's no wonder the future looks so exciting for BellSouth.

| | |
|---|---|
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 125 |
| Types of accounts managed | CJ |
| No. of portfolio managers | 5 |

Stacey Braun Associates Inc., is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd-based analysis. The major criteria in selection are reasonably consistent earnings growth, low p/e, multiples and dependable dividends for above-average yields.

Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 25% stocks, 39% bonds, 16% cash and 20% mortgage-backed securities. As of the same date, the firm had $6 million in foreign bonds.

The firm follows 108 stocks closely and 193, generally.

Clients include Laborers National Pension Fund, UPS Union, and American Guild of Musical Artists.

Martin H. Wexler, president, is the chief investment officer and client contact.

## Breau Capital Management

800 South St., Waltham, Mass. 02154; (617) 893-0600

| | |
|---|---|
| Total assets managed | $141,000,000 |
| Tax-exempt assets managed | $141,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 9 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Breau Capital Management Inc., an equity manager, holds value-oriented portfolios emphasizing low p/e and price-to-book multiples, overlooked companies and undervalued assets.

The firm follows 100 stocks closely and 400, generally; 70% of research is generated internally.

Clients include Aerospace, Ideal Basic and Martin Marietta.

Edward P. Breau, president, is chief investment officer and client contact.

## Daniel Breen & Co.

700 Louisiana, 3400 RepublicBank Center, Houston, Texas 77002; (713) 223-2110

| | |
|---|---|
| Total assets managed | $1,004,000,000 |
| Tax-exempt assets managed | $896,000,000 |
| Tax-exempt clients | 40 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 4 |

Daniel Breen & Co. is an equity, fixed-income and balanced manager.

Its equity approach uses a two-pronged, top-down approach by: identifying the stock market environment as p/e or earnings expectations driven; and analyzing valuation discrepancies based on market capitalization. This is combined with bottom-up selection of issues. Valuation work is based on historical, relative and absolute measures. Options are used.

Its fixed-income approach is based on interest rate anticipation using economic judgment, correlation models and other tools to determine appropriate duration and maturity. The firm invests primarily in Treasury securities.

The asset mix Jan. 1 was 49% stocks, 37% bonds and 14% cash.

Daniel A. Breen, president, and Harry M. Flavin, senior vice president, are chief investment officers; Edward S. McCullough is senior vice president and client contact.

## Bridge Capital Advisors Inc.

Glenpointe Centre West, Teaneck, N.J. 07666; (201) 836-3900

| | |
|---|---|
| Total assets managed | $150,000,000 |
| Tax-exempt assets managed | $105,000,000 |
| Minimum separate account | $3,000,000 |
| Tax-exempt clients | 17 |
| Types of accounts managed | CFJG |
| No. of portfolio managers | 5 |

Bridge Capital Advisors Inc. is a manager of expansion capital for expanding companies. It uses debt instruments with current return and equity features. Goals include a current return of approximately 10% and a total return between 25% and 30%. Virtually all investments are done privately.

William Spencer is the chairman of the investment committee; Hoyt Goodrich is client contact.

## Bridgewater Associates

372 Danbury Road, Wilton, Conn. 06897; (203) 762-8511

| | |
|---|---|
| Total assets managed | $700,000,000 |
| Tax-exempt assets managed | $40,000,000 |
| International assets managed | $10,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 4 |
| Types of accounts managed | CF |
| No. of portfolio managers | 3 |
| Size of research staff | 3 |

Bridgewater Associates is a fixed-income and global asset manager.

Its investment approach evaluates the relative merits of major markets using fundamental and technical systems that monitor economic conditions and identify changes. The firm will go short at customer request. Options, stock index futures and fixed-income futures are used.

The parent is Bridgewater Group.

Clients include The World Bank and Singer.

Ray Dalio, president, is the chief investment officer; Giselle Wagner, vice president, is the client contact.

## Brignoli, Curley & Roberts Associates

15 W. 39th St. Suite 300, New York, N.Y. 10018; (212) 869-4233

| | |
|---|---|
| Total assets managed | $826,000,000 |
| Tax-exempt assets managed | $826,000,000 |
| Minimum separate account | $3,000,000 |
| Tax-exempt clients | 16 |
| Types of accounts managed | C |
| Size of research staff | 4 |

Brignoli, Curley & Roberts Associates, a quantitative equity manager, uses a low-risk, fully invested program designed to provide incremental return by capturing a portion of the volatility of individual securities in a portfolio with a sophisticated diversification technique and a disciplined trading strategy.

The asset mix Jan. 1 was 99% stocks and 1% cash.

All research is generated internally.

The parent is Brignoli, Curley Inc.

Clients include Eastman Kodak, Johnson & Johnson, Westinghouse and Yale.

Robert L. Hunt is chief investment officer; Bruce Kerr, vice president-marketing, is client contact.

## John W. Bristol & Co. Inc.

233 Broadway, New York, N.Y. 10279; (212) 267-9000

| | |
|---|---|
| Total assets managed | $1,900,000,000 |
| Tax-exempt assets managed | $1,700,000,000 |
| 401(k)/457 assets managed | $13,000,000 |
| 401(k)/457 clients | 1 |
| Minimum separate account | $25,000,000 |
| Tax-exempt clients | 30 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 5 |

John W. Bristol & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach relies on growth stocks, while its fixed-income approach focuses on interest rate anticipation.

The asset mix Jan. 1 was 80% stocks, 15% bonds and 5% cash.

The firm follows 60 stocks closely and 200 generally; all research is generated internally.

Clients include Princeton University, Swarthmore College, Colorado College and Clark Art Institute.

Charles H. Mott, president, is chief investment officer and client contact.

## Robert C. Brown & Co. Inc.

655 Montgomery St., Suite 810, San Francisco, Calif. 94111; (415) 981-4050

| | |
|---|---|
| Total assets managed | $1,277,000,000 |
| Tax-exempt assets managed | $1,179,000,000 |
| 401(k)/457 assets managed | $46,000,000 |
| 401(k)/457 clients | 2 |
| Dedicated funds managed | $308,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 19 |
| Types of accounts managed | CFJ |
| No. of portfolio managers | 5 |
| Size of research staff | 1 |

Robert C. Brown & Co. Inc. is a fixed-income and cash manager that also offers economic and financial market consulting.

Its fixed-income approach is driven by interest rate anticipation. Its objectives are to conserve principal and maximize total rate of return; volatility of security markets provide opportunities for incremental portfolio performance through disciplined, active management. Fixed income futures are used.

The asset mix Jan. 1 was 90% bonds and 10% cash.

Clients include Boeing, Occidental Petroleum, Idaho Power and Hercules.

Eugene Y. Chow is chief investment officer; Donald C. De Lutis is client contact.

## Brown Brothers Harriman

59 Wall St., New York, N.Y. 10005; (212) 493-8331

| | |
|---|---|
| Total assets managed | $11,687,000,000 |
| Tax-exempt assets managed | $8,406,000,000 |
| International assets managed | $549,000,000 |
| Dedicated funds managed | $50,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 454 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 70 |
| Size of research staff | 25 |

Brown Brothers Harriman & Co. is an equity, fixed-income, balanced and international manager.

Based on sector rotation and Graham & Dodd analysis, its equity approach uses stock selection, diversification and market timing for equity accounts and equity components of balanced accounts.

Its fixed-income approach is based on duration. This approach incorporates the three variables that control the price volatility of a bond: maturity, coupon and yield to maturity. It also provides linear proportionality among the duration of various bonds.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 26% stocks, 63% bonds and 11% cash; $523 million was in foreign stocks and $26 million in foreign bonds.

The firm follows 280 stocks closely and 500, generally; 80% of the research is generated internally.

Elbridge T. Gerry Jr., is chief investment officer; Paul A. Legvold is the client contact.

## Alex. Brown Investment Management

135 E. Baltimore St., Baltimore, Md. 21203; (301) 727-1700

| | |
|---|---|
| Total assets managed | $900,000,000 |
| Tax-exempt assets managed | $800,000,000 |
| Minimum separate account | $3,000,000 |
| Tax-exempt clients | 66 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 4 |
| Size of research staff | 2 |

Alex. Brown Investment Management is an equity and balanced manager.

Its equity approach is based on flexible stock selection with a focus on overlooked or out-of-favor stocks where favorable changes are creating significant appreciation potential.

Its fixed-income approach also is flexible. It uses government and corporate bonds, emphasizing quality issues with intermediate maturities.

The asset mix Jan. 1 was 65% stocks, 15% bonds and 20% cash.

The firm follows 100 stocks closely and 200, generally; 50% of the research is generated internally.

The parent company is Alex. Brown and Sons Inc.

Clients include Alton Jones Foundation, Baltimore County, Johns Hopkins Hospital and Monumental Corp.

J. Dorsey Brown III is chief investment officer and client contact.

## Alex. Brown Realty Advisors

225 E. Redwood St., Baltimore, Md. 21202; (301) 727-3884

| | |
|---|---|
| Total assets managed | $1,396,000,000 |
| Tax-exempt assets managed | $994,000,000 |
| Real estate assets managed | $994,000,000 |
| Minimum separate account | $50,000,000 |
| Tax-exempt clients | 2 |
| Types of accounts managed | G |
| No. of portfolio managers | 4 |
| Size of research staff | 3 |

Alex. Brown Realty Advisors Inc., a real estate manager, represents clients in direct real estate investments.

The asset mix Jan. 1 was 97% equity real estate and 3% mortgages.

The firm follows 40 real estate securities closely and 130, generally; 75% of research is generated internally.

The parent company is Alex. Brown & Sons Inc.

John W. Guinee is chief investment officer; Mahlon Apgar IV, managing director-realty services, is client contact.

## Brundage, Story and Rose

1 Broadway, New York, N.Y. 10004; (212) 269-3050

| | |
|---|---|
| Total assets managed | $2,896,000,000 |
| Tax-exempt assets managed | $1,407,000,000 |
| International assets managed | $33,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 117 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 19 |

Brundage, Story and Rose is an equity and balanced manager.

Its equity approach combines Graham & Dodd analysis with growth stock and value strategies. It uses a top-down, long-term fundamental method emphasizing capital preservation.

Its fixed-income approach is based on interest rate anticipation. Managers purchase high-quality securities — primarily U.S. government — in the one- to five-year maturity range to provide stability and additional income.

The asset mix Jan. 1 was 75% stocks, 14% bonds and 11% cash. As of the same date, $33.4 million was in foreign stocks.

The firm follows 250 stocks closely and 350, generally; 75% of research is generated internally.

Clients include Ohio Operating Engineers, Perkin Elmer, Westvaco and Vermont State.

Malcolm D. Clarke and Charles G. Watson are the chief investment officers; Donald F. Daly is the client contact.

## Burgess Capital Corp.

499 Seaport Court Suite 201, Redwood City, Calif. 94063; (415) 369-4545

| | |
|---|---|
| Total assets managed | $100,000,000 |
| Tax-exempt assets managed | $42,000,000 |
| International assets managed | $10,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 20 |
| Types of accounts managed | CFJ |
| No. of portfolio managers | 3 |

Burgess Capital Corp. is an equity, fixed-income, balanced and international manager.

Its equity approach uses growth, emerging growth and low p/e stocks,

BEAR STEARNS

# Our 4 Year Old Has Been Around For 65 Years.

In 1984, Bear Stearns formed Custodial Trust Company.

Before we opened the doors, we already had 61 years experience. Bear Stearns experience. And all the talent and systems that go with being one of the nation's leading securities processors.

This unique combination enables Custodial Trust Company, a New Jersey State bank, to provide exceptional, yet inexpensive, custody and master trust services for institutional investors.

Securities lending, options and futures reporting, and the handling of mortgage backed securities are among the services in which we excel. Global custody, on-line reporting, performance measurement and a variety of vehicles for sweeping uninvested funds are all provided.

If you're interested in joining the pension funds, endowments, foundations, insurance companies, mutual funds and other institutions who've already discovered the trust company that's wise beyond its years, call Michael Minikes, Treasurer, The Bear Stearns Companies Inc. at (212) 272-2089 or Sandra J. Kinet, Director, Custodial Trust Company at (212) 272-2087.

**Custodial Trust Company** FDIC Insured

28 West State Street, Trenton, New Jersey 08680, (609) 599-5950.

Capital Advisors Inc. specializes in short-term cash management for institutional portfolios. It emphasizes highly liquid (two- to 10-day) high-quality portfolio structures.

All assets were in cash Jan. 1.

Clients include Central and South West Corp., Anderson-Clayton, Houston Industries and Blue Cross Indiana.

George A. Ominski is chief investment officer; Frank L. Iaquinta Jr., managing director, is client contact.

## Capital Advisors Inc.

320 S. Boston Suite 220, Tulsa, Okla. 74103; (918) 599-0045

| | |
|---|---|
| Total assets managed | $420,000,000 |
| Tax-exempt assets managed | $350,000,000 |
| International assets managed | $3,000,000 |
| Index funds managed | $52,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 60 |
| Types of accounts managed | CF |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Capital Advisors Inc. is an equity, fixed-income and balanced manager.

Its equity approach is top-down, combining growth stock, sector rotation and market-timing strategies. Managers seek to detect trends that provide investment opportunities or create added risks.

Its fixed-income approach uses interest rate anticipation for investing in U.S. government, agency and high-quality corporate obligations. Maturities are staggered between one and 10 years.

The firm follows 75 stocks closely and 500, generally; 20% of research is generated internally.

Clients include Oklahoma Teachers, Hinderliter Industries and United Catalysts.

Richard E. Minshall is chief investment officer; Lawrence Field is client contact.

## Capital Consultants Inc.

2300 S.W. First Ave., Portland, Ore. 97201; (503) 241-1200

| | |
|---|---|
| Total assets managed | $503,000,000 |
| Tax-exempt assets managed | $385,000,000 |
| Real estate assets managed | $163,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 82 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 4 |
| Size of research staff | 3 |

Capital Consultants Inc. is an equity, fixed-income, balanced and real estate manager.

Its equity approach is bottom-up (stocks picked through fundamental analysis and ROI; diversified by type, sector and number) and disciplined (multifactor pricing of ROI, fair market value and relative price-to-book ratio). Options are used.

In fixed income, it uses a disciplined approach based on interest rate forecasts and a duration approach, incorporating modest shifts in rate sensitivity and low volatility.

Real estate investments are centered in the West. Minimum equity acquisition is $1 million, specializing in office buildings, shopping centers and industrial properties. Loans vary from $250,000 to $5 million, providing a 10-year payoff.

Gregory J. Houser is executive vice president and chief investment officer; Richard A. Becher, vice president-marketing/client services, is client contact.

## Capital Guardian Trust Co.

| Tax-exempt clients | 2 |
| Types of accounts managed | CG |
| No. of portfolio managers | 16 |

Capital Management International of Deutsche Bank is an equity, fixed-income, balanced and global manager.

Its equity approach is top-down, emphasizing country and currency allocation based on economic and political fundamentals, industrial-sector outlook and analysis. Stock selection is based on value preservation.

In fixed-income, the firm takes a concentrated approach that gives equal weight to currency and interest rate considerations for achieving superior results over U.S. dollar-denominated bond portfolios.

The parent is Deutsche Bank AG.

Rudolf Heinz, executive vice president, is the chief investment officer; Michael Tintelnot, vice president and general manager-client relations, is the client contact.

## Capital Research & Management Co.

333 S. Hope St., Los Angeles, Calif. 90071; (213) 486-9200

| | |
|---|---|
| Total assets managed | $18,312,000,000 |
| Tax-exempt assets managed | $3,031,000,000 |
| 401(k)/457 assets managed | $125,000,000 |
| Minimum separate account | $20,000,000 |
| Tax-exempt clients | 1,355 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 15 |
| Size of research staff | 62 |

Capital Research & Management Co. manages U.S. and non-U.S. equity, fixed-income and balanced portfolios, primarily for the American Funds Group of mutual funds.

Its equity approach is fundamental and value oriented, based on thorough, detailed research and analysis.

Its fixed-income approach is based on interest rate anticipation and matu-

rity, sector and credit analysis.

The asset mix Jan. 1 was 69% stocks, 13.7% bonds and 17.3% cash.

The firm follows 600 stocks closely and 1,200 generally.

The firm generates 90% of its research internally.

The parent company is Capital Group Inc.

Clients include American Cyanamid, Chevron, Brunswick, Campbell Soup.

Jon B. Lovelace, chairman, is chief investment officer; Benjamin H. Shattuck, vice president, is client contact.

### Capital Strategy Group Ltd.

600 Erie Place, Suite 206, Syracuse, N.Y. 13204; (315) 471-1547

| | |
|---|---|
| Total assets managed | $30,000,000 |
| Tax-exempt assets managed | $24,000,000 |
| International assets managed | $100,000 |
| Minimum separate account | $100,000 |
| Tax-exempt clients | 124 |
| Types of accounts managed | CJ |
| No. of portfolio managers | 1 |
| Size of research staff | 1 |

Capital Strategy Group Ltd. is an equity, fixed-income, balanced and international manager.

Its equity approach is value-oriented, using a mix of growth stock, passive indexing and p/e analysis. Options are used.

Its fixed-income approach uses interest rate anticipation, sector analysis and credit analysis/special situations. Managers buy bonds to gain market value when rates drop. They look for yield pickup in undervalued credit plays.

James B. Sleeper is chief investment officer and client contact.

### Capital Supervisors Inc.

20 N. Clark, Suite 700, Chicago, Ill. 60602; (312) 236-8271

| | |
|---|---|
| Total assets managed | $5,901,000,000 |
| Tax-exempt assets managed | $5,852,000,000 |
| Minimum separate account | $2,000,000 |
| Tax-exempt clients | 65 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 8 |
| Size of research staff | 1 |

Capital Management Supervisors, acquired in February by the Prudential Asset Management Group, is an equity, fixed-income and balanced manager.

Its equity approach is based on sector rotation. Managers first identify the major trend of the market, then the sectors that will benefit from economic trends and, finally, attractive securities within the favored sectors.

Its fixed-income approach combines interest rate anticipation and sector analysis. Portfolios are managed actively to achieve total returns in excess of the returns from a buy-and-hold strategy.

The asset mix Jan. 1 was 48% stocks, 38% bonds and 14% cash.

The firm follows 75 stocks closely and 125 to 150 generally; 50% of research is generated internally.

Clients include Chicago Public School Teachers, Kentucky Retirement Systems, Mercy Hospital Employee and Wesleyan College Endowment.

A. Lee Thurow, chairman, is the chief investment officer; James C. Seyfarth, senior vice president, is the client contact.

### Capital Technology Inc.

P.O. Box 2428, Charlotte, N.C. 28211-8240; (704) 541-1437

| | |
|---|---|
| Total assets managed | $83,000,000 |
| Tax-exempt assets managed | $74,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 11 |
| Types of accounts managed | CF |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Capital Technology Inc. is an equity and balanced manager specializing in small-capitalization stocks.

It invests in small, fast-growing companies that are selling at a low p/e relative to their industry and to the overall market.

Clients include USG Corp., South Carolina Electric & Gas and City of Flint, Mich.

Robb Rowe, president, is the chief investment officer; Robert Mathai is the client contact.

### Capitol Bank & Trust Co.

1 Bulfinch Place, Boston, Mass. 02114; (617) 723-5300

| | |
|---|---|
| Total assets managed | $105,000,000 |
| Tax-exempt assets managed: | |
| Total | $102,000,000 |
| Separate | $102,000,000 |
| International assets managed | $22,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 7 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 1 |
| Size of research staff | 2 |

Capitol Bank & Trust Co. is an equity, fixed-income and balanced manager.

Its equity approach is based on market timing and tactical asset allocation decisions primarily using low p/e cyclical stocks.

Its fixed-income approach uses interest rate anticipation and sector analysis, focusing on maturity and sector swaps in anticipation of secular change. Minor portfolio adjustments are made in anticipation of cyclical developments or market inefficiencies.

The parent is Capitol Bancorporation.

G. Peter Grote, vice president and senior trust officer, is the chief investment officer and client contact.

### Capitoline Investment Services Inc.

| Tax-exempt clients | 74 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 5 |
| Size of research staff | 2 |

Chelsea Management Co. is an equity, fixed-income, balanced and cash manager.

Its equity approach is quantitative, emphasizing growth and undervalued stocks, market timing and sector rotation.

Its fixed-income approach uses interest rate anticipation.

Options, stock index futures and fixed-income futures are used.

As of Jan. 1, the firm had $1 million invested in foreign stocks and $250,000 in mortgage-backed securities.

Clients include Motion Picture Industry and International Photographers.

Frederick J. Ruopp is the chief investment officer; Dale K. Longacre, assistant director of marketing, is the client contact.

## Chemical International Asset Management

180 Strand, London, WC2R 1EX, U.K.; 01-379-7474

See entry for THE CHEMICAL INVESTMENT GROUP.

## The Chemical Investment Group

30 Rockefeller Plaza, 59th Floor, New York, N.Y. 10112; (212) 621-2017

| | |
|---|---|
| Total assets managed | $15,000,000,000 |
| Tax-exempt assets managed | $8,400,000,000 |
| No. of portfolio managers | 37 |
| Size of research staff | 17 |

The Chemical Investment Group, through its subsidiaries, is an equity, fixed-income, balanced, international/global and money market manager.

The parent company is Chemical New York Corp.

Kenneth S. Rolland, managing director, is chief investment officer; Edward E. Madden, managing director, is client contact.

These subsidiaries' assets and staff sizes are included in the data above:

- Chemical International Asset Management manages $119 million in tax-exempt assets.

It uses top-down analysis and a market valuation model for asset allocation/timing. Relative price and p/e screens are used for stock selection. In fixed income, top-down analysis is used to determine optimal currency interest rate trend and yield curve positioning. Options and financial futures are used.

Its asset mix Jan. 1 was 71% foreign stocks and 29% foreign cash.

Alan Pendleton is chief investment officer; Anthony F. Healy, director, is client contact.

- Chemical Trust and Banking Co. Ltd.-Japan manages $14 million in tax-exempt assets.

Its equity approach is to identify and weight attractive market sectors and stocks expected to benefit from trends in the Japanese economy.

The asset mix Jan. 1 was 59% foreign stocks, 1.7% foreign bonds and 39.3% cash.

Yasushi Matsumoto is chief investment officer; Yoshio Tokuyama, head of marketing, is client contact.

- Favia, Hill & Associates Inc. manages $5.397 billion in tax-exempt assets.

It offers two equity products: emerging growth and value. The firm first identifies secular change, which pinpoints major investment themes. Fundamental research then is used for security selection.

Its active fixed-income approach uses arbitrage, swaps and other value-added techniques to enhance returns. Sector analysis is used; portfolios are diversified and high quality.

The asset mix Jan. 1 was 36% stocks, 40% bonds and 24% cash; $119 million was in foreign stocks, $100 million in bond index funds and $215 million in dedicated/immunized portfolios.

Kenneth S. Rolland, managing director, is chief investment officer; Kevin Myers, vice president-sales and marketing, is client contact.

- Quantum Investment Management Inc. manages $17 million in tax-exempt assets.

In equities, it provides active, quantitative, systematic and computerized global management. Options and financial futures are used.

The asset mix Jan. 1 was 60% stocks and 40% cash; $10 million was in foreign stocks.

Gerald H. Scriver, president, is chief investment officer; John R. Serhant, executive vice president, is client contact.

- Texas Commerce Investment Management Co. manages $2.277 billion in tax-exempt assets.

In equities, it offers three styles: equity growth, equity income and emerging growth, with equity growth being the primary style.

Its fixed-income approach is risk-averse, with emphasis on maturity management. Sector analysis is used to add value. A highly disciplined six-step process is followed in formulating and implementing the strategy.

The asset mix Jan. 1 was 38% stocks, 34% bonds, 22% cash and 6% mortgage-backed securities.

Geoffrey P. Raymond, president, is chief investment officer; John Cooke, managing director-marketing/client services, is client contact.

- Treasury Asset Management manages $546 million in tax-exempt assets.

Its investment approach is to maximize return by actively trading a high-quality list of fixed-income invest-

ments. It takes a position on the yield curve to take advantage of changes in interest rates and anomalies in the yield curve.

The asset mix Jan. 1 was 100% money market securities.

William B. Budd is chief investment officer; Matthew Cody, vice president, is client contact.

## Chemical Trust and Banking Co. Ltd.-Japan

3-1 Marunouchi 2-Chome, Chiyoda-Ku, Tokyo 100 Japan; 03-214-9590

| Tax-exempt clients | 672 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 13 |
| Size of research staff | 18 |

CIGNA Asset Advisers Inc. is an equity, fixed-income, real estate, international and GIC manager.

Its research-based equity approach uses fundamental analysis to identify stocks with superior return potential. Analysis focuses on determination and valuation of a company's underlying growth in earnings.

Its fixed-income approach is cyclical anticipation of major interest rate movements over full economic cycles.

Options and stock index futures are used.

In real estate, emphasis is on diversified and specialized investments, managed by disciplined strategies. Value is added through aggressive, incentive-based asset management.

The separate account asset mix Jan. 1 was 31% stocks, 32% bonds, 14% cash and 23% equity real estate; $126 million was in foreign stocks and $22 million in equity index funds.

The parent is CIGNA Corp.

George R. Trumbull, is chief operating officer; Richard R. Anderson, senior vice president, is client contact.

## CIMG Inc.

P.O. Box 17500, Milwaukee, Wis. 53217; (414) 241-4575

| | |
|---|---|
| Total assets managed | $131,000,000 |
| Tax-exempt assets managed | $79,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 116 |
| Types of accounts managed | C |
| No. of portfolio managers | 3 |

CIMG Inc. is a balanced manager.

Its equity approach uses sector rotation and market timing/tactical asset allocation. Equities are concentrated in market sectors benefiting from the current business cycle.

Its fixed-income approach uses interest rate anticipation in government securities. Average maturities range from two to 25 years.

Louis T. Chambers, president, is chief investment officer and client contact.

Citicorp Investment Management Inc. is an equity, fixed-income, balanced, real estate, international, GIC, venture capital, index, immunization, special equity and fixed-income, futures and cash manager. It also offers tactical asset allocation.

Its equity approach is growth-oriented based on positive earnings revisions. Equal emphasis is placed on fundamental research, quantitative disciplines and valuation models in determining weightings.

In fixed income, it shifts portfolio sector, quality, coupon, issuer, duration and currency profiles in response to early identification of changes in the social, political and economic climate.

Options, stock index futures and fixed-income futures are used.

Its real estate approach emphasizes prime, income-producing properties in major cities with investments structured as direct-equity ownerships and convertible participating mortgages.

The asset mix Jan. 1 was 37% stocks, 18% bonds, 41% cash and 4% real estate. As of the same date, the firm had $306 million in equity real estate, $85 million in mortgages, $54 million in mortgage-backed securities, $298 million in foreign stocks, $25 million in foreign bonds, $24 million in foreign cash and $335 million in equity indexed funds.

The parent company is Citicorp.

Robert G. Wade Jr. is chief investment officer; Joan McIlroy, vice president, is client contact.

| Types of accounts managed | CEF |
| No. of portfolio managers | 3 |

Cohen & Steers Capital Management Inc. is a real estate equity securities manager, buying real estate securities for a premium yield and assets at a discount.

Martin Cohen is the chief investment officer and client contact.

## Coldwell Banker Capital Management Services

533 Fremont Ave., Los Angeles, Calif. 90071; (213) 613-3491

| | |
|---|---|
| Total assets managed | $817,000,000 |
| Tax-exempt assets managed | $817,000,000 |
| Real estate assets managed | $779,000,000 |
| Minimum separate account | $15,000,000 |
| Tax-exempt clients | 41 |
| Types of accounts managed | CEFG |

Coldwell Banker Capital Management Services, a real estate manager, maximizes asset values through aggressive management and timely dis-

position. Target properties are $5 million to $25 million office, industrial and retail sites.

The asset mix Jan. 1 was 90% equity real estate, 5.3% mortgages and 4.7% cash. As of the same date, the firm had $736 million in equity real estate and $43 million in mortgages.

The parent company is Sears, Roebuck & Co.

Clients include AT&T, Honeywell and Hughes Aircraft.

Tad W. Jones, president, is chief investment officer; Robert W. Morris, first vice president, is client contact.

## Collins Associates

840 Newport Center Drive, Suite 660, Newport Beach, Calif. 92660; (714) 644-5771

Collins Associates, a manager of managers, has $33 billion in total assets under management on its behalf by external managers.

It controls about $9 billion in 13 advisory accounts and $150 million in seven discretionary accounts for corporate, educational endowment and foundation clients.

The accounts cover equity, fixed-income, balanced, international, real estate and GIC management. Options, stock index futures and fixed-income futures are used.

All the assets are covered by portfolio insurance.

There are three internal portfolio managers and a four-member research staff. The firm follows 250 investment managers closely and 400 investment managers generally. All research on managers is conducted internally.

The parent company is Budge Collins Inc.

Clients include Xerox, Atlantic Richfield, Sunkist Growers and the University of Texas.

Budge Collins, president, is chief investment officer and client contact.

## Colorado Capital Advisors

P.O. Box 5168, Denver, Colo. 80217; (303) 892-4203

| | |
|---|---|

Confederation Life Insurance Co. is an equity, fixed-income, balanced, international, GIC and annuity manager.

Its equity approach is based on Graham & Dodd analysis. Options are used. Its fixed-income approach bases the portfolio's duration on interest rate forecasts and/or current economic statistics and trends. Shifts are gradual.

The separate account asset mix Jan. 1 was 59% stocks, 27% bonds and 14% cash; $2 million was in foreign stocks.

John H. Watson, senior vice president-investments, is chief investment officer; Gordon F. Grigor, group pension vice president, is client contact.

## Connecticut Mutual Life Insurance Co.

140 Garden St., Hartford, Conn. 06154; (203) 727-6500

| | |
|---|---|
| Total assets managed | $10,025,000,000 |
| Tax-exempt assets managed: | |
| Total | $2,735,000,000 |
| GICs | $2,322,000,000 |
| Other | $413,000,000 |
| Minimum separate account | $5,000,000 |
| Types of accounts managed | CJ |

Connecticut Mutual Life Insurance Co. offers separate accounts invested in domestic and international equities and fixed-income securities, as well as GICs.

The insurer has responsibility for pooled separate accounts, managed by external investment advisers, totaling an additional $203 million.

It establishes exclusive relationships with independent investment managers who act as investment advisers for these accounts. These managers are Westwood Management Corp., Solomon Asset Management Inc., Brown Brothers Harriman and State House Capital.

Two equity approaches are offered: active asset allocation and low p/e combined with achieved earnings in excess of expectations.

The hybrid fixed-income style invests in high yields and convertibles.

Connecticut Mutual also offers discretionary and non-discretionary asset allocation services through its CM Asset Advisors subsidiary.

Gary E. Lineberry, vice president-group pension sales and marketing, is client contact.

## Connecticut National Bank

777 Main St., Hartford, Conn. 06115; (203) 728-4420

| | |
|---|---|
| Total assets managed | $5,469,000,000 |
| Tax-exempt assets managed: | |
| Total | $2,354,000,000 |
| Commingled | $383,000,000 |
| Separate | $1,971,000,000 |
| Indexed assets managed | $8,000,000 |
| Dedicated assets managed | $7,000,000 |
| Minimum separate account | $1,000,000 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 27 |
| Size of research staff | 10 |

Connecticut National Bank is an equity, special equity, fixed-income and balanced manager.

Its equity approach seeks value relative to fundamental assessments. Its fixed-income approach is based on maturity shifts.

The asset mix Jan. 1 was 47% stocks, 44% bonds and 9% cash. As of the same date, $8 million was in equity index funds.

The parent is Hartford National Corp.

Rudolf Abel Jr., senior vice president, is chief investment officer; Arnold P. Boecklin, vice president, is client contact.

## Connors Investor Services

1100 Berkshire Blvd., Wyomissing, Pa. 19610; (215) 376-7418

| | |
|---|---|
| Total assets managed | $87,000,000 |
| Tax-exempt assets managed | $54,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 53 |
| Types of accounts managed | CFJ |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Connors Investor Services Inc. is an equity and balanced manager.

In equities, it selects stocks for option writing that have below-average downside risk and high current return. It also buys stock in small companies at below-market multiples with above-average earnings growth potential.

Fixed income securities, primarily high-quality issues with short to medium staggered maturities, are used in many accounts.

James M. Connors, president, is chief investment officer; Ronald H. Seher, vice president, is client contact.

## Consistent Asset Management Co.

1330 King St., Wilmington, Del. 19801; (302) 651-9400

| | |
|---|---|
| Total assets managed | $190,000,000 |
| Tax-exempt assets managed | $175,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 12 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 2 |

Consistent Asset Management Co., a quantitative fixed-income manager, uses mathematical analysis to allocate portfolios between U.S. Treasury issues and cash. It is trend recognition oriented, but does not use forecasting. Options and fixed-income futures are used.

Clients include Bank of Delaware and Virginia Power.

Daryl L. Hudson, chairman, is the chief investment officer; David W. Umbs, president, is the client contact.

| No. of portfolio managers | 16 |
| Size of research staff | 4 |

Constitution Capital Management Co. is an equity, fixed-income and balanced manager.

The firm offers two equity approaches. In the low p/e Valuepath approach, equities first are computer-ranked by fundamentals and then screened by professionals to avoid excessive risk. Buy/sell decisions are highly disciplined. The Diversified Growth approach concentrates on companies that offer superior growth-potential at attractive valuation levels.

In fixed income, value is added through active management of sector switches and individual issue selection. Portfolios are structured with a duration close to the Shearson Lehman Government/Corporate index.

The asset mix Jan. 1 was 50% stocks, 35% bonds and 15% cash.

Clients include Foxboro, Philips Andover Academy and Reed & Barton.

The parent is Bank of New England Corp.

John G. Anderson is chief investment officer; Harry Sterling Jr., senior vice president, is client contact.

## Continental Assurance Co.

CNA Plaza, Chicago, Ill. 60685; (312) 822-5000

| | |
|---|---|
| Total assets managed | $6,473,000,000 |
| Tax-exempt assets managed: | |
| Total | $3,721,000,000 |
| GICs | $2,213,000,000 |
| Annuities | $262,000,000 |
| Other | $1,246,000,000 |
| Types of accounts managed | CEGJ |
| No. of portfolio managers | 4 |
| Size of research staff | 6 |

Continental Assurance Co. is an equity and fixed-income manager.

Its equity approach is long-term growth emphasizing security of principal. Its fixed-income approach is passive and uses interest rate anticipation and sector analysis, buying and holding bonds while immunizing a portion of the portfolio.

The separate account asset mix Jan. 1 was 6.8% stocks, 93.1% bonds and 0.1% cash.

Its clients include IBM, Delta Air Lines, Conoco and Chevron.

The parent is CNA Insurance.

Donald Rycroft, treasurer, is chief investment officer; Ralph Vuono, national sales director, is client contact in New York at (212) 306-8637.

## Continental Capital Management Corp.

30 N. LaSalle St., Chicago, Ill. 60697; (312) 828-8298

| | |
|---|---|
| Total assets managed | $1,539,000,000 |
| Tax-exempt assets managed | $1,539,000,000 |
| Real estate assets managed | $5,000,000 |
| Dedicated funds managed | $40,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 55 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 4 |

Continental Capital Management Corp. is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented with a yield hurdle. Low p/e is emphasized.

Its fixed-income approach is passive. Interest rate risk exposure is managed by relating the portfolio's duration to the duration of the market.

The asset mix Jan. 1 was 38% stocks, 52% bonds and 10% cash; $5 million was in mortgage-backed securities.

It follows 100 stocks closely and 300, generally.

The parent is Continental Illinois Corp.

Clients include Shelby Williams, Coe College, Pipefitters and Cook County.

Raymond O. Wicklander Jr. is client contact.

## Contravisory Investment Management Corp.

37 Derby St., Hingham, Mass. 02043; (617) 740-1786

| | |
|---|---|
| Total assets managed | $14,000,000 |
| Tax-exempt assets managed | $6,000,000 |
| Minimum separate account | $300,000 |
| Tax-exempt clients | 15 |
| Types of accounts managed | CF |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Contravisory Investment Management Corp. is an equity and balanced manager.

Its equity approach relies upon a quantitative discipline that identifies changes in the long-term relative price trends of stocks, industry groups and sectors of the market. Options are used.

Its fixed-income approach uses interest rate anticipation.

G. Edward Noonan is the chief investment officer; Peter H. Reinemann is the client contact.

## David W. Cook & Co. Inc.

P.O. Box 868, West Newbury, Mass. 01985; (617) 363-5381

| | |
|---|---|
| Total assets managed | $33,000,000 |
| Tax-exempt assets managed | $8,000,000 |
| Tax-exempt clients | 18 |
| Types of accounts managed | C |
| No. of portfolio managers | 1 |

David W. Cook & Co., an equity, fixed-income and balanced manager, pursues a total rate of return approach for all investments.

The firm follows 30 stocks closely and 100, generally; 80% of research is generated internally.

David W. Cook, president, is chief investment officer and client contact.

## Cooke & Bieler Inc.

1435 Walnut St., Philadelphia, Pa. 19102; (215) 567-1101

| | |
|---|---|
| Total assets managed | $2,289,000,000 |
| Tax-exempt assets managed | $1,882,000,000 |
| Minimum separate account | $25,000,000 |
| Tax-exempt clients | 70 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 8 |

Cooke & Bieler Inc. is an equity, fixed-income and balanced manager.

Its equity approach stresses low-risk growth. Portfolios are structured with higher-than-market yields and return on equity, lower-than-market betas and strong balance sheets.

Its fixed-income approach uses interest rate anticipation, with emphasis on credit analysis and a structured maturity schedule.

The asset mix Jan. 1 was 75% stocks, 13% bonds and 12% cash.

The firm follows 70 stocks closely and 250, generally; 80% of research is generated internally.

The parent is United Asset Management.

Clients include Hercules, Columbia Gas, Southern Ohio Ironworkers and Wisconsin Electric.

Russell G. Redenbaugh is chief investment officer; Robert T. Brooks is client contact.

## Copley Real Estate Advisors

399 Boylston St., Boston, Mass. 02116; (617) 578-1200

| | |
|---|---|
| Total assets managed | $11,000,000,000 |
| Tax-exempt assets managed | $8,700,000,000 |
| Real estate assets managed | $8,700,000,000 |
| Minimum separate account | $100,000,000 |
| Tax-exempt clients | 215 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 6 |

Copley Real Estate Advisors, a real estate manager, takes a developmental approach. The investments are structured as partnerships with local real estate developers in selected markets. The firm also makes opportunistic investments, using a contrarian philosophy.

All assets were in equity real estate Jan. 1.

The parent is The New England.

Clients include AT&T, Washington, Blue Cross/Blue Shield and Ohio Teachers.

Joseph W. O'Connor is the chief investment officer; John C. Phillips Jr. is the client contact.

## Corbyn Associates Inc.

Suite 330, The Quadrangle, Village of Cross Keys, Baltimore, Md. 21210; (301) 532-8600

| | |
|---|---|
| Total assets managed | $136,000,000 |
| Tax-exempt assets managed | $89,000,000 |
| Minimum separate account | $100,000 |
| Tax-exempt clients | 110 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Corbyn Associates Inc. is a balanced manager.

Its equity approach is value-oriented with a foundation of modified contrary opinion. The low p/e emphasis is on the inefficient sector and special situations. Technical analysis plays a supplemental role. The fixed-income philosophy is conservative, stressing interest rate anticipation. There is heavy use of short-term U.S. government securities, interspersed with convertibles and an occasional AAA corporate bond for yield enhancement.

Daniel R. Long III, president, is chief investment officer; Richard Hynson Jr., vice president, is client contact.

## CoreStates Investment Advisers

Broad & Chestnut Streets, Philadelphia, Pa. 19101-7618; (215) 629-2821

| Total assets managed | $4,159,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,430,000,000 |
| Commingled | $573,000,000 |
| Separate | $857,000,000 |
| 401(k)/457 assets managed | $137,000,000 |
| 401(k)/457 clients | 29 |
| Real estate assets managed | $60,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients: | |
| Commingled | 100 |
| Separate | 30 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 8 |
| Size of research staff | 8 |

CoreStates Investment Advisers is an equity, fixed-income and balanced manager.

Its active equity approach focuses on earnings momentum and valuation to achieve long-term capital appreciation. The fixed-income approach combines active management of portfolio duration and sector emphasis to dampen volatility and maximize return. Interest rate anticipation is used.

The asset mix Jan. 1 was 50% stocks, 36% bonds, 10% cash and 4% mortgage-backed securities.

It follows 200 stocks closely and 500 generally; 50% of research is generated internally.

The parent company is Philadelphia National Bank.

Clients include United Presbyterian Church and Campbell Soup.

Paul G. Finegan, chairman, is chief investment officer; Mark G. Burlingham, vice president, is client contact.

## Corporate Investment Associates Inc.

P.O. Box 7500 Station A, Toronto, Ontario M5W 1P9; (416) 864-6144

| | |
|---|---|
| Total assets managed | $4,441,000,000 |
| Tax-exempt assets managed | $4,288,000,000 |
| Real estate assets managed | $295,000,000 |
| Non-North American assets | $42,000,000 |
| Indexed assets managed | $69,000,000 |
| Dedicated assets | $168,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 150 |
| Types of accounts managed | CEFGU |
| No. of portfolio managers | 10 |
| Size of research staff | 4 |

Corporate Investment Associates Inc., a Canadian firm, is an equity, fixed-income, balanced and real estate manager.

Its equity approach is sector rotational and value oriented. Sector weightings are made based on the capital markets outlook; stock selection is based on strict fundamentals.

Its fixed-income approach is active. About half of the portfolios represent a diversified core reflecting the long-term outlook; the balance reflects the 3-month cyclical outlook and is invested in marketable bonds.

In real estate, well-located multitenanted buildings in major urban areas with 7.5%+ initial income return are used. Leverage is used to a modest degree using long-term, fixed-rate financing. The acquisition process includes 15-year IRR analysis using a hurdle rate related to long-term bond yields.

The asset mix Jan. 1 was 33% Canadian stocks, 13% U.S. and foreign stocks, 32% bonds, 5% cash, 5% equity real estate, 7% mortgages and 5% direct energy investments; $69 million was in equity indexed funds.

The parent is Royal Trustco Ltd.

Stephan Donihee is chief investment officer and client contact.

## Corporate Property Investors

305 E. 47th St., New York, N.Y. 10017; (212) 421-8200

| | |
|---|---|
| Total assets managed | $3,800,000,000 |

"We wanted a shop that produced first quartile international fixed income performance for the past three-year period."

"So who'd you choose?"

"Chase Investors' International Shop...obviously!"

For information about Chase Investors' "Shops Within a Shop" concept, call Joe Martino 212-730-3359.

| | |
|---|---|
| Tax-exempt assets managed | $2,200,000,000 |
| Real estate assets managed | $2,200,000,000 |
| Tax-exempt clients | 30 |
| Types of accounts managed | CEFG |

Corporate Property Investors, an equity-oriented real estate investment trust, concentrates its portfolio in 28 regional shopping centers and two office buildings.

All assets were invested in equity real estate Jan. 1.

Clients include AT&T, Exxon, Ford Foundation and Yale.

Hans C. Mautner, chairman and president, is chief investment officer; Warren G. Hamer, director-investor relations, is client contact.

## County NatWest Management Ltd.

Fenchurch Exchange 43-44 Crutched Friars, London, England EC3N 2NX; 011-44-1-374-3000

| | |
|---|---|
| Total assets managed | $15,194,000,000 |
| Tax-exempt assets managed | $134,000,000 |
| International assets managed | $24,000,000 |
| Index funds managed | $78,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 3 |
| Types of accounts managed | C |
| No. of portfolio managers | 54 |
| Size of research staff | 22 |

County NatWest Investment Management Ltd. is an equity, fixed-income, balanced and international manager.

For equities, the international diversification program emphasizes active market allocation through passive stock selection using its market representative index funds. Quantitative techniques are used.

The fixed-income approach is top-down with emphasis on market allocation, emphasizing interest rate anticipation, yield curve analysis, currency allocation and high-quality instruments.

Options, stock index futures and fixed-income futures are used.

The firm provides portfolio insurance covering $188 million in assets.

The parent company is NatWest Investment Bank.

Christine Downton, chief executive, is the chief investment officer; Margaret Waller, vice president-marketing, is the client contact.

## Courier Capital Corp.

976 Delware Ave., Buffalo, N.Y. 14209; (716) 883-9595

| | |
|---|---|
| Total assets managed | $320,000,000 |
| Tax-exempt assets managed | $200,000,000 |
| Real estate assets managed | $10,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 80 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 5 |
| Size of research staff | 3 |

Courier Capital Corp. is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented, using emerging growth and low p/e stocks and market timing. It focuses on companies that are likely beneficiaries of existing economic trends and are statistically undervalued relative to either earnings or assets.

Its fixed-income approach is passive and based on interest rate anticipation.

It follows 40 stocks closely and 100, generally.

Francis G. Leonard is chief investment officer and client contact.

## Cowen Asset Management

Financial Square - 28th Floor, New York, N.Y. 10005; (212) 495-6650

| | |
|---|---|
| Total assets managed | $190,000,000 |
| Tax-exempt assets managed | $100,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 144 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 4 |
| Size of research staff | 2 |

Cowen Asset Management is an equity and balanced manager.

Its equity income approach seeks companies with above-market yields, prospects of future dividend growth and balance sheet strength. Its valuation approach focuses on undervalued assets, cash flow and earnings momentum. Options are used.

Its fixed-income approach is passive, emphasizing preservation of capital. Staggered maturities and short duration neutralize interest rate impact.

The parent is Cowen & Co.

William R. Church is the chief investment officer; Douglas B. Baran, vice president, is the client contact.

## The Crabbe-Huson Co.

1211 S.W. Fifth Suite 2900, Portland, Ore. 97204; (503) 295-0111

| | |
|---|---|
| Total assets managed | $260,000,000 |
| Tax-exempt assets managed | $230,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 25 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 3 |
| Size of research staff | 3 |

The Crabbe-Huson Co. is an equity, fixed-income and balanced manager.

Its equity approach is price-sensitive, risk-averse and contrarian, buying larger-cap stocks in concentrated portfolios at substantial discounts from price peaks with an identifiable catalyst for price advance.

For fixed income, the firm uses a contrarian approach to distinguish turning points in interest rates. Short to medium maturities are stressed, with sector swapping and arbitrage used to improve total return.

Clients include Blue Cross/Blue Shield-Oregon and Duplex Products.

James E. Crabbe, president, is chief investment officer. The client contact is James C. Vogelzang, Vogelzang & Associates, 600 17th St. Suite 2325S, Denver, Colo. 80202; (303) 629-1900.

## Cramblit & Carney Inc.

523 W. Sixth St. Suite 1134, Los Angeles, Calif. 90014; (213) 680-0562

| | |
|---|---|

| Tax-exempt clients | 33 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 5 |

Cramblit & Carney Inc. is an equity, fixed-income and balanced manager.

Its equity approach is based on growth and low p/e stock strategies. Its fixed-income approach uses sector analysis.

The asset mix Jan. 1 was 42% stocks, 30% bonds and 28% cash.

The firm follows 100 stocks closely and 300, generally; 25% of the research is generated internally.

Clients include Provision Workers, Claremont University Center, Screen Actors Guild-Producers and 20th Century Fox Film.

Richard P. Carney is chief investment officer; Barry T. Seymour is client contact.

## Cramer Rosenthal McGlynn

520 Madison Ave., New York, N.Y. 10022; (212) 838-3830

| | |
|---|---|
| Total assets managed | $295,000,000 |
| Tax-exempt assets managed | $116,000,000 |
| Minimum separate account | $3,000,000 |
| Tax-exempt clients | 22 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Cramer Rosenthal McGlynn Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses sector rotation and Graham & Dodd analysis on emerging growth and low p/e stocks. Its fixed-income approach uses interest rate anticipation with emphasis on short-term U.S. government obligations.

Options and stock index futures are used.

Clients include Columbia University, Georgia Pacific and the NBA.

Gerald Cramer is chief investment officer; Ernest A. Remig, marketing representative, is client contact.

## Crawford Investment Counsel Inc.

Dana Investment Advisors is an equity, fixed-income and balanced manager.

Its risk-averse management approach emphasizes growth and income stocks. It is value-oriented on a total rate of return basis.

The firm is an active fixed-income manager, looking to extract current value and keep interest rate (movement) risk to a minimum; variable rate government-backed securities are used extensively.

Michael L. Dana, president, is the chief investment officer; Donald J.

# *We don't react at the drop of an interest rate.*

Successful investing depends a lot more upon how well you react to market changes than upon how quickly.

This is not to say that we don't change as conditions change. We do. We just don't believe that something as important as your retirement fund portfolio should be altered by short term factors.

Our goal is to deliver long term growth through equity investments and prudent portfolio balance through sound fixed-income management. We believe we're uniquely qualified to meet these objectives.

Because at David L. Babson & Company, we have a very simple philosophy: the best way to achieve investment success is to start with the best people. And then give them the resources and the power to make decisions. Informed decisions.

How do we attract and keep the best people? By giving them the opportunity literally to be a part of the company. Our company is owned by the active members of the professional staff, none of whom own as much as 15% of the stock.

The result of having top-quality people is being able to create top-quality, low-risk, growth equity and fixed-income portfolios.

For example, we offer real estate investments that are an excellent way to diversify your retirement fund portfolio. Choose from a closed-end pooled fund or from separate investments. In either case, the goal is low-risk growth.

We have recently introduced further diversification through investment in international markets. Reduce risk and broaden your opportunity by choosing an international mutual fund, a group trust for pension portfolios, or separate investments.

We also offer separately managed portfolios (similar to the Babson Enterprise Fund) of companies with small market capitalizations. These are companies that fill a niche in their particular industry. Companies in which management holds a large stake.

So if you're looking for sound investments with limited risk for your retirement fund portfolio, consider David L. Babson. Because good performance depends on good planning. And you can't develop a plan without solid investment decisions.

For more information about what we can do for you, call Peter Thompson, President, at (617) 225-3800. Or write: David L. Babson & Company, Inc., One Memorial Drive, Cambridge, MA 02142.

**David L. Babson & Company, Inc.**
*The person you talk to owns the company.*

| No. of portfolio managers | 17 |

Delaware Investment Advisers is an equity, fixed-income and balanced manager.

Its equity approach combines sector rotation with low p/e and value/equity income strategies. Its philosophy stresses risk management within a total-rate-of-return orientation.

Its fixed-income approach uses equity-type credit analysis, a sensitivity to business cycles and sophisticated trading strategies to protect the income premium on high-yielding corporate bonds.

The asset mix Jan. 1 was 82% stocks, 11% bonds and 7% cash.

The firm follows 150 stocks closely and 350, generally; 35% of research is generated internally.

The parent company is Delaware Management Co.

Clients include Ameritech, Father Flanagan's Boys' Home, GM and Dartmouth.

John H. Durham, chief executive officer, is chief investment officer; Winthrop S. Jessup, senior vice president, is client contact.

### Delta Financial Inc.

| Types of accounts managed | CEFJG |
| No. of portfolio managers | 11 |

Dewey Square Investors is an equity, fixed-income and balanced manager.

Its equity approach is quantitative and low p/e. It constructs highly diversified portfolios built of stocks with high relative valuation rank and poor past price behavior.

Its fixed-income approach uses a proprietary economic cycle approach to determine primary interest rate trends and structure maturity allocation.

The asset mix Jan. 1 was 46% stocks, 32% bonds, 18% cash and 4% mortgage-backed securities.

The firm follows 100 stocks closely and 650, generally; 40% of the research is generated internally.

The parent is Bank of Boston.

Clients include Ford, American Airlines, Gillette and Raytheon.

William B. Moody, president, is chief investment officer; Caroline Hovey, director of marketing, is client contact.

### Dietche & Field Advisers

| | |
|---|---|
| Total assets managed | $187,000,000 |
| Tax-exempt assets managed | $154,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 5 |
| Types of accounts managed | C |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Dietche & Field Advisers Inc., an equity manager, uses Graham & Dodd analysis in its bottom-up approach. Managers seek undervalued companies undergoing significant change.

Clients include Boise Cascade, Baltimore and Tyndall North American Fund.

Paul Dietche, president, is chief investment officer; Lincoln P. Field, vice president, is client contact.

### Dillon, Read Capital Inc.

535 Madison Ave., New York, N.Y. 10022; (212) 906-7659

| | |
|---|---|
| Total assets managed | $1,941,000,000 |
| Tax-exempt assets managed | $1,490,000,000 |
| Minimum separate account | $3,000,000 |
| Tax-exempt clients | 41 |
| Types of accounts managed | CFJG |
| No. of portfolio managers | 5 |

Dillon, Read Capital Inc. is an equity and balanced manager.

Its equity approach emphasizes active asset allocation, using a price-sensitive, bottom-up stock selection approach in which securities of quality companies are bought when they are out of favor and undervalued. Cash will be raised when securities are overvalued or the trend to overall liquidity is negative.

In balanced accounts, fixed-income assets are actively managed, adjusting maturities depending on valuation and trends of liquidity. High-quality issues are used.

The asset mix Jan. 1 was 57% stocks, 2% bonds and 41% cash.

The firm follows 150 stocks closely and 300, generally; 75% of research is generated internally.

The parent is Dillon, Read & Co. Inc., which is owned by The Travelers Corp. In addition to the assets above, Dillon, Read Capital manages some commingled funds for its parent.

Clients include Hughes Aircraft, Alcoa and Illinois Municipal.

Timothy G. Dalton Jr., president, is chief investment officer; David A. Dewey, executive vice president, is client contact.

### Dimensional Fund Advisors

1299 Ocean Ave. Suite 650, Santa Monica, Calif. 90401; (213) 395-8005

| Minimum separate account | $50,000,000 |
| Tax-exempt clients | 112 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 6 |
| Size of research staff | 3 |

Dimensional Fund Advisors Inc. is an equity, fixed-income and international manager.

Its equity approach is passive. It invests in small companies to provide diversification and potential for long-term return premiums.

Its fixed-income approach uses a variable maturity strategy that maxi-

# Would You Really Trust Your Company's Master Trust To Someone Who Didn't Make It A Top Priority?

You know a Master Trust can save your company time, money and headaches by pooling investments and consolidating administration of your employee benefit funds. But at a lot of trust companies, you risk getting lost in the shuffle instead of getting the attention you need.

The solution? Centerre Trust Company of St. Louis.

We make it a top priority to treat each client as a top priority. No matter how big or small. And this approach works so well, we're a bit surprised our competition hasn't caught on.

A Centerre Master Trust gives you everything you'd expect from a full-service Master Trustee: Comprehensive accounting and reporting, an on-line inquiry system for timely information about your account, a cash management system that generates income from money that might otherwise sit idle, and a securities lending system to boost your return on assets even further.

Get the personal *and* professional service you deserve.

Call Centerre about a Master Trust or Master Custody agreement today at (314) 436-9673. It's the only number we'll ever ask you to take.

**CENTERRE TRUST COMPANY**

510 Locust Street, St. Louis, MO 63101

mizes expected returns by shifting maturities in response to changes in the current prices.

The asset mix Jan. 1 was 74% stocks, 24% fixed income and 2% cash. As of the same date, the firm had $154 million in foreign stocks, $2.85 billion in equity index funds and $974 million in fixed-income funds.

The firm follows 3,000 stocks closely and 3,000, generally; 90% of the research is generated internally.

Clients include GM, IBM, Maryland and California Public Employees.

Rex A. Sinquefield, chairman, is chief investment officer. David G. Booth, chairman and chief executive officer, is the client contact.

## Disciplined Investment Advisors Inc.

1800 Sherman Ave., Evanston, Ill. 60201; (312) 328-6707

| | |
|---|---|
| Total assets managed | $400,000,000 |

Disciplined Portfolio Management Inc., an equity manager, takes a fundamental, systematic and disciplined approach, using a combination of Graham & Dodd and quantitative principles. Appropriate fundamental, qualitative, quantitative and technical ranks identify attractive investments. The process is reinforced by a rigorous sell discipline.

The firm follows 1,900 stocks closely and 1,900, generally.

Darley T. Randall, managing director, is the chief investment officer and the client contact.

## Discount Corp. of New York Advisers

58 Pine St., New York, N.Y. 10005; (212) 248-8989

| | |
|---|---|
| Total assets managed | $5,285,000,000 |
| Tax-exempt assets managed | $5,285,000,000 |
| 401(k)/457 assets managed | $232,000,000 |
| 401(k)/457 clients | 2 |
| Minimum separate account | $100,000,000 |
| Tax-exempt clients | 17 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 5 |
| Size of research staff | 11 |

Discount Corp. of New York Advisers is a fixed-income, international and options and futures manager.

Its fixed-income approach uses high credit-quality issues, shifting into securities of greater or lesser market risk based on anticipated interest rate moves. Investment policies are based on fundamental market analysis and technical factors. Portfolio managers refine broad investment policy, select specific instruments and execute transactions, allowing for active management of short- and long-term accounts and quick portfolio adjustments to preserve capital or to a benefit from profit opportunity.

Options and fixed-income futures are used.

The asset mix Jan. 1 was 25% bonds and 75% cash.

The parent company is Discount Corp. of New York.

Clients include General Dynamics, Eastman Kodak and Pacific Telesis.

Patricia de Blank Klink, president and director, is chief investment officer; Barbara D. Fiorito, vice president-marketing and administration, is client contact.

## Dixon Krogseth Ltd.

1066 W. Hastings St., Vancouver, British Columbia V6E 3X1; (604) 684-8541

| Types of accounts managed | CU |
| No. of portfolio managers | 3 |

Dixon Krogseth Ltd., a Canadian firm, is an equity, fixed-income and balanced manager.

Its equity approach uses growth stock and sector rotation strategies, with about half of the stocks selected for sector weighting and half selected for individual growth characteristics.

Its fixed-income approach uses interest rate anticipation.

The firm follows 50 stocks closely and 100, generally; 10% of research is generated internally.

T. Alan Dixon is chief investment officer and client contact.

## Dodge & Cox

1 Post St., 35th Floor, San Francisco, Calif. 94104; (415) 981-1710

| | |
|---|---|
| Total assets managed | $4,931,000,000 |
| Tax-exempt assets managed | $3,960,000,000 |
| Minimum separate account | $20,000,000 |
| Tax-exempt clients | 91 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 8 |
| Size of research staff | 9 |

Dodge & Cox is an equity, fixed-income and balanced manager.

It takes a fundamental value, diversified approach to equities, investing in established companies managers believe have positive earnings prospects not reflected in current prices.

Its fixed-income approach focuses on identifying undervalued market sectors and securities to construct high-quality, diversified portfolios. Maturities are gradually adjusted within a range of nine to 15 years. Interest rate anticipation is used.

The asset mix Jan. 1 was 57% stocks, 40% bonds and 3% cash.

Joseph M. Fee, president and chief executive officer, is chief investment officer; Kenneth E. Olivier, vice president, is client contact.

## Dohmen Capital Management Inc.

73 Bishop St., Suite 1800, Honolulu, Hawaii 96813; (808) 524-8063 or (800) 992-9989

| | |
|---|---|

| Separate | 92 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 8 |
| Size of research staff | 7 |

First Asset Management is primarily a balanced manager with separate equity, fixed-income and real estate management available.

Its equity approach uses sector rotation with a value bias. Selection of industries and securities is based on its economic forecast, a return-on-equity model and a fair value model.

Its fixed-income strategy centers around fundamental interest rate forecasting within a framework for measuring and controlling both systematic and specific risk in the portfolio. Dedication/immunization strategies are used.

Its real estate approach is to select properties whose values can be enhanced through aggressive management and additional capital.

The asset mix Jan. 1 was 25% stocks, 34.2% bonds, 35% cash, 2.3% equity real estate and 3.5% GICs and oil/gas; $8 million was in mortgages and $19 million in equity index funds.

The parent is First Bank System.

John M. Murphy Jr. is chief investment officer; Kevin S. Underkofler is client contact.

| Size of research staff | 56 |

First Chicago Investment Advisors is an equity, fixed-income, balanced, real estate, international, venture capital and multiple asset class manager.

Its equity approach is value-oriented, based on fundamental research. It identifies mispriced securities in shifting market environments, selecting stocks within the context of disciplined judgments on market timing, sector exposures and industry.

For fixed-income, a portfolio's interest rate, yield curve, quality/sector and issue-specific exposures are managed to outperform a selected benchmark during an interest rate cycle.

Its real estate approach focuses on building core portfolios of general-purpose properties in proven markets diversified by type and region.

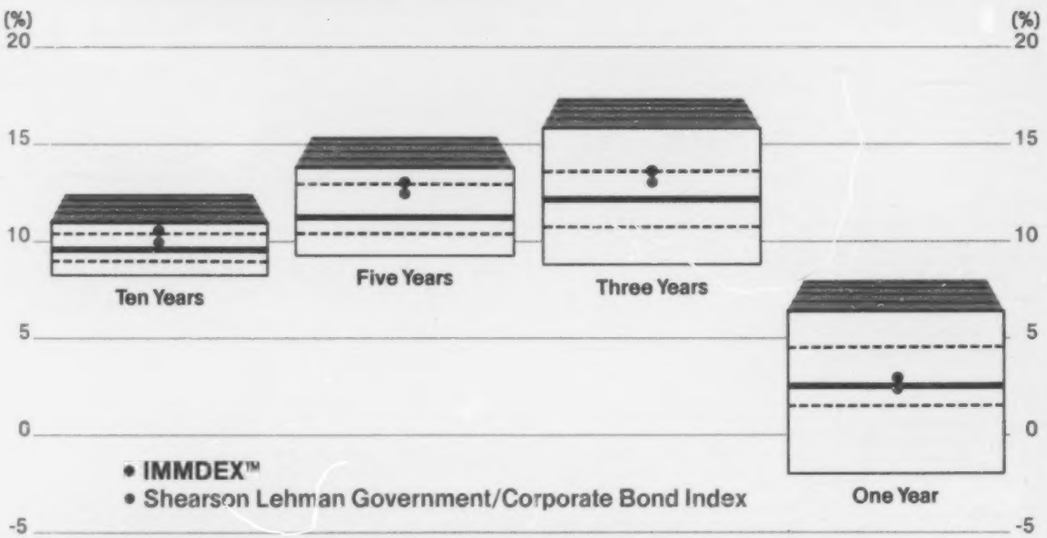
The asset mix Jan. 1 was 25% stocks, 46% bonds, 17% cash, 10% equity real estate and 2% venture capital; $638 million was in foreign stocks, $1.67 billion in foreign bonds and $82 million in equity indexed funds. The above figures include $306 million invested in its multi-asset portfolio.

The parent company is First Chicago Corp.

Gary P. Brinson is president and chief investment officer; Diana M. Cohen, assistant vice president, is client contact.

Public funds will be highlighted Nov. 28.

# Bond Indexation with the IMMDEX™ advantage.



**Bond fund total rates of return for periods ended December 31, 1987. Source SEI.**

**The Shearson Lehman Government/Corporate Bond Index has provided superior performance when compared to active fixed income managers. The Index has consistently provided first or strong second quartile returns over most time periods.**

**Immdex is a unique bond management system in which the annual return will match or exceed the index rate of return. On the basis of actual experience, IMMDEX has added an average of 65 basis points of excess annual return to the Shearson Lehman Government/Corporate Bond Index.**

**Immdex accomplishes this objective through two strategies:**

- **The index rate of return is achieved through a proprietary duration-matching strategy.**
- **Immdex capitalizes on market opportunities to further enhance total return.**

**First Wisconsin Trust Company is a leader in the area of quantitative fixed income management and we believe that the Immdex advantage will prove to be an attractive alternative to your current bond management approach.**

**Let us review how Immdex provides positive tracking to the Shearson Lehman Government/Corporate Bond Index and enhanced market returns through the use of bond management techniques. Call Robert Aubrecht at (414) 765-4906 or Charles Groeschell at (414) 765-4789 or write First Wisconsin Trust Company, First Wisconsin Center, Box 2054, Milwaukee, Wisconsin 53201.**

| Separate | 174 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 13 |

First Interstate Bank of Arizona is an equity, fixed-income, balanced and real estate manager.

Its equity approach is to buy stocks, at reasonable prices, of companies with a consistent record of above-average increases in earnings and dividends. Its fixed-income approach emphasizes construction of a high-quality, conservative portfolio that produces a predictable income stream and low portfolio turnover.

Its real estate approach focuses on management of individual properties.

The parent company is First Interstate Bancorp.

Clients include Tucson Medical Center and Sun Health.

Robert L. Mueller, senior vice president, is chief investment officer; Richard A. Malcolmson, vice president, is client contact.

## First Interstate Bank of California

707 Wilshire Blvd., Los Angeles, Calif. 90017; (213) 614-3210

| | |
|---|---|
| Total assets managed | $1,016,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,316,000,000 |
| Commingled | $966,000,000 |
| Separate | $50,000,000 |
| 401(k)/457 assets managed | $50,000,000 |
| 401(k)/457 clients | 274 |
| International assets managed | $18,000,000 |
| Indexed assets managed | $228,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients: | |
| Commingled | 117 |
| Separate | 15 |
| Types of accounts managed | CFGJ |
| No. of portfolio managers | 5 |
| Size of research staff | 14 |

First Interstate Bank of California is an equity, fixed-income and balanced manager.

Its equity and fixed-income approaches are passive. Stocks follow the S&P 500 index. Long-term fixed-income goals are to produce real rates of return that exceed the Salomon Brothers BIG index.

Its real estate approach emphasizes geographic diversity, with concentration on areas offering strong growth potential and stable economic bases.

The asset mix Jan. 1 was 29% stocks, 20% bonds, 47% cash and 4% equity real estate. As of the same date, it had $18 million in foreign stocks, $175 million in equity index funds and $53 million in bond index funds.

The parent company is First Interstate Bancorp.

Vern Kozlen, senior vice president, is chief investment officer; Peter C. Gerrer is client contact.

## First Interstate Bank of Casper

P.O. Box 40, Casper, Wyo. 82602; (307) 235-4362

| | |
|---|---|
| Total assets managed | $79,000,000 |
| Tax-exempt assets managed: | |
| Total | $26,000,000 |
| Commingled | $10,000,000 |
| Separate | $16,000,000 |
| Real estate assets managed | $4,000,000 |
| Minimum separate account | $2,500,000 |
| Tax-exempt clients: | |
| Commingled | 170 |
| Separate | 14 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 2 |

First Interstate Bank of Casper is an equity, fixed-income, balanced, real estate and mineral interest manager.

Its equity approach is value-oriented and contrarian. It uses market timing and low p/e evaluation to purchase out-of-favor companies that have favorable financial characteristics and growth prospects. Its fixed-income approach stresses intermediate maturities of a two- to 12-year time frame. It makes limited use of options.

The parent is First Interstate Bancorp.

John McAteer, vice president and trust officer, is chief investment officer.

## First Interstate Bank of Denver

633 17th St., Denver, Colo. 80270; (303) 293-2211

| | |
|---|---|
| Total assets managed | $1,500,000,000 |
| Tax-exempt assets managed: | |
| Total | $0 |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 15 |
| Size of research staff | 8 |

First Interstate Bank of Denver is an equity, fixed-income and balanced manager.

Its equity approach uses growth and low p/e stocks. Its fixed-income approach uses sector analysis.

Denver Investment Advisors, a subsidiary of the bank that is profiled elsewhere in this issue, manages $572 million from 170 tax-exempt clients on behalf of the bank.

The bank follows 130 stocks closely and 200, generally; 70% of research is generated internally.

The parent company is First Interstate Bancorp.

John Resetarits is client contact.

## First Interstate Bank of Oregon, Capital Management Group

1300 S.W. Fifth Ave., Portland, Ore. 97201; (503) 225-2379

| | |
|---|---|
| Total assets managed | $2,100,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,014,000,000 |
| Commingled | $250,000,000 |
| Separate | $764,000,000 |
| 401(k)/457 assets managed | $30,000,000 |
| 401(k)/457 clients | 48 |
| Real estate assets managed | $55,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients: | |
| Commingled | 180 |
| Separate | 117 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 12 |
| Size of research staff | 3 |

First Interstate Bank of Oregon, Capital Management Group is an equity, fixed-income, balanced, real estate and international manager.

Its equity approach uses stocks with very low p/es. Its portfolios are structured for low risk, low portfolio beta of 0.8 to 0.9, and high yield.

Its fixed-income approach is passive, focusing on the intermediate sector of the bond market. Average maturity ranges from five to 12 years.

The asset mix Jan. 1 was 40% stocks, 46% bonds, 9% cash and 5% mortgage-backed securities.

Clients include Niagara Mohawk Power, Northwest Natural Gas, Louisiana-Pacific and Freightliner.

The parent company is First Interstate Bancorp.

Dennis Wood, vice president and manager-investment advisory services, is chief investment officer; Jan Dawson, vice president-employee benefit services, is the client contact.

## First Interstate Bank of Washington

PO Box 21927, Seattle, Wash. 98111; (206) 343-8346

| | |
|---|---|
| Total assets managed | $2,600,000,000 |
| Tax-exempt assets managed: | |
| Total | $705,000,000 |
| Commingled | $53,000,000 |
| Separate | $652,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients: | |
| Commingled | 250 |
| Separate | 90 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 9 |

First Interstate Bank of Washington is an equity, fixed-income and balanced manager.

Its equity approach follows Graham & Dodd principles while emphasizing low volatility, high dividend yield, high EPS stability, industrial sector shifting and large-cap stocks, with moderate concentration in sectors or issues. Options are used.

Its fixed-income approach emphasizes high credit quality and yield pickup swapping, with moderate emphasis on laddered maturity shifting and sector shifting.

The asset mix Jan. 1 was 45% stocks, 40% bonds and 15% cash.

J. Clark Reardon, senior vice president and trust officer, is chief investment officer; Lawrence T. Divers, vice president and trust officer, is client contact.

## First Interstate Trust Co. of Wisconsin

636 Wisconsin Ave. P.O. Box 171, Sheboygan, Wis. 53082-0171; (414) 459-2070

| | |
|---|---|
| Total assets managed | $495,000,000 |
| Tax-exempt assets managed: | |
| Total | $185,000,000 |
| Commingled | $55,000,000 |
| Separate | $130,000,000 |
| Real estate assets managed | $22,000,000 |
| International assets managed | $2,000,000 |
| Indexed assets managed | $3,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients: | |
| Commingled | 130 |
| Separate | 332 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 4 |
| Size of research staff | 2 |

First Interstate Trust Co. of Wisconsin is an equity, fixed-income and balanced manager.

For equity investments, it uses value and growth philosophies, diversifying the approach within each account to obtain the highest risk-adjusted return. Options are used.

Its fixed-income approach uses interest rate anticipation and sector analysis. Generally, the bank focuses on short to intermediate sectors, looking for quality and using spreads between quality and various instruments.

Its real estate approach is limited, mostly to limited partnerships and some inflation hedge.

The parent company is First Interstate Bank of Wisconsin.

Michael J. Millhouse, vice president, is chief investment officer; Fred M. Hollander, vice president, is client contact.

## First Investment Management

120 N. Robinson Ave., Suite 860 West, Oklahoma City, Okla. 73102; (405) 272-4202

| | |
|---|---|
| Total assets managed | $1,587,000,000 |
| Tax-exempt assets managed | $1,587,000,000 |
| 401(k)/457 assets managed | $15,000,000 |
| 401(k)/457 clients | 10 |
| Real estate assets managed | $30,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 150 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 5 |
| Size of research staff | 3 |

First Investment Management is an equity, fixed-income, balanced, GIC and convertible securities manager.

Its equity approach uses a multifactor decision framework incorporating value, earnings and price momentum components along with distinct buy, hold and sell decision rules for each equity sector. Options are used.

Its fixed-income approach is based on adjusting maturities according to the expected trend in interest rates. The trend forecast is derived from an internally developed asset allocation framework.

The asset mix Jan. 1 was 14.6% stocks, 60.6% bonds, 17.6% cash, 1.3% mortgages, 1% mortgage-backed securities and 4.9% other investments.

The parent company is First Interstate Bank of Oklahoma.

Clients include The Noble Foundation, Shriners Hospitals and Oklahoma Gas & Electric.

C. Lee Liscom, senior portfolio manager, is chief investment officer; Richard H. Parry, senior portfolio manager-marketing, is client contact.

## First Jersey National Bank

1 Gateway Center, Newark, N.J. 07102; (201) 648-8027

| | |
|---|---|
| Total assets managed | $1,250,000,000 |
| Tax-exempt assets managed: | |
| Total | $375,000,000 |
| Commingled | $155,000,000 |
| Separate | $220,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients: | |
| Commingled | 184 |
| Separate | 247 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 8 |

First Jersey National Bank is an equity, fixed-income and balanced manager.

Its value-oriented equity strategy emphasizes Graham & Dodd analysis of emerging growth, growth and low p/e stocks, and market timing in its top-down stock selection.

Its fixed-income approach is macroeconomic, using active management in maturity structure, quality distribution and sector selection.

The bank follows 50 stocks closely and 150, generally; 10% of research is generated internally.

Clients include NL Industries, Flexi-Van and Teamsters Welfare Fund (Locals 469 and 617).

The parent company is National Westminster Bancorp.

John J. Saueracker is chief investment officer; J. Thomas Chiolo is client contact.

## First Kentucky Co.

101 S. Fifth St., Louisville, Ky. 40202; (502) 581-7668

| | |
|---|---|
| Total assets managed | $1,896,000,000 |
| Tax-exempt assets managed | $1,700,000,000 |
| Dedicated funds managed | $12,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 38 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 5 |
| Size of research staff | 4 |

First Kentucky Co. is an equity, fixed-income and balanced manager.

Its equity approach focuses on financially sound companies currently undervalued as measured by high yield, low p/e or above-average growth potential in relation to price.

Its fixed-income approach follows interest rate trends, continually repositioning sectors (industries, qualities, maturities, coupon) while maintaining high-quality call-protected portfolios with effective duration plus or minus the index.

The asset mix Jan. 1 was 27% stocks, 54% bonds and 19% cash.

The firm follows 50 stocks closely and 150, stocks generally; 75% of research is generated internally.

The parent company is First Kentucky National Corp.

Irvin W. Quesenberry, senior vice president, is chief investment officer; John H. Yost, senior vice president, is client contact.

## First Kentucky Trust Co.

101 S. Fifth St., Louisville, Ky. 40202; (502) 581-4050

| | |
|---|---|
| Total assets managed | $5,002,000,000 |
| Tax-exempt assets managed: | |
| Total | $2,174,000,000 |
| Commingled | $192,000,000 |
| Separate | $1,982,000,000 |
| 401(k)/457 assets managed | $2,000,000 |
| 401(k)/457 clients | 6 |
| Real estate assets managed | $44,000,000 |

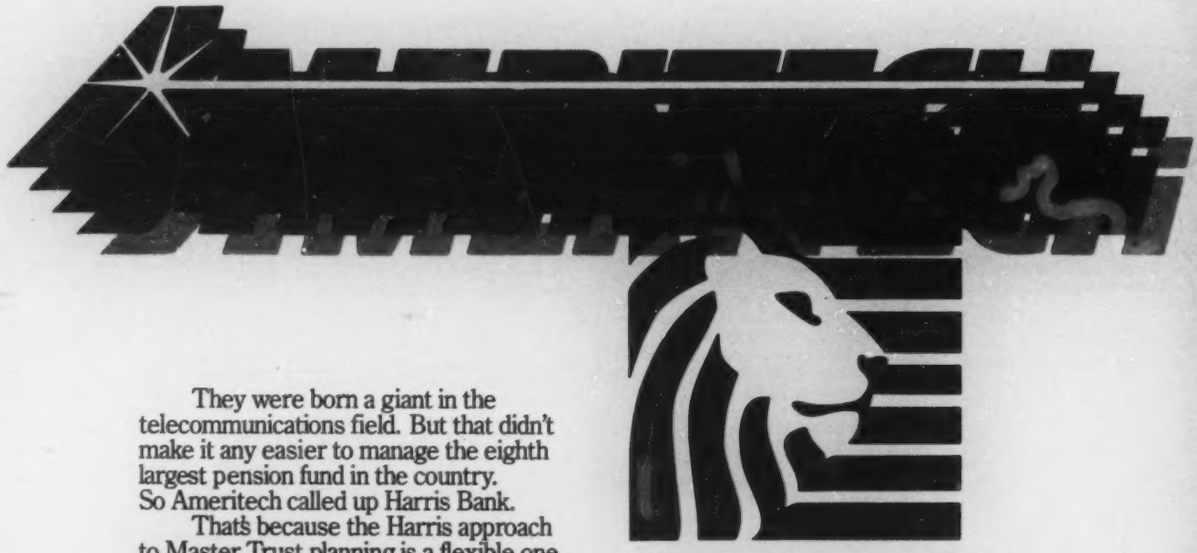
Its active fixed-income approach uses interest rate anticipation and sector analysis in short/intermediate duration management. Its real estate approach offers active management of farm and

# When Ameritech needed a Master Trust who did they dial for information?



They were born a giant in the telecommunications field. But that didn't make it any easier to manage the eighth largest pension fund in the country. So Ameritech called up Harris Bank.

That's because the Harris approach to Master Trust planning is a flexible one. Rather than a preset service package, we offered Ameritech a custom-tailored plan to meet their specific needs. A plan that can be further adapted, as their needs grow and change.

This kind of cooperative planning means we do more than respond to requests. We initiate ideas. And offer expert help, not just from one source person, but from various levels of our Master Trust department.

For Ameritech, the Harris brand of flexible teamwork made the best Master Trust connection. See what we can do for you. Call our Marketing Representative at (312) 461-7956.

The Harris. Move up to the Banking Lion.

| Size of research staff | 6 |

First RepublicBank Asset Management Co. Texas is an equity, fixed-income, balanced, real estate, international, index, venture capital, energy, portfolio insurance and cash manager.

Its equity approach seeks growth-potential stocks using research to identify companies with lower p/e, lower-than-market price/book value and higher-than-market current yields.

Its active fixed-income approach takes advantage of market inefficiencies, using higher-yielding bonds through sector selection. Credit research and swapping provide incremental return. Options and financial futures are used.

In real estate, it looks for properties with long-term growth and stability; diversification is achieved by property.

The asset mix Jan. 1 was 50% stocks, 43% bonds, 5% cash and 2% equity real estate; $31 million was in foreign stocks, $370 million in equity index funds and $50 million in bond index funds.

The parent is First RepublicBank Texas.

H.E. Anderson, chairman, and David E. Hoener, president, are chief investment officers; David J. Pittman, senior vice president and director-trust institutional marketing, is client contact.

First Security National Bank & Trust Co. is an equity, fixed-income and balanced manager.

Its value-oriented stock selection is primarily based on an in-house valuation model modified by a subjective analysis of fundamental factors.

Its fixed-income approach uses interest rate anticipation with emphasis on maturities of 10 years or less to reduce volatility.

The parent company is First Security Corp. of Kentucky.

Jerry C. Troyer, vice president and senior trust investment officer, is chief investment officer; Barry V. Bond, vice president and trust development officer, is client contact.

## 1st Source Bank

100 N. Michigan St., South Bend, Ind. 46601; (219) 236-2000

| Tax-exempt clients: | |
| Commingled | 915 |
| Types of accounts managed | CEPGJ |
| No. of portfolio managers | 10 |
| Size of research staff | 9 |

First Tennessee Investment Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses sector rotation, looking for stocks with long-term growth in unit volume, sales and earnings. Options are used.

Its fixed-income approach uses interest rate anticipation and sector analysis to take advantage of yield curve and other temporary distortions in the market. Credit considerations are emphasized.

The asset mix Jan. 1 was 30% stocks, 59% bonds, 5% cash, 2% equity real estate, 1% mortgages and 3% mortgage-backed securities.

The parent company is First Tennessee National Corp.

William V. Pruett, president, is chief investment officer; Pat Kunnecke and Bill Woodson are client contacts.

## First Union National Bank

1200 First Union Plaza/CMG-16, Charlotte, N.C. 28288; (704) 371-5155

| | |
|---|---|
| Total assets managed | $6,400,000,000 |
| Tax-exempt assets managed: | |
| Total | $2,960,000,000 |
| Commingled | $1,770,000,000 |

| Tax-exempt clients: | |
| Commingled | 1,765 |
| Separate | 120 |
| Types of accounts managed | CEPGJ |
| No. of portfolio managers | 28 |
| Size of research staff | 6 |

First Union National Bank is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd principles identifying low p/e stocks. It invests in companies that have average to above-average financial characteristics and that sell substantially below market valuation levels.

Its fixed-income approach is conservative and based on interest rate anticipation, aiming to provide consistently positive returns, attractive levels of current income and capital gains when interest rates decline.

Stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 45% stocks, 35% bonds and 20% cash; $18 million was in equity indexed funds.

Clients include Ace Hardware, Sterling Drug, Chanel and Trailways.

The parent is First Union Corp.

William R. Hackney III is chief investment officer; Deborah L. Tate, national sales manager, is client contact.

## First Wachovia Corp.

301 N. Main St., Winston-Salem, N.C. 27150; (919) 770-5906

| | |
|---|---|
| Total assets managed | $8,100,000,000 |
| Tax-exempt assets managed: | |
| Total | $4,800,000,000 |
| Commingled | $875,000,000 |
| Separate | $3,925,000,000 |
| Real estate assets managed | $700,000,000 |
| Minimum separate account | $5,000,000 |
| Types of accounts managed | CEPG |
| No. of portfolio managers | 21 |
| Size of research staff | 10 |

First Wachovia Corp. is an equity, fixed-income, balanced, real estate, timberland and GIC manager.

Its equity approach is early identification of socioeconomic trends affecting the economy and markets and over- or underweighting the portfolio accordingly with quality companies selling at reasonable value.

Its fixed-income approach is multidisciplined, weaving judgments about the interest rate environment with opportunities to add value through sector rotation, security swapping and credit analysis.

Its real estate approach is to acquire properties when demand is low and develop when demand is high.

The asset mix Jan. 1 was 36% stocks, 33% bonds, 19% cash and 12% equity real estate.

The bank follows 125 stocks closely and 600 generally; 50% research is generated internally.

H. Vernon Winters is chief investment officer; Nick Verano, vice president and manager of marketing, is client contact.

## First Wisconsin Trust Co.

777 E. Wisconsin Ave., Milwaukee, Wis. 53202; (414) 765-4444

| | |
|---|---|
| Total assets managed | $3,166,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,883,000,000 |
| Commingled | $893,000,000 |
| Separate | $990,000,000 |
| 401(k)/457 assets managed | $362,000,000 |
| 401(k)/457 clients | 38 |
| Real estate assets managed | $8,000,000 |
| International assets managed | $3,000,000 |
| Indexed assets managed | $213,000,000 |
| Dedicated assets managed | $572,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients: | |
| Commingled | 561 |
| Separate | 89 |
| Types of accounts managed | CEPGJ |
| No. of portfolio managers | 17 |

First Wisconsin Trust Co. is an equity, fixed-income, balanced, global/international, real estate and GIC manager.

It has two separate equity philosophies. First Wisconsin Asset Management, a subsidiary, emphasizes growth or capital appreciation in the management of three collective equity approaches. First Wisconsin Trust takes a more conservative, income-oriented approach for actively managed portfolios, emphasizing large-cap and some medium-cap issues. Current dividend yield and the prospect for dividend growth are important elements.

For fixed income it uses active, passive and quantitative investment techniques.

Its real estate approach uses unleveraged equity positions in existing, leased commercial properties to develop a stable income stream and potential appreciation.

The asset mix Jan. 1 was 13% stocks, 51% bonds, 34% cash, 0.5% equity real estate and 1.5% other.

The parent company is First Wisconsin Corp.

Jackson Kirk, first vice president, is chief investment officer; Robert Aubrecht, vice president, is client contact.

## FirsTier Bank, Lincoln

P.O. Box 81008, Lincoln, Neb. 68506; (402) 471-1307

| | |
|---|---|
| Total assets managed | $580,000,000 |
| Tax-exempt assets managed: | |
| Total | $235,000,000 |
| Commingled | $40,000,000 |
| Separate | $195,000,000 |
| Real estate assets managed | $9,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients: | |
| Commingled | 195 |
| Separate | 25 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 5 |

FirsTier Bank, Lincoln is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented focusing on low p/e and growth stocks; a major screen is earnings momentum. Based on interest rate anticipation, its fixed-income strategy calls for reducing volatility; maturities are not longer than 10 years.

The parent company is FirsTier Inc.

William S. Eastwood, vice president and manager-trust investment department, is chief investment officer; Norman Wilson, vice president-employee benefit administration, is client contact.

## Fischer, Francis, Trees & Watts Inc.

717 Fifth Ave., New York, N.Y. 10022; (212) 350-8050

| | |
|---|---|
| Total assets managed | $11,100,000,000 |
| Tax-exempt assets managed | $9,200,000,000 |
| Real estate assets managed | $350,000,000 |
| Dedicated funds managed | $280,000,000 |
| Minimum separate account | $50,000,000 |
| Tax-exempt clients | 33 |
| Types of accounts managed | CEPG |
| No. of portfolio managers | 12 |

Fischer, Francis, Trees & Watts Inc., a fixed-income manager, uses interest rate anticipation and sector analysis. It manages market risk and sector spread opportunities in prime quality issues with active trading. Hedged foreign securities are used, as are options and fixed-income futures.

The asset mix Jan. 1 was 96% bonds and 4% mortgage-backed securities.

The firm generates 85% of its research internally.

Clients include IBM, World Bank, Honeywell and New York City Retirement Systems.

Richard G. Fischer is chief investment officer; Cecilia M. Murphy is client contact.

## Fisher Investments Inc.

301 Henrik Road, Woodside, Calif. 94062; (415) 851-3334

| | |
|---|---|
| Total assets managed | $140,000,000 |
| Tax-exempt assets managed | $80,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 21 |
| Types of accounts managed | CPG |

Fisher Investments Inc. is an equity and balanced manager.

Its equity approach is qualitative and quantitative, using internally developed evaluation techniques to identify unpopular companies with strong balance sheets and business advantages where the potential earnings yield is twice the long-term bond yield.

Fixed income is used during poor stock market environments. Its fixed-income approach is passive, with the main emphasis on staggered maturities and credit risk. Government, corporate and convertible debentures are used.

Kenneth L. Fisher, president, is chief investment officer; Joseph L. Toms, managing director, is client contact.

## Fiske Capital Management

40 Grove St. P.O. Box 96, Wellesley, Mass. 02181; (617) 237-0010

| | |
|---|---|
| Total assets managed | $60,000,000 |
| Tax-exempt assets managed | $47,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 75 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Fiske Capital Management Inc., an equity manager, uses cyclical asset allocation between equities and cash. In rising markets it emphasizes high upside beta issues. It doesn't predict market direction but coordinates with it based on internally developed quantitative research models.

The firm follows 1,600 stocks closely; all research is generated internally.

Edwin F. Thrall Jr. is chief investment officer; Steven Vantine, director-portfolio operations, is client contact.

## Flagship Financial Inc.

1 First National Plaza Suite 910, Dayton, Ohio 45402-1501; (513) 461-0332

Franklin Research & Development Corp. is an equity, fixed-income and balanced manager.

Its equity approach is earnings driven and sector rotational. It screens for social factors such as weaponry, South Africa, environmental and employee relations. Its fixed-income approach uses interest rate anticipation.

The firm is affiliated with Franklin Management.

Joan Bavaria is chief investment officer; Priscilla Wren, investment associate, and Edmund Bennett, vice president-marketing, are client contacts.

*Pensions & Investment Age* will highlight defined contribution plans on July 11.

Cutting diamonds and managing a pension fund have a lot in common.

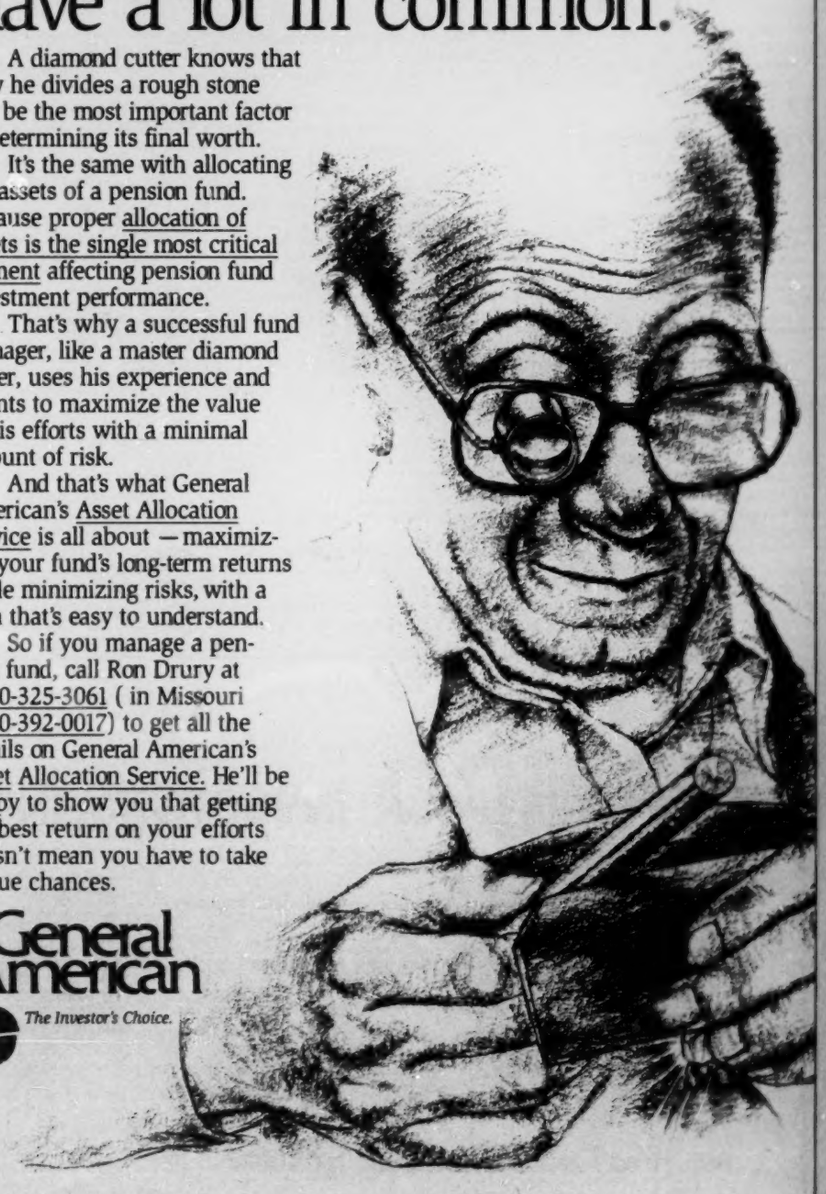
A diamond cutter knows that how he divides a rough stone will be the most important factor in determining its final worth.

It's the same with allocating the assets of a pension fund. Because proper allocation of assets is the single most critical element affecting pension fund investment performance.

That's why a successful fund manager, like a master diamond cutter, uses his experience and talents to maximize the value of his efforts with a minimal amount of risk.

And that's what General American's Asset Allocation Service is all about — maximizing your fund's long-term returns while minimizing risks, with a plan that's easy to understand.

So if you manage a pension fund, call Ron Drury at 1-800-325-3061 ( in Missouri 1-800-392-0017) to get all the details on General American's Asset Allocation Service. He'll be happy to show you that getting the best return on your efforts doesn't mean you have to take undue chances.



General American

The Investor's Choice.

| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 35 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 5 |
| Size of research staff | 4 |

Frontier Capital Management Co. is an equity and balanced manager.

Its equity approach focuses on companies with rapidly growing earnings. Frontier employs this approach in traditional growth and small-cap portfolios.

The firm follows 500 stocks closely and 3,000, generally; 65% of research is generated internally.

Clients include Donaldson, Lufkin & Jenrette; L.L. Bean; GTE; and GM.

J. David Wimberly is the chief investment officer; John A. McQuillkin is the client contact.

## Frost National Bank

P.O. Box 1600, San Antonio, Texas 78296; (512) 220-4361

| | |
|---|---|
| Total assets managed | $1,004,000,000 |
| Tax-exempt assets managed: | |
| Total | $210,000,000 |
| Commingled | $21,000,000 |
| Separate | $189,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients: | |
| Commingled | 140 |
| Separate | 65 |
| Types of accounts managed | EF |
| No. of portfolio managers | 6 |
| Size of research staff | 2 |

Frost National Bank is an equity, fixed-income and balanced manager. The bank also manages an equity fund of funds, using a data base to select the best mutual funds.

Its equity approach uses Graham & Dodd principles and proprietary valuation techniques to identify stocks undervalued in relation to the market. It uses options. Its fixed-income approach uses interest rate anticipation and sector analysis.

The parent is Cullen/Frost Bankers.

Vernon Torgerson, senior vice president, is the chief investment officer; Andrew S. Behrends, vice president, is the client contact.

## Furgueson Capital Management Inc.

19 W. 44th St., New York, N.Y. 10036; (212) 840-1781

| | |
|---|---|
| Total assets managed | $91,000,000 |
| Tax-exempt assets managed | $17,000,000 |
| Minimum separate account | $100,000 |
| Tax-exempt clients | 24 |
| Types of accounts managed | CE |
| No. of portfolio managers | 3 |

Furgueson Capital Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes growth and emerging growth stocks analyzed through Graham & Dodd principles.

Its fixed-income approach is passive. Bonds are used for income and balance. Maturities usually are laddered to reduce interest rate risk.

The firm follows 50 stocks closely and 100, generally; 20% of research is generated internally.

Cornelius Furgueson IV is chief investment officer; Mr. Furgueson and Stephen Orr are client contacts.

# G

## GAMCO Investors Inc.

655 Third Ave., New York, N.Y. 10017; (212) 972-2350

| | |
|---|---|
| Total assets managed | $1,536,000,000 |
| Tax-exempt assets managed | $740,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 55 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 15 |
| Size of research staff | 5 |

GAMCO Investors Inc. is an equity manager.

Using Graham & Dodd analysis, its investment approach hinges on identifying asset-rich companies that are selling at a discount to their private market value, and where a catalyst has emerged to display these values.

The asset mix Jan. 1 was 77% stocks and 23% cash.

The firm follows 300 stocks closely and 600, generally; all research is generated internally.

The parent is The Gabelli Group Inc.

Clients include ITT, Honeywell, University of Texas and Virginia Supplemental Retirement System.

Mario J. Gabelli is chief investment officer; Douglas R. Jamieson, vice president, is client contact.

## Gannett, Welsh & Kotler Inc.

22 Batterymarch St., Boston, Mass. 02109; (617) 482-8900

| | |
|---|---|
| Total assets managed | $353,000,000 |
| Tax-exempt assets managed | $40,000,000 |
| International assets managed | $4,000,000 |
| Index funds managed | 4,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 30 |
| Types of accounts managed | CFJ |
| No. of portfolio managers | 6 |
| Size of research staff | 3 |

Gannett, Welsh & Kotler Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses quantitative and Graham & Dodd analysis with sector rotation. Its fixed-income approach uses interest rate anticipation. Options are used.

The firm follows 40 stocks closely and 100, generally; 75% of research is generated internally.

Harold G. Kotler, president, is chief investment officer; Susan M. Ambrozavitch, vice president, is client contact.

## Ganucheau, Stupfel & Brumley Investment Counsel

301 Commerce, Suite 1001, Fort Worth, Texas 76102; (817) 332-9915

| | |
|---|---|
| Total assets managed | $140,000,000 |
| Tax-exempt assets managed | $110,000,000 |
| Dedicated funds managed | $10,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 12 |
| Types of accounts managed | CF |
| No. of portfolio managers | 2 |

Ganucheau, Stupfel & Brumley Investment Counsel is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd analysis in its value approach seeking low p/e, low price-to-book and low price-to-cash flow stocks.

Its fixed-income approach is passive, using laddered maturities.

Clients include American Airlines, St. Luke's Episcopal Hospital and Harbison Fischer.

Frank Ganucheau is chief investment officer; Lyle E. Brumley is client contact.

## Ganz Associates Inc.

1400 N.E. Miami Gardens Drive, North Miami Beach, Fla. 33160; (305) 949-2800

| | |
|---|---|
| Total assets managed | $167,000,000 |
| Tax-exempt assets managed | $85,000,000 |
| Real estate assets managed | $21,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 60 |
| Types of accounts managed | CFJ |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Ganz Associates Inc. is an equity, fixed-income and balanced manager.

Its equity approach applies rigorous market timing analysis, focusing on growth stocks and active convertible bond management for total return.

Its fixed-income approach uses interest rate anticipation. A proprietary program using only Treasury issue is offered.

The firm follows 100 stocks closely and 1,500, generally; 50% of research is generated internally.

Charles B. Ganz, president, is chief investment officer and client contact.

## Gardner and Preston Moss

1 Winthrop Square, Boston, Mass. 02110; (617) 482-6500

| | |
|---|---|
| Total assets managed | $3,068,000,000 |
| Tax-exempt assets managed | $2,578,000,000 |
| Real estate assets managed | $126,000,000 |
| International assets managed | $258,000,000 |
| Dedicated funds managed | $41,000,000 |
| Minimum separate account | $400,000 |
| Tax-exempt clients | 474 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 21 |
| Size of research staff | 4 |

Gardner and Preston Moss Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses low p/e stocks with sector rotation and market timing techniques. Managers vary asset mix based on economic, technical and valuation factors and use industry-specific key variables and relative valuation measures to vary sector weightings.

For fixed income, managers vary maturity based on interest rate outlook and yield curve valuation. They change sector and quality based on relative value.

The asset mix Jan. 1 was 35% stocks, 44% bonds, 16% cash and 5% mortgage-backed securities.

The firm follows 180 stocks closely and 6,000, generally; about 50% of research is generated internally.

The parent company is Britannia Arrow Holdings PLC.

Clients include Washington Metropolitan Transit Authority, IC Industries and Blue Cross/Blue Shield United of Wisconsin.

G. Kinnear Pash, president, is chief investment officer; Sue-Ellen Whelan, assistant vice president, is client contact.

Leasing: Oct. 3.

## Garrett Realty Advisors

1509 Main St., Suite 1105, Dallas, Texas 75201; (214) 749-7777

| | |
|---|---|
| Total assets managed | $34,000,000 |
| Tax-exempt assets managed | $30,000,000 |
| Real estate assets managed | $30,000,000 |
| Minimum separate account | $2,000,000 |
| Tax-exempt clients | 6 |
| Types of accounts managed | CG |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Garrett Realty Advisors, a real estate manager, purchases substantially leased industrial warehouse properties, at or below reproduction cost, in major U.S. distribution markets with strong credit tenants, primarily in the eastern half of the United States. The properties must be in industrial parks or along major interstate routes.

Joseph P. Garrett, president, is chief investment officer; Daniel H. Lawson is client contact.

## Garrison, Keogh & Co.

122 E. 42nd St., New York, N.Y. 10168; (212) 557-7440

| | |
|---|---|
| Total assets managed | $210,000,000 |
| Tax-exempt assets managed | $145,000,000 |
| International assets managed | $10,000,000 |
| Minimum separate account | $2,000,000 |
| Tax-exempt clients | 19 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 3 |

Garrison, Keogh & Co. is an equity and balanced manager.

Its equity approach uses emerging growth and low p/e stocks. Proprietary valuation screens are applied to a closely followed list of stocks with high returns, strong finances and low institutional ownership. Cash reserves are actively used to preserve capital. Bonds are bought only when risk/reward is favorable. Convertibles and selected high-yield issues are used.

Clients include Columbia University, Cowles Media and the ILGWU.

William G. Garrison, Thomas F. Keogh and William Bradford III are the chief investment officers; Mr. Bradford is client contact.

## Gateway Investment Advisers Inc.

400 TechneCenter Drive Suite 220, Cincinnati, Ohio 45150; (513) 248-2700

| | |
|---|---|
| Total assets managed | $250,000,000 |
| Tax-exempt assets managed | $86,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 30 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 3 |
| Size of research staff | 12 |

Gateway Investment Advisers Inc.'s primary strategy is dividend capture. It uses a computer program to evaluate stock prices and volume prior to ex-dividend dates. Call options and index put options are used for downside protection.

The firm follows 30 stocks closely and 80, generally; all research is generated internally.

Clients include Stockham Valve, O'Neill Foundation and Cintas.

Walter G. Sall, president, is chief investment officer; J. David Cummings and K. Bruce Jones, vice presidents, are client contacts.

## Geewax, Terker & Co.

99 Starr St., Phoenixville, Pa. 19460; (215) 935-3000

| | |
|---|---|
| Total assets managed | $2,100,000,000 |
| Tax-exempt assets managed | $2,100,000,000 |
| Minimum separate account | $25,000,000 |
| Tax-exempt clients | 29 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 4 |
| Size of research staff | 3 |

Geewax, Terker & Co., an equity manager, blends quantitative valuation analysis with sector rotation among growth/value stocks.

Options and stock index futures are used.

The asset mix Jan. 1 was 95% stocks and 5% cash.

It follows 2,000 stocks closely; 90% of research is generated internally.

Clients include Bell Atlantic, Rockefeller Foundation, Alcoa and International Paper.

John J. Geewax is chief investment officer and client contact.

| Dedicated funds managed | $1,900,000,000 |
| Tax-exempt clients | 16 |
| Types of accounts managed | CF |
| No. of portfolio managers | 15 |

GE Investments is an equity, fixed-income, balanced, real estate, international and private placements manager.

Its equity approach stresses growth and quality together with sector concentration. Systematic portfolios are quantitatively driven and value based.

Its fixed-income portfolios are actively managed using a relative value approach to domestic vs. international bond diversification. Financial futures and options are used.

In real estate, it makes direct investments in high-quality, well-located assets in major metropolitan areas, and uses aggressive property management, leasing and innovative financing techniques to maximize value.

The asset mix Jan. 1 was 39% stocks, 28% bonds, 14% cash, 8% equity real estate, 2% mortgages, 2% mortgage-backed securities and 7% private placements.

An additional $1.3 billion is managed externally on behalf of GE Investments.

The parent company is General Electric Co.

D.F. Frey, chairman and president, is chief investment officer; G.R. Norman, executive vice president, is client contact.

## General American Investors

330 Madison Ave., New York, N.Y. 10017; (212) 916-8408

| | |
|---|---|
| Total assets managed | $1,533,000,000 |

| Size of research staff | 3 |

General American Life Insurance Co. is an equity, fixed-income and balanced manager.

In equities, it offers an S&P 500 index fund, an NYSE low-cap fund and an actively managed fund using Morgan Stanley Asset Management as the investment adviser.

In fixed income, it offers two pooled bond accounts: one of actively managed public bonds, and another of passively managed private placements.

It originates mortgages and purchases real estate in areas where demand is expected to remain strong.

The separate account asset mix Jan. 1 was 8.1% stocks, 13.7% bonds, 12.2% cash and 66% mortgages; $23 million was in equity index funds and $33 million in bond index funds.

Leonard M. Rubenstein and Donald L. Smith are chief investment officers for securities and real estate, respectively; Ronald O. Drury, vice president-sales and marketing, is client contact.

## Geneva Capital Management

135 W. Wells St. Suite 640, Milwaukee, Wis. 53203; (414) 224-6002

| | |
|---|---|
| Total assets managed | $18,000,000 |
| Tax-exempt assets managed | $17,000,000 |
| Real estate assets managed | $510,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 24 |
| Types of accounts managed | C |
| No. of portfolio managers | 2 |

Geneva Capital Management Ltd. is an equity, fixed-income and balanced manager.

Its equity approach focuses on growth stocks; emphasis is on companies with healthy balance sheets, market leadership positions, earnings dynamics, low-cost production and minimum annual sales of $100 million.

Its fixed-income approach is passive. Bonds with maximum maturity of 10 years and minimum A rating are targeted. Volatility is reduced through laddered maturities.

William A. Priebe, president, is chief investment officer; Amy S. Croen, vice president, is client contact.

## GeoCapital Corp.

655 Madison Ave., New York, N.Y. 10021; (212) 935-0111

| | |
|---|---|
| Total assets managed | $430,000,000 |

FPB-100

Kenneth J. Gerbino & Co. is an equity, fixed-income and balanced manager.

Based on a proprietary economic model, it takes a top-down, long-term investment approach, attempting to take advantage of short-term valuation disparities. Its fixed-income approach uses interest rate anticipation, adjusting maturity dates to reflect the position in the credit cycle.

The firm follows 30 stocks closely and 80, generally.

Kenneth J. Gerbino is the chief investment officer; Michael J. Dlack is the client contact.

## GIM Global Advisors Inc.

745 Broad St., Newark, N.J. 07101; (201) 877-7805

| | |
|---|---|
| Total assets managed | $40,000,000 |
| Tax-exempt assets managed | $40,000,000 |
| International assets managed | $40,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 1 |
| Types of accounts managed | C |
| No. of portfolio managers | 2 |
| Size of research staff | 3 |

GIM Global Advisors Inc. is a global and international manager.

Its investment approach is top-down and macroeconomic. In equities, country and sector rotation are used emphasizing markets and companies experiencing an acceleration in earnings growth. In fixed income, interest rate anticipation is used with technical research to actively manage country exposure, currencies and maturities.

Options are used and stock index futures sometimes used.

Its real estate approach is opportunistic, using indirect investments (equity REITS or real estate companies).

The parent is B.V. Algemeen Vermogensbeheer (General Investment Management) GIM. The firm is an affiliate of Prudential Asset Management.

Peter S. Zwart, chairman, is chief investment officer; Joseph D. Reed, president, is client contact.

## Gintel Equity Management

No. 6 Greenwich Office Park, Greenwich, Conn. 06830; (203) 622-6400 or (800) 243-5808

| | |
|---|---|
| Total assets managed | $177,000,000 |
| Tax-exempt assets managed | $75,000,000 |
| Minimum separate account | $1,000,000 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 2 |
| Size of research staff | 3 |

Gintel Equity Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented using low p/e and Graham & Dodd analysis. The firm looks for emerging growth stocks and is willing to concentrate in 25 stocks of less.

Its fixed-income approach emphasizes interest rate anticipation and seeks relative value as seen by the yield spreads between issues and/or quality sectors.

The firm follow 40 stocks closely and 60, generally; 95% of research is generated internally.

Robert Gintel is chief investment officer; A.L. Robinson Jr. is client contact.

## GIT Investment Funds

1655 N. Fort Meyer Drive, Arlington, Va. 22209; (800) 336-3063 or (703) 528-6500

| | |
|---|---|
| Total assets managed | $362,000,000 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 5 |
| Size of research staff | 1 |

GIT Investment Funds is an equity and fixed-income manager that deals in mutual funds.

Its equity approach emphasizes low p/e ratios and offers products in aggressive-growth, equity-income and growth-income funds.

Its fixed-income approach is driven by interest rate anticipation.

The firm cannot break out tax-exempt accounts from among its mutual fund clients.

The parent company is Bankers Finance Investment Management Corp.

Thomas Miller is chief investment officer for stocks; Richard Gunn, for bonds. Elizabeth Henry, customer service manager, is client contact.

## Glass, Austin & Calvert Inc.

Suite 1100 InterFirst Plaza, 300 Convent St., San Antonio, Texas 78205; (512) 224-8241

| | |
|---|---|
| Total assets managed | $603,000,000 |
| Tax-exempt assets managed | $202,000,000 |
| International assets managed | $10,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 30 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 4 |
| Size of research staff | 2 |

Glass, Austin & Calvert Inc. is an equity, fixed-income and balanced manager.

Its equity approach is to identify securities undergoing a positive fundamental change that has been overlooked by the market.

Using interest rate anticipation and sector analysis, fixed-income investments are based primarily on yield curve and spread analysis; managers identify longer-term economic trends.

Clients include San Antonio Firemen and Policemen, and Luby's Cafeterias.

Edward M. Glass, president, is chief investment officer and client contact.

| Tax-exempt clients | 30 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 7 |
| Size of research staff | 2 |

The Glenmede Trust Co. is an equity, fixed-income, balanced and international manager.

Its equity approach uses Graham & Dodd and quantitative analysis to identify low p/e stocks. It seeks equities with better-than-market financial characteristics with below-market multiples.

Its fixed-income approach uses sector analysis. It observes historic spreads to invest in maturities and sectors with the most opportunity.

Its use of options is limited.

The asset mix Jan. 1 was 53% stocks, 15% bonds, 20% mortgage-backed securities, 10% cash and 2% foreign equity.

Clients include Pew Memorial Trust, Pennsylvania State Teachers, Elwin Institute and Grove City College.

John W. Church Jr., senior vice president, is chief investment officer; Philip Young and Thomas Dunlevy are client contacts.

## Glickenhaus & Co.

6 E. 43rd St., New York, N.Y. 10017-4641; (212) 953-7800

| | |
|---|---|
| Total assets managed | $1,800,000,000 |
| Tax-exempt assets managed | $1,200,000,000 |
| 401(k)/457 assets managed | $10,000,000 |
| 401(k)/457 clients | 4 |
| Minimum separate account | $4,000,000 |
| Tax-exempt clients | 90 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 14 |
| Size of research staff | 4 |

Glickenhaus & Co. is an equity, fixed-income and balanced manager.

Its equity approach is very risk conscious, evaluating downside exposure against the opportunity for upside potential. A value-oriented, bottom-up approach to stock selection includes characteristics such as low p/es, high yield, low price-to-book ratios and low price-to-sales.

Its fixed-income approach uses interest rate anticipation, analyzing credit and maturity in relation to economic conditions. Its risk-conscious philosophy dictates investment in high-quality issues.

The asset mix Jan. 1 was 85% stocks, 10% cash and 5% convertible bonds.

The firm follows 100 stocks closely and 250, generally; 80% of research is generated internally.

Clients include New York State Teachers, Pennsylvania Employes, Xerox and Philip Morris.

Seth M. Glickenhaus, senior partner, is chief investment officer; Connie Moak Mazur, partner, is client contact.

## Gofen & Glossberg Inc.

401 N. Michigan Ave. Suite 3065, Chicago, Ill. 60611; (312) 828-1100

| | |
|---|---|
| Total assets managed | $4,750,000,000 |
| Tax-exempt assets managed | $400,000,000 |
| Minimum separate account | $750,000 |
| Tax-exempt clients | 145 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 8 |
| Size of research staff | 4 |

Gofen & Glossberg Inc. is an equity, fixed-income and balanced manager.

Its equity approach stresses a total return concept, using valuation techniques emphasizing the relationship of p/e ratios to anticipated growth rates.

Its fixed-income approach uses interest rate anticipation, seeking the maximum rate of return consistent with minimal volatility of principal values.

The asset mix Jan. 1 was 40% stocks, 50% bonds and 10% cash.

The firm follows 100 stocks closely and 500, generally; 30% of the research is generated internally.

Carl X. Elvove, president, is chief investment officer; Mark R. Goodman, assistant secretary and treasurer, is client contact.

## Goldman, Sachs & Co.

4900 Sears Tower, Chicago, Ill. 60606; (800) 621-2550

| | |
|---|---|
| Total assets managed | $14,190,000,000 |
| Tax-exempt assets managed | $1,162,000,000 |
| Tax-exempt clients | 405 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 3 |

Goldman, Sachs & Co., a fixed-income manager, uses interest rate anticipation, focusing on high-quality, high-income securities consistent with preservation of capital.

The asset mix Jan. 1 was 70% bonds and 30% commercial paper.

All research is generated internally.

Clients include Ameritech, Florida Power & Light, Harris Associates and Harris Trust.

Bob Giordano, partner, is chief investment officer. Prospective clients can contact the account administration desk at (312) 993-4400.

## Govaars and Associates

2280 University Drive, Newport Beach, Calif. 92660; (714) 650-0675

| | |
|---|---|
| Total assets managed | $3,700,000,000 |
| Tax-exempt assets managed | $13,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | C |
| No. of portfolio managers | 7 |
| Size of research staff | 2 |

Govaars and Associates, a fixed-income manager, attempts to add value by anticipating interest rate trends, rotating sectors, capturing volatility and assessing relative values. Using its expertise in the valuation of mortgage-backed securities, the firm monitors portfolio composition, weighted average life and effective duration to profit from the current and expected phases of the market cycle. Options and fixed-income futures are used.

William K. Mawhorter, executive vice president, is chief investment officer; Sid McCausland is client contact.

## Gradison & Co. Inc.

580 Walnut St., Cincinnati, Ohio 45202; (513) 579-5866

| | |
|---|---|
| Total assets managed | $155,000,000 |
| Tax-exempt assets managed | $89,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 71 |
| Types of accounts managed | CFJ |
| No. of portfolio managers | 3 |
| Size of research staff | 9 |

Gradison & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach is growth- and value-oriented, using quantitative techniques. The approach is earnings driven and disciplined.

Its fixed-income approach is passive, using government and agency securities in staggered maturities.

Clients include Dugan & Meyers Construction and Cincinnati Museum of Natural History.

William J. Leugers Jr., executive vice president, is the chief investment officer; Alfred M. Brunner, vice president, is the client contact.

## Granahan Investment Management Inc.

303 Wyman St., Waltham, Mass. 02154; (617) 890-4412

| | |
|---|---|
| Total assets managed | $80,000,000 |
| Tax-exempt assets managed | $0 |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 2 |

Granahan Investment Management Inc., an equity manager, focuses on small, well-managed companies as well as under-researched specialty growth companies.

The firm follows 100 stocks closely and 200, generally; all research is generated internally.

John J. Granahan is chief investment officer; Jane M. White is client contact.

## Grantham, Mayo, Van Otterloo & Co. International

40 Rowes Wharf, Boston, Mass. 02110; (617) 330-7523

| | |
|---|---|
| Total assets managed | $1,857,000,000 |
| Tax-exempt assets managed | $1,857,000,000 |
| International assets managed | $1,857,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 33 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 5 |
| Size of research staff | 3 |

Grantham, Mayo, Van Otterloo & Co. International is an international equity manager.

Its International Quantitative Equities pool uses quantitative analytical screening techniques to achieve low-beta foreign equity exposure with a low p/e profile. Portfolio turnover averages less than 20% per year.

The asset mix Jan. 1 was 88% stocks, 1% bonds and 11% cash.

The firm follows 1,200 stocks closely and 3,000 generally.

The parent company is Grantham, Mayo, Van Otterloo & Co.

## Great-West Life Assurance

8505 E. Orchard Road, Englewood, Colo. 80111; (303) 889-3000

| | |
|---|---|
| Total assets managed | $15,524,000,000 |
| Tax-exempt assets managed: | |
| Total | $5,500,000,000 |
| Pooled accounts | $290,000,000 |
| GICs | $1,364,000,000 |
| Annuities | $515,000,000 |
| Other | $3,331,000,000 |
| 401(k)/457 assets managed | $1,263,000,000 |

| Tax-exempt clients | 45 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 3 |
| Size of research staff | 5 |

Hahn Holland & Grossman is an equity, fixed-income and balanced manager.

Its equity approach emphasizes conserving capital in falling markets. The firm uses a top-down method concentrating on evaluation of market direction, identification of attractive industries and large-cap, value-oriented stocks. Stock index futures are used.

Its fixed-income approach is passive, using interest rate forecasts to structure portfolios with long, intermediate or short obligations from government or AAA corporate securities depending on yield spreads.

The asset mix Jan. 1 was 60% stocks, 15% bonds and 25% cash.

The firm follows 50 stocks closely; 80% of research is generated internally.

Clients include University of Minnesota, Chicago Laborers and Chrysler.

Donald Hahn is chief investment officer; Kenneth Grossman is client contact.

## Hallmark Capital Management Inc.

1 Exchange Plaza, New York, N.Y. 10006; (212) 363-4480

| | |
|---|---|
| Total assets managed | $84,000,000 |
| Tax-exempt assets managed | $70,000,000 |
| Minimum separate account | $3,000,000 |
| Tax-exempt clients | 23 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Hallmark Capital Management, acquired by the Prudential Asset Management Group in February, is an equity and balanced manager.

Its equity approach uses Graham & Dodd principles, stressing value established by the use of a fundamental valuation model and confirmed by traditional fundamental research. The mix of fixed income and cash equivalent holdings is based on interest rate anticipation. Portfolio composition is conservative and risk averse.

The asset mix Jan. 1 was 31% stocks, 52% bonds and 17% cash.

The parent company is Prudential Insurance Co. of America.

Robert L. Ardizzone is the chief investment officer; Peter S. Hagerman is the client contact.

## Hambrecht & Quist Equity Management

235 Montgomery St., San Francisco, Calif. 94104; (415) 986-5115

| | |
|---|---|

| Tax-exempt assets managed | $20,000,000 |
| Minimum separate account | $300,000 |
| Tax-exempt clients | 4 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Hambrecht & Quist Equity Management, an equity and balanced manager, offers emerging growth portfolios. It focuses on small-cap, undervalued stocks using both quantitative and qualitative measures.

The firm follows 250 stocks closely and 1,000 generally; 50% of the research is generated internally.

The parent is Hambrecht & Quist Group.

Clients include Carnegie Mellon University endowment and Equifax.

Michael T. Jackson is chief investment officer; Eric L. Munson, vice president, is client contact.

## John Hancock Financial Services

P.O. Box 111, Boston, Mass. 02117; (617) 421-6294

| | |
|---|---|
| Total assets managed | $40,868,000,000 |
| Tax-exempt assets managed: | |
| Total | $15,070,000,000 |
| Pooled accounts | $1,330,000,000 |
| Separate accounts | $881,000,000 |
| GICs | $6,944,000,000 |
| Annuities | $1,509,000,000 |
| Other | $4,626,000,000 |
| Real estate assets managed | $1,026,000,000 |
| Indexed assets managed | $12,000,000 |
| Tax-exempt clients | 174 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 19 |
| Size of research staff | 27 |

John Hancock Financial Services is a real estate, international, GIC, timber, venture capital, private placements and convertibles manager.

Its equity and fixed-income investments are handled through Independence Investment Associates, which is profiled elsewhere in this issue. Fixed-income futures are used.

For real estate, it offers a full range of equity-oriented investments, including pooled and non-pooled accounts, joint ventures and direct investments in commercial real estate and timber.

The separate account asset mix Jan. 1 was 17% bonds, 4% cash, 51% equity real estate, 0.5% mortgages and 27.5% other; $11.5 million was invested in equity index funds.

Its clients include Eastman Kodak, Honeywell and Hughes Aircraft.

Foster L Aborn, president-investments and pension sector, is chief investment officer; George F. Miller, senior vice president-investment marketing, is client contact.

## Hanseatic-American Group

341 Madison Ave., 17th Floor, New York, N.Y. 10017; (212) 599-3003

| | |
|---|---|
| Total assets managed | $130,000,000 |
| Tax-exempt assets managed | $0 |
| Minimum separate account | $4,000,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 3 |

Hanseatic-American Group Inc. is an equity and balanced manager.

Its equity approach combines solid fundamental analysis and quantitative hedging disciplines to control market risk. It focuses on growth and emerging growth stocks using market timing and sector rotation. Options, stock index futures and fixed-income futures are used. Its total-return approach to fixed income combines interest rate anticipation and sector analysis.

The parent companies are Hanseatic Corp. and American Asset Management Co.

Philip G. Putnam, chief executive officer, is chief investment officer; George A. Kolodka, vice president, is client contact.

## Hanson Investment Management Co.

4000 Civic Center Drive, San Rafael, Calif. 94903; (415) 499-1400

| | |
|---|---|
| Total assets managed | $804,000,000 |
| Tax-exempt assets managed | $499,000,000 |
| Real estate assets managed | 7,000,000 |
| Minimum separate account | $3,000,000 |
| Tax-exempt clients | 25 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 5 |
| Size of research staff | 1 |

Hanson Investment Management Co. is an equity and balanced manager.

It uses Graham & Dodd principles and emphasizes low p/e stocks in its value-oriented, bottom-up approach.

Its fixed-income approach uses interest rate anticipation.

The firm follows 35 stocks closely and 60 generally; 50% of research is generated internally.

The parent company is United Asset Management.

Clients include Hawaii, City and County of San Francisco, McKesson and Miami.

Herbert M. Hanson Jr. is chief investment officer and client contact.

## Harbor Capital Management

265 Franklin St., Suite 1800, Boston, Mass. 02110; (617) 439-4500

| | |
|---|---|
| Total assets managed | $1,573,000,000 |
| Tax-exempt assets managed | $1,160,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 70 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 7 |
| Size of research staff | 5 |

Harbor Capital Management Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes growth and low p/e stocks, using a disciplined, "bond-competitive" decision-making process and strong fundamental research.

Its fixed-income approach is conservative, stressing a real rate of return using fundamental economic and interest rate analysis.

The asset mix Jan. 1 was 48% stocks, 42% bonds and 10% cash.

The firm follows 150 stocks closely

### Harris Associates L.P.

2 N. LaSalle St., Chicago, Ill. 60602; (312) 621-0612

| | |
|---|---|
| Total assets managed | $2,629,000,000 |
| Tax-exempt assets managed | $1,135,000,000 |
| International assets managed | 87,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 156 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 7 |
| Size of research staff | 9 |

Harris Associates L.P., an equity and balanced manager, takes a value-oriented approach that produces portfolios with p/e and price/book ratios less than market; yield and ROE greater than market; and positive-low volatility rate of return. Its fixed-income approach is passive.

The asset mix Jan. 1 was 59% stocks, 12% bonds and 29% cash; $87 million was in foreign stocks.

The firm follows 150 stocks closely and 400 to 500 generally; 50% of research is generated internally.

Clients include Federated Department Stores, Texaco, Budd and Dean Foods.

Myron R. Szold is the chief investment officer; Earl J. Rusnak Jr. is the client contact.

### Harris Bretall Sullivan & Smith Inc.

1 Post St., Suite 2300, San Francisco, Calif. 94104; (415) 391-8040

| | |
|---|---|
| Total assets managed | $400,000,000 |
| Tax-exempt assets managed | $300,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 15 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 5 |
| Size of research staff | 10 |

Harris Bretall Sullivan & Smith Inc. is an equity, fixed-income and balanced manager.

Its equity approach combines a disciplined selection process, focusing on growth stock, with tactical asset allocation. Its fixed-income approach uses interest rate anticipation and active yield curve analysis; Treasuries are purchased.

The firm follows 220 stocks closely and 500 generally; 75% of research is generated internally.

Clients include Alameda County and Asian Development Bank.

Jack Sullivan is client contact.

### Harris, Greenhouse, Kutzel

56 Beaver St., New York, N.Y. 10004; (212) 514-9800

| | |
|---|---|
| Total assets managed | $600,000,000 |
| Tax-exempt assets managed | $600,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 50 |
| Types of accounts managed | CJG |
| No. of portfolio managers | 5 |

Harris, Greenhouse, Kutzel Inc. is an equity, fixed-income and balanced manager.

Following its value-oriented equity approach, the firm buys out-of-favor issues that offer above-average growth potential, with the major impact based on the stock's historical position in the market vs. the economic cycle.

Its fixed-income approach is based on interest rate anticipation, with a maturity schedule of six years or less; the firm trades actively along the curve.

The asset mix Jan. 1 was 45% stocks, 45% bonds and 10% cash.

The firm follows 150 stocks closely and 250 generally; 50% of the research is generated internally.

Clients include Western Pennsylvania Teamsters and City of Pittsburgh.

Warren Greenhouse is chief investment officer; Joseph Kutzel, managing director, is client contact.

### Harris Trust and Savings Bank

P.O. Box 755, 190 LaSalle St., Chicago, Ill. 60690; (312) 461-2121

| | |
|---|---|
| Total assets managed | $14,293,000,000 |
| Tax-exempt assets managed: | |
| Total | $8,703,000,000 |
| Commingled | $3,061,000,000 |

| Types of accounts managed | CEFJG |
| No. of portfolio managers | 12 |
| Size of research staff | 8 |

Harris Trust and Savings Bank is an equity, fixed-income, balanced, real estate, international equity, convertible securities, stock index and futures/options manager.

Its equity approach incorporates a five-factor model: low p/e; dividend discount; earnings momentum; earnings estimate change; and price momentum. Stocks are then ranked by a process that weights each model to its predictive power.

Its fixed-income approach uses a structured decision-making process reliant on quantitative models to establish exposure in duration, term structure and sector/quality. Options and financial futures are used.

Real estate investments are equity oriented and made in unleveraged industrial, retail and office properties in the $1 million to $3 million range.

The asset mix Jan. 1 was 27% stocks, 31% bonds, 40% cash, 1% equity real estate and 1% mortgage-backed securities.

The parent is Bank of Montreal.

John C. Kirscher, senior vice president, is chief investment officer; Robert E. Vanden Bosch, senior vice president, is client contact.

### Hartford Life Insurance Co.

| Tax-exempt clients | 63 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 4 |

Heartland Capital Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses market timing and asset allocation consistent with the primary market trend. Stock selection emphasizes consistent growth with accelerating earnings per share.

Its fixed-income approach uses interest rate anticipation.

Clients include Ball, Indiana Gas, Hanover College and Indiana Pacers.

Barry F. Ebert and Robert D. Markley are the chief investment officers and the client contacts.

## Heilweil Hollander & Jacobs

400 Perimeter Center Terraces, Suite 190, Atlanta, Ga. 30346; (404) 393-8725

| | |
|---|---|
| Total assets managed | $92,000,000 |
| Tax-exempt assets managed | $29,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 69 |
| Types of accounts managed | CF |
| No. of portfolio managers | 3 |

Heilweil Hollander & Jacobs Inc. is an equity, fixed-income and balanced manager.

The firm takes a defensive value approach, concentrating on capital preservation and appreciation. Investments are made when prospects for further price deterioration seem minimal and strong potential exists for significant appreciation in two to three years.

In fixed income, both external events and market psychology are used in interest rate determination. Credit analysis focuses on underrated issues.

Marc S. Heilweil is chief investment officer; Brenda Dorrien is client contact.

## Heitman Advisory Corp.

180 N. LaSalle St., Suite 3600, Chicago, Ill. 60614; (312) 855-5700

| | |
|---|---|
| Total assets managed | $4,300,000,000 |

## Hoisington Investment Management Co.

950 Echo Lane, Suite 210, Houston, Texas 77024; (713) 467-7900

| | |
|---|---|
| Total assets managed | $635,000,000 |
| Tax-exempt assets managed | $635,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 17 |
| Types of accounts managed | CFG |
| No. of portfolio managers | 2 |

Hoisington Investment Management Co., a fixed-income manager, uses a risk-averse, market-timing approach. Very short maturities are used during periods of high risk, while 30-year maturities capitalize on low-risk periods.

All tax-exempt assets Jan. 1 were in cash; long Treasuries were used in the first and fourth quarters of 1987.

Clients include TRW, 3M, Sara Lee and Unocal.

Van R. Hoisington, president, is chief investment officer; Janice Teague Green, senior vice president, is client contact.

## Home Capital Services Inc.

59 Maiden Lane, 21st Floor, New York, N.Y. 10038; (212) 530-6016

| | |
|---|---|
| Total assets managed | $4,000,000,000 |
| Tax-exempt assets managed | $24,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 3 |
| Types of accounts managed | C |
| No. of portfolio managers | 5 |
| Size of research staff | 2 |

Home Capital Services Inc. is an equity, fixed-income and balanced manager.

Its equity approach is quantitative and uses a proprietary valuation model to select undervalued securities that show evidence of positive earnings momentum. Its fixed-income approach emphasizes sector analysis, combining high-yield portfolios with investment-grade corporate bonds and government obligations.

The parent is Home Group Inc.

Hiram F. Moody Jr. is chief investment officer; Erich G. Weissenberger Jr., director of marketing/client services, is the client contact.

## Home Life Insurance Co.

75 Wall St., New York, N.Y. 10005; (212) 428-2000

| | |
|---|---|
| Total assets managed | $3,542,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,278,000,000 |
| Pooled accounts | $19,000,000 |
| GICs | $719,000,000 |
| Annuities | $9,000,000 |
| Other | $531,000,000 |
| Tax-exempt clients | 1,000 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 3 |

Home Life Insurance Co. is an equity, fixed-income and balanced manager.

Its fixed-income approach uses a seven-year laddered portfolio with emphasis on preservation of principal.

In addition to the above assets, $30 million in pooled separate equity accounts is managed for Home Life Insurance by First Manhattan Capital Management.

The separate account asset mix Jan. 1 was 70% stocks and 30% bonds.

The insurer follows 200 stocks closely.

The parent company is Home Life Financial Resources.

John A. Fabian, senior vice president, is chief investment officer; John F. Hannan, vice president, is client contact at (201) 980-4402.

## Horgan Tattersall Investment Counsel Ltd.

Suite 1904 P.O. Box 95, The Cadillac Fairview Tower, 20 Queen St. W., Toronto, Ontario M5H 3R3; (416) 979-1818

| | |
|---|---|
| Total assets managed | $50,000,000 |
| Tax-exempt assets managed: | |
| Total | $13,000,000 |
| For subsidiaries of U.S. firms | $0 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 2 |
| Types of accounts managed | C |
| No. of portfolio managers | 2 |

Horgan Tattersall Investment Counsel Ltd., a Canadian firm, is an equity, fixed-income, balanced, small-cap Canadian and international manager.

Its equity approach is value oriented without a dogmatic adherence to any approach. Its fixed-income approach uses interest rate anticipation, concentrating portfolios in the highest quality issues to permit rapid implementation of strategy changes.

Patrick S. Horgan is chief investment officer; Mr. Horgan and Robert Tattersall, vice president, are client contacts.

## Hotchkis and Wiley

800 W. Sixth St. Suite 540, Los Angeles, Calif. 90017-2708; (213) 623-4073

| | |
|---|---|

| Minimum separate account | $30,000,000 |
| Tax-exempt clients | 27 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 3 |

Hotchkis and Wiley, an equity and balanced manager, uses Graham & Dodd analysis and emphasizes preservation of capital and the power of dividend return compounded.

The asset mix Jan. 1 was 78% stocks, 11.5% bonds and 10.5% cash.

The firm follows 100 stocks closely and 250, generally.

Clients include Rockwell, PacTel, GTE, Oregon and American Airlines.

George J. Rebhan, director of marketing, is the client contact.

## HT Investors Inc.

321 S. Main St., Providence, R.I. 02903; (401) 276-6100

| | |
|---|---|
| Total assets managed | $911,000,000 |
| Tax-exempt assets managed | $911,000,000 |
| 401(k)/457 assets managed | $17,000,000 |
| 401(k)/457 clients | 8 |
| Real estate assets managed | $10,000,000 |
| International assets managed | $2,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 124 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 5 |

HT Investors Inc. is an equity, fixed-income, balanced, real estate, international and GIC manager.

Its equity approach seeks relative value among stocks showing high profitability, positive internal cash flow, strong technical characteristics, low price-to-book ratios and high return on equity. Sector rotation is based on a top-down, macroeconomic outlook. Its fixed-income approach uses interest rate anticipation, and attempts to add value through swaps and purchases of significantly undervalued issues.

The asset mix Jan. 1 was 45% stocks, 29% bonds, 25% cash and 1% equity real estate; $2 million was in foreign stocks.

The parent is RIHT Financial Corp., a Bank of Boston subsidiary.

H.M. Greenleaf Jr., president, is chief investment officer; J. Richard Schroder, marketing director, is client contact.

## Hudson Investment Management Co.

11 Bailey Ave. Suite 1, Ridgefield, Conn. 06877; (203) 438-8332

| | |
|---|---|
| Total assets managed | $0 |
| Minimum separate account | $1,000,00 |
| No. of portfolio managers | 1 |

Hudson Investment Management Co., a fixed-income manager, structures portfolios to be specifically different from, and less volatile than, the market. Incremental returns are sought from selecting misunderstood securities and overweighting out-of-favor sectors. Duration is below market.

Howard G. Hudson is chief investment officer and client contact.

## Huntington Asset Management Co.

41 S. High St., Columbus, Ohio 43215; (614) 463-3797

| | |
|---|---|
| Total assets managed | $1,500,000,000 |
| Tax-exempt assets managed: | |
| Total | $500,000,000 |
| Commingled | $350,000,000 |
| Separate | $150,000,000 |
| Real estate assets managed | $27,000,000 |
| International assets managed | $6,000,000 |
| Indexed assets managed | $2,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients: | |
| Commingled | 400 |
| Separate | 200 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 6 |

Huntington Asset Management Co. is an equity, fixed-income and balanced manager.

Its equity approach is quantitative, with a computer screen that uses a dividend discount model.

Its fixed-income approach is based on interest rate anticipation and sector analysis. Probability analysis and historic yield spread relationships are used; capital preservation is a priority.

The asset mix Jan. 1 was 40% stocks, 50% bonds, 9.5% cash and 0.5% equity real estate; $25 million was in mortgage-backed securities, $6 million in foreign stocks and $2 million in equity index funds.

The parent company is Huntington Bancshares Inc.

Douglas V. Epp is chief investment officer; William Spetrino, vice president, is client contact.

## Hutchinson National Bank and Trust Co.

P.O. Box 1488, Hutchinson, Kan. 67504-1488; (316) 662-0561

| | |
|---|---|
| Total assets managed | $296,000,000 |
| Tax-exempt assets managed: | |
| Total | $74,000,000 |
| Commingled | $18,000,000 |
| Separate | $56,000,000 |
| Real estate assets managed | $5,000,000 |
| International assets managed | $1,000,000 |
| Dedicated assets managed | $10,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients: | |
| Commingled | 187 |
| Separate | 93 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 5 |
| Size of research staff | 3 |

Hutchinson National Bank and Trust Co. is an equity, fixed-income, balanced and options manager.

Its equity approach combines market and business cycle timing in a top-down approach used with industry segment rotation.

Its fixed-income approach emphasizes marketability; interest rate anticipation is the catalyst to buys and sells.

Options, stock index futures and fixed-income futures are used.

It provides portfolio insurance to two clients covering $2 million in assets.

Dale E. Page, vice president, is the chief investment officer and client contact.

## Hutton Asset Management

71 Broadway 10th Floor, New York, N.Y. 10004; (212) 742-7763

| | |
|---|---|
| Total assets managed | $22,243,000,000 |
| Tax-exempt assets managed | $1,536,000,000 |
| Types of clients | CEFJG |

Hutton Asset Management offers equity, fixed-income and balanced management through its two subsidiaries, profiled below. The parent company is Shearson Lehman Hutton Inc., a unit of American Express Co.

• HUTTON CAPITAL MANAGEMENT, with $1.436 billion in tax-exempt assets, is an equity and balanced manager. It has 349 U.S. tax-exempt institutional clients, nine portfolio managers and a nine-member research staff.

Its value-oriented equity style seeks to identify companies characterized by an attractive combination of profitability, growth and financial strength, priced at below market p/e ratios.

Its fixed-income approach focuses on yield curve inflection and relative attractiveness of government vs. corporate issues. Maturities are kept below 10 years.

The asset mix Jan. 1 was 49% stocks, 29% bonds, 22% cash.

Peter N. Smith, director, is chief investment officer and client contact.

• HUTTON GOVERNMENT SECURITIES MANAGEMENT, with $100 million in tax-exempt assets, is a fixed-income manager that uses U.S. government and selected agency issues.

The asset mix Jan. 1 was 50% Treasury bills and 50% Treasury notes.

There are three portfolio managers and a three-member research staff.

Tom Styles, chief executive officer of Hutton Asset Management, is chief investment officer; Rob Olcott, national product manager, is client contact.

## Idaho First National Bank

P.O. Box 7928, Boise, Idaho 83707; (208) 383-7200

| | |
|---|---|
| Total assets managed | $600,000,000 |
| Tax-exempt assets managed: | |
| Total | $310,000,000 |
| Commingled | $21,000,000 |
| Separate | $289,000,000 |
| Real estate assets managed | $32,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients: | |
| Commingled | 300 |
| Separate | 25 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 5 |
| Size of research staff | 2 |

Idaho First National Bank is an equity, fixed-income, balanced and real estate manager.

Its equity approach uses a value orientation toward stock selection that originates with a top-down economic overview. It prefers companies with low financial leverage, expanding earnings, below-market p/e and low price/book. Options are used.

Its fixed-income approach uses interest rate trends and forecasts generated from a fundamental view to set portfolio durations. Sector analysis is used to identify vehicles and add incremental returns.

It purchases open-end pooled real estate funds by client specification.

The parent is Moore Financial Group Inc.

Rudy Thomas, vice president and manager-investments, is chief investment officer; John F. Hart, assistant vice president and manager-employee benefit investments, is client contact.

## IDS Equity Advisors/IDS Fixed-Income Advisors

| Minimum separate account | $500,000 |
| Tax-exempt clients | 288 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 14 |

Independence One Investment Services is composed of three subsidiaries: Michigan National Corp.; PRIMA; and Morison Asset Management.

• Michigan National Corp. is an equity, fixed-income, balanced, international and GIC manager.

In equities, it invests in the highest quality companies at points where the market has significantly undervalued the long-run prospects. Its fixed-income approach is technical/fundamental, focusing on a longer-range outlook, as well as relative risk/potential over shorter time horizons.

As of Jan. 1, Michigan National had $990 million in assets, of which $400 million was tax exempt. Its asset mix was 35% stocks, 50% bonds and 15% cash.

Charles Coristine is the chief investment officer and client contact.

• PRIMA is a fixed-income manager.

Its fixed-income approach uses sector analysis and active trend following. It analyzes price movements of Treasuries over historical time periods. It identifies patterns that systematically repeat and correlate with periods of strong performance.

At Jan. 1, PRIMA had $34 million under management, of which $25 million were tax exempt; all was in bonds.

Josef Blass, executive vice president, is chief investment officer; Barbara K. Baker, vice president, is client contact.

• Morison Asset Management, in Minneapolis, is an equity, fixed-income, balanced and international manager.

Its equity approach puts primary emphasis on asset allocation over business and interest rate cycles based on absolute potential/risk analysis. Asset allocation is driven by availability of quality issues using a core stock list of fast growth companies.

Its fixed-income approach takes advantage of yield curve analysis to increase yield and to control maturity and duration of the portfolio.

As of Jan. 1, it managed $370 million, of which $217 million was tax exempt. Its asset mix was 30% stocks, 30% bonds and 40% cash.

Thomas J. Morison is the chief investment officer; Ron Halverson, senior vice president, is client contact.

| Tax-exempt clients | 10 |
| Types of accounts managed | CFG |
| No. of portfolio managers | 2 |
| Size of research staff | 6 |

Invista Capital Management Inc., an equity manager, develops investment themes and then selects stocks based on expected long-term cash flows. Sector rotation is used.

The asset mix Jan. 1 was 98.3% stocks and 1.7% cash.

The firm follows 5,000 stocks closely and 3,000 generally; 95% of the research is conducted internally.

The parent is Principal Financial Group.

Clients include U.S. Olympic Foundation, Iowa Public Employees and Martin Marietta.

S. Ralph Kosmicke is chief investment officer; Kenneth Fridrich, vice president, is client contact.

## Irving Trust Co.

One Wall St., New York, N.Y. 10015; (212) 635-8221

| | |
|---|---|
| Total assets managed | $8,534,600,000 |
| Tax-exempt assets managed: | |
| Total | $5,341,000,000 |
| Commingled | $2,464,000,000 |
| Separate | $2,877,000,000 |
| Real estate assets managed | $320,000,000 |
| International assets managed | $6,000,000 |
| Indexed assets managed | $40,000,000 |
| Dedicated assets managed | $367,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients: | |
| Commingled | 250 |
| Separate | 193 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 10 |
| Size of research staff | 11 |

Irving Trust Co. is an equity, fixed-income, balanced, international and passive/structured manager.

Its value-oriented equity approach is bottom-up, seeking stocks that are cheap relative to the company's anticipated profit and dividend growth. Primary emphasis is on companies expected to experience significant acceleration in earnings growth during the next three to five years.

Its active fixed-income approach uses valuation analysis and interest rate forecasting to determine maturity/duration. Maturity averages between three and 15 years. Options and fixed-income futures are used.

The asset mix Jan. 1 was 12% stocks, 77% bonds (including mortgage-backed securities) and 11% cash.

The parent company is Irving Bank Corp.

Gary N. Yalen, executive vice president, is the chief investment officer; John A. Spiezia, vice president, is the client contact.

## Ivory & Sime International

39 Main St., Chatham, N.J. 07928; (201) 635-6700

Jacques & Kurdziel Ltd. is a real estate manager for Dutch institutions. It seeks office buildings and regional malls, on an all-cash basis, with development or redevelopment potential.

W. Murray Jacques and Donald M. Kurdziel are the client contacts.

Consultants: Oct. 17.

PROFILES

### James Investment Research
P.O. Box 8, Alpha, Ohio 45301; (513) 426-7640

| | |
|---|---|
| Total assets managed | $450,000,000 |
| Tax-exempt assets managed | $171,000,000 |
| Minimum separate account | $2,500,000 |
| Tax-exempt clients | 64 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 5 |
| Size of research staff | 8 |

James Investment Research Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses growth and low p/e stocks with sector rotation, market timing and quantitative approaches. It seeks neglected stocks that have excellent fundamentals.

For fixed-income, only high-quality bonds are bought, with maturities based on interest rate forecasts.

The firm follows 160 stocks closely and 4,000, generally; all research is generated internally.

Francis E. James Jr., president and founder, is chief investment officer; Diane M. Rose and Barry R. James are the client contacts.

### James River Capital Management Inc.
909 E. Main St. Suite 321, Richmond, Va. 23219; (804) 782-8725

| | |
|---|---|
| Total assets managed | $150,000,000 |
| Tax-exempt assets managed | $72,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 50 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 4 |

James River Capital Management Inc. is an equity and balanced manager.

Asset allocation and stock selection are driven by systematic analysis of valuation, fundamental and psychological data. Stocks are screened for low p/e, earnings momentum and reported earnings above expectations.

Its fixed-income approach is based on interest rate anticipation. Computer-based models analyze economic and monetary rate of change data.

The parent company is Scott & Stringfellow Financial Inc.

Paul C. Munson is chief investment officer; Charles K. Fox, managing director, is client contact.

### Jamison, Eaton & Wood Inc.
39 Main St., Chatham, N.J. 07928; (201) 635-6700

| | |
|---|---|
| Total assets managed | $5,361,000,000 |
| Tax-exempt assets managed | $5,257,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 33 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 6 |

Jamison, Eaton & Wood Inc. is an equity, fixed-income and balanced manager.

Its equity approach seeks to provide long-term superior returns with limited risk and capital preservation in down markets. Both top-down asset mix decisions (interest rates, profits) and bottom-up stock selection (ROE, margins) are employed. Sector rotation is pursued within these disciplines.

Its fixed-income approach applies risk reduction techniques to both the maturity and quality decisions. The process is based on the integration of top-down policy-making and bottom-up company analysis. Anticipated changes in interest rates and credit rating are taken into account.

The asset mix Jan. 1 was 55% stocks, 23% bonds and 22% cash.

The firm follows 125 stocks closely and 300, generally; 50% of the research is generated internally.

Keith H. Wood, chairman, is chief investment officer and client contact.

### Jarislowsky, Fraser & Co.
65 Queen St. W., Suite 1501, Toronto, Ontario M5H 2M5; (416) 363-7417

| | |
|---|---|
| Total assets managed | $8,100,000,000 |
| Tax-exempt assets managed: | |
| Total | $6,900,000,000 |
| For subsidiaries of U.S. firms | $900,000,000 |
| Minimum separate account | $7,000,000 |
| Tax-exempt clients | 192 |
| U.S. subsidiaries | 27 |
| Types of accounts managed | CEFGU |
| No. of portfolio managers | 10 |

Jarislowsky, Fraser & Co., a Canadian firm, is an equity, fixed-income and balanced manager.

Its equity approach is based on fundamental research using Graham & Dodd analysis. Emphasis is placed on value analysis, financial strength and management competence.

Its fixed-income approach uses interest rate anticipation and sector analysis. It maximizes yield primarily by investing in quality corporate bonds. Three criteria are used — safety of principal, average term and yield optimization.

The asset mix Jan. 1 was 32% Canadian stocks, 48% bonds, 8% cash and 12% U.S. stocks.

It follows 60 stocks closely and 100, generally; all research is generated internally.

Clients include F.W. Woolworth, Weston, Xerox Canada and Abitibi.

Stephen Jarislowsky, president, is chief investment officer; Lorne T. Wickerson is client contact.

### JCB Asset Management
330 Commerce St., Nashville, Tenn. 37201; (615) 748-9422

| | |
|---|---|
| Total assets managed | $130,000,000 |
| Tax-exempt assets managed | $104,000,000 |

| Minimum separate account | $200,000 |
| Tax-exempt clients | 110 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 4 |
| Size of research staff | 12 |

JCB Asset Management is an equity, fixed-income and balanced manager.

Its equity approach seeks companies with strong earnings, preferably accelerating earnings growth, that are outperforming the market in terms of price movement. Its fixed-income approach is passive, using laddered short- to intermediate-term bonds.

It follows 40 stocks closely and 2,500, generally.

The parent is J.C. Bradford & Co.

Norris Nielsen, president, is chief investment officer; Tom Pollock is client contact.

### Jennison Associates Capital
466 Lexington Ave., New York, N.Y. 10017; (212) 421-1000

| | |
|---|---|

| Tax-exempt assets managed | $20,424,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 80 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 7 |
| Size of research staff | 6 |

Jennison Associates Capital Corp. is an equity, fixed-income and balanced manager.

In fixed-income, it actively manages long-term, high-quality bonds and handles controlled accounts. It also manages dedicated and quantitatively structured accounts.

The asset mix Jan. 1 was 29.7% stocks, 63.9% bonds (including mortgage-backed securities) and 6.4% cash.

The firm follows 300 stocks closely and 300, generally; between 75% and 95% of research is generated internally.

The parent company is The Prudential Insurance Co. of America.

Spiros Segalas, director and senior vice president, is chief investment officer; John H. Hobbs, president, is client contact.

### Jenswold, King & Associates Inc.
Sage Plaza, 5151 San Felipe Suite 1450, Houston, Texas 77056-3698; (713) 961-0462

| | |
|---|---|
| Total assets managed | $279,000,000 |
| Tax-exempt assets managed | $115,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 59 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 4 |
| Size of research staff | 1 |

Jenswold, King & Associates Inc. is an equity and balanced manager.

Its value-oriented equity approach features asset allocation and an emphasis on preservation of capital. Investments generally have low p/es, high yields or substantial asset values.

Its fixed-income approach regulates maturities based on the slope of the yield curve and the firm's rate expectations. Straight debt issues rated AAA or better plus convertible bonds trading on a debt basis are used.

Roger H. Jenswold is chief investment officer; Roger E. King, president, is the client contact.

Public funds: Nov. 28.

### JMB Institutional Realty
875 N. Michigan Ave. Suite 3960, Chicago, Ill. 60611-1950; (312) 915-1900

| | |
|---|---|
| Total assets managed | $10,900,000,000 |
| Tax-exempt assets managed | $5,800,000,000 |

## Jurika & Voyles Inc.

1999 Harrison Suite 700, Oakland, Calif. 94612-3517; (415) 446-1991

| | |
|---|---|
| Total assets managed | $110,000,000 |
| Tax-exempt assets managed | $60,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 25 |
| Types of accounts managed | CP |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Jurika & Voyles Inc. is an equity and balanced manager.

The firm's equity approach uses Graham & Dodd analysis and low p/e stocks. It approaches stocks as though it were to buy the whole company at present market value. Managers concentrate on cash flow and will not pay p/e multiples higher than the averages.

Fixed-income investments are made based on a momentum index consisting of eight interest rate indicators. When the index reverses, maturities are lengthened or shortened.

Clients include Robert Mondavi and Central Bank.

William K. Jurika is chief investment officer and client contact.

| Size of research staff | 22 |

Kemper Financial Services is an equity, fixed-income, balanced and high-yield manager.

Its equity approach is fundamental, selecting individual stocks possessing superior earnings growth potential at valuations that underestimate that growth.

Its fixed-income approach follows a sector allocation style that emphasizes issuer selection within a controlled framework of plus or minus 25% of the duration of the Shearson Lehman Hutton Government/Corporate bond index.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 60.1% stocks, 28.1% bonds and 11.8% cash.

Its subsidiary, Kemper-Murray Johnstone International, manages the $97.2 million in foreign stocks and $1.7 million in foreign bonds.

The parent company is Kemper Financial Corp.

Clients include Arlington County Employees, Illinois Teachers, Great Northern Nekoosa and Rochester Gas & Electric.

Stephen B. Timbers is chief investment officer; Gary S. Klem is client contact.

## Kempner Capital Management Inc.

P.O. Box 119, Galveston, Texas 77553; (409) 765-6671

| | |
|---|---|
| Total assets managed | $351,000,000 |
| Tax-exempt assets managed | $82,000,000 |
| International assets managed | 19,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 8 |
| Types of accounts managed | CEPJ |
| No. of portfolio managers | 2 |

Kempner Capital Management Inc., an equity manager, emphasizes Graham & Dodd analysis and low p/e stocks with limited downside risk and with expansion in growth, earnings and p/e multiples expected in three to five years. Options are used.

In fixed-income, it takes a passive approach, buying high-quality, full-faith-and-credit governments.

The firm follows 100 stocks closely and 500, generally; 10% of research is generated internally.

Harris L. Kempner Jr., president, is chief investment officer; Donna Ginn, vice president, is client contact.

## Kennedy Associates Inc.

2400 Financial Center, Seattle, Wash. 98161; (206) 624-9640

| | |
|---|---|
| Total assets managed | $3,300,000,000 |
| Tax-exempt assets managed | $3,300,000,000 |
| Real estate assets managed | $880,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 62 |
| Types of accounts managed | JG |
| No. of portfolio managers | 9 |
| Size of research staff | 3 |

Kennedy Associates Inc. is an equity, fixed-income, balanced and real estate manager.

For equities, growth stocks and sector rotation are emphasized to capitalize on investments' long-term prospects by combining each client's objectives with technical and fundamental research. Options are used.

Fixed-income investments are based on the firm's evaluation of the interest rate cycle and its relationship to the business cycle and economic outlook to maximize expected performance of investments.

Its real estate approach takes equity positions in general-purpose, multitenant, commercial properties nationwide.

The asset mix Jan. 1 was 31% stocks, 15% bonds, 6% cash, 24% equity real estate, 2% mortgages and 22% mortgage-backed securities.

The firm follows 250 stocks closely and 400, generally; 50% of the research is generated internally.

Clients include Alameda County, New York City, International Ironworkers and International Brotherhood of Painters & Allied Trades.

Duff Kennedy is chief investment officer; Roger V. Kelly, senior vice president, is client contact.

## Kennedy Capital Management Inc.

425 N. New Ballas Road Suite 181, St. Louis, Mo. 63141-6821; (314) 432-0400

| | |
|---|---|
| Total assets managed | $111,000,000 |
| Tax-exempt assets managed | $105,000,000 |
| Minimum separate account | $200,000 |
| Tax-exempt clients | 43 |
| Types of accounts managed | CEPJ |
| No. of portfolio managers | 3 |
| Size of research staff | 3 |

Kennedy Capital Management Inc., an equity income allocation manager, takes a quantitative approach. It uses basic value/earnings momentum screens to identify stocks with the greatest growth potential combined with equity/income allocation through highly correlated accumulation/leading trend indicators.

For balanced accounts, the firm uses leading trend indicators to target risk aversion during statistically high-risk periods, moving assets into into money market funds.

Gerald T. Kennedy, president, is chief investment officer; John P. Morris, portfolio manager, is client contact.

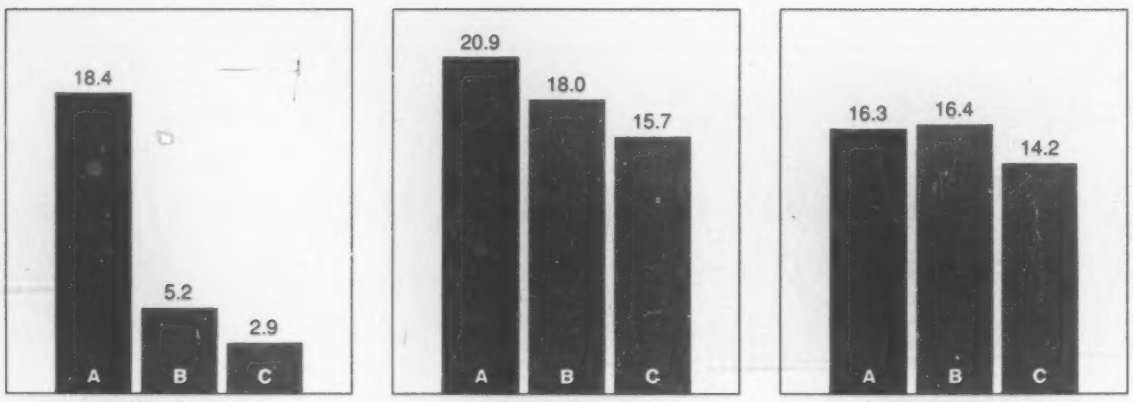
Frank B. McBrearity Jr., president, is

# Another trust ad with pretty pictures.



1987 Performance | 3-Year Performance | 5-Year Performance

Percentage rates of return:
**A** MTrust Stock Fund
**B** S&P 500
**C** CDA Universe Median Manager

Our pretty pictures may not be the same as the other guys, but we think you'll find them quite attractive. Because when you're looking for a company to manage your employee benefit plans, you want facts. Not fluff.

As you can see, in last year's challenging market our stock fund performance more than tripled the S&P 500 and CDA Universe returns. This places the fund in the top 1% of over 310 bank pooled common stock funds in the CDA Universe. And the charts speak for themselves about the consistency of our performance. As for day-to-day administration of employee benefit plans in the areas of trustee services, plan administration and participant recordkeeping, nobody performs better.

This outstanding performance is the result of our staff of experienced professionals. People who deliver a full range of employee benefit services using the resources available through our own advisory companies – MSecurities, MRealty and MPetroleum. And unlike a lot of trust companies, you have direct access to our trust professionals – when you need them.

It's the kind of service that's made us one of the nation's leading trust organizations. So give us a call. Because not many trust companies can show you pictures as pretty as ours.

LaSalle National Bank, formerly ABN/LaSalle, is an equity, fixed-income, balanced, global/international and GIC manager.

Using an equity approach based on growth stock, Graham & Dodd and quantitative principles, it offers a family of quantitatively driven products.

The fixed-income approach is based on interest rate anticipation and sector analysis. It establishes a yardstick, then constructs a portfolio with a yield advantage and positive convexity. Duration is managed based on rate forecasts.

The asset mix Jan. 1 was 25% stocks, 60% fixed income, 10% cash and 5% mortgage-backed securities; $2 million was in equity index funds.

The parent company is ABN.

B. Meyer, vice president, is chief investment officer; James Sullivan, senior vice president, is client contact.

### Lateef Management Associates

500 Sansome St. Suite 808, San Francisco, Calif. 94111; (415) 981-2102

| | |
|---|---|
| Total assets managed | $150,000,000 |
| Tax-exempt assets managed | $100,000,000 |
| Tax-exempt clients | 80 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 4 |
| Size of research staff | 1 |

Lateef Management Associates is an equity, fixed-income and balanced manager.

The firm selects individual equities on the basis of earnings acceleration, the potential for asset revaluation and group/sector attractiveness. It favors a flexible equity strategy. Options are used. The firm does not draw a sharp line between equity and fixed-income; its conservative portfolios are supplemented with convertible securities and selected equity holdings.

Khateeb A. Lateef, general partner, is chief investment officer and client contact.

Latimer & Buck Real Estate Advisors, a real estate manager, concentrates on equity-oriented investments using participating and convertible mortgages and joint-venture structures.

The asset mix Jan. 1 was 60% equity real estate and 40% mortgages.

The parent company is First Fidelity Bancorp.

Clients include Pennsylvania Public School Employes' and Pennsylvania State Employes'.

Douglas S. Callantine is chief investment officer and client contact.

### WR Lazard & Co.

40 Rector St., New York, N.Y. 10006; (212) 406-5855

| | |
|---|---|
| Total assets managed | $918,000,000 |
| Tax-exempt assets managed | $908,000,000 |
| Index funds managed | $906,000,000 |
| Dedicated funds managed | $2,000,000 |
| Minimum separate account | $20,000,000 |
| Tax-exempt clients | 9 |
| Types of accounts managed | CFJG |
| No. of portfolio managers | 3 |
| Size of research staff | 1 |

WR Lazard & Co., an equity and fixed-income manager, uses an approach that is passive and designed to reduce portfolio risk. Expected risk/return characteristics are tailored through flexibility in defining the stock or fixed-income universe against which to index. In fixed income, it also offers immunization and liability/cash flow-matched strategies.

Of the assets under management, $765 million is managed by a consortium of WR Lazard and Smith Barney Harris Upham.

The asset mix Jan. 1 was 98% bonds, 1% cash and 1% mortgage-backed securities; $906 million was in bond indexed funds of which $5 million was in mortgage-backed securities.

Clients include Avon Products, Consolidated Edison and D.C. Retirement.

Frankie D. Hughes is chief investment officer; Edward M. Swan Jr. is client contact.

### Lazard Freres Asset Management

1 Rockefeller Plaza, New York, N.Y. 10020; (800) 228-0203

| Real estate assets managed | $500,000,000 |
| International assets managed | $200,000,000 |
| Dedicated funds managed | $300,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 170 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 21 |
| Size of research staff | 6 |

Lazard Freres Asset Management is an equity, fixed-income, balanced and international manager.

Its equity approach uses proprietary research to discover and validate stocks where it received more (high return on equity and assets) than it paid for (price/book value).

Its fixed-income approach manages accounts with a total return orientation. Valuation techniques are used to restructure the coupon, sector and maturity of portfolios.

Strategy is implemented through risk-reward analysis.

The asset mix Jan. 1 was 75% stocks, 20% bonds and 5% cash. As of the same date, the firm had $500 million in mortgage-backed securities and $200 million in foreign stocks.

*LaSalle Advisors Limited*

## R.M. Leary & Co. Inc.

3300 E. First Ave. Suite 380, Denver, Colo. 80206; (303) 320-1063

| | |
|---|---|
| Total assets managed | $17,000,000 |
| Tax-exempt assets managed | $15,000,000 |
| Minimum separate account | $100,000 |
| Tax-exempt clients | 68 |
| Types of accounts managed | CFJ |
| Size of research staff | 2 |

R.M. Leary & Co. Inc. is a balanced manager and mutual fund market timer.

Its equity approach uses market timing in an aggressive common stock fund during rising markets and defensive positions in a bond or money market fund during declining markets.

Its fixed-income approach uses interest rate anticipation. Bearish markets dictate a defensive move to money market funds that pay average competitive returns.

Clients include Caney Valley Electric Co-op and La Junta Medical Center.

Kate Leary Lee is the chief investment officer and the client contact.

## Leavy Investment Management Inc.

6400 Powers Ferry Road Suite 102, Atlanta, Ga. 30339; (404) 951-9314

| | |
|---|---|
| Total assets managed | $375,000,000 |
| Tax-exempt assets managed | $370,000,000 |
| Dedicated funds managed | $54,000,000 |
| Tax-exempt clients | 30 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Leavy Investment Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented, focusing on identifying well-run, financially sound companies whose stock is temporarily depressed because of short-term actual or anticipated disappointments.

Its fixed-income approach seeks stability of return, protection of principal value and current income. Maturity is adjusted gradually in response to interest rate levels, both absolute and relative. Emphasis is on A or better rated intermediate maturities.

The firm follows 130 stocks closely and 3,600, generally; 20% of the research is generated internally.

John M. Leavy, president, is chief investment officer; Barbara A. Reiser, executive vice president, is client contact.

## Lee, Robinson & Steine Inc.

First American Center, Nashville, Tenn. 37238; (615) 748-2893

| | |
|---|---|
| Total assets managed | $3,500,000,000 |
| Tax-exempt assets managed | $1,400,000,000 |
| 401(k)/457 assets managed | $30,000,000 |
| 401(k)/457 clients | 12 |
| International assets managed | $20,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 140 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 8 |
| Size of research staff | 1 |

Lee, Robinson & Steine Inc. is an equity, fixed-income, balanced and GIC manager.

Its equity approach uses sector rotation, market timing and quantitative analyses. The fixed-income approach is based on interest rate anticipation.

The asset mix Jan. 1 was 55% stocks and 45% bonds.

The firm follows 175 stocks closely and 400, generally; 10% of the research is generated internally.

The parent company is First American Trust Co.

Clients include United Cities Gas, Tennessee Performing Arts Foundation, and David Lipscomb College Endowment.

Charles H. Robinson, president, is the chief investment officer; Frank M. Bass is the client contact.

Master trust: Aug. 22.

## Legg Mason Capital Management Inc.

111 S. Calvert St., Baltimore, Md. 21203; (301) 547-2558

| | |
|---|---|
| Total assets managed | $350,000,000 |
| Tax-exempt assets managed | $160,000,000 |
| Real estate assets managed | $8,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 100 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 4 |

Legg Mason Capital Management Inc. is an equity, fixed-income and balanced manager.

The firm adheres to a bioad, bottom-up, value-oriented equity approach that uses common stocks and convertibles to increase the consistency of returns and create more opportunities for compounding.

For fixed income, the firm follows a relative-value approach, buying securities in market sectors that appear undervalued on a historical basis.

The parent is Legg Mason Inc.

Peter A. Lareau is chief investment officer; Terrence D. Woulfe is client contact.

## Lehman Management Co.

55 Water St., New York, N.Y. 10041; (212) 668-4073

| | |
|---|---|
| Total assets managed | $16,077,000,000 |
| Tax-exempt assets managed | $11,920,000,000 |
| Real estate assets managed | $450,000,000 |
| Index funds managed | $2,000,000,000 |
| Minimum separate account | $25,000,000 |
| Tax-exempt clients | 156 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 21 |
| Size of research staff | 13 |

Lehman Management Co. Inc. is an equity, fixed-income, balanced, bond index and special situations equity manager.

Its equity approach for corporate funds is to purchase growth-oriented securities that sell at reasonable prices. For Taft-Hartley funds, the emphasis is on a contrarian, value-oriented approach.

For fixed income, it offers active and passive strategies. Its active approach is conservative, emphasizing high-quality intermediate securities and minimizing interest rate risk. The index products are customized, emphasizing controlled maturity movements while adding value through security selection and sector rotation.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 37% stocks, 54% bonds (including mortgage-backed securities) and 9% cash; $450 million was in mortgage-backed securities.

The parent is Shearson Lehman Hutton Inc., an American Express Co. unit.

C. Charles Hetzel and Coleman C. Brandt are chief investment officers; H. Scott Higgins, executive vice president, is the client contact.

## Lehndorff & Babson Real Estate Counsel

2501 Cedar Springs Suite 550, Dallas, Texas 75201; (214) 855-5800

| Tax-exempt clients | 23 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 2 |
| Size of research staff | 3 |

John A. Levin & Co. Inc., an equity manager, seeks diverse companies with market liquidity that dominate their niche, are inexpensive relative to cash flows/asset value, or have new products or developments. Disciplined price parameters are enforced.

The firm follows 50 stocks closely and 200, generally; 75% of the research is generated internally.

The parent is Loeb Holding Corp.

John A. Levin, president, is chief investment officer; Robert Bowers is client contact.

## Lexington Management

Park 80 West Plaza II, Saddle Brook, N.J. 07662; (201) 845-7300

| | |
|---|---|
| Total assets managed | $2,152,000,000 |
| Tax-exempt assets managed | $720,000,000 |
| 401(k)/457 assets managed | $35,000,000 |
| 401(k)/457 clients | 21 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 46 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 8 |
| Size of research staff | 18 |

Lexington Management Corp. is an equity, fixed-income, balanced and global manager.

Its equity approach stresses relative value analysis. Seeking to preserve capital and earn a real rate of return, the firm will increase or decrease equity exposure based upon an analysis of risk factors in the investment environment.

Its fixed-income approach uses interest rate anticipation and duration to manage portfolios; its neutral position is very defensive.

Options are used.

The asset mix Jan. 1 was 44% stocks, 35% bonds and 21% cash.

The parent company is Piedmont Management.

William S. Stack is the chief investment officer; Joseph Barcic Jr., chief operating officer, is the client contact.

## Leylegian Investment Inc.

855 Oak Grove Ave. Suite 200, Menlo Park, Calif. 94025; (415) 325-1055

| | |
|---|---|
| Total assets managed | $275,000,000 |

| No. of portfolio managers | 10 |

Lincoln Capital Management is an equity, fixed-income and balanced manager.

Its equity approach emphasizes growth stocks. Its fixed-income approach is active with an assured minimum return; interest rate anticipation is employed.

The asset mix Jan. 1 was 31% stocks and 69% bonds; $1.495 billion was in bond index funds.

The firm follows 75 stocks closely and 300, generally; 75% of research is generated internally.

Clients include AT&T, GM, State of Virginia and Ameritech.

J. Parker Hall III, president, is chief investment officer and client contact.

### Lincoln National Pension Insurance Co.

1300 S. Clinton St., Fort Wayne, Ind. 46801; (219) 427-4878

Lincoln National Pension Insurance Co. employs a multimanager approach to provide equity, fixed-income, balanced, international and dedicated bonds/annuities management.

It is responsible for $5.343 billion in assets managed by external managers, of which $5.082 billion is from 2,000 institutional tax-exempt clients. MPT Associates, a wholly owned subsidiary profiled separately, is responsible for an additional $155 million in tax-exempt assets.

It offers five equity funds, using quantitative analysis and growth and emerging growth stocks.

Its fixed-income approach is driven by interest rate anticipation. Four different maturity components are maintained, and returns are maximized by shifting maturities in only one of the components, emphasizing value sectors and swapping issues to take advantage of spreads.

Options, stock index futures and fixed-income futures are used.

The parent company is Lincoln National Corp.

Robert Crispin, executive vice president, is chief investment officer; Bill L. Sanders, vice president, is client contact.

### Lingo Capital Management

3200 West End Ave. Suite 405, Nashville, Tenn. 37203; (615) 292-9546

| | |
|---|---|
| Total assets managed | $8,000,000 |
| Tax-exempt assets managed | $1,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 3 |
| Types of accounts managed | C |
| No. of portfolio managers | 1 |
| Size of research staff | 3 |

Lingo Capital Management is an equity, fixed-income and balanced manager.

Its equity approach is quantitative, using successive, statistical screens of its 2,700-stock data base to select equities that meet the firm's rigorous decision criteria.

Its fixed-income approach uses a statistical model to anticipate interest rate trends. Fixed-income investments are selected only when rates are stable or declining.

Kenneth H. Lingo is chief investment officer and client contact.

### Lipman, Carasso & Young

1880 Century Park East Suite 1511, Los Angeles, Calif. 90067; (213) 282-0300

| No. of portfolio managers | 6 |
| Size of research staff | 23 |

Lord Abbett & Co. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes low p/e ratios, dividends and net asset

Where Has The Liquidity Gone?

Liquidity has evaporated as capital and participants have fled the marketplace. Professional Investors have been relying much more on the Jefferies way to get their hard trades done. A broker should be the client's ally rather than adversary. We believe the best trade is when the ultimate buyer and seller set the price. Over the last twenty-five years we have established a unique network to achieve this, including:
200 dedicated professionals
1,600 Institutions
6,000 Corporations
If you trade large blocks and illiquidity has been frustrating, please call Ray Killian, Senior Managing Director, at 617-451-7020. Put the world's strongest trader-sales force on your team.

Marinvest is an equity, fixed-income, balanced and nuclear decommissioning trust manager.

Its equity approach features total return, capital enhancement and high-yield portfolios. It uses value-based criteria to screen stocks. Subsequent in-house analysis seeks to identify revaluation potential.

Its fixed-income approach seeks to exceed market performance with price volatility reflective of the market; yield is enhanced through active sector rotation. Maturities are adjusted to reflect interest rate movements.

International investing is offered by Wardley Investment Services Ltd.

The asset mix Jan. 1 was 34% stocks, 30% bonds and 36% cash.

The parent is Marine Midland Holdings Inc.

Leo Grohowski and Bonnie O'Neil set the investment policy for equities; Wayne Wong and Ed Merkle set investment policy for fixed income. Denman Zirkle, business manager, is client contact.

## C.S. McKee & Co. Inc.

1 Gateway Center, Pittsburgh, Pa. 15222; (412) 566-1234

| | |
|---|---|
| Total assets managed | $1,100,000,000 |
| Tax-exempt assets managed | $1,100,000,000 |
| Dedicated funds managed | $13,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 93 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 8 |

C.S. McKee & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach is risk-averse and opportunistic, emphasizing a bottom-up style. For risk avoidance, it utilizes broad diversification and periodic reduction of exposure by raising cash. In its opportunistic approach, it stresses value-oriented selection, including low p/e, increased earnings and high return on earnings.

Its fixed-income approach is risk-averse and opportunistic. Identifying interest rate direction is essential to protect and enhance capital. Sector and quality shifts enhance return potential; investments are A or better.

The asset mix Jan. 1 was 45% stocks, 49% bonds and 6% cash.

It follows 150 stocks closely and 1,000 generally; all research is generated internally.

The parent company is United Asset Management.

Clients include Allegheny County, First Catholic Slovak Union of United States and Canada, Electric Materials and Buhl Foundation.

| | |
|---|---|
| Tax-exempt assets managed | $14,000,000 |
| International assets managed | $7,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 30 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 2 |

Meridian Capital Management Ltd. an equity, balanced and international manager.

Its equity approach uses active asset allocation with a special situation bias that also incorporates fixed income and cash equivalents. It concentrates on value-oriented growth companies with superior appreciation potential. Its fixed-income approach is passive, using primarily short- to medium-duration Treasuries. Options are used.

Ellis Smith and John Messner are chief investment officers; Kimberlee O'Maley is client contact.

### Meridian Investment Co.

P.O. Box 2000, Valley Forge, Pa. 19482; (215) 251-7986

| | |
|---|---|
| Total assets managed | $725,000,000 |
| Tax-exempt assets managed | $458,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 32 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 6 |
| Size of research staff | 5 |

Meridian Investment Co. is an equity, fixed-income, balanced and convertibles manager.

Its equity approach is quantitative, combining growth stock and convertible securities. It uses Quantitative Evaluation and Selection Techniques, which evaluate four variables for ranking 1,000 stocks and constructs portfolios from those rated highest.

Its fixed-income uses sector analysis, with a quantitative process that focuses on components of credit supply and demand and inflation trends. A computer model monitors 11 variables for maturity and sector allocations.

The parent company is Meridian Asset Management.

Clients include Hess's, Tasty Baking, Sheet Metal Workers Local 19 and Dickinson College.

Phillip H. Brown II is chief investment officer; Dawson Richardson and Lawrence Neill, vice presidents, are client contacts.

### Meridian Management Co.

Midlantic National Bank is an equity, fixed-income, balanced and immunized portfolio manager.

Its equity approach is value-oriented, emphasizing high quality, low p/e ratios, above-average yield and low price to book. Computer screening is used extensively in ranking stocks based on selection criteria. Performance premium primarily results from stock selection rather than sector emphasis.

Its fixed-income approach emphasizes low risk through high-quality portfolios, moderate maturity shift with laddered structure and average maturity ranging between six and 12 years.

Options are used.

The asset mix Jan. 1 was 37% stocks, 35% bonds, 17% cash and 11% mortgage-backed securities.

The parent company is Midlantic Corp.

William P. DuBose Jr., senior vice president, is chief investment officer; Walter T. Bednarz, asset management officer, is client contact.

| No. of portfolio managers | 14 |
| Size of research staff | 7 |

Miller, Anderson & Sherrerd is an equity, fixed-income and balanced manager.

Its equity decisions focus on a disciplined valuation process and investment strategy that combines quantitative analytical techniques, low p/e stocks and sector rotation.

Its fixed-income approach uses sector analysis. Securities are used to reduce overall portfolio risk and provide a positive real return with deflation protection. Three components are employed: intermediate maturity orientation, maturity management and value investing.

The asset mix Jan. 1 was 37% stocks, 36% bonds, 8% cash and 19% mortgage-backed securities.

It follows 100 stocks closely and 250 generally; 50% of research is generated internally.

Clients include Pennwalt, J.C. Penney and Yale University.

Frederic S. Owen, director of marketing, is client contact.

## MIMLIC Asset Management

400 N. Robert St., St. Paul, Minn. 55101; (612) 298-3826

| | |
|---|---|
| Total assets managed | $4,334,000,000 |
| Tax-exempt assets managed | $268,000,000 |
| Real estate assets managed | $5,000,000 |
| International assets managed | $6,000,000 |
| Index funds managed | $81,000,000 |
| Minimum separate account | $5,000,000 |

| Types of accounts managed | CEFU |
| No. of portfolio managers | 12 |

Montrusco Associates Inc., a Canadian firm, is an equity, fixed-income, balanced and international (EAFE) manager.

Its equity approach is based on business cycle analysis, with stock selection generated from a multivariable quantitative approach highlighting total expected return.

Its fixed-income approach uses a process that involves scenario identification, quarterly probability weighted expected interest rate forecasting and rigorous spread analysis.

The asset mix Jan. 1 was 31% Canadian stocks, 10% U.S. stocks, 47% bonds, 8% cash and 4% EAFE stocks.

Montreal Trusco Inc. holds a controlling interest in the firm.

Andre Marsan, president and chief executive officer, is chief investment officer and client contact.

## MONY Financial Services

4 Manhattanville Road, Purchase, N.Y. 10577; (914) 697-8506

| | |
|---|---|
| Total assets managed | $22,568,000,000 |
| Tax-exempt assets managed: | |
| Total | $8,240,000,000 |
| Pooled accounts | $2,181,000,000 |
| Separate accounts | $1,224,000,000 |
| GICs | $1,700,000,000 |
| Other | $3,135,000,000 |
| 401(k)/457 assets managed | $300,000,000 |
| 401(k)/457 clients | 300 |
| Dedicated assets managed | $475,000,000 |
| Minimum separate account | $10,000,000 |
| Types of accounts managed | CEFGJ |
| No. of portfolio managers | 11 |

MONY Financial Services is an equity, fixed-income, balanced, real estate, international and GIC manager.

Its equity approach seeks long-term capital growth by investing in stocks with above-average earnings growth. Its fixed-income approach uses interest rate anticipation. Options and financial futures are used.

Its real estate approach is long-term, concentrating on direct ownership of income-producing properties. The portfolio is diversified by location and type of property.

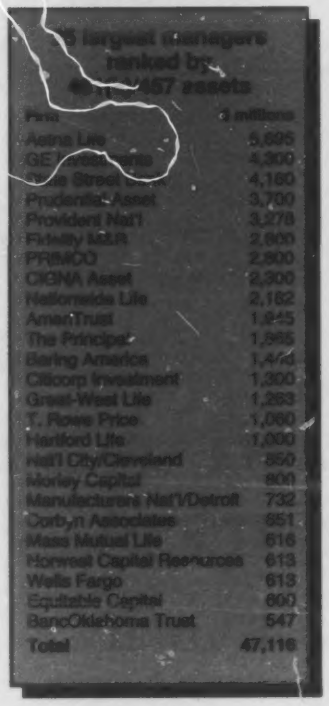
The separate account asset mix Jan. 1 was 30% stocks, 60% bonds and 10% cash.

The insurer follows 200 stocks closely and 500, generally; 50% of research is generated internally.

It offers portfolio insurance covering $7 million.

The parent company is Mutual Life Insurance Co. of New York.

Floyd L. Smith, executive vice president, is chief investment officer; Phillip N. Maisano, vice president-pension sales, is client contact.



## Moore & Schley

95 Madison Ave., Morristown, N.J. 07960; (201) 540-0540

| | |
|---|---|
| Total assets managed | $12,000,000 |
| Tax-exempt assets managed | $8,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | C |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Moore & Schley is a fixed-income, balanced and GIC manager.

In stocks, it takes a growth and value approach.

Its fixed-income approach is passive and uses sector analysis. As an internal value-added approach, the primary objective is to provide relatively high and stable current income while avoiding undue risk to the value of the portfolio.

Elliot S. Collins and John K. Paoloni are the chief investment officers and client contacts.

## Moran Asset Management

41 W. Putnam Ave., Greenwich, Conn. 06830; (203) 869-5100

| Types of accounts managed | CEF |
| No. of portfolio managers | 5 |

Morgan Grenfell Capital Management Inc., an equity manager, uses a bottom-up approach to identify attractive emerging growth companies (with market capitalizations of $50 million to $500 million) and a top-down approach to select economic sectors.

The parent company is Morgan Grenfell Asset Management Ltd.

Clients include Pacific Telesis, Whittaker and Bechtel Power Group.

Robert E. Kern, executive vice president, is chief investment officer; James E. Minnick, executive vice president, is client contact.

## Morgan Grenfell Investment Services Ltd.

46 New Broad St., London EC2M 1NB U.K.; 01-256-7500

| | |
|---|---|
| Total assets managed | $2,789,000,000 |
| Tax-exempt assets managed | $2,378,000,000 |
| International assets managed | $2,378,000,000 |
| Minimum separate account | $15,000,000 |
| Tax-exempt clients | 44 |
| Types of accounts managed | CFG |
| No. of portfolio managers | 9 |
| Size of research staff | 12 |

Morgan Grenfell Investment Services Ltd. is an equity and fixed-income international manager.

It is an active global equity manager, using growth and low p/e stocks and market timing. Equal emphasis is placed on market and stock selection. No investments are made without considering the currency impact.

Its fixed-income approach combines active management of currencies, bond markets and maturities. Currency and bond market exposure decisions are separated through currency hedging.

The asset mix Jan. 1 was 86% stocks, 4% bonds and 10% cash. As of the same date, the firm had $2.043 billion invested in foreign stocks, $97 million in foreign bonds and $238 million in foreign cash.

The parent company is Morgan Grenfell Asset Management Ltd.

Clients include General Motors, Rockefeller Foundation, San Francisco City and County and Owens-Illinois.

Michael Bullock is chairman and chief investment officer. Client contact is James E. Minnick, executive vice president, Morgan Grenfell Capital Management Inc., (212) 230-2600.

## J.P. Morgan Investment Management Inc.

522 Fifth Ave., New York, N.Y. 10036; (212) 837-2300

| | |
|---|---|
| Total assets managed | $52,975,000,000 |
| Tax-exempt assets managed | $51,115,000,000 |
| Real estate assets managed | $5,243,000,000 |
| International assets managed | $3,000,000 |
| Dedicated funds managed | $6,500,000,000 |
| Tax-exempt clients | 410 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 43 |
| Size of research staff | 23 |

J.P. Morgan Investment Management Inc. offers equity, fixed-income, balanced, international, real estate, convertible, immunized fixed-income and oil and gas management, as well as portfolio protection.

Its equity approach is a focused internal analytical effort combined with disciplined valuation and portfolio construction. Stock selection is the most important element.

Its fixed-income approach is based on interest rate anticipation, with sector and yield spread analysis providing incremental return and lowering volatility.

Options and financial futures are used.

Its real estate approach is to make direct investments in special-situation projects that provide high current income, cash flow growth potential and high residual property appreciation.

The asset mix Jan. 1 was 36% stocks, 38% bonds, 7% cash, 3% equity real estate, 2% mortgages, 5% mortgage-backed securities, 3% convertibles and 6% international.

The parent company is J.P. Morgan & Co. Inc.

C. Nicholas Potter, president, is chief investment officer; John B. Thomas, managing director, is client contact.

### Morgan Stanley Asset Management

1633 Broadway, New York, N.Y. 10019; (212) 703-2752

| | |
|---|---|
| Total assets managed | $12,448,000,000 |
| Tax-exempt assets managed | $3,292,000,000 |
| Real estate assets managed | $829,000,000 |
| International assets managed | $9,000,000 |
| Dedicated funds managed | $187,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 164 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 23 |
| Size of research staff | 4 |

Morgan Stanley Asset Management is an equity, fixed-income, balanced, international/global and high-yield manager.

Its equity approach combines market sector allocation with a growth- and value-oriented selection process. Top-down and bottom-up elements are used.

Its fixed-income approach concentrates on active maturity shifting, with short- and intermediate-term holdings comprising the portfolio core. Long-term bonds are used opportunistically.

The asset mix Jan. 1 was 34% stocks, 46% bonds, 10% cash and 10% mortgage-backed securities; $9 million was in foreign bonds.

The parent company is Morgan Stanley Group Inc.

In addition to the assets above, Morgan Stanley Asset Management is fiduciary for $8.811 billion, of which $7.825 billion is tax-exempt.

Barton M. Biggs, chairman, is chief investment officer; Perry E. Hall II, principal, and Gail Hunt Reeke, vice president, are client contacts.

### Morgan Stanley Asset Management/The Chicago Group

440 S. LaSalle St., Chicago, Ill. 60605; (312) 765-6035

| | |
|---|---|
| Total assets managed | $294,000,000 |

Who offers your defined contribution plan participants the flexibility of daily telephone transfers between funds?

The same company who offers excellent investment management.

As a leading provider of 401(k) and other defined contribution plan services to more than 1,000 corporations across the country, Fidelity Investments offers a wide range of investment management and client services designed to meet the needs of both you and your employees.

**A Wide Array Of Nationally Known Funds.** With more than $70 billion in assets under management, Fidelity offers a broad choice of professionally managed mutual funds ranging from equity funds like Fidelity Magellan Fund and Fidelity Equity-Income Fund, to money market funds and GIC's. The funds are available on a *no-load* basis to plans with more than 200 eligible employees. And, as market conditions or personal investment objectives change, plan participants have the flexibility to transfer their investments among available mutual funds by telephone on any business day.

**Comprehensive Recordkeeping.** Fidelity's recordkeeping services are designed specifically to reduce your administrative burden.

Not only can your employees call us directly to transfer existing balances, they can also redirect future contributions by telephone. Our state of the art system and experienced employee benefit professionals work to ensure timely and accurate reports for both you and your employees.

**Employee Communications Support.** Fidelity will work with you to develop the communication materials needed to support your employees from enrollment through retirement. We'll help you explain your program and the available investment options clearly and effectively. In addition, your employees can call toll-free 24 hours a day, seven days a week and talk with a knowledgeable Fidelity representative about available investment options.

For more information about Fidelity's defined contribution plan services, including fund prospectuses covering management fees, expenses, and applicable sales charges, please call Jeffrey Paster, Corporate Market Manager, at 1-800-345-5033. In Massachusetts call collect 617-570-5692.

SELLING THEIR DOWNTOWN OFFICE TOWER AT JUST THE RIGHT TIME LEFT THEM SITTING PRETTY.

Those who participate in your pension fund want growth and security. With the kind of real estate investment performance you get from Richard Ellis, you can give them what they want.

That performance shows in every phase of the property investment cycle. Buying at the right time and place. Actively managing the investments. And, just as important, selling at the right time and realizing the maximum return.

Richard Ellis

Active real estate portfolio management for selective institutional investors

New York 212/355-4810 · Chicago 312/861-1105 · Atlanta 404/231-0400 · San Francisco 415/392-1090 · Los Angeles 213/955-7979

Richard Ellis, Inc., is a registered investment adviser under the Investment Advisers Act of 1940.

National Bank of Detroit is an equity, fixed-income, balanced and international/global manager.

NCNB National Bank is an equity, fixed-income, balanced and real estate manager.

Its equity approach uses top-down analysis and sector rotation as it seeks value within stages of the economic cycle. Securities are selected based on relative and absolute value criteria.

Its fixed-income approach focuses on duration relative to the Shearson index with value added by sector swaps and interest rate anticipation.

Its real estate approach is to invest in commercial and industrial properties in the Southeast, with an emphasis on office and business parks leased to quality tenants.

The asset mix Jan. 1 was 45% stocks, 30% bonds, 5% cash and 20% equity real estate; $100 million was in mortgage-backed securities and $25 million in bond index funds.

Clients include Potomac Electric and Power, Shell Oil and World Bank.

The parent company is NCNB Corp.

Donald G. Berdine, senior vice president, is chief investment officer; David J. Cathcart, senior vice president, is client contact.

## Nelson, Benson & Zellmer

455 Sherman St. Suite 100, Denver, Colo. 80203; (303) 778-6800

| | |
|---|---|
| Total assets managed | $379,000,000 |
| Tax-exempt assets managed | $261,000,000 |

Neuberger and Berman is an equity, fixed-income and balanced manager.

Its equity approach adheres to a market-oriented, value-driven style, emphasizing undervalued stock selections, along with a flexible asset mix strategies.

Its fixed-income approach adheres to a limited maturity market-oriented, value-driven style, emphasizing undervalued sector selections and interest rate trend related maturity/duration flexibility.

The asset mix Jan. 1 was 46% stocks, 40% bonds and 14% cash.

The firm follows 300 stocks closely and 600, generally; 80% of the research is generated internally.

Clients include Sundstrand, International Paper, Eastman Kodak and Harris.

Richard A. Cantor, president, is chief investment officer; Robert R. McComsey, chief operating officer, is client contact-equity and balanced; Martin McKerrow, director of client services, is contact-fixed income.

## The New England

501 Boylston St., Boston, Mass. 02117; (617) 578-2000

| | |
|---|---|
| Total assets managed | $14,505,000,000 |
| Tax-exempt assets managed: | |
| Total | $5,306,000,000 |
| Pooled accounts | $237,000,000 |
| Separate accounts | $56,000,000 |
| GICs | $2,242,000,000 |
| Annuities | $78,000,000 |
| Other | $2,693,000,000 |
| Real estate assets managed | $5,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 402 |
| Types of accounts managed | CEGJ |
| No. of portfolio managers | 40 |
| Size of research staff | 80 |

The New England is an equity, fixed-income, balanced and real estate manager.

Its equity approach is characterized by sector rotation, search for companies with the greatest potential for earnings surge and a strong sell discipline. Usually, 20 to 30 issues are held.

Its fixed-income approach is based on interest rate anticipation and sector and credit analyses. Options and financial futures are used.

Its real estate investments are handled by its affiliate, Copley Real Estate Advisors, which is profiled elsewhere in this issue.

The separate account asset mix Jan. 1 was 63% stocks, 14% bonds, 13% cash, 0.5% equity real estate, 2% mortgages and 7.5% other.

Its clients include Union Pacific, Pillsbury, Coca-Cola and Virginia.

Ralph F. Verni, executive vice president-finance, is chief investment officer; Antwine Jefferson III, vice president, is client contact.

## New York Life Insurance Co.

51 Madison Ave., New York, N.Y. 10010; (212) 576-7416

| | |
|---|---|
| Total assets managed | $33,792,000,000 |
| Tax-exempt assets managed: | |
| Total | $12,400,000,000 |
| Pooled accounts | $313,000,000 |
| GICs | $8,145,000,000 |
| Annuities | $1,761,000,000 |
| Other | $4,241,000,000 |
| Real estate assets managed | $33,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 507 |
| Types of accounts managed | CGJ |
| No. of portfolio managers | 12 |

New York Life Insurance Co. is an equity, fixed-income, convertibles and money market manager.

It offers active and passive stock approaches. Its growth equity approach focuses on companies with earnings growth rates substantially above the S&P 500. Management of the value equity account searches for companies whose value is not reflected in the stock price. The indexed equity account tracks the S&P 500.

Its fixed-income approach combines partial market timing and an actively managed core to provide competitive returns that consistently exceed inflation. Buy/sell disciplines are heavily emphasized; sector analysis is used.

The separate account asset mix Jan. 1 was 41.8% stocks, 30.7% bonds, 11.5% cash, 3.8% equity real estate and 12.2% convertible securities.

Its clients include American Airlines, New York City Teachers, K mart and Du Pont.

William E. Kelter, executive vice president, is chief investment officer; Linda Livornese, assistant vice president, is client contact.

## Newbold's Asset Management

1500 Walnut St., Philadelphia, Pa. 19102; (215) 893-9167

| | |
|---|---|
| Total assets managed | $3,294,000,000 |

Norwest Capital Resources Inc. is an equity, fixed-income, balanced, GIC and cash manager.

Its equity approach uses quantitative approaches with growth and emerging growth stocks. An active manager, it evaluates current trends and anticipated changes.

In fixed income, the core style uses laddering, investing equally in each year of a maturity schedule. Participation is emphasized over anticipation, and investing over speculation. Sector analysis is used.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 45% stocks and 55% bonds; $12 million was in foreign stocks, $37 million in equity index funds and $39 million in bond index funds.

Clients include Northern States Power, Valspar and Bemis.

The parent is Norwest Corp.

Judy Mares, vice president and managing director, is chief investment officer; Dave Bodine, vice president, is client contact.

## NSR Asset Management

605 Third Ave., New York, N.Y. 10158; (212) 687-2200

| | |
|---|---|
| Total assets managed | $166,000,000 |
| Tax-exempt assets managed | $166,000,000 |
| Minimum separate account | $2,500,000 |
| Tax-exempt clients | 9 |
| Types of accounts managed | CE |
| No. of portfolio managers | 2 |

NSR Asset Management Corp. is an equity and balanced manager.

Its quantitative, low p/e equity approach uses Graham & Dodd analysis.

Its fixed-income approach uses sector analysis. Portfolio duration variation is modest - plus or minus 10% from the applicable index. There is an orientation toward yield.

The firm follows 100 stocks closely and 300, generally; 50% of the research is generated internally.

The parent company is National Securities & Research Corp.

Clients include Brooklyn Union Gas, National Intergroup and Gleason.

William R. Sadler is the chief investment officer and the client contact.

## NWQ Investment Management Co.

655 S. Hope St., 11th Floor, Los Angeles, Calif. 90017; (213) 624-6700

| | |
|---|---|
| Total assets managed | $1,146,000,000 |
| Tax-exempt assets managed | $962,000,000 |
| Minimum separate account | $2,000,000 |
| Tax-exempt clients | 189 |
| Types of accounts managed | CFJG |
| No. of portfolio managers | 6 |
| Size of research staff | 1 |

NWQ Investment Management Co. is an equity and balanced manager.

Its equity approach combines market timing with low p/e stocks and above-average yield. Fixed-income instruments are used as equity substitutes when it is believed the risk/reward relationships are attractive and a meaningful opportunity to earn a return well above the coupon rate exists. Interest rate anticipation is used.

The asset mix Jan. 1 was 35% stocks, 38% bonds and 27% cash.

The firm follows 150 stocks closely and 500 generally; 15% of the research is generated internally.

Clients include Directors Guild of America, Unisys, National Bulk Carrier and Motion Picture Industry Pension.

David A. Polak, managing director, is the chief investment officer; James P. Owen, managing director, is the client contact.

O

## Oakwood Counselors Inc.

888 Seventh Ave., New York, N.Y. 10106; (212) 757-6495

| | |
|---|---|
| Total assets managed | $54,000,000 |
| Tax-exempt assets managed | $14,000,000 |

| Tax-exempt clients | 20 |
| Types of accounts managed | CE |
| No. of portfolio managers | 3 |

Oakwood Counselors Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses conceptual investing. It invests in the beneficiaries of secular trends taking place.

Its fixed-income approach anticipates credit spreads and interest rate curves to achieve greatest possible return within risk parameters.

The firm follows 45 stocks closely and 60 generally.

Paul Sherman is the chief investment officer; Kenneth Mantel is the client contact.

## The O'Connor Group

200 Park Ave., New York, N.Y. 10166; (212) 687-7420

| | |
|---|---|
| Total assets managed | $1,200,000,000 |
| Tax-exempt assets managed | $930,000,000 |
| Real estate assets managed | $930,000,000 |
| Minimum separate account | $100,000,000 |
| Tax-exempt clients | 13 |
| Types of accounts managed | CEFG |
| Size of research staff | 4 |

The O'Connor Group, formerly J.W. O'Connor & Co. Inc., is a real estate manager that invests in large transactions with franchise characteristics, such as center city office buildings and regional shopping centers. The firm acts as investment manager for institutional clients on a separate account basis and through commingled funds, and maintains property management capabilities in-house.

All assets were committed to equity real estate Jan. 1. As of the same date, $703 million was actually invested.

Clients include New York State Common Fund, AT&T, Kansas Public Employees and Burlington Northern.

Jeremiah W. O'Connor Jr., president, is the chief investment officer; Nancy Lashire, vice president, is the client contact.

## Oechsle International Advisors

1 International Place, Boston, Mass. 02110; (617) 330-8817

| | |
|---|---|
| Total assets managed | $800,000,000 |
| Tax-exempt assets managed | $585,000,000 |
| International assets managed | $585,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 21 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 5 |
| Size of research staff | 3 |

Oechsle International Advisors is an international manager.

Its equity approach emphasizes bottom-up stock selection, aggressive top-down country allocation and value orientation. The investment horizon is 18 to 24 months; portfolios are constructed with a limited number of holdings; investments are managed in a minimum of eight and a maximum of 12 country markets.

All tax-exempt assets were invested in foreign stocks Jan. 1.

The firm follows 300 stocks closely and 100 generally; 90% of the research is generated internally.

Clients include US WEST, City and County of San Francisco, Harvard University and Stanford University.

Walter Oechsle, partner, is the chief investment officer; Stephen P. Langer, partner, is the client contact.

## O'Herron & Co. Inc.

1300 St. Mary's St., Suite 210, Raleigh, N.C. 27605; (919) 834-9224

| | |
|---|---|
| Total assets managed | $59,000,000 |
| Tax-exempt assets managed | $38,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 40 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 2 |

O'Herron & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach is value oriented, focusing on investments with relatively low p/e ratios and strong balance sheets. Approximately 40% of equity investments are maintained in companies in North and South Carolina.

Its fixed-income approach uses convertible bonds primarily, plus government securities of five years or less maturity.

The parent company is Foundation Investment Group.

James J. Green, president, is the chief investment officer and the client contact.

## Michael B. O'Higgins & Co.

99 Pine St., Albany, N.Y. 12207; (518) 436-9731

| | |
|---|---|
| Total assets managed | $170,000,000 |

ment officer; George B. Chelius III, partner-marketing, is client contact.

## The Ohio Co.

155 E. Broad St., Columbus, Ohio 43215; (614) 464-5548

| | |
|---|---|
| Total assets managed | $400,000,000 |
| Tax-exempt assets managed | $330,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 72 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 5 |
| Size of research staff | 6 |

The Ohio Co. is an equity, fixed-income and balanced manager.

Its equity approach buys stock with long-term track records of earnings and dividend growth, superior return-on-equity trends, priced at a 15% to 20% discount to the S&P 500 multiple.

Its fixed-income approach uses interest rate anticipation. Managers are defensive, buying only AAA rated, government or government-backed securities with average maturities of five to seven years.

The firm follows 60 stocks closely and 150 generally; 20% of the research is generated internally.

C.A. Peterson, senior executive vice president, is the chief investment officer; Sam J. Vogel, business development officer, is the client contact.

## Old Kent Bank and Trust Co.

1 Vanderberg Center, Grand Rapids, Mich. 49503; (616) 774-5248

| | |
|---|---|
| Total assets managed | $4,101,000,000 |

| Tax-exempt clients | 65 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 5 |

Olympic Capital Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses sector rotation and Graham & Dodd analysis.

Its fixed-income approach uses interest rate anticipation and sector analysis.

The asset mix Jan. 1 was 42% stocks, 42% bonds and 16% cash.

The firm follows 200 stocks closely and 1,000 generally; 20% of the research is generated internally.

The parent company is United Asset Management.

Clients include Boeing, Pacific Gas & Electric, United Methodist Church and Pacific Lighting.

John S. Crowl is the chief investment officer and the client contact.

## One Federal Asset Management

1 Federal St., Boston, Mass. 02211; (617) 292-3178

| | |
|---|---|
| Total assets managed | $1,754,000,000 |
| Tax-exempt assets managed | $1,150,000,000 |
| 401(k)/457 assets managed | $229,000,000 |
| 401(k)/457 clients | 2 |
| Dedicated funds managed | $13,000,000 |
| Minimum separate account | $3,000,000 |
| Tax-exempt clients | 22 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 12 |
| Size of research staff | 2 |

One Federal Asset Management is an equity, fixed-income and balanced manager.

Its equity approach uses a bottom-up, fundamental stock selection process.

Its fixed-income approach uses risk-controlled active bond management to establish a benchmark to meet client objectives. Portfolios are actively managed around the benchmark.

The asset mix Jan. 1 was 22% stocks, 36% bonds (including mortgage-backed securities) and 42% cash.

The firm follows 120 stocks closely and 600 generally; all research is generated internally.

The parent company is Shawmut National Corp.

Clients include Shawmut Employees, Liberty Mutual, Massachusetts Treasurer's Trust and Massachusetts PRIT.

Bradford J. Johnson, president, is the chief investment officer; Albert R. Vandam, vice president-director of marketing and client service, is the client contact.

## Oppenheimer Capital Corp.

Oppenheimer Tower, World Financial Center, New York, N.Y. 10281; (212) 667-7515

| | |
|---|---|
| Total assets managed | $12,201,000,000 |
| Tax-exempt assets managed | $11,914,000,000 |

## Pacific Century Advisers Inc.

1200 Third Ave. Suite 1800, San Diego, Calif. 92101; (619) 544-1252

| | |
|---|---|
| Total assets managed | $8,085,000,000 |
| Tax-exempt assets managed | $1,672,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 97 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 9 |
| Size of research staff | 2 |

Pacific Century Advisers Inc. is an equity, fixed-income, balanced, GIC and convertible securities manager.

Its equity approach is driven by a stock selection process that focuses on companies demonstrating positive rates of change in earnings, price and industry-relative strength. This approach is supplemented by a top-down overlay looking at economic rates of change and sector-relative strength.

Its fixed-income approach uses interest rate anticipation and sector analysis. The firm uses several techniques, including laddering of maturities, variable barbelling and diversification by maturity, quality and industry.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 48% stocks, 26% bonds and 26% cash.

The firm follows 2,000 stocks generally; 50% of research is generated internally.

The parent company is Security Pacific National Bank.

Clients include Olin, Dallas Police & Fire and California Community Foundation.

Joel Swanson, president, is the chief investment officer; Clark Gates, managing director, is the client contact.

## Pacific Financial Cos.

# STOCK INDEX TRADERS:

## Use the New York Alternative

Stock index futures traders know the importance of fast, accurate executions. That's why more and more traders are using NYSE Composite Index futures on the New York Futures Exchange (NYFE).

Here are some more reasons:

**Competitive margins.**
NYSE Index futures margins are very competitive compared to those of other stock index futures. Call your broker to find out our margins.

**Smaller point changes.**
Due to lower index levels, absolute point changes of NYSE Index futures are smaller than the S&P and MMI.

**Quality Markets.**
From August 28, 1984 to January 17, 1987 the NYFE did not receive one written customer complaint. Not one. During that period over 7 million futures contracts were traded. This is one of the best records in the industry.

So if you trade stock index futures, know the risk before you trade. Then discover the New York alternative. Trade NYFE stock index futures and options.

**Call your broker today.** Tell him it's time for a change. 800-221-7722, In NY 212-656-8896.

Portfolio Timing Inc. is an equity, fixed-income and balanced manager.

Its equity approach is a 100% movement of assets between no-load equity mutual funds and money market funds using a proprietary timing model.

Its fixed-income approach is to move between long term no-load bond funds and money market funds.

Carl J. Kludt, president and portfolio manager, is chief investment officer; Les Cathersal, vice president, is client contact.

## Posthorn Global Asset Management Ltd.

375 Park Ave. Suite 1407, New York, N.Y. 10022; (212) 415-0802

| | |
|---|---|
| Total assets managed | $596,000,000 |
| Tax-exempt assets managed | $596,000,000 |
| International assets managed | $596,000,000 |
| Minimum separate account | $15,000,000 |
| Types of accounts managed | CFG |
| No. of portfolio managers | 10 |
| Size of research staff | 6 |

Posthorn Global Asset Management Ltd. is an international equity and fixed-income manager.

Its equity approach is thematic, identifying global investment themes or forces and using valuation screens to select attractively priced companies benefiting from these themes.

Its fixed-income approach is based on active currency and interest rate management. Returns in four major currency blocks are forecast to take significant currency and interest rate bets, controlling risk-and-return trade-offs. Currency options are used.

The asset mix Jan. 1 was 74% equities and 26% fixed-income.

The parent is Shearson Lehman Hutton, a unit of American Express.

Karl Van Horn, chairman, is chief investment officer; Susan Leader, director-marketing, is client contact.

## Potomac Asset Management

5247 Wisconsin Ave. N.W., Suite 5, Washington, D.C. 20015; (202) 364-6900

| | |
|---|---|
| Total assets managed | $278,000,000 |
| Tax-exempt assets managed | $266,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 28 |
| Types of accounts managed | CEFJ |
| No. of portfolio managers | 4 |
| Size of research staff | 2 |

Potomac Asset Management Inc. is an equity, fixed-income and balanced manager.

Its bottom-up equity approach is value oriented and risk averse, using Graham & Dodd analysis to screen for emerging growth, growth or special situation stocks. An earnings-yield screen is used.

Its fixed-income approach uses economic analysis and forecasting to determine interest sensitivity of the portfolio. Maturity selections are based on yield curve. All corporate assets are available for swapping.

Clients include Operating Engineers, Steamship Trade Association and Dyncorp.

Peter Ladd Gilsey is chief investment officer; Howard Tucker is client contact.

## Prescott Asset Management

1331 Euclid Ave., Cleveland, Ohio 44115; (216) 696-3360

| | |
|---|---|
| Total assets managed | $512,000,000 |
| Tax-exempt assets managed | $329,000,000 |
| Real estate assets managed | $15,000,000 |
| International assets managed | $2,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 154 |
| Types of accounts managed | CEF |

Prescott Asset Management is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd principles to identify low p/e stocks. A blend of top-down "central tendency" industry and fundamental value analyses define how the market will value assets under the prevailing and future environments.

The parent company is Prescott, Ball & Turben Inc.

Robert M. Hosler, senior vice president, is the client contact.

## Rowe Price-Fleming International Inc.

100 E. Pratt St., Baltimore, Md. 21202; (301) 547-2141

| | |
|---|---|
| Total assets managed | $7,538,000,000 |
| Tax-exempt assets managed | $2,006,000,000 |
| 401(k)/457 assets managed | $11,000,000 |
| International assets managed | $2,006,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 23 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 11 |
| Size of research staff | 86 |

Rowe Price-Fleming International Inc. is an international manager.

Its equity approach uses top-down/bottom-up methods and country selection as key components of its overall investment strategy.

Its fixed-income approach applies an analysis of interest and exchange rate movements over a short and intermediate range to obtain a balance between income and capital appreciation.

The asset mix Jan. 1 was 72% stocks, 15% bonds and 13% cash.

The firm follows 1,500 stocks closely and 2,500, generally; 95% of the research is generated internally.

The parent company is T. Rowe Price Associates/Fleming Group.

Clients include GM, GTE, The Common Fund and Oregon.

Martin G. Wade, president, is the chief investment officer; George A. Murnaghan, vice president, is the client contact.

## T. Rowe Price Associates

100 E. Pratt St., Baltimore, Md. 21202; (301) 547-2000

| | |
|---|---|
| Total assets managed | $20,130,000,000 |

Putnam Cos. Inc. is an equity, fixed-income, balanced, international and GIC manager.

Its growth-oriented equity approach seeks investment positions in three areas: quality growth, focusing on large-cap stocks with superior dividend and earnings growth; specialty equity, concentrating on medium- and small-cap companies with rapid earnings growth; and basic value, seeking undervalued companies with earnings and dividend growth rates equal to the market and above-market yield.

Its active fixed-income approach is disciplined and systematic, working to achieve predictable returns independent of interest rate moves and seeking opportunities in yield curve changes.

The asset mix Jan. 1 was 23% stocks, 69% bonds, 5% cash and 3% mortgage-backed securities. As of the same date, the firm had $168 million in foreign stocks, $48 million in foreign bonds and $1.62 billion in bond indexed funds.

The parent company is Marsh & McLennan Cos. Inc.

Chief investment officers are Francis

*More predictability, less risk.*

# VANGUARD OFFERS "RELATIVE PREDICTABILITY" IN TODAY'S VOLATILE MARKETS.

The Vanguard Group offers "relative predictability" to investors in both the stock and bond markets through:

- **Vanguard Index Trust—500 Portfolio** Seeks investment results that track the Standard & Poor's 500 Composite Stock Price Index.* Established in 1976, it was the nation's first no-load stock index mutual fund. We also offer an S & P 500 Index commingled fund for employee benefit plans.
- **Vanguard Index Trust—Extended Market Portfolio**—Seeks investment results which parallel the performance of the Wilshire 4500 Index.** The Wilshire 4500 consists of over 4,500 medium and small capitalization stocks which are not included in the S & P 500 Index. By investing in the 500 Portfolio and the Extended Market Portfolio in appropriate proportions, investors can track the performance of the entire stock market.
- **Vanguard Quantitative Portfolios**—Seeks to outperform the S & P 500 Index while maintaining the investment and risk characteristics of the Index. The Portfolio uses a series of computer models to evaluate more than 3,500 securities.
- **Vanguard Bond Market Fund**—Seeks to parallel the total return of the Salomon Brothers Broad Investment-Grade Bond Index, *** which consists of mortgage-backed, government and corporate bonds.

Vanguard provides investors competitive investment performance at low cost. We will even tailor separately managed index funds to suit your needs. Please contact:

Sally Hudson,
Director of Institutional Marketing Services
Vanguard Financial Center
Valley Forge, PA 19482

### Qualified Counseling Inc.
46 Prince St., Rochester, N.Y. 14607; (716) 461-9130

| | |
|---|---|
| Total assets managed | $150,000,000 |
| Tax-exempt assets managed | $90,000,000 |
| Real estate assets managed | $6,000,000 |
| Dedicated funds managed | $5,000,000 |
| Minimum separate account | $300,000 |
| Tax-exempt clients | 125 |
| Types of accounts managed | CEJG |
| No. of portfolio managers | 5 |

Qualified Counseling Inc. is an equity, fixed-income, balanced and cash manager.

Its equity approach uses sector rotation and takes a conservative, top-down approach, selecting undervalued sectors and industries within which specific stocks are chosen. It also uses a top-down approach to develop the interest rate scenario and sector analysis for fixed-income decisions.

The firm follows 40 stocks closely and 200, generally.

Fred C. Gregory is chief investment officer; Norman C. Hughes is client contact.

### Qualivest Capital Management Inc.
P.O. Box 2758, Portland, Ore. 97208; (503) 275-6806

| | |
|---|---|
| Total assets managed | $1,763,000,000 |
| Tax-exempt assets managed | $603,000,000 |
| 401(k)/457 assets managed | $424,000,000 |
| 401(k)/457 clients | 13 |
| Minimum separate account | $2,000,000 |
| Tax-exempt clients | 25 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 7 |
| Size of research staff | 1 |

Qualivest Capital Management Inc. is an equity, fixed-income, balanced and GIC manager.

Its equity approach is emerging growth, low p/e and sector rotation. Its fixed-income approach uses sector analysis and is actively managed.

The asset mix Jan. 1 was 60% stocks and 40% bonds.

The firm follows 100 stocks closely and 90 to 100, generally; all research is generated internally.

The parent company is U.S. Bancorp.

Gary K. Sweitzer is the chief investment officer; Linda D. Davis, account manager, is the client contact.

### Quantitative Asset Management Group
1 S. Wacker Drive, Suite 1580, Chicago, Ill. 60606; (312) 977-4173

| | |
|---|---|
| Total assets managed | $0 |
| Minimum separate account | $2,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 3 |

Quantitative Asset Management Group is a new fixed-income manager and international/global manager. It offers portfolio insurance.

Its approach emphasizes active yield enhancement, using options and futures. The firm will create a synthetic Treasury bond when the relative price of futures is less than the relative price of the actual 30-year T-bond. It takes advantage of the difficulty in pricing futures with a model that enables it to better value the contracts.

The parent company is Drexel Burnham Lambert Inc.

Fred Arditti is the chief investment officer; Richard Bindler is the client contact.

### Quantum Investment Management Inc.
885 Third Ave., Suite 810, New York, N.Y. 10022; (212) 230-2500

| Tax-exempt clients | 4 |
| Types of accounts managed | CF |
| No. of portfolio managers | 1 |

RAC Advisors, Inc. is a balanced manager.

Its equity approach uses growth stocks and a low-risk, high-potential valuation method with an emphasis on Graham & Dodd. Its fixed-income approach is passive.

The firm follows 50 stocks closely and 200, generally; 50% of the research is generated internally.

The parent company is Rodecker & Co. Investment Brokers Inc.

Clients include the Helen DeRoy and Bauervic-Carroll Foundations.

Arthur Rodecker is the chief investment officer and client contact.

### Rampart Investment Management Co. Inc.
Exchange Place, Suite 2800, Boston, Mass. 02109; (617) 742-7400

| | |
|---|---|
| Total assets managed | $450,000,000 |
| Tax-exempt assets managed | 0 |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 6 |

Rampart Investment Management Co. Inc. is a defined risk-hedged equity and option overwriting manager.

Its equity approach uses defined risk hedged equity, targeting the market's long-term rate of return with 50% to 60% less volatility, and using exchange-traded options to predefine and minimize risk exposure.

Options are used.

It manages $100 million in options overwriting accounts that are not included in the total assets figure.

The firm follows 100 stocks closely and 100 generally; 20% of the research is generated internally.

George M. DeVoe Jr., is the chief investment officer; R. Ronald Guerriero is the client contact.

### RCM Capital Management
4 Embarcadero Center, Suite 2900, San Francisco, Calif. 94111; (415) 954-5474

| | |
|---|---|
| Total assets managed | $10,875,000,000 |
| Tax-exempt assets managed | $9,675,000,000 |
| Real estate assets managed | $1,506,000,000 |

| Tax-exempt clients | 95 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 9 |
| Size of research staff | 22 |

RCM Capital Management is an equity, fixed-income and balanced manager. The firm offers GIC management through its affiliate, Certus Financial Corp.

Its equity approach uses sector rotation, emphasizing growth and emerging growth stocks. It uses screens to find securities whose growth in earnings and dividends will provide a total return greater than the market.

The firm actively manages fixed-income portfolios to achieve consistently superior relative and absolute rates of return.

The firm constantly monitors, balances and quantifies risk. Sector analysis and active duration management are used.

Stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 49% stocks, 21% bonds, 14% cash and 16% mortgage-backed securities.

Clients include Chevron, Southern California Edison, Tektronix and Xerox.

Claude N. Rosenberg Jr. is the chief investment officer.

Melody L. McDonald, director of client services, is the client contact.

### Reams Asset Management

| Types of accounts managed | CF |
| No. of portfolio managers | 4 |
| Size of research staff | 5 |

W.H. Reaves & Co. Inc., a special equity manager, takes a conservative approach, committed exclusively to investments in electric utilities, natural gas, energy and telecommunication common stocks. It emphasizes capital preservation and low risk.

The asset mix Jan. 1 was 91% stocks and 9% cash.

The firm follows 200 stocks closely and 200 generally; all research is generated internally.

Clients include Eli Lilly, Teco Energy, Public Service Electric & Gas and Aerospace.

William Reaves is the chief investment officer and client contact.

### Red Oak Advisors Inc.
Park 80 West, Plaza One, Saddle Brook, N.J. 07662; (201) 712-1990

| | |
|---|---|
| Total assets managed | $15,000,000 |
| Tax-exempt assets managed | $10,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 2 |
| Types of accounts managed | CJ |
| No. of portfolio managers | 2 |

Red Oak Advisors Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses defensive/value investment management, emphasizing above-average dividend yield, low p/e ratio and low ratio of price to tangible book value.

Its fixed-income approach is quantitative, using confirmed change in the interaction between interest rate momentum and "real" rate level.

Stock index futures and fixed-income futures are used.

Gary A. Gerstein and Thomas R. Jackson, managing directors, are chief investment officers; Mr. Gerstein is the client contact.

### J.W. Redmond & Co.
1750 Pennsylvania Ave. N.W., Washington, D.C. 20006; (202) 393-7900

| | |

| Tax-exempt clients | 37 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 5 |

Reich & Tang L.P. is an equity manager.

Its equity approach emphasizes growth and low p/e stocks, looking for companies with a discount valuation and above-average prospective growth.

The asset mix Jan. 1 was 82% stocks, 1% bonds and 17% cash.

The firm follows 75 stocks closely and 150 generally; all of the research is generated internally.

Clients include RJR Nabisco, General Mills and the Henry J. Kaiser Foundation.

Robert F. Hoerle is the chief investment officer; Gene A. Hoots is the client contact.

### Reimer and Koger Associates Inc.
8500 W. 63rd, Suite 105, Shawnee Mission, Kan. 66202; (913) 236-6700

| | |
|---|---|
| Total assets managed | $962,000,000 |
| Tax-exempt assets managed | $815,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 38 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 6 |

Reimer and Koger Associates Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses growth and emerging growth stocks, sector rotation and market timing, rotating by themes developed along perceived economic changes.

Issues are selected for purchase and sale by quantitatively screening 100 issues.

Its fixed-income approach uses interest rate anticipation, utilizing a duration-based discipline that seeks higher-than-market returns with market risk or less.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 41% stocks, 49% bonds and 10% cash.

Ronald C. Reimer, managing director, is the chief investment officer; Thomas J. Bash, managing director, is the client contact.

# 401(k) Survived Tax Reform, but what about the Recordkeeping?

## TRILOG has the Answer.

Three answers, in fact.

**EBS PROCESSING** offers timely, accurate recordkeeping service for large defined contribution plans of virtually any complexity. Our powerful ***on-line inquiry feature with computational capabilities*** gives you immediate data access without the burdens of handling the recordkeeping yourself.

**PENSION PAY** retirement plan disbursing system provides quality check production at the most competitive prices on the market. Trilog processes over a million lump-sum and repetitive checks annually...***and we've never missed a mailing date.***

**MICROSHARE® THRIFT/401(k)** recordkeeping software for defined contribution plans gives you complete control over processing and reporting at competitive prices. It runs on all IBM microcomputers and permits you to ***download salary and contribution data from other computer systems...automatically.***

**Most important–with Trilog, you never have to worry about changes in government regulations.** Trilog's systems are continuously modified to remain current with regulatory compliance and tax legislation.

**TRILOG**

PROFILES

Rittenhouse Financial Services Inc. is an equity, fixed-income and balanced manager.

Its equity approach tries to locate value in the high-equity, large-cap segment. Value is defined as low p/e and above-average yield. Average portfolio beta must be below the market.

In its fixed-income approach, it staggers maturities out to a maximum of 10 years by using only high-quality corporate and government issues and moves along the yield curve to minimize risk and maximize income.

The firm follows 100 stocks closely and 600 generally.

Clients include The Huston Foundation, Graduate Hospital, Historical Society of Pennsylvania and Rosemont College.

James S. Morgan, vice president, is the chief investment officer; Bernard A. Francis, senior vice president, is the client contact.

Leasing: Oct. 3.

## RNC Capital Management

11601 Wilshire Blvd. Penthouse, Los Angeles, Calif. 90025; (213) 477-6543

| | |

The asset mix Jan. 1 was 40% stocks and 60% bonds.

The parent company is N.M. Rothschild Asset Management (Holding) Ltd.

Clients include Pacific Telesis, American Airlines, GM and Massachusetts PRIM.

*The Creation of Extraordinary Value is the Result of Extraordinary Vision*

- - the Rembrandt Philosophy

A profitable investment portfolio, like the great artist's work on canvas, is rarely the consequence of whim or chance. At Tomlin Properties, we have that extraordinary vision to create extraordinary value with exceptional returns through 17 years of investing in Predevelopment Land.

**"Heaven forbid that I should ever see things the way they do!"**

Rembrandt worked to see what few around him saw. And he created masterpieces. At Tomlin Properties, we've cultivated an approach that looks beyond what "conventional wisdom" might suggest. While some view land as risky business, we've created an approach that proves this is a bit short sighted. With over eighty investments in predevelopment land, *we've proven that predevelopment land is a prudent investment.*

**"Secret . . . fiddlesticks! I start with a formula, and work to prove that it is correct."**

Don't misunderstand. When we speak of "vision" we're not referring to some nebulous "feeling" we get about a parcel of land. The Tomlin formula is based on *detailed research, intensive management* and *hard work.* That experience has been the cornerstone of our success. With a keen eye on the nation's prime growth markets, we begin with the parameters of a cautious investment clearly in focus: location of the land, and timing of the acquisition. Assessed correctly, these are the factors which *minimize risk* and maximize return. Additionally, we only invest in those cities where we have *on-site local management* offices. *Dallas, Los Angeles, Houston, Atlanta, Phoenix and Washington, D.C.* Local Tomlin executives who know the market and who know how to maximize each property's potential. Time and time again our clients have enjoyed the fruits of this approach.

**"Perhaps 400 years from now, if any of my pictures are left, they will say, 'this fellow was going in the right direction'."**

Rembrandt knew that time was the ultimate test of the value of his art. Fortunately we're not looking at a 400 year waiting period. Instead, our average investment period is much shorter than you might expect. History tells us that land has been profitable for the patient sophisticated investor. And while not all land is suitable for capital growth investments, we live in a world where predevelopment land in ideal locations is a diminishing resource. Its appreciation potential is great, while the measured risks are comparable to the most traditionally conservative portfolio components. And Tomlin investments in predevelopment land continually outperform other forms of real estate, stocks, bonds, and treasury bills. *Our clients agree — we've passed the test of time. And the result is extraordinary value.*

Schield Management Co., a market risk manager, uses timing to reduce the risk of owning a mutual fund by preserving gains that might deteriorate in a declining market. Conversely, the portfolio is repositioned when the market returns to an upward position.

The firm follows 100 stocks closely and 4,000, generally; all research is generated internally.

The parent company is Schield Management Co.

Marshall L. Schield is chief investment officer; Karen Oliver, vice president-public relations, is client contact.

### Schield Portfolios Series

390 Union Blvd. Suite 410, Denver, Colo. 80228; (303) 985-9999

| | |
|---|---|
| Total assets managed | $7,000,000 |
| Tax-exempt assets managed | $1,000,000 |
| Types of accounts managed | CE |
| No. of portfolio managers | 4 |

Schield Portfolio Series offers equity, fixed-income and balanced manager, using systematic risk management with a hedge strategy.

Its equity approach seeks to create capital gains potential; its fixed-income approach seeks to achieve the highest possible current income. In both, it seeks to shift capital during downward trends and maximize participation during upward swings. Options and stock index futures and fixed-income futures are used.

The parent company is Schield Management Co.

Marshall L. Schield is chief investment officer; Karen Oliver, vice president-communications, is client contact.

### A.R. Schmeidler & Co. Inc.

| Minimum separate account | $50,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | CG |
| No. of portfolio managers | 2 |

Schroder Real Estate Associates, a real estate manager, acquires underperforming or underused properties that will respond to its direct, intense property and construction management. Properties are sold upon creation of their optimum incremental value.

Clients include General Foods, 3M, Eastman Kodak and Ohio Police & Fire.

Norman L. Peck, managing director, is chief investment officer; John E. Emmanuel, senior vice president, is client contact.

### Scudder, Stevens & Clark

345 Park Ave., New York, N.Y. 10154; (212) 326-6200

| | |
|---|---|
| Total assets managed | $36,738,000,000 |
| Tax-exempt assets managed | $10,495,000,000 |
| 401(k)/457 assets managed | $200,000,000 |
| 401(k)/457 clients | 160 |
| Real estate assets managed | $897,000,000 |
| International assets managed | $1,819,000,000 |
| Dedicated funds managed | $242,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 623 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 94 |
| Size of research staff | 51 |

Scudder, Stevens & Clark is an equity, fixed-income, balanced, international and mutual funds manager.

Its equity approach is value-oriented, emphasizing emerging growth stocks. Fundamental research, identification of long-term change and global perspective provide substantial opportunities for portfolio management at low risk.

Its fixed-income approach is characterized by original and close interaction between managers and the market; interest rate projections and opportunity/risk profiles are critical.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 21% stocks, 50% bonds, 20% cash and 9% mortgage-backed securities. As of the same date, the firm $1.5 billion in foreign stocks, $288 million in foreign bonds and $6 million in foreign cash.

Douglas M. Loudon is chief investment officer-equities; Lynn S. Birdsong is chief investment officer-fixed-income. Victoria J. Herget, principal, and Emily L. Smith, vice president, are client contacts.

### Seaboard Investment Advisers

100 Seaboard Center, 235 Plume St., Norfolk, Va. 23510; (804) 622-0123

| | |
|---|---|
| Total assets managed | $83,000,000 |
| Tax-exempt assets managed | $48,000,000 |

| Types of accounts managed | CEF |
| No. of portfolio managers | 9 |

Selected Financial Services Inc. is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented, focusing on low p/e stocks.

The firm follows 225 stocks closely.

The parent company is Prescott Ball & Turben.

Clients include Cleveland Builders Supply and American Bar Association.

Peggy G. Beier, vice president of marketing, is the client contact.

## J & W Seligman & Co. Inc.

1 Bankers Trust Plaza, New York, N.Y. 10006; (212) 488-0212

| | |
|---|---|
| Total assets managed | $6,775,000,000 |
| Tax-exempt assets managed | $1,562,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 97 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 19 |
| Size of research staff | 10 |

J & W Seligman & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach focuses on growth stocks in companies that are fundamentally strong and meet momentum-based price disciplines.

Its fixed-income approach is conservative and includes secular and interest rate trends and market indicators. The firm also has an equity-oriented high-yield approach and duration and liability matching fixed-income programs.

The asset mix Jan. 1 was 67% stocks, 23% bonds and 10% cash.

The firm follows 150 stocks closely and 300 generally; 90% of research is generated internally.

Clients include New York State Common, University of Oklahoma and Control Data.

Ronald T. Schroeder is chief investment officer; Michael J. Del Priore is client contact.

## Shearson Asset Management Inc.

2 World Trade Center, New York, N.Y. 10048; (212) 321-5313

| | |
|---|---|
| Total assets managed | $4,771,000,000 |
| Tax-exempt assets managed | $1,848,000,000 |
| Minimum separate account | $300,000 |
| Tax-exempt clients | 904 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 17 |
| Size of research staff | 1 |

Shearson Asset Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses fundamental analysis to assess earnings momentum, unrecognized value and the quality of management. Stocks should benefit from competitive advantage and dominant industry and economic trends. It focuses on well-capitalized companies with good relative value and price.

Its fixed-income approach is to invest in high-quality securities in issues or sectors undervalued on a relative basis.

The asset mix Jan. 1 was 45% stocks, 45% bonds and 10% cash.

The firm follows 150 stocks closely and 500, generally; 10% of the research is generated internally.

The parent is Shearson Lehman Hutton Inc., a unit of American Express.

Harry D. Cohen, president, is chief investment officer; Warren Bender, executive vice president, is client contact.

## Shearson Management Inc.

521 Fifth Ave. Suite 1401, New York, N.Y. 10175; (212) 759-8932

| | |
|---|---|
| Total assets managed | $233,000,000 |
| Tax-exempt assets managed | $71,000,000 |
| Minimum separate account | $200,000 |
| Tax-exempt clients | 109 |
| Types of accounts managed | CEG |
| No. of portfolio managers | 3 |

Shearson Management Inc., an equity manager, looks for "niche" growth companies with proven track records. Accounts usually are diversified in 10 positions. Its fixed-income approach is passive.

The firm follows 20 stocks closely and 40, generally; all research is generated internally.

The parent is Shearson Lehman Hutton Inc., a unit of American Express Co.

Leslie M. Pollack, chairman, is chief investment officer; William E. Lauer Jr., senior vice president, is client contact.

## Sheffield Investment Management Inc.

900 Circle 75 Parkway, Suite 750, Atlanta, Ga. 30339; (404) 953-1597

| | |
|---|---|
| Total assets managed | $18,000,000 |
| Tax-exempt assets managed | $16,000,000 |
| Minimum separate account | $250,000 |
| Tax-exempt clients | 38 |
| Types of accounts managed | C |
| No. of portfolio managers | 1 |

Sheffield Investment Management Inc., formerly Sheffield & Co. Inc., is an equity, fixed-income and balanced manager.

Its equity approach focuses on stocks with low p/e ratios, using screens to locate stocks selling at or below book value and having earnings growth potential of 20% annually.

Its fixed-income approach uses bonds to enhance cash flow and reduce volatility. Maturities are held to three to six years.

Roger Sheffield is chief investment officer and client contact.

## Shields Asset Management

709 Westchester Ave., White Plains, N.Y. 10604; (914) 684-6900

| | |
|---|---|
| Total assets managed | $3,400,000,000 |
| Tax-exempt assets managed | $3,400,000,000 |
| Real estate assets managed | $340,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 100 |
| Types of accounts managed | JG |
| No. of portfolio managers | 6 |
| Size of research staff | 6 |

Shields Asset Management is an equity, fixed-income and balanced manager.

Its equity approach uses economic and financial analysis and risk/reward assessments to determine sector concentration and industry/company selection. Portfolios are diversified among generally large, high-quality companies.

Its fixed-income approach is to make maturity and duration judgments based on anticipated interest rate changes and to capitalize on sector opportunities and shifts of yield curves and quality spreads.

The asset mix Jan. 1 was 30% stocks, 45% bonds, 15% cash and 10% mortgage-backed securities.

The firm follows 125 stocks closely and 500, generally; 80% of research is generated internally.

Kenneth Safian is chief investment officer; John R. Larkin, vice president, is client contact.

## Siebel Capital Management

80 E. Sir Francis Drake Blvd., Larkspur, Calif. 94939; (415) 461-3850

| | |
|---|---|
| Total assets managed | $1,946,000,000 |
| Tax-exempt assets managed | $1,420,000,000 |
| 401(k)/457 assets managed | $400,000 |
| 401(k)/457 clients | 1 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 77 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 8 |
| Size of research staff | 2 |

Siebel Capital Management Inc. is an equity, fixed-income, balanced and mutual fund manager.

Its equity approach is value-oriented, using low p/e growth stocks and sector rotation with market timing/tactical asset allocation.

Its fixed-income approach is duration management, using moderate market timing to follow the market.

The asset mix Jan. 1 was 82% stocks, 2% bonds and 16% cash.

The firm follows 75 stocks closely and more than 700 generally; 65% of the research is generated internally.

The parent company is Equitec Financial Group Inc.

Clients include Xerox, Oklahoma Teachers, Ohio State University and Connecticut.

Kenneth F. Siebel Jr., president, is the chief investment officer; Lawrence A. Mitchell, executive vice president, is the client contact.

## Signet Asset Management

7 N. 8th St., 1st Floor, Richmond, Va. 23219; (804) 771-7131

| | |
|---|---|
| Total assets managed | $350,000,000 |
| Tax-exempt assets managed | $350,000,000 |
| Minimum separate account | $2,000,000 |
| Tax-exempt clients | 40 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 3 |
| Size of research staff | 1 |

Signet Asset Management is an equity, fixed-income and balanced manager.

Its equity approach is risk-averse, incorporating a value-driven style that involves a continual and concurrent process of top-down economic analysis and quantitative stock valuation.

Its fixed-income approach is passive, with short- and intermediate-term bonds used in balanced accounts to provide stability.

The parent company is Signet Banking Corp.

W. Guy Williams, executive vice president, is the chief investment officer; James R. Eads, director of marketing, is the client contact.

## Signet Bank/Maryland

P.O. Box 17034, Baltimore, Md. 21203; (301) 332-5877

| | |
|---|---|
| Total assets managed | $595,000,000 |
| Tax-exempt assets managed: | |
| Total | $225,000,000 |
| Commingled | $12,000,000 |
| Separate | $213,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients: | |
| Commingled | 45 |
| Separate | 206 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 7 |

Signet Bank/Maryland is an equity, fixed-income, balanced and GIC manager.

Its equity approach uses sector rotation and Graham & Dodd principles. Its top-down analysis combines quantitative stock valuation and qualitative computer modeling techniques.

Its fixed-income approach uses interest rate anticipation and sector analysis. High quality and maturities averaging less than 10 years are guides.

The parent company is Signet Banking Corp.

Guy Williams is the chief investment officer; Jay M. Neale II, vice president, is the client contact.

## Signet Trust Co.

P.O. Box 26311, Richmond, Va. 23260; (804) 771-7156

| | |
|---|---|
| Total assets managed | $650,000,000 |

| No. of portfolio managers | 4 |
| Size of research staff | 1 |

Signet Trust Co. is an equity, fixed-income, balanced and pooled GIC manager.

Its equity approach is risk-averse, incorporating a value-driven style that involves a continual and concurrent process of top-down economic analysis and quantitative stock valuation.

Its fixed-income approach is passive, with short- and intermediate-term bonds used in balanced accounts to provide stability.

The parent company is Signet Banking Corp.

Charles B. Arrington, vice president, is the chief investment officer; Samuel R. Brent, vice president, is the client contact.

## Simms Capital Management

7 E. 76th St., New York, N.Y. 10021; (212) 861-2830

| | |
|---|---|
| Total assets managed | $409,000,000 |
| Tax-exempt assets managed | $43,000,000 |
| International assets managed | $12,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 5 |
| Types of accounts managed | CG |
| No. of portfolio managers | 5 |
| Size of research staff | 3 |

Simms Capital Management Ltd. is an equity, fixed-income, balanced and international/global manager.

Its equity approach is both top down and bottom up. Economic analysis is used country selection; accelerating earnings momentum and relative undervaluation are the criteria for stock selection. Options are used.

Its top-down fixed-income approach uses the firm's global bond valuation matrix. Real rates are compared after review of trend and cycle adjustments. Currency prospects are considered.

O. Calvin Puckett, president, is chief investment officer; Krista M. Woodall, director of marketing, is client contact.

## Simpson Capital Management Co.

1205 PSFS Building, Philadelphia, Pa. 19107; (215) 629-0162

| | |
|---|---|
| Total assets managed | $50,000,000 |
| Tax-exempt assets managed | $17,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 9 |
| Types of accounts managed | C |
| No. of portfolio managers | 1 |

Simpson Capital Management Co. is an equity, fixed-income and balanced manager.

Its equity approach is contrarian, using Graham & Dodd analysis and low p/e screens to identify growth and emerging growth stocks. Sector rotation and market timing are used.

Its fixed-income approach predominantly uses Treasuries in a process that controls maturity management through interest rate anticipation.

The firm follows 100 stocks closely and 300 generally; 85% of research is generated internally.

Allen J. Simpson, president, is chief investment officer and client contact.

## Sirach/Flinn, Elvins Capital Management

3323 One Union Square, Seattle, Wash. 98101; (206) 624-3800

| | |
|---|---|
| Total assets managed | $523,000,000 |
| Tax-exempt assets managed | $476,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 35 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 5 |
| Size of research staff | 1 |

Sirach/Flinn, Elvins Capital Management is an equity, fixed-income, balanced and GIC manager.

Its equity approach emphasizes growth stocks at a reasonable price. It uses active asset allocation of large- and medium-cap stocks to vary risk levels.

Its fixed-income approach is one of controlled active management based on interest rate forecasting. Duration is limited to plus or minus two years around a benchmark; portfolios hold 15 to 20 issues rated BAA or higher.

The firm follows 45 stocks closely and 100 generally; 30% of the research is generated internally.

Clients include Boeing, Rust-Oleum and Puget Sound University.

George B. Kauffman, principal, is the chief investment officer; Kenneth E. Carlson, principal, is the client contact.

## Sit Investment Associates

| Tax-exempt clients | 3 |
| Types of accounts managed | G |
| No. of portfolio managers | 1 |
| Size of research staff | 1 |

George B. Springman Inc., an equity manager, stresses bottom-up valuation emphasizing large-cap issues with lower p/e ratios. It has a moderately conservative/defensive, opportunity-driven style.

It follows 50 stocks closely and 200 generally; 35% of research is generated internally.

Clients include San Francisco City & County, Contra Costa County and Oregon.

George B. Springman, president, is chief investment officer and client contact.

### Sprout Group

140 Broadway, New York, N.Y. 10005; (212) 504-3600

| | |
|---|---|
| Total assets managed | $200,000,000 |
| Tax-exempt assets managed | $120,000,000 |
| Tax-exempt clients | 25 |
| Types of accounts managed | CEP |
| No. of portfolio managers | 9 |
| Size of research staff | 2 |

Sprout Group, a venture capital manager, seeks significant appreciation through investment in early-round and later-stage financings of U.S. companies with unusually high growth potential, and leveraged and management buy-outs of mature companies.

The parent company is Donaldson, Lufkin & Jenrette, a subsidiary of Equitable Life Assurance Society of the United States.

Clients include GE, General Foods and the University of North Carolina.

Richard E. Kroon is client contact.

### Standish, Ayer & Wood Inc.

1 Financial Center, Boston, Mass. 02111; (617) 350-6100

| | |
|---|---|
| Total assets managed | $7,524,000,000 |
| Tax-exempt assets managed | $3,803,000,000 |
| Real estate assets managed | $760,000,000 |
| International assets managed | $200,000,000 |
| Dedicated funds managed | $100,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 123 |
| Types of accounts managed | CEPG |
| No. of portfolio managers | 13 |
| Size of research staff | 5 |

Standish, Ayer & Wood Inc. is an equity, fixed-income, balanced and international manager.

Its value/growth equity approach combines Graham & Dodd analysis, growth stock and sector rotation.

Its fixed-income approach stresses active management using intermediate maturities and sector analysis.

Options and fixed-income futures are used.

The asset mix Jan. 1 was 16% stocks, 59% bonds, 5% cash and 20% mortgages. As of the same date, the firm had $10 million in foreign stocks and $190 million in foreign bonds.

The firm follows 150 stocks closely and 300 generally; 80% of the research is generated internally.

Clients include Northeastern University, Frank Russell Investment, Commonwealth of Massachusetts and NYNEX.

D. Barr Clayson, managing director, is chief investment officer; Richard C. Doll, director of marketing and client service, is the client contact.

### Starbuck, Tisdale & Associates

301 E. Carrello St., Santa Barbara, Calif. 93101; (805) 963-5963

| | |
|---|---|
| Total assets managed | $102,000,000 |
| Tax-exempt assets managed | $51,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 12 |
| Types of accounts managed | CPG |
| No. of portfolio managers | 2 |

Starbuck, Tisdale & Associates is a balanced manager.

Its equity approach is value-oriented, using low p/e stocks and Graham & Dodd analysis. The firm offers a traditional, fundamental approach to management.

Its fixed-income approach is to purchase instruments so the duration of the assets coincide (within reason) with the cash needs of the client.

The firm follows 80 stocks closely and 45 generally; 50% of the research is generated internally.

L. David Tisdale is the chief investment officer; Patrick S. Steele is the client contact.

### State Mutual Cos.

440 Lincoln St., Worcester, Mass. 01605; (617) 852-1000

| | |
|---|---|
| Total assets managed | $5,000,000,000 |
| Tax-exempt assets managed: | |
| Total | $2,600,000,000 |
| Pooled accounts | $140,000,000 |
| GICs | $1,600,000,000 |

DOES YOUR BOND MANAGER GUARANTEE ITS PERFORMANCE? EVERY YEAR?

WE DO!

Less than 2% of all bond managers have matched the Shearson Lehman Government/Corporate Bond Index each year for the past ten years.*

Our GuarDex Fund guarantees your pension fund a return equal to that of the Index, with no reduction for any fees or charges – a guarantee backed by the assets of a AAA claims-paying rated insurance company.

*SEI Evaluation Service

For the index fund that matches the market, call Robert Southard, Managing Director, Pacific Financial Advisors. Inside California: 1-800-325-9095; Outside California: 1-800-325-8572.

| No. of portfolio managers | 1 |

Steele & Co. Ltd. is an equity, fixed-income and balanced manager.

Its equity approach uses growth and emerging growth stock, sector rotation and market timing. Technical analysis is emphasized for stocks and bonds.

Its fixed-income approach uses interest rate anticipation and trend analysis based on technical analysis. Its fixed-income model allows swift market timing between long-term Treasury securities and cash.

Stock index futures are used.

The firm follows 50 stocks closely: 90% of the research is generated internally.

Michael B. Steele is the chief investment officer and the client contact.

## Stein Roe & Farnham

1 S. Wacker Drive, Chicago, Ill. 60606; (312) 368-7632

| | |
|---|---|
| Total assets managed | $13,091,000,000 |
| Tax-exempt assets managed | $5,266,000,000 |
| 401(k)/457 assets managed | $201,000,000 |
| 401(k)/457 clients | 75 |
| Real estate assets managed | $400,000,000 |
| International assets managed | $12,000,000 |
| Index funds managed | $50,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 857 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 52 |
| Size of research staff | 28 |

Stein Roe & Farnham is an equity, fixed-income and balanced manager.

Its equity approach seeks opportunities in growth, large capitalization, emerging growth and low p/e stocks through a blending of qualitative and quantitative analysis. It uses a 6,500-stock data base to manage portfolios with different investment objectives and styles.

Its fixed-income approach is risk-averse and employs multiple disciplines (maturity optimization, sector rotation and credit selection) with a bias toward capital preservation in bear markets.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 49% stocks, 27% bonds, 20% cash and 4% mortgage-backed securities. As of the same date, the firm had $12 million in foreign stocks and $50 million in equity indexed funds.

Liberty Mutual Insurance owns 80% of Stein Roe Farnham.

Alfred F. Kugel, executive vice president, is the chief investment officer; Richard L. Ford, first vice president, is the client contact.

| Size of research staff | 4 |

Sun Bank Investment Management Group is an equity, fixed-income and balanced manager.

Its value-oriented, large-cap approach uses active portfolio management emphasizing stocks with above-average historical expected growth and strong fundamentals that are selling at low relative prices.

Its fixed-income approach emphasizes using the full range of maturities and shifts holdings on the basis of interest rate anticipation, sector swapping and yield curve analysis.

The real estate fund holds income-producing properties, including shopping centers, small office buildings, light industrial warehouses and offices.

The asset mix Jan. 1 was 70% stocks, 23% bonds and 7% cash.

The parent company is SunTrust Banks Inc.

Anthony R. Gray, president, is the chief investment officer; Victor A. Zollo Jr., senior vice president, is the client contact.

## Sun Life of Canada Investment Management

200 University Ave., Toronto, Ontario M5H 3C7; (416) 595-7809

| | |
|---|---|
| Total assets managed | $1,712,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,588,000,000 |
| For subsidiaries of U.S. firms | $410,000,000 |
| Dedicated assets | $20,000,000 |

| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 6 |
| Types of accounts managed | CG |
| No. of portfolio managers | 1 |
| Size of research staff | 1 |

Target Investors Inc., an equity manager, invests in small to midsize growth companies having relatively low p/es, strong balance sheets and positive earnings surprise potential.

It follows 50 stocks closely and 6,000 generally; 90% of research is generated internally.

Clients include Allied-Signal, Dallas, Champion International and Carolina Power & Light.

Robert Zuccaro, president, is chief investment officer; Mary Jane Boyle, vice president-marketing, is client contact.

### Templeton International

Broward Financial Centre, Suite 2100, Fort Lauderdale, Fla. 33394-3091; (305) 764-7390

| | |
|---|---|
| Total assets managed | $15,400,000,000 |
| Tax-exempt assets managed | $2,000,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 34 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 10 |
| Size of research staff | 12 |

Templeton International is an equity, fixed-income, balanced and international manager.

Its equity approach is based on Graham & Dodd analysis and low p/e stocks searching for undervalued securities. Its long-term approach precludes any country or currency allocation. Strategy remains flexible and responsive to the selection of stocks based primarily on their relative undervaluation.

Its fixed-income approach uses sector analysis, identifying initially those countries with the most positive currency and interest rate outlook. Subsequently, a value analysis occurs, factoring in liquidity, volatility and market size.

The asset mix Jan. 1 was 86% stocks, 4% bonds and 10% cash.

The parent company is Templeton, Galbraith & Hansberger Ltd.

John M. Templeton is chief investment officer; Thomas L. Hansberger, president, is client contact.

| Types of accounts managed | CEFG |
| No. of portfolio managers | 5 |
| Size of research staff | 1 |

Texas American Investment Management is an equity, fixed-income, balanced and real estate manager.

Its equity approach is based on a long-term philosophy that is fundamental in nature but still oriented toward growth through high-value investments.

Its fixed-income approach is passive, seeking maximum income and preservation of principal through diversified investments in intermediate-term securities.

Its real estate approach is to actively invest in high-quality income-producing properties offering competitive cash returns and significant potential for appreciation.

The asset mix Jan. 1 was 35% stocks, 30% bonds, 20% cash, 10% equity real estate and 5% GICs.

The parent company is Texas American Bancshares.

Harold Achziger, president, is chief investment officer; Gary C. Nelson, senior vice president, is client contact.

### Third National Bank

Financial Services Division, Nashville, Tenn. 37244; (615) 748-4391

| | |
|---|---|
| Total assets managed | $1,472,000,000 |
| Tax-exempt assets managed: | |
| Total | $528,000,000 |
| Commingled | $250,000,000 |
| Separate | $278,000,000 |
| 401(k)/457 assets managed | $67,000,000 |
| 401(k)/457 clients | 28 |
| Real estate assets managed | $21,000,000 |
| Indexed assets managed | $25,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients: | |
| Commingled | 404 |
| Separate | 44 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 10 |

Third National Bank is an equity, fixed-income, balanced, real estate and GIC fund manager.

Its equity approach is based on top-down sector rotation, emphasizing shifts through the business cycle.

Its fixed-income approach is quantitative, matching a target risk level and adding value through detailed yield curve analysis and various options and fixed-income futures strategies.

Its real estate approach emphasizes purchasing income-producing properties of $1 million to $5 million in the secondary markets of the Southeast.

The asset mix Jan. 1 was 20% stocks, 39% bonds, 1% cash, 3% equity real estate, 1% mortgages, 6% miscellaneous and 30% money market.

The parent company is SunTrust Banks Inc.

Parker Thomas is chief investment officer; Dick Moser is client contact.

Consultants: Oct. 17.

### Thompson/Rubinstein Investment Management

715 S.W. Morrison, Suite 604, Portland, Ore. 97205; (503) 224-1488

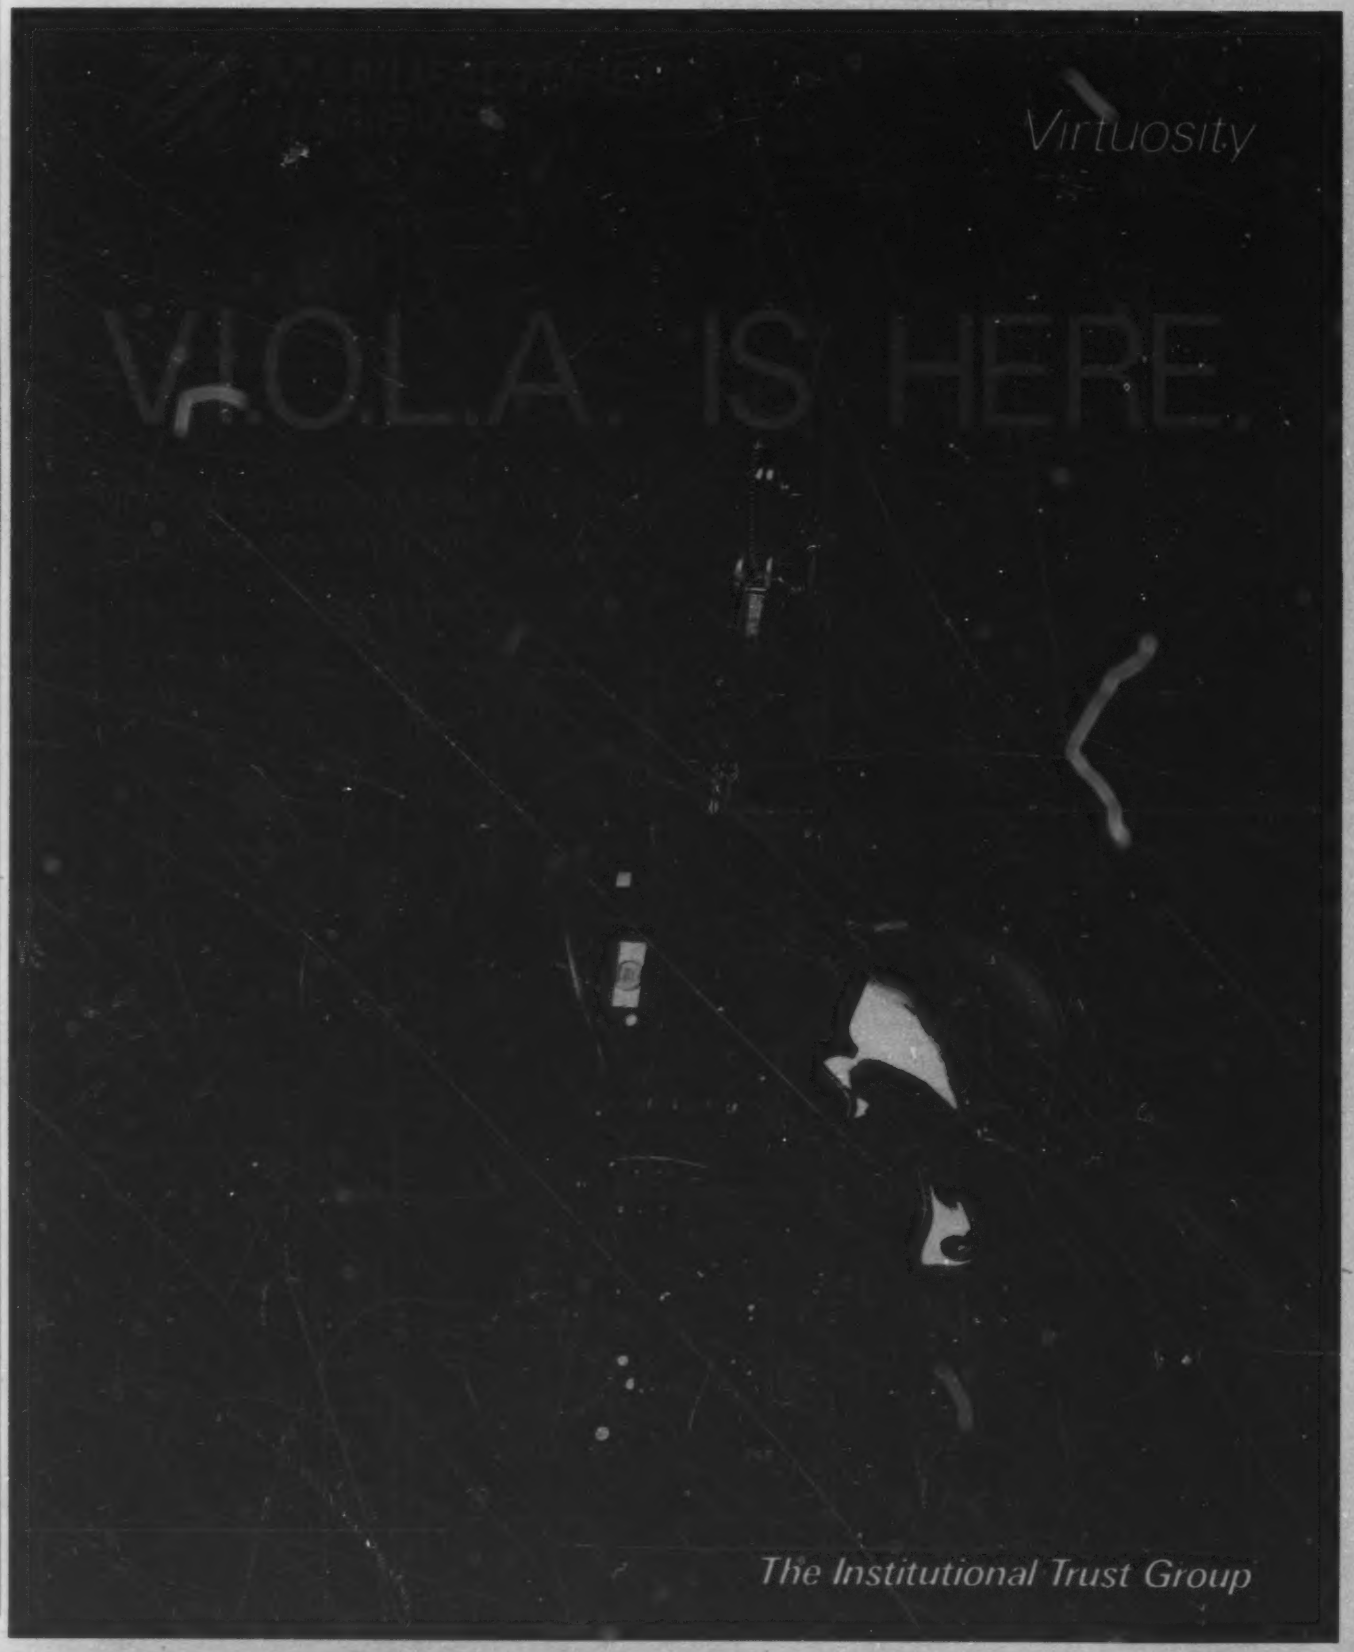
| | |
|---|---|
| Total assets managed | $264,000,000 |
| Tax-exempt assets managed | $170,000,000 |
| Real estate assets managed | $1,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 67 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 5 |

Thompson/Rubinstein Investment Management Inc. is an equity, fixed-income and balanced manager.

Its bottom-up equity approach emphasizes companies that have a history of earnings and dividend growth, high ROE and management that has substantial investment in the business.

Its fixed-income approach is based on interest rate anticipation, investing in U.S. government and high-quality corporate securities with maturities of 10 years or less.

Fay L. Thompson and Richard A.



Rubinstein are chief investment officers; Tim F. Ellis, vice president, is client contact.

## Thompson, Siegel & Walmsley Inc.

5000 Monument Ave., Richmond, Va. 23230; (804) 353-4500

| | |
|---|---|
| Total assets managed | $2,450,000,000 |
| Tax-exempt assets managed | $2,205,000,000 |
| 401(k)/457 assets managed | $200,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 109 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 6 |

Thompson, Siegel & Walmsley Inc. is an equity and balanced manager.

It follows a conservative, risk-averse, value-oriented equity approach incorporating economic top-down analysis, valuation and fundamental security analysis and asset allocation tools as building block disciplines in a highly structured decision-making process.

Its fixed-income approach also is conservative and risk-averse, incorporating economic top-down analysis, fundamental credit analysis and sector spread analysis. Average maturities range from four to 12 years through the cycle. Quality is emphasized.

The asset mix Jan. 1 was 52% stocks, 38% bonds and 10% cash.

It follows 200 stocks closely and 500 generally; 60% of research is generated internally.

The parent company is United Asset Management.

Clients include James River, Burroughs Wellcome and PacTel.

The chief investment officers are Matthew Thompson, John Siegel and S. Pierce Walmsley, managing directors, and Horace Whitworth II and Paul Fenwerda, vice presidents. Mr. Thompson is client contact.

## Thompson, Unger & Plumb

4610 University Ave., Madison, Wis. 53705; (608) 231-1676

| | |
|---|---|
| Total assets managed | $131,000,000 |
| Tax-exempt assets managed | $72,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 97 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 3 |

Thompson, Unger & Plumb Inc., formerly FMI Capital Management Inc., is an equity, fixed-income and balanced manager.

Its equity approach involves buying midsize growth companies at or near S&P 500 p/e levels and holding them until the fundamentals weaken or until the p/e reaches an overvalued level.

Its fixed-income approach uses interest rate anticipation for longer-term trends.

Clients include Wisconsin Power & Light Foundation, Edgewood Clinic and Paper Converting Machine.

Raymond F. Unger is chief investment officer; Thomas G. Plumb is client contact.

## Thorson, Brown & Plunkett

43 Arch St., Greenwich, Conn. 06830; (203) 661-0666

| | |
|---|---|
| Total assets managed | $342,000,000 |
| Tax-exempt assets managed | $79,000,000 |
| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 33 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 5 |

Thorson, Brown & Plunkett Inc., an equity and balanced manager, is theme-oriented. The firm emphasizes growth investments with a bias toward small and midsize companies and companies that tend to be underowned institutionally. It focuses on identifying emerging trends, with capital concentrated in sectors and companies that will benefit.

Its fixed-income approach is based on interest rate anticipation.

Petr A. Thorson and John H. Plunkett, managing directors, are chief investment officers; Pegeen M. Burgess is vice president and director of marketing.

## Todd Investment Advisors

3160 First National Tower, Louisville, Ky. 40202; (502) 585-3121

| | |
|---|---|
| Total assets managed | $2,511,000,000 |
| Tax-exempt assets managed | $2,392,000,000 |
| 401(k)/457 assets managed | $10,000,000 |
| 401(k)/457 clients | 2 |
| Real estate assets managed | $125,000,000 |
| Index funds managed | $210,000,000 |
| Dedicated funds managed | $150,000,000 |
| Minimum separate account | $3,000,000 |
| Tax-exempt clients | 22 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 4 |

Todd Investment Advisors Inc. is an equity, fixed-income, balanced and enhanced index manager.

Its equity approach is conservative with a strong capital-preservation bent focusing on low-beta, large-cap and high-yield stocks. It uses aggressive shifts between sectors and industry groups. Valuation studies determine asset allocation, while quantitative measures control buying and selling.

Its fixed-income approach is based on interest rate anticipation. High-quality securities are used with aggressive shifts in average maturity.

Options, stock index futures and fixed-income futures can be used.

The asset mix Jan. 1 was 19% stocks, 58% bonds, 18% cash and 5% mortgage-backed securities; $210 million was in bond indexed funds.

The firm follows 100 stocks closely and 450 generally; 60% of the research is generated internally.

Clients include Kentucky Teachers, Memphis, Louisville Gas & Electric and Ohio Casualty Insurance.

Bosworth M. Todd Jr., president, is chief investment officer; Robert M. Calvert, executive vice president, is client contact.

## Tomlin Properties Inc.

5001 Spring Valley Road, Suite 1000-East, Dallas, Texas 75244-3910; (214) 239-8041

| | |
|---|---|
| Total assets managed | $580,000,000 |
| Tax-exempt assets managed | $80,000,000 |
| Real estate assets managed | $80,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 6 |
| Types of accounts managed | C |
| No. of portfolio managers | 5 |
| Size of research staff | 6 |

Tomlin Properties Inc. is a predevelopment real estate manager. It researches the primary growth corridors in Los Angeles, Phoenix, Dallas, Houston, Atlanta and Washington, identifying important properties in those paths for possible acquisition. Once acquired, aggressive management is applied to improve the development timeframe and increase value.

Clients include Texas Instruments.

Dan O. Tomlin Jr., chairman, is chief investment officer; George M. Dishman, managing partner, is client contact.

## Toronto Investment Management

26 Wellington St. E., Suite 900, Toronto, Ontario M4S 1C6; (416) 865-0731

| | |
|---|---|
| Total assets managed | $2,990,000,000 |
| Tax-exempt assets managed: | |
| Total | $2,392,000,000 |
| For subsidiaries of U.S. firms | $1,129,000,000 |
| Real estate assets managed | $38,000,000 |
| Non-North American assets | $32,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 78 |
| U.S. subsidiaries | 26 |
| Types of accounts managed | CGU |
| No. of portfolio managers | 11 |
| Size of research staff | 2 |

Toronto Investment Management, a Canadian firm, is a conservative balanced manager that also offers specialty management in aggressive equities, fixed income, non-North American equities, real estate and venture capital.

Its equity approach uses fundamental analysis with an emphasis on growth and low p/e stocks and market timing. Portfolios are value-oriented.

Its fixed-income approach is fundamentally oriented to economic and credit market research, and includes interest rate anticipation. Extensive use is made of computer analysis and spread trading analysis. Value is added through trades in coupon sector, quality and yield curve.

It follows 70 stocks closely and 125, generally; 60% of research is generated internally.

The parent company is AMI Asset Management International Inc.

Gary Kondrat, vice president, is chief investment officer; Tania Murenko, vice president-corporate development, is client contact.

The Travelers Cos. is an equity, fixed-income, balanced, real estate, international, GIC, annuities, options and futures, portfolio insurance, direct placement, asset allocation and timberland manager.

Separate account equity management is provided through subsidiaries Dillon, Read Capital and Travelers Investment Management; fixed-income management is provided through subsidiaries Travelers Keystone and Travelers Cos.' securities department.

The subsidiaries manage some commingled funds for the parent that are included in the data above. Assets listed for the subsidiaries, which are profiled separately, do not include these commingled assets.

Its real estate approach is to maintain objectives via 100% ownership, all-cash investments and an emphasis on high cash-yielding properties.

Options, stock index futures and fixed-income futures are used.

The insurer follows 250 stocks closely and 1,500, generally; 25% of research is generated internally.

It provides portfolio insurance on $26 million in assets.

Clients include Equifax and BDM.

The parent is The Travelers Corp.

Richard Shima, executive vice president, is chief investment officer; B. Thomas Willison, vice president, is client contact.

## Travelers Asset Management International

1 Tower Square — 10PB, Hartford, Conn. 06183-2030; (203) 954-0766

| Size of research staff | 14 |

Travelers Asset Management International Corp. is a fixed-income, balanced, international and GIC manager.

It offers active, passive or asset/liability management fixed-income approaches in domestic and international capital markets. It focuses on total return through quality and sector swaps and credit analysis. Options and fixed-income futures are used.

All research is generated internally.

The parent is The Travelers Corp.

Anne Melissa Dowling, vice president and chief investment officer, is client contact.

## Travelers Investment Management Co.

Northeast Plaza, 90 State House Square Suite 1200, Hartford, Conn. 06103-3796; (203) 277-4158

| | |
|---|---|
| Total assets managed | $1,551,000,000 |
| Tax-exempt assets managed | $771,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 7 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 7 |
| Size of research staff | 2 |

Travelers Investment Management Co. is an equity, fixed-income, international, index, portfolio insurance and options overwriting manager.

Its active equity approach seeks to identify fundamental value through a dividend discount model. Systematic quantitative disciplines are used in tactical asset allocation and security selection. Domestic and international index funds are offered.

Its risk management group engages in hedged and domestic and international index-related investment strategies using derivative instruments to protect equity portfolios and hedge foreign currency risk.

Fixed-income capabilities include management of an index fund tracking the Salomon Brothers BIG index.

In addition to the assets above, $299 million is managed in an options overwriting program. Travelers Investment Management also manages commingled accounts for The Travelers Insurance Co.

The asset mix Jan. 1 was 85% stocks and 15% cash.

The parent company is The Travelers Corp.

David M. Dunford, president, is chief investment officer; Kent A. Kelley, executive vice president, is client contact.

United States Trust Co. of New York is an equity, fixed-income, balanced, real estate and global/international manager.

Its equity approach is to buy and hold assets that have demonstrated value in terms of underlying resources and assets or earnings potential, and are favorably priced.

Economic analysis, both domestic and international, is the most critical factor in its fixed-income approach. Yield curve analysis plays a vital role in selection and maturity. Credit analysis and changing yield spread relationships affect quality and sector distribution decisions. Options are used.

Its real estate approach consists of buying predevelopment land for cash. The holding period averages five years.

The asset mix Jan. 1 was 31% stocks, 67% bonds, 1% cash and 1% equity real estate; $30 million was in foreign stocks.

The parent company is United States Trust Co.

Frederick B. Taylor, chairman-investment policy, is the chief investment officer; Preston S. Smith, vice president, is the client contact.

### United Trust Fund

4770 Biscayne Blvd., Miami, Fla. 33137; (305) 576-7711

| | |
|---|---|
| Total assets managed | $215,000,000 |
| Tax-exempt assets managed | $0 |
| No. of portfolio managers | 7 |
| Size of research staff | 3 |

United Trust Fund is a fixed-income and real estate manager.

Its fixed-income approach is passive, taking long-term, fixed-rate securities or other credit instruments and making continuous investment without regard to market timing in a flat-rate market. In an escalating market, it will go short and roll. Fixed-income futures are used.

Its real estate approach is guaranteed return through credit leases.

James Nolan is chief investment officer and client contact.

### Unity Management Inc.

2001 Marcus Ave., Lake Success, N.Y. 11042; (516) 437-2200

| | |
|---|---|
| Total assets managed | $560,000,000 |
| Tax-exempt assets managed | $560,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 67 |
| Types of accounts managed | CJG |
| No. of portfolio managers | 7 |
| Size of research staff | 3 |

Unity Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach combines growth and low p/e stocks, and market timing. In-house computer systems and traditional research sources are used for fundamental and technical analysis.

Its fixed-income approach is established through conventional and computer-generated interest rate forecasts. Bond swapping and immunization programs are used for restructuring asset allocations.

The asset mix Jan. 1 was 25% stocks, 35% bonds and 40% cash.

The firm follows 250 stocks closely and 2,000, generally; 75% of the research is generated internally.

Irving Decter is chief investment officer; Kenneth Decter is the client contact.

### UNUM Life Insurance

| No. of portfolio managers | 2 |

Vanbrit Investment Management, a Canadian firm, is an equity, fixed-income, balanced and money market manager.

Its equity approach emphasizes growth stock and its fixed-income approach, interest rate anticipation.

The firm follows 100 stocks closely and 200, generally; 40% of research is generated internally.

The parent company is AMI Asset Management International Inc.

Larry Avant, president, is chief investment officer and client contact.

### Van Cleef, Jordan and Wood

230 Park Ave., Suite 910, New York, N.Y. 10169; (212) 986-2600

| | |
|---|---|
| Total assets managed | $240,000,000 |
| Tax-exempt assets managed | $170,000,000 |
| Minimum separate account | $500,000 |
| Types of accounts managed | CFJ |
| No. of portfolio managers | 6 |
| Size of research staff | 6 |

Van Cleef, Jordan and Wood Inc. is an equity, fixed-income and balanced manager.

The firm uses a stable growth, low risk, top-down/bottom-up value oriented approach to equity investing, coupled with industry sector rotation. Its active fixed-income management consists of shifting duration, maturity sector rotation and anticipation of quality upgrades and downgrades. Asset allocation is of primary importance in both approaches.

The asset mix Jan. 1 was 35% stocks, 55% bonds and 10% cash.

Richard F.F. Nichols Jr. is chief investment officer; George C. Brett is client contact.

### Van Deventer & Hoch

420 N. Brand Blvd., Glendale, Calif. 91203; (818) 247-5330

| | |
|---|---|
| Total assets managed | $1,118,000,000 |
| Tax-exempt assets managed | $483,000,000 |
| Minimum separate account | $200,000 |
| Tax-exempt clients | 539 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 20 |
| Size of research staff | 7 |

Van Deventer & Hoch, a balanced manager, takes a value-oriented approach to equities, investing in soundly managed businesses when available at a discount to true asset value.

Its fixed-income approach is passive. High-grade securities maturing in seven years or less are used for defensive purposes.

The firm follows 200 stocks closely; all research is generated internally.

The parent company is Chemical New York Corp.

Richard D. Trautwein, executive vice president, is chief investment officer; Richard A. Snyders, president, is client contact.

### Van Eck Associates Corp.

122 E. 42nd St., New York, N.Y. 10168; (212) 687-5200

| | |
|---|---|
| Total assets managed | $500,000,000 |
| Tax-exempt assets managed | $90,000,000 |

| Minimum separate account | $5,000,000 |
| Tax-exempt clients | 1 |
| Types of accounts managed | C |
| No. of portfolio managers | 4 |
| Size of research staff | 8 |

Van Eck Associates Corp. is an equity, fixed-income, balanced, international and gold-products manager.

Its equity approach emphasizes growth stocks, with gold investments used for prudent diversification and as a hedge against inflation. It follows global investment trends with appropriate hedging strategies. Its fixed-income approach uses interest rate anticipation and currency trends to judge the investment climate. Options and financial futures are used.

The parent is Van Eck Management Corp.

Klaus Buescher, president, is the chief investment officer; David Kenerson is client contact.

### The Vanguard Group

Vanguard Financial Center, Valley Forge, Pa. 19482; (215) 648-6000

| | |
|---|---|
| Total assets managed | $12,800,000,000 |
| Tax-exempt assets managed | $1,233,000,000 |
| Index funds managed | $478,000,000 |
| Minimum separate account | $25,000,000 |
| Types of accounts managed | CEFJG |

The Vanguard Group is an equity and fixed-income manager; additional equity and fixed-income and its balanced, real estate, international and GIC management is handled by external managers.

Vanguard has $27 billion in total assets; $12.8 billion is managed internally and $14.2 billion, externally. Of the total, $5.9 billion represents tax-exempt assets; $1.233 billion is managed internally and $4.7 billion, externally.

Its equity approach varies with a fund's investment objective. The approaches offered are passive, quantitative, growth, emerging growth and low p/e stocks. Graham & Dodd analysis is used.

The fixed-income strategy also varies by fund. Those used are passive or sector analysis.

Financial futures are used to hedge a fund's cash position.

Its real estate approach is to invest primarily in existing, income-producing commercial properties.

It handles, through internal and external management, $3 billion in assets

YOU'RE LOOKING AT ONE OF THE REASONS OTHER ENERGY COMPANIES WISH THEY WERE QUESTAR.

We're in the energy business from top to bottom.

From our headquarters in Salt Lake City, Utah, we engage in oil and gas exploration and production, interstate transmission and storage, and retail distribution of natural gas in one of the country's fastest-growing regions. Our operations in each area of the company make a significant contribution to Questar's bottom line—which results in greater economic stability.

That diversity is what other energy companies are trying to achieve. We've been there for a long time now.

It's paid off.

Our shareholders have received 173 consecutive dividends; we've increased those dividends 15 times in the last 15 years; and our performance compares favorably with other companies in the energy industry.

Write (or call) for more information. And we'll give you more reasons to take a closer look at Questar.

| Minimum separate account | $300,000 |
| Tax-exempt clients | 12 |
| Types of accounts managed | C |
| No. of portfolio managers | 2 |

Weiser Investment Management Ltd. is an equity and balanced manager.

The firm uses a flexible Graham & Dodd approach with emphasis on earnings and sales growth, financial condition and book value. Fixed-income investments are almost solely in convertibles. Options are used rarely, and only on buy/write programs.

Clients include Odetics and Taylor Spring Manufacturing.

Morris Weiser, president, is chief investment officer; Mr. Weiser and Michael Herst, vice president, are client contacts.

### Weiss, Peck & Greer

1 New York Plaza, New York, N.Y. 10004; (212) 908-9500

| | |
|---|---|
| Total assets managed | $3,724,000,000 |
| Tax-exempt assets managed | $2,870,000,000 |
| Real estate assets managed | $300,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 100 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 12 |
| Size of research staff | 7 |

Weiss, Peck & Greer is an equity, fixed-income and balanced manager.

Its equity approach is flexible, characterized by a combination of top-down and bottom-up processes, overweighting particularly attractive sectors. In stock selection, the firm is value-driven, seeking companies with consistent earnings growth or with prospects of fundamental change in structure or regulation in its industry.

Its fixed-income approach stresses high-quality portfolios to earn significant excess returns over bond indexes. Management is systematic, based on holding a constant level of portfolio risk and producing the excess returns consistently. The methodology is an alternative to indexation and market timing.

Options and financial futures are used.

The asset mix Jan. 1 was 53% stocks, 28% bonds, 9% cash and 10% mortgage-backed securities.

It follows 200 stocks closely and 500 generally; 95% of research is generated internally.

Clients include GM, GTE and Allied.

Stephen H. Weiss is chief investment officer; Vincent E. Teti is client contact.

### Wilkens & Nanovic Associates

35 Mason St., Greenwich, Conn. 06830; (203) 622-1040

| | |
|---|---|
| Total assets managed | $470,000,000 |
| Tax-exempt assets managed | $470,000,000 |
| Minimum separate account | $15,000,000 |
| Tax-exempt clients | 4 |
| Types of accounts managed | C |
| No. of portfolio managers | 2 |

Wilkens & Nanovic Associates is a risk-averse core equity manager focusing on identifying fundamental changes within companies whose stocks at purchase exhibit limited downside risk. Portfolios are diversified; cash reserves may reach 50%.

The firm follows 90 stocks closely and 400, generally; 10% of research is generated internally.

Clients include GenCorp, RJR Nabisco, Sea-Land and Inco.

Frank Wilkens is chief investment officer.

### Wilmington Capital Management Inc.

1 Rodney Square, Suite 807, Wilmington, Del. 19801; (302) 656-8241

| | |
|---|---|
| Total assets managed | $992,000,000 |
| Tax-exempt assets managed | $914,000,000 |
| Minimum separate account | $10,000,000 |
| Tax-exempt clients | 17 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 3 |
| Size of research staff | 3 |

Wilmington Capital Management Inc. is an equity and balanced manager.

Its equity approach combines Graham & Dodd analysis and low p/e stocks. Its seeks to determine value through fundamental analysis; disparities between value and price create investment opportunities. Fixed income is used in balanced accounts for increased cash flow, reduced market volatility and to protect against business risk.

The asset mix Jan. 1 was 85.2% stocks, 2.9% bonds and 11.9% cash.

It follows 80 stocks closely and 300 generally; 75% of research is generated internally.

Clients include Delmarva Power & Light, Pennsylvania Power & Light, California Teachers and Teamsters.

Daniel F. Mahoney Jr., president, is chief investment officer; James W. MacAllen, vice president, is client contact.

### Wilmington Trust Co.

Rodney Square North, Wilmington, Del. 19890; (302) 651-8518

| | |
|---|---|
| Total assets managed | $18,038,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,006,000,000 |
| Commingled | $62,000,000 |
| Separate | $944,000,000 |
| 401(k)/457 assets managed | $6,000,000 |
| 401(k)/457 clients | 9 |
| International assets managed | $2,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients: | |
| Commingled | 6 |
| Separate | 115 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 8 |
| Size of research staff | 6 |

Wilmington Trust Co. is an equity, fixed-income, balanced, international and GIC manager.

Its equity approach is disciplined, systematic, consistent and value oriented, using low p/e stocks and Graham & Dodd analysis. It offers three distinct approaches: quantitative equities, core value and optioned equity.

Its fixed-income approach uses a mathematical investment process that reacts to and participates in market price trends.

Options and fixed-income futures are used.

The asset mix Jan. 1 was 34% stocks, 42% bonds and 24% cash; $2 million was in foreign stocks.

It follows 125 stocks closely and 300, generally; 75% of research is generated internally.

Clients include Hagley Museum & Library and Iowa State University.

Nathan Hayward III, senior vice president, is chief investment officer; Peter J. Succoso, vice president, is client contact.

### Wilshire Asset Management

1299 Ocean Ave., Santa Monica, Calif. 90401; (213) 451-3051

| | |
|---|---|
| Total assets managed | $2,500,000,000 |
| Tax-exempt assets managed | $2,500,000,000 |
| Index funds managed | $2,500,000,000 |
| Tax-exempt clients | 5 |
| Types of accounts managed | CG |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Wilshire Asset Management, an equity manager, provides a variety of index and custom approaches including highly disciplined style-oriented portfolios. Costs are controlled through low turnover and highly efficient trading practices. Stock index futures are used in rebalancing portfolios.

All assets Jan. 1 were in equity index funds.

The firm follows 6,000 stocks generally; all research is generated internally.

The parent company is Wilshire Associates.

Clients include Minnesota, North Dakota Teachers and Minnesota Mutual.

Thomas D. Stevens is chief investment officer and client contact.

### Wilson Foster & Co. Inc.

4987 Olivas Park Drive, No. 100, Ventura, Calif. 93001; (805) 644-8207

| | |
|---|---|
| Total assets managed | $72,000,000 |
| Tax-exempt assets managed | $71,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 15 |
| Types of accounts managed | CF |
| No. of portfolio managers | 2 |

Wilson Foster & Co. Inc. is an equity and balanced manager.

Its equity approach combines growth and low p/e stocks and market timing. It screens for new trends and growth potentials and the desire of investor ownership, including a major emphasis on fundamental analysis. Asset allocation depends upon perceived risks.

It follows 60 stocks closely and 700, generally; 50% of research is generated internally.

Harvey F. Wilson, president, is chief investment officer; Fynn F. Wilson, portfolio manager, is client contact.

### Wilson, Kemp & Associates

400 Renaissance Center, Detroit, Mich. 48243; (313) 259-6210

| | |
|---|---|
| Total assets managed | $340,000,000 |
| Tax-exempt assets managed | $210,000,000 |
| Minimum separate account | $200,000 |
| Tax-exempt clients | 80 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 2 |

Wilson, Kemp & Associates Inc. is an equity, fixed-income and balanced manager.

Its equity approach is fundamental, combining growth, emerging growth and low p/e stocks with Graham &

Dodd analysis.

Its fixed-income approach uses interest rate anticipation without a short-term trading orientation.

It follows 75 stocks closely and 300, generally; 5% of research is generated internally.

Robert D. Kemp Jr. and Thomas A. Wilson, principals, are chief investment officers and client contacts.

### Winchester Capital Management Co.

1 International Place, Boston, Mass. 02110; (617) 482-3001

| | |
|---|---|
| Total assets managed | $160,000,000 |
| Tax-exempt assets managed | $100,000,000 |
| Minimum separate account | $500,000 |
| Tax-exempt clients | 48 |
| Types of accounts managed | CFGJ |
| No. of portfolio managers | 4 |

Winchester Capital Management Co. is an equity, fixed-income, balanced and GIC manager.

Its equity approach uses sector rotation, and is top-down and bottom-up. Valuation mechanisms include relative and absolute p/e.

Its fixed-income approach uses interest rate anticipation based on macroeconomic analysis.

It follows 100 stocks closely and 50, generally; 50% of research is generated internally.

John Livens, principal, is chief investment officer; Paul J. Marcus, principal, is client contact.

### Winrich Capital Management

23702 Birtcher Drive, Lake Forest, Calif. 92630; (714) 380-0200

| | |
|---|---|
| Total assets managed | $180,000,000 |
| Tax-exempt assets managed | $119,000,000 |
| International assets managed | $6,000,000 |
| Minimum separate account | $1,000,000 |
| Tax-exempt clients | 33 |
| Types of accounts managed | CF |
| No. of portfolio managers | 4 |
| Size of research staff | 2 |

Winrich Capital Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented, using systematic, computer-aided application of objective criteria, plus daily monitoring, revaluation and application of buy/sell disciplines. Criteria are low p/e, strong balance sheet and unrecognized assets.

Fixed-income investments are used as a stabilizing influence/income generator. High-quality government and corporate securities are used, with laddered maturities. The average maturity is adjusted based on interest rate expectations using yield curve analysis.

Darrell J. Winrich, chairman and president, is chief investment officer; Kurt R. Winrich, vice president, is client contact.

### Wolf, Webb, Burk & Campbell Inc.

260 S. Broad St., Suite 901, Philadelphia, Pa. 19102; (215) 735-5910

| | |
|---|---|
| Total assets managed | $850,500,000 |

| Tax-exempt clients | 110 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 7 |
| Size of research staff | 37 |

Wright Investors' Service is an equity, fixed-income and balanced manager.

Equity investments follow semi-passive, growth and small-cap growth stock strategies. It offers three products: quality core — quality growth broadly diversified; blue chip — value-established growth companies; and junior blue chip — smaller, well-established growth companies.

Its fixed-income approach is influenced by interest rate anticipation; active management and dedicated programs are offered.

The asset mix Jan. 1 was 65% stocks, 33% bonds and 2% cash.

It follows 360 stocks closely and 4,000 generally; all research is generated internally.

The parent is Winthrop Corp.

Judith R. Corchard, executive vice president and senior investment officer, is chief investment officer; Albert L. Meric Jr., executive vice president, is client contact.

## Y

### Yamaichi Capital Management Inc.

2 World Trade Center, Suite 9660, New York, N.Y. 10048; (212) 912-6484

| | |
|---|---|
| Total assets managed | $95,000,000 |
| Tax-exempt assets managed | $0 |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 3 |

Yamaichi Capital Management Inc. is an equity, fixed-income, balanced and global manager.

Its equity approach focuses on asset allocation, industry sectors and a favorable reward/risk evaluation that maximizes return and minimizes risk.

Its fixed-income approach analyzes economic and monetary trends to identify optimal maturity selection.

The parent company is Yamaichi International Capital Management.

Henry A. Frantzen is chief investment officer.

### Yasuda Bank & Trust Co.

1 World Trade Center, Suite 8833, New York, N.Y. 10048; (212) 912-1684

| | |
|---|---|
| Total assets managed | $0 |
| No. of portfolio managers | 20 |
| Size of research staff | 20 |

Yasuda Bank & Trust Co. is an equity, fixed income, balanced and international manager.

For equity investments, about 70% is indexed to the market, while 30% is actively invested in low p/e stocks. It has a long-term (three years-plus) view of the market. Its fixed-income approach indexes about 70% of assets with 30% invested based on interest rate projections. A medium- to long-term duration weighting is used.

Stock index and fixed-income futures are used.

The parent company is Yasuda Trust and Bank Ltd., Toyko.

Shoji Yamada, general manager-pension fund management department, is chief investment officer; W. Franklin Clemmons II, assistant treasurer, is client contact.

### Yeager, Wood & Marshall

630 Fifth Ave., New York, N.Y. 10111; (212) 765-5350

| | |
|---|---|
| Total assets managed | $840,000,000 |
| Tax-exempt assets managed | $640,000,000 |

Zevenbergen Capital Inc., an equity manager, uses a bottom-up, value-oriented approach based on fundamentals. Its fixed-income approach is passive. Options are used.

The firm follows 25 stocks closely and 50 generally; 15% of research is generated internally.

Nancy A. Zevenbergen, principal, is chief investment officer; Kathleen H. Sesnon, vice president, is client contact.

## Consultant exec moves to new firm

DALLAS — Brian C. Ternoey, principal and national director of the William M. Mercer-Meidinger-Hansen Inc. insurance consulting practice, will leave at the end of May to head the insurance and annuity consulting division at A. Foster Higgins & Co., New York.

Mr. Ternoey will replace Murray Becker who left the parent company of Johnson & Higgins Jan. 29, along with other J&H executives, to establish a guaranteed investment contract management and consulting firm: Becker, Rooney Inc., Teaneck, N.J.

Mr. Ternoey becomes the third national director of insurance consulting to leave Mercer-Meidinger-Hansen since 1985.

At that time, Vernon Hodge, who was also national director of asset planning for what was then Mercer-Meidinger, left to form PRIMCO Capital Management Inc., a GIC management firm in Louisville, Ky.

Mr. Hodge was succeeded as national director of the insurance consulting group by Peter Bowles, who left in 1987 to set up Fiduciary Capital Management Inc. a GIC management firm in Woodbury, Conn.

Carol Proffer, principal and head of the Mercer-Meidinger-Hansen asset planning office in Dallas, said she expects to replace Mr. Ternoey.

Ms. Proffer also plans to expand the asset planning staff in Dallas from its current level of 13 people, she said.

Mr. Ternoey is the second senior-level person to leave Mercer-Meidinger-Hansen's Dallas office following the merger of William M. Mercer-Meidinger Inc. and A.S. Hansen Inc. in February 1987.

Guy Cooper, a principal and consultant with Hansen, resigned earlier this year in order to remain in Dallas rather than accept a position in the Mercer-Meidinger-Hansen office in Deerfield, Ill., Ms. Proffer said. ■

PROFILES

# Growth slows

*Continued from page 1*

1986 and Jan. 1, 1987, the largest 25 bond indexers reported a 102% increase.

Patricia Dunn, president of Wells Fargo Investment Advisors, San Francisco, the leading bond index fund manager, attributed the continued growth to "increasing realization that the active bond manager doesn't add value."

The 25 largest real estate managers saw an increase in tax-exempt assets of almost 45% from last year, to $63.8 billion from $44.1 billion in 1986. Overall, real estate assets managed increased 29.3%, to $96.1 billion from $74.3 billion. Of that, equity real estate increased 43.5%, to $78.4 billion from $54.6 billion, and mortgages increased more than 20%, to $17.7 billion from $14.7 billion.

Paul Saylor, principal of Institutional Property Consultants Inc., Atlanta, said the market drop is one reason pension funds are flocking to real estate. Others are "a result of the natural growth of pension funds; the acceptability of real estate (as an investment for pension funds); its lack of volatility; and competitive yields over time."

Among the Top 100 managers of tax-exempt assets, four are making their first appearances in *P&I Age's* directory. One — GE Investment Management Inc. is the largest independent investment adviser profiled. GE has $19.9 billion under management, all from GE's employee benefit assets, and now is taking outside clients.

One newcomer represents a merger of two old-timers: Northern Investment Management Co., created from the union of Northern Trust Co./Strategic Investment Services and The Griffin Group, with $5.6 billion under management. The other two are Sears Investment Management Co., with $4.7 billion under management, and VALIC, a Houston-based insurance company owned American General Corp., with $7.1 billion.

Ten other new names appeared on the list for the first time, although like Northern Investment, not all are truly new. The firms and their tax-exempt assets under management are: The Chemical Investment Group, which runs $8.4 billion through six subsidiaries, including Texas Commerce Investment Management Co. and Favia, Hill & Associates; Mitchell Hutchins Institutional Investors Inc., the renamed Manufacturers Hanover Investment Corp., with $18.4 billion; and JMB Institutional Realty Corp., whose assets jumped more than $4 billion to $5.8 billion with the acquisition last year of Cadillac Fairview Corp. Ltd.

Also, Great-West Life Assurance Co., which in prior years was ranked as a Canadian firm but has been reclassified as a domestic company, with $5.5 billion; Discount Corp. of New York Advisers, $5.3 billion; Merrill Lynch Asset Management Co., $4.8 billion; Manufacturers National Bank of Detroit, $4 billion; Dimensional Fund Advisors, $4 billion; Nationwide Insurance Group, $3.9 billion; and Western Asset Management, $3.9 billion.

VALIC and Great-West also entered the list of the 25 largest insurers, ranking 15th and 18th respectively.

Managers dropped from the Top 100 managers of tax-exempt assets include Batterymarch Financial Management, whose assets decreased $1 billion to $6.7 billion, and Kemper Financial Services Inc., also down $1 billion to $2.6 billion.

The Common Fund, Lincoln National Pension Insurance Co. and Frank Russell Trust Co. were removed from the general ranking because they are managers of managers.

Other highlights of *P&I Age's* special profiles issue include:

- The 25 largest managers of 401(k) assets reported a decrease in assets this year of 12.4%, partly because of the market crash and also because many managers were unable to break out 401(k) and 457 plan asset data by deadline.
- The 25 largest equity index managers gained 10.7% in assets this year, to $102.2 billion from $92.3 billion.
- Thirty-nine Canadian managers responded to the survey, representing $44.4 billion (in U.S. dollars) in tax-exempt assets.
- The 25 largest dedicated/immunized bond portfolio managers reported a 7.8% increase in assets, to $35.8 billion from $33.2 billion.
- Assets invested by the 25 largest managers of mortgage-backed securities decreased 14.1%, to $23.9 billion from $27.9 billion, although many managers hold the securities as part of their bond portfolios and were unable to break out the exact figures. ■

## PEOPLE

### Managers

Haine

**Dean H. Haine** has been appointed senior vice president and head of the trust division at Commonwealth National Bank, Harrisburg, Pa. Before coming to Commonwealth, Mr. Haine was vice president and chief trust officer of Mellon Bank Delaware, Wilmington.

Also at Boston Safe Deposit, **Christopher P. Keating** has joined the institutional markets group as vice president. He is responsible for investment management marketing for jointly trusteed and public employee retirement funds. Previously he was a personal investment banker in the individual client group.

**Julian C. Jett Jr.** has been appointed vice president-marketing at Chicago-based Fiduciary Management Associates. Prior to joining Fiduciary Management, Mr. Jett was employed as vice president in the investment consulting division of the Atlanta office of Prudential-Bache Securities.

Munson

**Leon J. Munson** has been named a principal of the investment management firm Cadinha & Co., Honolulu. Mr. Munson joined the company in 1985. Previously, Mr. Munson was employed by First Hawaiian Bank.

**Daryle G. Johnson** has been elected senior vice president of pension investment services at Pacific Mutual Life Insurance Co. He is responsible for all aspects of Pacific Mutual's investment products for the pension market. Mr. Johnson replaces **William Cunningham**, who has announced his retirement.

Consemius

**Norbert J. Consemius** has been promoted to president of First Trust, the St. Paul trust subsidiary of Minneapolis-based First Bank System. Mr. Conzemius has been with the bank system for more than 20 years, and most recently was manager of the branch banking system.

Ganley

Columbine Capital Services Inc., Colorado Springs, Colo., has named **Susanne Ganley** vice president responsible for East Coast clients. Previously, she was director of fund sales for Pilgrim Baxter Greig & Associates.

Also at Columbine, **Jeffrey W. Haney** has been named vice president. He will be responsible for clients in the Midwest and Southeast. Prior to joining Columbine, Mr. Haney held positions with subsidiaries of Newtech Development Corp.

**Fred Obser** has been elected senior vice president of Irving Trust Co., New York. He is manager of the equities management division and joined the bank in 1982.

Also at Irving Trust, **Brian J. Keeney** has been elected senior vice president. Mr. Keeney, who is manager of the investment management marketing and sales division, joined the bank in 1985. He previously was employed by New York-based Chase Manhattan Bank.

Mitchell

**James J. Mitchell** has been named executive vice president at the Northern Trust Co., Chicago. Mr. Mitchell joined the bank in 1964 and has overall responsibility for the trust and financial services operations.

Connecticut Investment Management Inc., Old Lyme, Conn., has named **Gerald A. Long** vice president and senior portfolio manager. Previously, Mr. Long was vice president and trust investment manager at Shawmut Home Bank, Meriden, Conn.

Hibbs

**Richard W. Hibbs** has been elected senior vice president-pension and institutional services at Centerre Trust Co. He joined the St. Louis-based firm in 1984 and most recently was vice president and director of pension and institutional services marketing.

Reed

Also at Centerre Trust, **Fredrick T.W. Reed** has been hired as senior consultant and assistant vice president-pension and institutional services. Mr. Reed, who joined Centerre Trust in 1987, previously was president of Reed Employee Benefits Systems Inc., which was acquired by Centerre Trust in 1987.

**Sidney Hansen** is now president of Trident Investment Management Inc., Anaheim, Calif. Mr. Hansen, who has been with Trident since 1983, was named chief executive officer in July 1987.

Bruntjen

**Worth Bruntjen** has joined Piper Capital Management Inc., Minneapolis, as fixed income portfolio manager. He previously worked as a portfolio manager with Alliance Capital Management Corp.

Chase Manhattan Bank has named **Marshall Carter** senior vice president and global custody group executive. He previously worked as executive vice president and group executive at Chase Lincoln First Bank, Rochester, N.Y.

Also at Chase, **Susan Schoen** was named pension trust securities services executive in the service products sector.

Wolff

**William A. Wolff** has joined The New England as second vice president in the group pension product management division. Before joining The New England, Mr. Wolff was employed by CIGNA Corp.

**Robert C. Segee** has joined Income Research & Management Inc., Boston, as vice president. Before joining Income Research, Mr. Segee was a senior vice president-institutional marketing at The Putnam Cos.

**Susan R. Jenson** has joined Fiduciary Capital Management Inc., Woodbury, Conn., as principal. She previously worked as a group pension sales officer for GICs at Connecticut Mutual Life Insurance Co.

Also, **Allison A. Cross** has been named GIC investment specialist at Fiduciary Capital. Ms. Cross had been employed by RCB Trust Co., the investment subsidiary of Rogers, Casey & Barksdale Inc., as trust officer.

**James F. Webb Jr.** has joined First Wachovia Trust Services as vice president and senior sales consultant with the First Wachovia Employee Benefit Services Department, Winston-Salem, N.C. Mr. Webb will be responsible for marketing timberland portfolios and The Timberland Fund. He previously worked with Weyerhaeuser Co. in timberland sales and marketing for institutional investors.

**Jane B. Fisher** has been elected senior vice president in the institutional trust group of First Wachovia Trust Services. Ms. Fisher is manager of master trust in the employee benefit services department.

Prudential Asset Management Co. Inc., Newark, N.J., has named **Pamela C. Scott** director-public funds. Ms. Scott, who will be responsible for investment management marketing to public employee retirement systems in the East and Midwest, previously worked with Irving Trust Co.

**John S. Maurer Jr.** has joined Bank IV Wichita, Kan., as vice president and portfolio manager in the securities management group. Prior to coming to Bank IV, Mr. Maurer was employed as senior vice president at the First National Bank of Lawrence.

Lane

**Francis B. Lane** has been named senior vice president and chief investment officer of Horizon Trust Co., Morristown, N.J. Previously, Mr. Lane was vice president of the investment advisory division of Equitable Life Assurance Society of the United States.

Weber

**Jeffery L. Weber** has been promoted to senior vice president of Merchants Investment Counseling Inc., a subsidiary of Merchants National Corp., Indianapolis. He joined the firm as vice president in 1986.

Key Trust Co. of Alaska, Anchorage, has hired **Vernon E. Sayles** as senior vice president and trust manager. Previously, Mr. Sayles worked in the employee benefits units of National Bank of Alaska and Union Bank of California.

Potomac Asset Management Inc., Washington, has appointed **Frederic M. Smoak** vice president and portfolio manager for fixed-income investments. Before coming to Potomac, Mr. Smoak worked in the fixed-income division of American and European Investments Inc.

Nelson

**John D. Nelson** has been named to head the new public funds division of State Street Bank and Trust Co., Boston. Mr. Nelson had been director of marketing for the master trust services division, which formerly provided custody and bookkeeping services to both public funds and corporate pension funds.

**Donald M. Mykrantz** has joined New York-based Morgan Stanley Asset Management Inc. as a vice president in the high-yield fixed-income department. Prior to joining Morgan Stanley, Mr. Mykrantz was a vice president at Salomon Brothers specializing in high-yield bond research and sales.

Webster Capital Management, New York, has named **William Kamperman** director-investments. Mr. Kamperman previously worked in the New York office of Paris-based Bankerab Internationale de Investments, where he was an options strategist.

**Margaret Toben** has joined The Marine Trust Co., Milwaukee, as an investment officer and senior equity trader. Previously, Ms. Toben was employed in institutional sales and equity sales trading for Kidder, Peabody & Co.

**Gregory S. Miller** has been appointed president of Towle Capital Realty Group, an affiliate of Towle Real Estate Co., Minneapolis. Mr. Miller, formerly a first vice president and manager of the mortgage lending group at Balcor, will direct the group's acquisition of investment-grade real estate. Towle Capital will also provide clients with advisory and management services and work with buyers on syndication and joint ventures. Mr. Miller will also be a senior vice president for Towle Real Estate.

# Managers running to cash

## $3.1 billion out of markets

By Trudy Ring

Money managers moved at least $3.1 billion to cash from stocks and bonds since the beginning of the year, primarily because of rising interest rates and tight monetary policy.

Market timers and asset allocators interviewed by *Pensions & Investment Age* have moved a total of $2.7 billion out of stocks and $427 million out of bonds.

In many cases, the moves accounted for half to all of the assets each firm has under management.

Major equity moves include:

• Schield Management Co. Timing Service, Denver, moved its $128 million in equity accounts 100% into cash May 19.

• Avatar Associates, New York, reduced its equity allocation to 55% from 100%.

• The $2 billion in tactical asset allocation run by Bankers Trust Co. — Investment Management Group, New York, was at 25% stocks, 44% bonds and 31% cash May 19, down from 94% stocks, 1% bonds and 5% cash April 1.

• Matrix Capital Management Inc., Greenwich, Conn., reduced its equity exposure to 10% for aggressive clients and 35% for conservative clients from an average of 70% within the past month. Most of the move was to cash, a smaller portion to bonds. Matrix has $820 million under management.

• Davis, Weaver & Mendel Inc., Atlanta, moved half of its $220 million in equity accounts to cash during April.

• Lesesne & Co., Atlanta, moved its $60 million under management to cash from equities April 15.

• North American Capital Management Corp., Shawnee Mission, Kan., reduced its equity exposure to 45% from 94% in March. The firm, with $10 million under management, expects to be fully invested in June.

• Simpson Capital Management Co., Philadelphia, put its $12 million in equities into cash in mid-February.

• R.M. Leary & Co. Inc., Denver, switched $18 million of its $20 million under management to money market funds from equity mutual funds be-

*Continued on page 42*

Steven Lauer said rising interest rates caused Bankers Trust to slash equities in its tactical asset allocation accounts.

Polaroid Corp. stock is a hot property among some investors who believe a large award stemming from the company's patent infringement suit against Eastman Kodak could make Polaroid a takeover target.

# Investors hot for a slice of patent award

By Barry B. Burr

Jennison Associates Capital Corp. and Prudential Insurance Co. of America each have bought more than 5% of Polaroid Corp., joining some other money managers with smaller positions in the company that is seeking $5.7 billion from Eastman Kodak Co. for patent infringement.

Both Prudential and Jennison identified their holdings as passive investments, seeking neither control nor influence of management, according to 13(g) filings with the Securities and Exchange Commission in February, the latest data available.

Speculation on the size of Polaroid's award from Kodak has led several analysts and money managers to view the company as a potential takeover target, which, in turn, attracts investors. No one has indicated any interest in taking over the company, however.

One large institutional holder of Polaroid, who asked to remain unnamed, and some analysts drew parallels of the size of the claim with the $3 billion cash settlement Pennzoil Co. received from its suit against Texaco Inc. in April.

# KKR eyeing Texaco

By Curtis Vosti and Trudy Ring

In the midst of the continuing battle between Carl Icahn and Texaco Corp., Kohlberg Kravis Roberts & Co., the leveraged buy-out firm, has reportedly been talking with Texaco about a possible leveraged buy-out of the White Plains, N.Y., oil giant.

A KKR-led buy-out could be complicated by Texaco's South African-related investments because several institutional investors with South Africa-free portfolio requirements are invested in the KKR fund. The buyout might result in the sale of Texaco's South African investments.

It's an issue faced before and likely will be faced again: Many pension funds are bound by state, city or investment board policies prohibiting investments in South Africa-related companies, but leveraged buy-outs are becoming an increasingly attractive investment.

On Friday, Texaco officials rejected Mr. Icahn's offer of $60 per share, an offer made after negotiations between the two on how best to restructure Texaco broke down earlier in the week.

A source close to the proceedings said Texaco's rejection of Mr. Icahn's offer would increase KKR's stature as a potential white knight.

LATE NEWS

## Official seeks delay of new plan

CHARLESTON, W.Va. — The West Virginia Legislature has instituted a new pension program to aid and eventually replace the financially ailing State Teachers' Retirement System.

George Crum, acting director of the $1 billion Public Employees' Retirement System, however, has asked the governor to delay implementing the plan for one year until anticipated problems can be worked out and staff added. The Legislature is to meet in special session this week to consider the matter.

## Australian tax on funds possible

SYDNEY, Australia — The Australian government proposed sweeping changes in the Australian pension system, including imposing taxes on Australian pension funds that might drive the funds toward Australia equities and passive equity strategies.

Under the government's mini-budget a 15% tax would be imposed on income earned by pension, or superannuation, funds. The tax would be retroactive to May 26.

In addition, a capital gains tax would be imposed on transactions after July 1, which might drive pension funds toward increased use of index funds, with their lower turnover rates, investment experts said.

The tax on fund earnings can be offset if funds receive enough dividends from companies that already have paid the full corporate tax rate on profits, which is proposed to decrease to 39% from 49%. In such cases, investors will be able to claim a 39% tax credit on the dividends.

The tax may cause funds to reduce their foreign holdings, for which no tax credit would be available.

## Hancock relaunches realty pool

BOSTON — John Hancock Properties Inc. is building an open-end commingled fund with $200 million in properties from its $540 million Equity Real Estate Account fund, and will sell ERA's remaining holdings to meet client withdrawal requests.

"This restructuring is the clients' call," and is the best way to handle withdrawals, said Kevin McGuire, Hancock Properties' president. He wouldn't disclose how much is being withdrawn.

## Kraft names Preece's successor

GLENVIEW, Ill. — Alice Peterson has joined Kraft Inc. as assistant treasurer-corporate finance, replacing William H.S. Preece Jr., who left at the end of April.

Ms. Peterson has responsibility for investing Kraft's nearly $2 billion in pension assets and for other corporate finance matters.

She previously was director-corporate finance at Pepsico Inc., Purchase, N.Y., where she worked for four years.

## Drexel unit considering buy-out

PHILADELPHIA — The management of Drexel Burnham Lambert Investment Advisors is considering a buy-out of the firm in an attempt to shed the stigma resulting from a federal investigation of its parent company, industry sources said.

Officials at the Philadelphia-based manager declined to comment; a spokesman for Drexel Burnham Lambert Inc. in New York said comment would be "premature."

As of Jan. 1, the investment management unit had $2.9 billion in assets under management, of which $1.4 billion was tax-exempt. The Securities and Exchange Commission has been investigating the firm's junk bond operations.

## Houston police revamping fund

HOUSTON — The $480 million Houston Police Officers' Pension System hired five money managers, terminated three and is searching for real estate and international managers as part of its recently completed five-year financial plan.

The restructuring will result in an approximate asset mix of 55% domestic equities, 30% bonds, 10% international and 5% real estate and small-capitalization stocks, according to Dalton Baskin, fund chairman. The current asset mix is about 60% stocks, 30% bonds and 10% real estate.

The fund last week hired Beacon Capital Management and Market Research & Management Corp., as active asset allocators; JMC Capital Management and Lehman Management Co. as value-oriented equity managers; and Capital Technology Inc. as a small-cap manager.

All managers will manage $25 million each, except for Capital Technology, which will run $10 million, Mr. Baskin said.

The assets came from three equity managers that were released: Barrow, Hanley, Mewhinney & Strauss, which managed $63 million; Loomis, Sayles & Co. Inc., which managed $62 million; and Waddell & Reed Asset Management Co., which managed $56 million. All were terminated because of poor performance, Mr. Baskin said.

Between $30 million and $40 million of the assets from the terminations will be invested in real estate equity and international stocks with managers hired by July.

# RCB partners split

## Barksdale to focus on asset management

By Barry B. Burr

STAMFORD, Conn. — Rogers, Casey & Barksdale Inc. is splitting into two separate firms, with Edgar A. Barksdale breaking away to form RCB International Inc., an investment management company without any domestic consulting services.

Stephen Rogers and John F. Casey will remain with the other entity, which has not yet been named. It will serve U.S. clientele, doing domestic and international consulting, and some investment management, run by outside advisers.

The new Rogers Casey firm will retain all 30 U.S. consulting clients, mainly pension funds, and some $1.2 billion in investment management programs. The Rogers Casey investment program has about 15 to 18 clients, mainly large pension sponsors.

Rogers, Casey & Barksdale's split means both entities will run so-called manager of managers investment approaches.

RCB International will get 132 investment management clients (128 tax-exempt institutional investors and four high-net worth individuals) in the United States, Canada and the United Kingdom, with $2.4 billion invested globally. It will not do consulting for U.S. clients, but will do so for foreign clients.

"It's a logical division of the company to areas where the interests of the principals have been for some time," said Mr. Barksdale. "The business has evolved in different directions and it makes sense to split the company. It's an amicable division."

Neither firm will have any control or direct involvement with the other, although Messrs. Rogers and Casey will hold an undisclosed share in RCB International. Mr. Barksdale said their stake will be purchased gradually by executives in RCB International under a reorganization agreement, ultimately making it wholly owned by its key executives in Canada, the United Kingdom and the United States, the three countries in which it will operate.

According to James F. Beasley, Rogers, Casey & Barksdale chief executive officer, Mr. Barksdale is retaining no interest in the new Rogers Casey firm. Messrs. Rogers and Casey will own the firm, along with about five other executives. Mr. Beasley, who will remain with Rogers Casey, said Rogers Casey ownership will be broadened eventually to include

# Moving up, moving on

Personnel changes are affecting the treasurers' offices and pension staffs at several corporations.

At the same time, one of the best-known names in pension fund real estate investing likely will become a part timer.

• Robert T. Mall, vice president-pension fund investments of Honeywell Inc., Minneapolis, for the past five years, has been named treasurer, resulting in several other staff changes at Honeywell.

• Leon M. Grandcolas, treasurer of Ball Corp., Muncie, Ind., will retire in August after almost 31 years with the company.

• Gloria Griesinger, a former investment analyst for Indianapolis-based Eli Lilly & Co.'s pension fund, has joined Ball Corp. as supervisor-benefit plans.

• Mark Adams, former investment manager for Pacific Telesis Group, San Francisco, has joined Parametric Portfolio Associates, Seattle, in charge of computer support and systems development.

• Michael C. Dolsen has left Blue Cross & Blue Shield Association, Chicago, where he was manager-benefits financing, to take a job with the same title at Brunswick Corp., Skokie, Ill.

• Claude M. Ballard, a partner with Goldman, Sachs & Co., New York, and a pioneer in pension fund real estate investing, probably will cut back his hours at the investment banking firm, although an arrangement has not been finalized.

Mall

Ballard

At Honeywell, Mr. Mall replaces Dean Fjelstul, who is now vice president-finance and administration for Honeywell Europe, Brussels, Belgium.

Debbie W. Veverka, manager-long-term investments for the past seven years, replaces Mr. Mall and will direct investment of Honeywell's $1.9 billion defined benefit assets and the $400 million defined contribution plan.

Jean Wangard has replaced Ms. Veverka as manager-long-term investments. She formerly was in the management development program at IDS Financial Services Inc., Minneapolis.

At Ball, Mr. Grandcolas was on vacation and could not be reached for comment. But Larry Miller, director of public relations, confirmed Mr. Grandcolas will retire.

R. David Hoover, who was named assistant treasurer late last year, is expected to take Mr. Grandcolas' place but has not yet been appointed. Under the corporation's bylaws, an officer has to retire in the month in which he or she turns 65.

In her new position at Ball, Ms. Griesinger will report to Vic Gilla, manager-corporate benefits. The company has $175 million in retirement assets.

Most recently, Ms. Griesinger worked as project manager-distribution systems of Eli Lilly. From 1985 to early 1987, she was

# School's gain is manager's loss

By Joel Chernoff

AMHERST, Mass. — Morgan Stanley Asset Management Inc. has lost one of its oldest accounts — by its own choice.

Morgan Stanley, New York, resigned a $40 million bond account this spring when Amherst College members tapped Peter A. Nadosy, president Morgan Stanley Asset Management, to become chairman of the college's investment committee.

"You can't really report to yourself," Mr. Nadosy explained.

Subsequently, Amherst hired Mackay-Shields Financial Corp., New York, to manage the account.

The rewards of helping guide the $300 million endowment fund more than offset any loss of income from the account, Mr. Nadosy said.

"It's a pleasure, because you feel you can do some good," he added. "In the long term, if I can help a school like that, the fee is immaterial."

Mr. Nadosy's attachment to Amherst has grown during the years he traveled to this New England town for investment committee meetings. While there, he sat in on classes.

"It was clear it would have been hard to find an alumnus who evinced such an interest" in the college, said James Scott, Amherst's treasurer.

The investment committee, made up mostly of business executive alums, unanimously selected Mr. Nadosy to take on the chairmanship. The post previously was held by Theodore Cross, a private investor, publisher and editor, who had stepped down after 12 years.

**Peter A. Nadosy is using his money management expertise to help Amherst College.**

While Amherst has gained a new investment committee chief, it has lost a stellar bond manager. During the time Morgan Stanley ran the account, from Sept. 1, 1980 through March 31, 1988, the portfolio returned a cumulative 210%, far above the 152.2% return for the Shearson Lehman Hutton Government/Corporate bond

# Market boon due as Social Security rises

By Joel Chernoff and Nicky Robertshaw

WASHINGTON — Assets of the Social Security trust funds will balance the federal budget deficit by the mid-1990s, buoying both bond and stock markets and providing a desperately needed source of national savings.

Thought to be near the brink of bankruptcy five years ago, the accumulated reserves of the Old Age, Survivors and Disability Insurance Fund now are projected to grow to $109 billion this year, $155 billion in 1989, $1.4 trillion in 2000 and $12 trillion in 2030, according to the "intermediate" set of assumptions issued by the Social Security Administration.

Wall Street hasn't picked up on the staggering capital market implications of that growth.

"The capital markets don't look very far ahead and have a great deal of skepticism" that the assets will accumulate undisturbed by the federal government, said Herbert Stein, a former chairman of the Council of Economic Advisers and senior fellow at the American Enterprise Institute, Washington.

With such a huge source of financing for federal debt because the funds are prohibited from investing in anything except special U.S. Treasury issues, the U.S. government's drain on capital markets might shrink drastically. In fact, the funds' expected growth eventually could overwhelm federal debt markets, and spill over into other areas of the economy, especially if Social Security assets ever are allowed to be used to purchase corporate equities.

"If we talk about $12 trillion, that could easily be more than what's available in federal securities," said James Tobin, a Nobel laureate and Sterling Professor of Economics at Yale University, New Haven, Conn. The total U.S. deficit now is about $2 trillion.

Today's concerns are a far cry from those of the late 1970s and early 1980s, when market economists worried Treasury debt would "crowd out" corporate borrowers.

"In a couple of years, people will be complaining there aren't enough government bonds around," predicted Edward Yardeni, chief economist at Prudential-Bache Securities Inc., New York.

Even the shorter-term potential of the Social Security accumulations have far-reaching implications for Wall Street.

Decreased federal demand for outside capital could result in lower interest rates, meaning cheaper sources of financing for corporations. In turn, equity markets could appear more attractive as relative yields offered by bonds decrease.

Interest rates for long-term bonds could decrease 200 basis points within the next two years, to 7%, and to 5% to 6% within the next five years, Mr. Yardeni said.

Lawrence Kudlow, chief economist for Bear, Stearns & Co. Inc., New York, agreed, noting not only may interest rates drop to 5% to 6%, but also the growing Social Security trust funds will eliminate needs for tax increases.

There are risks as well. If Washington tries to cut back federal

*Continued on page 46*

# $20 billion sought for financing wave

By Marcia Parker

Investment and commercial banking firms and insurers are in the process of raising more than $20 billion from institutional investors to finance a new surge of leveraged buy-outs and corporate restructurings.

The accumulation of money suggests the leveraged buy-out wave that has roiled American industry for five years will continue to change the face of corporations and the capital markets.

Participation in corporate finance investments has become so significant for some investors they are defining the investments as a separate asset class. Edward Regan, New York state comptroller and overseer of the $38.7 billion New York State & Local Retirement System, and Brian Wruble, president of Equitable Capital Management Corp., New York, have been developing selection and evaluation criteria tailored to these corporate finance investments.

The investment pools are attracting institutional investors looking for ways to boost their returns. These institutions are drawn by the high returns earned in previous buy-out funds.

Competition for the institutional dollar and for the deals is raising the returns demanded by the institutions and the prices on some deals.

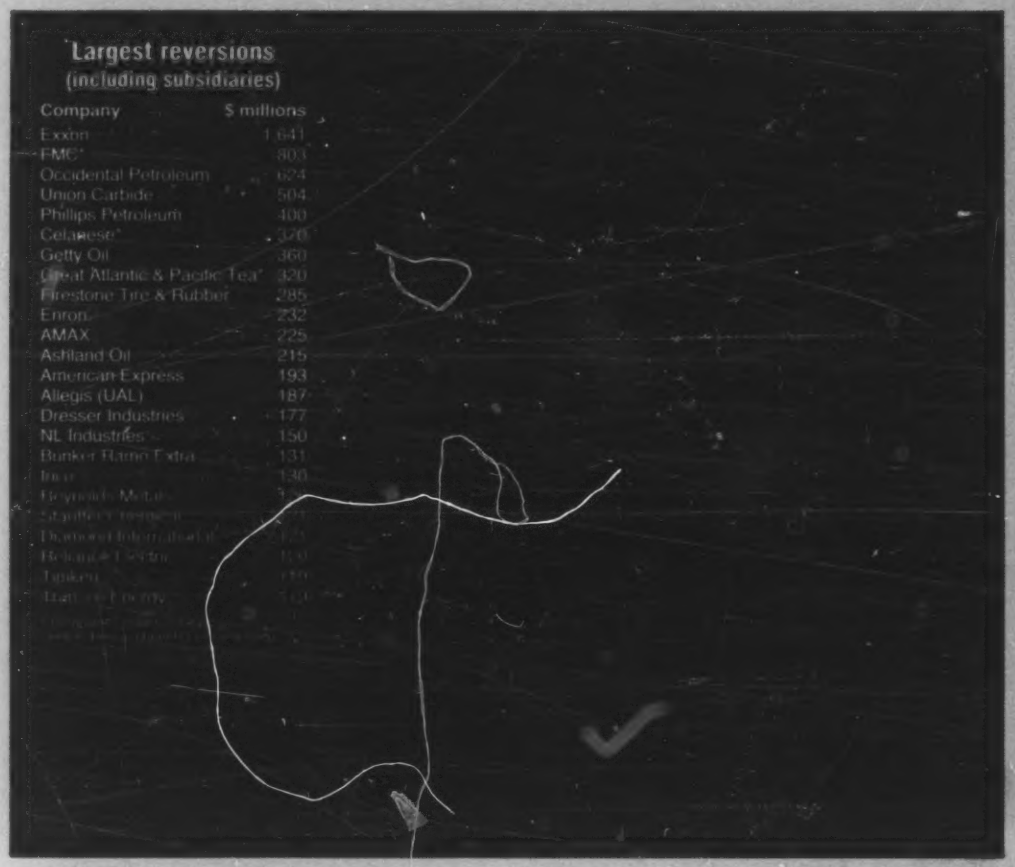
The $20 billion consists of at least $7.5 billion being raised by major investment and commercial banking firms and $12 billion being raised by investment banking boutiques.

Among the fund raisers are Shearson Lehman Hutton Inc., Equitable, Morgan Stanley Group Inc., Manufacturers Hanover Corp., Prudential-Bache Capital Funding and Merrill Lynch Capital Partners.

Others, including First Boston Corp., have billions of dollars available for leveraged buy-outs, but the assets are not in blind pools like its competitors.

Together, they aim to raise more than $7.5 billion from corporations, corporate pension funds, insurance companies and institutional investors from abroad. Fund-raisers were reluctant to identify institutional investors, in part

*Continued on page 45*



**Occidental's plan to recoup $95.5 million is just the latest in a series of terminations. The energy firm has received $528.5 million since 1983, equal to 23% of its cumulative net income from 1983 to 1987.**

# Occidental gets 13th reversion

By Barry B. Burr

Occidental Petroleum Co.'s move to recapture $95.5 million in surplus assets by terminating one of its last remaining pension plans — the largest such reversion in almost a year — could be a sign the termination/reversion era is still alive.

Occidental, a Los Angeles energy concern, is aggressive among corporations in terminating pension plans and recouping assets after it acquires companies.

Including its latest filing, Occidental will have recaptured more than $624 million from terminating 13 plans since 1983. Excluding the pending termination, the $528.5 million Occidental has recaptured is equal to 23% of the company's cumulative net income from 1983 to 1987.

Its pending termination would eliminate nearly all of Occidental's remaining $465 million in pension assets and $332 million accrued liabilities, using an 8% discount rate, according to its financial statements as of Dec. 31.

The plan being terminated — from Midcon Corp., Lombard, Ill., a company Occidental acquired in 1986 — has $382 million in assets and present value liabilities totaling $286.5 million, according to the Pension Benefit Guaranty Corp., Washington.

Pension industry executives are divided on whether terminations will surge again.

"My view is perhaps you will see an increase in terminations," said Stephen Cordy, senior associate-pension group at Morgan Stanley & Co., New York.

He suggested terminations could increase if the economy starts slumping, interest rates rise and tighter restrictions on reversions appear close to enactment in Congress, where two bills are pending.

But Ellen Goldstein, director-public affairs and membership development for the Association of Private Pension and Welfare Plans, the Washington-based corporate trade group, said employers "are not standing around waiting to terminate their plans."

Said Gary Pines, consultant at Towers, Perrin, Forster & Crosby Inc., Chicago: "If anyone is looking at a surplus and deciding whether to terminate and get the money, they definitely have to consider the bills in Congress."

Although passage of the bills is uncertain, sponsors "have got to take into account that at any point in time these bills could pass," Mr. Pines added.

"I don't necessarily subscribe to this view, but I've heard suggestions that because of pending legislation, those considering terminating might want to do it right away because they fear it will be illegal or more restrictive," said Joseph S. Piacentini, research analyst at the Employee Benefit Research Institute, Washington.

"There are so many variables it's hard to say what the trend will be," he added.

The bills, pending in subcommittees in the Senate and House, would place a one-year moratorium on recaptures until Congress decides if reversions should be shared with beneficiaries (*Pensions & Investment Age*, March 7).

The bills, HR 4111 and S 2284, "stop everything from going on for a year until new legislation is put in place," said Kelly Ring, research assistant for the retirement income and employment subcommittee of the House Select Committee on Aging.

That new legislation could be HR 1942, introduced last year by Rep. Edward Roybal, D-Calif., chairman of the committee on aging. The bill, pending before a subcommittee, would disallow any corporate reversions, requiring all surplus assets go to beneficiaries.

The APPWP's Ms. Goldstein said "passage seems unlikely this year" for the moratorium bills. "They've seemed to have stalled; I don't know why."

"The position of employers has been made clear all along; the assets belong to them," she said.

"They take the risk in good times and bad, and they don't want legislation restricting their control of their assets.

"Most pension sponsors don't want to terminate their plans."

With its latest move, Occidental tied with Dresser Industries Inc., Dallas, for the most plan terminations, according to PBGC data since December 1983.

Dresser has recaptured $177.2 million in its 13 plan terminations between 1985 and 1987.

AMAX Inc., Greenwich, Conn., the next most prolific terminator, has recaptured $224.5 million in reversions from 10 plans between 1983 and 1987.

Only two other companies have recaptured more from reversions than Occidental.

Exxon Corp., New York, recaptured the largest amount ever, $1.64 billion in 1986; and FMC Corp., Chicago, recovered $803 million, including $470 million in FMC stock, in 1985. FMC, however, was required to pay an undisclosed share of the reversion to the Department of Defense, under a rule imposed in 1986 on defense contractors.

Overall, corporate terminations of overfunded plans have been slowing because of new fed-

# GTE fee change hits few bumps

STAMFORD, Conn. — Although one management firm reportedly has balked, the $11 billion GTE Corp. pension fund is encountering little resistance to converting its 24 domestic equity managers to performance-based fees, GTE's pension chief said.

"It's taking a little time, but we're still working with everyone, and it's still on schedule," said John Carroll, president of GTE Investment Management Corp., Stamford, Conn.

One manager reportedly proposed cutting fees by 25% to avoid performance fees. The identity of the manager could not be learned, and Mr. Carroll declined to comment on that report.

"It's not appropriate for us to comment on a manager's strategy," he said. "I can say that all of our managers are still with us. Many have agreed (to performance-based fees), and we are working with the others.

"We're doing this in stages, and we expect to have everyone completed by the end of the year."

Investment management consultants say they have experienced no increase in inquiries regarding performance-based fees; fees are negotiated on a case-by-case basis by the pension funds and their managers.

GTE managers contacted by *Pensions & Investment Age* seemed amenable to the conversion to performance-based fees.

"I think that unless it's really off the wall, most managers go along" with performance-based fees, said Frank Houghton, chairman, BMI Capital Corp., New York.

## CORRECTIONS

• In a May 16 article, **Oppenheimer Capital Corp.**'s performance for the 12 months ended March 31 was identified incorrectly as its performance for the year ended Dec. 31. For calendar year 1987, Oppenheimer returned 4.8%.

• In a May 16 story, the amount of tax-exempt assets managed by **Ariel Capital Management Inc.**, Chicago, was incorrect. The correct figure is $353 million.

• The May 23 profile on **The Principal** contained incorrect data. The correct profile follows:

**The Principal**
711 High St., Des Moines, Iowa 50309; (515) 247-5041

| | |
|---|---|
| Total assets managed | $18,216,000,000 |
| Tax-exempt assets managed: | |
| Total | $12,209,000,000 |
| Pooled accounts | $829,000,000 |
| GICs | $4,175,000,000 |
| Annuities | $2,930,000,000 |
| Other | $4,275,000,000 |
| 401(k)/457 assets managed | $1,865,000,000 |
| 401(k)/457 clients | 3,353 |
| Real estate assets | $218,800,000 |
| International assets managed | $18,000,000 |
| Tax-exempt clients | 3,534 |
| Types of accounts managed | CEG |

The Principal is an equity, fixed-income, balanced, real estate, international and GIC manager.

Its top-down, value-oriented equity approach is determined by relating current price to estimated future return on net worth.

Its fixed-income approach is fundamental, using both public and private markets and focusing on interest rates, credit risk, maturities and terms.

Its real estate approach emphasizes newly constructed, fully leased buildings of less than $15 million. It focuses on low leverage with national diversification.

The separate account asset mix Jan. 1 was 2% stocks, 2% bonds, 59% cash, 10% equity real estate, 16% mortgages and 11% private placements; $18 million was in foreign stocks.

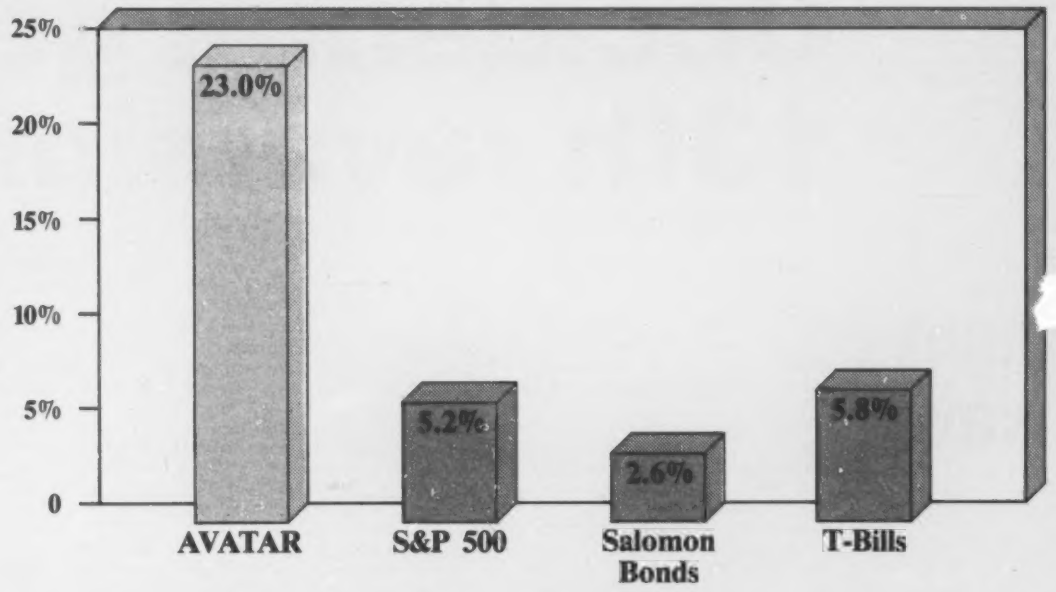
The parent is The Principal Financial Group.

Roy Ehrle, executive vice president, is the chief investment officer; F. Doug Rasmussen is client contact.

• **J.P. Morgan Investment Management Inc.**'s international assets were incorrectly stated in the May 23 issue. Its $2.9 billion would have placed the firm third in the list of the 25 largest managers of international assets.

• **Batterymarch Financial Management** ranks 58th among the nation's 100 largest investment managers. Its position was incorrect in the May 23 issue.

This is how our ASSET ALLOCATION STYLE performed in 1987. Call us for the other 16 years of REAL-TIME performance.



Performance is the mean time-weighted total rates of return of all discretionary tax-exempt accounts over $1 million. Past performance is no guarantee of future results.

■ EQUITY PORTFOLIO MANAGEMENT. Active stock selection (large capitalization issues) combined with the critical portfolio stocks/cash mix shifts.

■ TACTICAL ASSET ALLOCATION. Same asset mix shifts cost-efficiently implemented with an index fund and cash fund. Or, use stock index futures as an "invisible" hedge overlay to actively/passively managed equities.

PIPER

# Takeover fever fuels winners

By Curtis Vosti

Patience — and a little help from takeover frenzy — helped some bank and insurance company commingled special equity funds climb to the top of Pensions and Investments' Performance Evaluation Report for the first quarter.

The $8.3 million Diversified Special Value fund of First Wachovia Bank, Winston-Salem, N.C., was the top performer of the 106 special equity funds tracked by PIPER, with a 25.2% return for the quarter.

In comparison, the median PIPER fund returned 12.2%; the Standard & Poor's 500 stock index, 5.7%; and the Russell 2000, 18.7%.

First Wachovia's fund contains about 30 stocks, said George M. Salley, First Wachovia vice president and senior portfolio manager. It stresses companies with low price-book and price-earnings ratios and unrealized value.

"I'll buy a stock and stick with it until something happens," Mr. Salley said. The fund's top performers in the quarter included **Stop & Shop Companies Inc.** and regional banks such as **Fidelity Federal S&L Association** and **Atlantic American Corp.**, he said.

First Wachovia's fund also has holdings in **The Williams Cos.**, and **Zayre Corp.**, he said.

The $26 million Supplemental Equity fund of Connecticut National Bank, Hartford, ranked second for the quarter with a 23.9% return.

The fund consists of approximately 100 stocks, according to Peter Larson, vice president. Mr. Larson attributed the fund's strong performance to two main factors: a willingness to stay relatively fully invested and the fund's small-capitalization characteristics.

He said the fund's performance was helped by 10 takeovers during the quarter, although he finds a dark side to that success.

"I don't like the stigma of being thought of as a takeover fund," he said. "Most (of our stocks) are long-term holdings. We just got hit by mergermania."

For example, he said, **Grolier Inc.**, **North American Communications Corp.** and **Dickey-john Inc.** were holdings that performed well in the first quarter in after being the subjects of takeovers.

"The whole idea is to get some sense of the company before" Wall Street does, Mr. Larson said.

Historically, the fund has had a pretty good position in New England banks, he said, and they experienced a strong January.

Other significant holdings in the fund are **Intermec Corp.**, **Intermedics Inc.**, **Cordis Corp.** and **Weigh-Tronix Inc.**

"People always laugh at the names, but there is some substance there," he said. "We try to be patient with these things."

The Uncommon Value equity fund of Manufacturers Hanover Trust Co., New York, finished third for the quarter at 23%.

Dorik Rozanski, vice president for Mitchell Hutchins Institutional Investors Inc., New York, which manages the fund for Manufacturer's Hanover, said it's a long-term, value-oriented, fairly consistent portfolio with an affinity for high-quality, overlooked

# Funds shifting to Hong Kong

By Marlene Givant

Leading international stock managers included in the Pensions & Investments' Performance Evaluation Report are placing big bets on Hong Kong and Australia, diverting money from the pricey Japanese market.

Managers of PIPER's foreign bond funds, which generally lagged the equity funds, have mixed views on the U.S. dollar, however.

Among those with renewed confidence in Hong Kong, which closed temporarily following Oct. 19, and Australia, which also was battered in the stock market crash, are Confederation Life Insurance Co., which had PIPER's top return for the quarter and year ended March 31, and Provident Capital Management, Philadelphia.

In addition, the $45 million International Stock Portfolio of Wellington Management Co./ Thorndike, Doran, Paine & Lewis, Boston, is putting new cash flow from Japan into Singapore and Europe.

Equity funds re-emerged as top performers among international and global commingled funds in the first quarter. The $3 million International Common Stock fund of Confederation Life, managed from Toronto, returned 16.49% and 26.83% for the quarter and year ended March 31, beating the Morgan Stanley Capital International Europe Australia Far East index's 15.31% and 16.79% for those periods.

Ranking second for the quarter and year, Wellington's $6 million Pacific Basin portfolio returned 15.95% and 24.57%. The firm's International Stock Portfolio was third for the quarter among active managers, returning 11.33% while Provident's $65 million International Low P/E Equity Fund ranked third for the year at 23.22%.

Japan is once again affecting strategies. Confederation Life is increasing its exposure to inexpensive Australia and Hong Kong as Japan, in which it invests 35% to 40%, becomes more costly, said Ian Fyfe, portfolio manager. The insurer's fund has 10% in Australia and 5% in Hong Kong. It also has 9% in Holland, in companies like **Nedlloyd**, a shipping company. **Fuji Machine**, a Japanese machine tool company, also was a top-performing holding.

Wellington has 43% in Japan in such companies as **Kokusa Electric**, but is putting incremental cash flow from Japan into Singapore and Spain because those markets should grow faster in the second quarter, said Jerry Mitchell, senior vice president.

Its Pacific Basin fund's biggest weightings include 62% in Japan and 9% in Australia.

Provident Capital might increase Australia to 6% from 4% because it expects commodity inflation to benefit the market. It has pared Japan to 42% from 44% with a target of 40% by June. Provident sold **Morozoff**, a food company, which was up 80% in April alone and **Takasago Thermo**, which makes large air-conditioning systems. It boosted its U.K. holdings to 19%, buying **Dixons PLC**, a retailer of electrical appliances, said Sandor Cseh, vice president.

"We're moving to a more defensive position in Japan. Utilities are 10% of our Japanese portfolio. The market will have a correction some time in the summer. It's more overvalued than it was just before the crash and now nobody seems to be concerned," he said.

For longer periods, index funds prevailed. For the three years ended March 31, index funds managed by American National Bank & Trust Co. of Chicago,

# Takeovers

*Continued from page 29*

stocks that are bought at big discounts to intrinsic value.

"These are not widely held institutional stocks," Mr. Rozanski said, adding the stocks are key players in their respective industries.

He declined to identify the approximately 40 stocks in the $90 million fund.

For the longer periods, one fund ranked first in the one-, three- and five-year periods ended March 31: the Select Equity Fund offered by FirstRepublic Bank, Dallas.

The $15 million fund had returns of 20.4%, a compound annualized 42.5% and an annualized 40.3%, respectively.

The median returns for the same periods were, respectively, −9.6%, an annualized 13.1% and an annualized 10.5%; the S&P 500 returns were −8.4%; 16.8% and 15.6%; and the Russell 2000 returns, −13.4%, 9.3% and 8.7%.

"We came off two extraordinary back-to-back years," said Ben Fischer, senior vice president and director of the bank's investment asset management group, referring to returns of 70% in 1986 and 69.5% in 1987.

The fund performed below the median for the quarter, with a 10.6% return, although that still topped the S&P 500.

Mr. Fischer said the $15 million fund is usually concentrated in less than 10 stocks, which are chosen from a value screen that stresses low p/e ratios. A high turnover rate — typically 300% and at times as high as 450% a year, he said — keeps Mr. Fischer a busy man.

Among stocks sold in the first quarter, he said, were **Arkansas Best Corp.**, **Ferro Corp.**, **IBM Corp.**, **Digital Equipment Corp.** and **Chrysler Corp.** New buys include **Hospital Corp. of America**, **Textron Inc. and Gould Inc.**

One of the most consistent performers in the past years has been the Regional Bank fund offered by First of Neenah, now a part of Associated Banc-Corp of Wisconsin.

The 4-year-old fund finished among the top seven funds for the quarter, year and three-year periods, with respective returns of 20.8%, 7.8% and an annualized 30.4%.

The fund, as its name suggests, holds bank stocks, primarily regional banks in the $1 billion to $3 billion range, according to Kenneth J. Brusda, vice president and trust investment officer. First of Neenah looks at p/e and price/book ratios and also at takeover candidates.

"Every bank we hold we would consider a takeover candidate," Mr. Brusda said. "We still feel very strongly about the concept."

In the quarter, a couple of the fund's banks, **Citizens Financial Group Inc.** and **Unibancorp Inc.**, were the object of takeovers, he said.

"These acquisitions have occurred pretty regularly," he said. "These have been helpful, but the banks in general have been more popular."

The fund has a little more than $10 million, with holdings in about 18 banks nationwide, although 98% of them are east of the Mississippi, he said.

Mr. Brusda said he "feels very strongly" that **Signet Banking Corp.** is the most attractive takeover candidate among the fund's holdings.

Signet itself was born of a takeover. About four years ago, First of Neenah bought stock in Union Trust Bancorp of Maryland, which subsequently merged with Bank of Virginia Co., and they changed the name to Signet.

Patience was a virtue for the $16 million supplemental equity fund of California First Bank, San Diego. It's small-cap, emerging growth fund was the top performer for the 10 years, with an annualized 26.11% return.

For the same period the median PIPER fund returned an annualized 17.47%, while the S&P 500 returned 16.6%. The Russell 2000 doesn't go back that far.

"We've basically had the same principles for more than 10 years," said David Urben, funds manager for California First. "You're trying to catch the stocks in the early stages of its growth cycle and hope to be gone by the time it becomes cyclical," he said.

**Liz Claiborne Inc.**, New York, has been the leading stock for First California in the long term, Mr. Urben said, although it's not as important to the portfolio now.

In the quarter, First California's portfolio of about 47 stocks was led by **Advanced Marketing Services**, San Diego, and **Flight Group International**, Atlanta. ■

Profiles of the leading investment management consultants will be published in the Oct. 17 issue of *Pensions & Investment Age*.

**Contrary to popular opinion, not all bears look alike.**

Neither do global asset managers. That's why more and more U.S. plan sponsors are turning to Julius Baer Investment Management. For good timing and consistently superior performance. In both fixed interest and equity markets.

We draw on the strong portfolio management capabilities of JBIM in London. And on the strategy and policy-making expertise of the Julius Baer Group, Zurich, which has over 40 years experience in international portfolio management and billions invested in global fixed income and equity markets.

If your objectives call for customized global asset management services, we invite you to take a closer look at JBIM. Contact: Jay A. Dirnberger, Managing Director, JULIUS BAER INVESTMENT MANAGEMENT INC., 330 Madison Avenue, New York, N.Y. 10017, Tel.: (212) 949-9055.

State Street Bank & Trust Co., Boston, and Wells Fargo Investment Advisors, San Francisco, had compound annualized returns of 52.05%, 51.37% and 50.79%, respectively, vs. the EAFE's 51.84%.

For the five years, American National's $220 million fund was up an annualized 36.63% and Wells Fargo's $624 million reached 36.4% vs. the EAFE's 37.26%.

The top active portfolio for three years, Boston-based Fidelity Management Trust's $100 million Overseas Equity fund logged a 49.24% compound annualized return, followed by London-based WorldInvest Ltd.'s $56 million International Employee Benefit Equity fund with 49.05%. Wellington's Pacific Basin fund was third with 47.22%.

For five years, the Wellington fund also excelled with 35.21% followed by New York-based Bankers Trust Co. — Investment Management Group's International Equity fund with 33.4% and WorldInvest's equity fund's 31.47%.

Fidelity's three-year return incorporates the returns of the Fidelity Overseas mutual fund up to April 1, the day the commingled fund was transferred to the mutual fund's management team from Fidelity International Investment Advisors, Boston, a separate company.

The fund has been up and down in Japan from 65% in early 1987 to 25% post-crash to 50% now. It has been fully invested since the beginning of the year and invests 10% in Spain, said Robert L. Reynolds, senior vice president.

WorldInvest has a mammoth, 18% exposure to the small Spanish market. It has nothing in Japan, 25% in the United Kingdom and more than 20% in deutsche mark, yen and sterling cash. It expects U.K. companies to enjoy Europe's consumer growth and is buying financial stocks like French insurer **Group Victoire** because European interest rates are falling, said Ali Ansari, investment manager.

Bond funds generally lagged equities during the quarter but the top bond fund, Newark, N.J.-based PCM International's $200 million Global Bond fund beat some equity funds returning a hefty 4.23%. The firm's $85 million Global Yield fund, which invests in short-term instruments, followed with 2.58% and WorldInvest's $40 million International Employee Benefit Fixed Income fund ranked third among bond funds with a 2.01% return.

For periods ended March 31, the Salomon Brothers Non-U.S. Dollar World Government Bond index returned 1.09% for the quarter, 20.42% for the year and a compound-annualized 33.29% for three years.

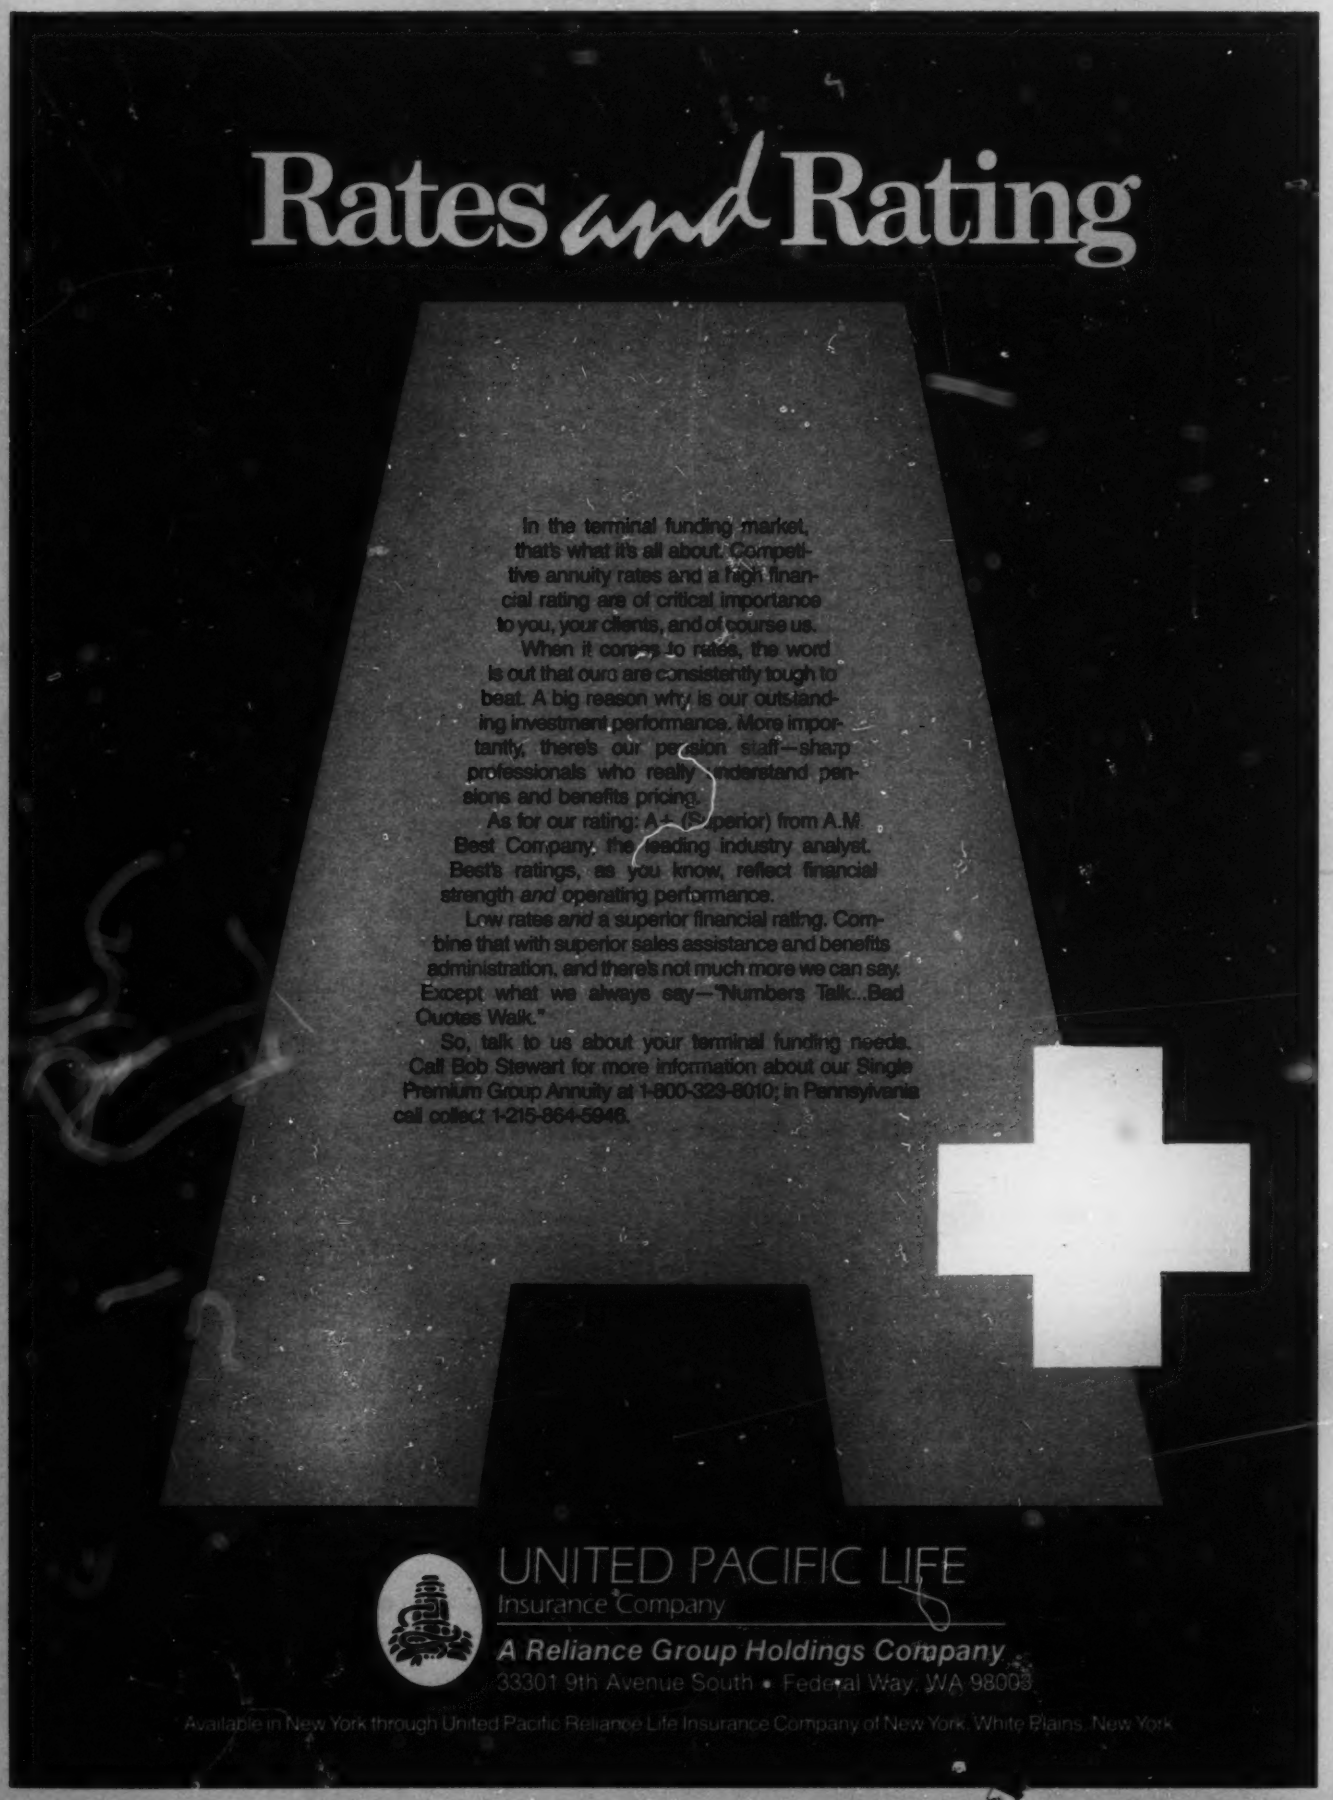
Bond funds were high fliers for the year. PCM's $200 million foreign bond fund returned 22.85% followed by First Chicago Investment Advisor's $270 million International Non-Dollar Fixed Income fund with 22.73% and PCM's Global Bond fund with 22.71%.

WorldInvest triumphed over three years returning a compound annualized 38.31%. PCM's global fund rose 36.92% followed by its foreign bond fund with 36.5%.

PCM's global fund topped the five-year bond charts with an annualized 24.61% vs. 22.25% for its foreign fund and First Chicago's 21.79% international bond return.

WorldInvest invests 40% in yen cash — not bonds — because the Japanese yield curve is flat, the Bank of Japan is reluctant to cut interest rates and economic growth is strong, said Philip Wolstencroft, investment manager. It also has 40% in deutsche mark bonds and 20% in Canadian bonds, greatly differing from the Salomon Non-U.S. index's 15% in Germany 45% in Japan and less than 10% in Canada.

First Chicago is holding medium to long maturities in Australia and Canada, markets that could benefit if the dollar rises. "We think the dollar is at the end of its cyclical decline," said Richard Carr, managing director. In global portfolios, the firm, which rarely uses derivatives, is hedging 25% from deutsche mark and sterling into U.S. dollars. ■



# Stock sales outpace buys

NEW YORK — Institutional investors were average net sellers of 800,000 shares of stock daily on the New York Stock Exchange in the first quarter, according to the Securities Industry Association.

In the same period in 1987, institutions fueled the stock market's rally with net purchases of 5.9 million shares a day on the NYSE, according to association officials.

Daily average volume on the NYSE in the first quarter was 358.2 million shares, down 3.3% from the daily average figure of 370.4 million shares a year ago. However, if corporate buyback and dividend recapture activities were excluded, the daily average volume would have been barely more than 300 million shares, or 17% less than a year earlier.

Retail activity accounted for about 24% of NYSE first-quarter volume, compared with 26.9% in the same period last year.

Volume on the American Stock Exchange declined 28.7% in the quarter, to a daily average 21.6 million shares from 30.3 million in 1987's first quarter. Institutional investors were net sellers of 300,000 shares daily, about the same as a year earlier.

In the over-the-counter market, daily average volume fell 16.1%, to 257.6 million shares from 307.1 million in 1987. Institutions were net buyers of 1.3 million shares of OTC stocks on a daily average basis, down from 2.1 million a year ago. ■

# International firms defensive

## Cash holdings doubled

By Marlene Givant

International equity managers more than doubled their tiny cash exposure in the first quarter while slightly increasing holdings in Japan and reducing those in the United Kingdom, according to the geographic asset allocation of the median non-U.S. equity portfolio of InterSec Research Corp., Stamford, Conn.

The portfolio's cash rose to 4.1% as of March 31 from 1.8% as of Dec. 31. That mirrors cash increases by domestic equity managers during the first quarter, according to INDATA investment analysis service, Southport, Conn. (*Pensions & Investment Age*, May 2).

Managers increased Japanese holdings to 39.9% from 35.8%, although the market itself rose to 64.4% of the Morgan Stanley Capital International Europe Australia Far East index vs. 61.4% at the end of December.

The portfolio's U.K. portion was reduced to 16.2% from 18.9%, although that market's performance alone sent it down almost 11% as a percentage of the EAFE to 13% from 14.4%.

Managers interviewed by *Pensions & Investment Age*, while not raising as much cash as the InterSec portfolio, were more defensive during the quarter. Some of the defensiveness stemmed from concerns over the U.S. market.

Believing foreign markets are vulnerable to a U.S. market shock, Ivory & Sime International Ltd., Edinburgh, invested 19% to 20% in gilts (U.K. government bonds) as of March 31. The firm, which invests $150 million internationally for U.S. tax-exempt clients, is balancing that defensive asset allocation with aggressive stock selection, avoiding the institutional favorites in each market.

Capital Guardian Trust Co., Los Angeles, which invests $2.8 billion internationally for U.S. tax-exempt clients, has maintained about 13% in cash since the fourth quarter of last year.

But IDS International Inc., London, sold its bonds and reduced cash to the 5% to 10% range from 5% to 15% because it believes stocks should outperform cash and bonds as the world economy is dominated by fears of inflation or recession.

Many managers are marveling at Japan's economic strength and stock market resiliency.

"We regard it as indisputable that the best economic fundamentals in the world can be found in Japan," noted an IDS International report.

Yet the economic engine is unlikely to overheat, the report noted. "The indications are that Japanese growth is moderating from its somewhat excessive burst of speed." The firm had between 54% and 60% in Japan at the end of the first quarter vs. 30% to 35% as of Dec. 31.

In addition, IDS reduced its target U.K. exposure to 10% to 12% from 12% to 16% in its effort to underweight hard-currency mature industrial markets in favor of Japan and other countries dependent on world trade.

In the first quarter, Martin Currie Inc., Edinburgh, which invests $249 million internationally for U.S. tax-exempt clients, increased Japan to 48% from 42% by reducing cash. Its target in Japan is 52%.

"It's one area of the world where we see continued economic growth to 1989 almost regardless of what happens in the rest of the world," said W.M.C. Kennedy, president, citing the nation's improved infrastructure and increased capital investment.

But some U.S.-based managers are avoiding Japan because of its high price-earnings ratios. To compensate for its minuscule 4% exposure to Japan, Grantham, Mayo, Van Otterloo International, Boston, which runs $2 billion for U.S. tax-exempt clients, is slowly increasing its exposure to the United Kingdom at the expense of Spain because the U.K. market has progressed so strongly.

"If you take Japan out, the U.K.'s neutral weight becomes 38% in EAFE," said Eyk Van Otterloo, partner. He added the United Kingdom, which should reach 35% in the portfolio, is cheaper than the index as a whole. As of the end of the first quarter, the firm had 32.5% of its holdings there. ■

**Geographic asset allocation of non-U.S. portfolios**

| Country/region | InterSec median portfolio 1st qtr. | InterSec median portfolio 4th qtr. | EAFE 1st qtr. | EAFE 4th qtr. |

# Going to cash

*Continued from page 1*
tween April 17 and May 12.

Some managers moved away from stocks much earlier.

J.H. Ayres & Co. Inc., a market timer in Colorado Springs, Colo., went to 100% cash from 100% equities Sept. 8 and is still there, said James H. Ayres, president. The move was due to the Fed's tightening of monetary policy, he said. The firm manages $1.8 billion.

Market timing and tactical asset allocation managers shift among asset classes because of predicting or reacting to changes in the value of each class. Many use a quantitative process. Most can shift allocations either by buying and selling the actual securities or using futures and options.

Among the shifts to cash from bonds:

- Consistent Asset Management Co., Wilmington, Del., which moved its $250 million under management to 100% cash from 100% bonds March 8.
- Harris Bretall Sullivan & Smith Inc., San Francisco, which placed half of its $200 million in fixed-income accounts in cash in February. It also has $200 million in equity-oriented accounts, which have been 85% in cash since last summer.
- Wilmington Trust Co., Wilmington, Del., changed the bond portions of its balanced accounts to cash in mid-March, said James V. Kelly, vice president. It makes moves based on a group of proprietary indicators keyed off trends in the market, he said.

The firm has $117 million in balanced accounts. Target allocations are 25% stocks, 75% bonds or cash for low-risk clients; 50% stocks, 50% bonds or cash for medium-risk clients; and 75% stocks, 25% bonds or cash for high-risk clients.

- R. Meeder & Associates Inc., Dublin, Ohio, reduced its bond accounts' exposure to nearly zero from 100% a month ago, said Robert Meeder, president. It effected the change primarily through the derivative markets. It came because of the firm's anticipation that interest rates would continue rising, he said.

The firm has between $40 million and $50 million in bond accounts. Its equity accounts, between $450 million and $500 million, have been half in stocks and half in cash since the beginning of the year.

- Schield moved its $2 million in bond accounts into cash in late March.
- Davis, Weaver & Mendel moved its fixed-income allocation, between $15 million and $20 million, to cash from long-term Treasury securities in late March.

There also were some earlier moves out of the bond market. Hoisington Investment Management Co., Houston, went to 100% cash from 100% bonds in December and remains there. It has $750 million under management.

On the stock side, Bruce Poliquin, Avatar's vice president and principal, said Avatar began reducing the exposure in late March and continued throughout April. The other 45% of Avatar's $1.5 billion under management is in cash.

"April and May were somewhat unusual," said Steven Lauer, manager-options and futures group. Bankers Trust, a tactical asset allocator, effects changes only by overlaying futures on a portfolio.

"It's not unusual for us to be totally out of the market two to four times a year," noted Marsh Douthat, executive vice president of Davis, Weaver & Mendel.

Bankers Trust, on the other hand, had made only minor shifts earlier in the year, but in April and May it was reacting to the changes in interest rates, Mr. Lauer said. The most recent move also was due to the Fed's tightening of credit, he said.

In Schield's case, stock prices had so deteriorated that further deterioration appeared likely, said Marshall Schield, president and chief investment officer. The firm looks at stock prices on an absolute basis and also considers them in relation to their 15-week moving averages.

As measures of the stock market, Schield Management does not use the Standard & Poor's 500 stock index or the Dow Jones industrial average, but broader universes such as the Value Line index of roughly 1,700 stocks and its own universe of 4,000 issues.

**James H. Ayres says his investment management firm has held cash since Sept. 8.**

In bonds, Schield Management looks at prices, as well as interest rate trends and monetary policy.

The firm's accounts are either 100% in their respective markets or 100% in cash. It had gone into equities Dec. 23, after having gotten out of the market Sept. 22. It had been in the bond market since Oct. 21.

Avatar bases its tactical asset allocation decisions on the amount of liquidity in the economy and in the hands of investors, Mr. Poliquin said. If there is excess cash not being absorbed by the industrial sector, it often ends up in stocks.

"Excess liquidity means low risk, so we raise equity exposure in those environments," he said. By the same token, it decreases equity exposure in climates of less liquidity. Avatar measures liquidity by such factors as interest rate trends, Federal Reserve policy and foreign participation in U.S. markets.

Bankers Trust's Mr. Lauer said in the near future, bonds have a higher probability of performing well.

The outlook would be more positive for stocks if the Fed loosens the money supply, he said.

Not all asset allocators are down on stocks, however. Renaissance Investment Management Inc., Cincinnati, had been 100% in bonds last summer and went to a 50-50 stock/bond allocation early in November, and might increase stocks further, said Mike Schroer, director of research.

The firm has $1.2 billion under management.

The Boston Co., Boston, cut its tactical asset accounts' equity exposure to slightly more than 50%, from 70%, when the Dow hit 2200 seven weeks ago, but went back to about 60% stocks when the average came down into the 1900s two weeks ago, said Richard Crowell, senior vice president.

The remainder of the $2 billion in the accounts is in bonds; neither stocks nor bonds are overvalued now, so there's no reason to hold cash, Mr. Crowell said.

David Bostian, chief investment officer of Bostian Research Associates Inc., New York, said the many managers holding cash is positive for the stock and bond markets because the cash will be ready for use when these markets start to move.

Mr. Bostian sees no immediate threat of inflation or recession and looks for upward moves in both the stock and bond markets. His firm manages only equities, about $6 million, and has been fully invested since December. ■

# RCB split

*Continued from page 2*
other key employees. Mr. Beasley is a shareholder in Rogers, Casey & Barksdale; he will become a shareholder in the new Rogers Casey firm.

Messrs. Casey and Rogers were unavailable for comment.

Under the split, RCB International will get four Rogers Casey & Barksdale operations — RCB Trust Co., based in Stamford; the Diversified Fund of Canada, Toronto; the Diversified Fund of the U.K., London; and Stamford Associates Ltd., Guernsey, Channel Islands.

Barksdale

The four operations offer commingled funds through outside investment advisers hired by the company. In the United Kingdom, Mr. Barksdale said RCB International has begun offering separate account investment programs, also run by outside advisers. The Guernsey operation serves the four wealthy individual clients, through commingled investment funds.

As the four operations were established and grew, Mr. Barksdale eventually devoted all of his time to them.

The Canada fund, the first of the four, was formed in 1979. RCB Trust, set up in 1985, markets to small funds; its commingled funds always were separate from the investment programs Rogers Casey is retaining, Mr. Beasley noted.

The RCB International funds invest globally in stocks and bonds, as well as holding U.S. and Canadian real estate, Mr. Barksdale said.

The Rogers Casey funds invest only in U.S. stocks and fixed income, according to Mr. Beasley.

According to Mr. Barksdale, who will be president and chief operation officer of RCB International, the two entities have been operating as separate accounting units since Aug. 1 in preparation for the legal split.

Some pension fund clients said they have been aware of the impending change since last year; they saw no impact on the services.

Mr. Barksdale said the reorganization agreement precludes the entities from working in the other's fields for some time.

He said the reorganization was taking some time to complete, in part because "it's an enormously complicated process to go through a tax-free exchange."

The reorganization is a division of assets; no cash will change hands. He added the October market crash postponed the legal work further as the principals were off serving clients.

"There are no problems or obstacles," Mr. Barksdale added. "But if everyone is off serving clients, no one is there to push the lawyers along."

Mr. Beasley said legal work on the reorganization should be complete in two or three months.

# ESOP refinancing holds guaranty

By Brad Rudin

NASHVILLE, Tenn. — HealthTrust Inc., created last year in an employee-sponsored leveraged buy-out, will refinance some of its acquisition debt in an innovative offering, part of which will be guaranteed by the company's former owner, Hospital Corp. of America.

The refinancing is an important step for HealthTrust because it allows the still-struggling company to defer some cash debt service payments for four years.

"It makes sense for the company because it gives them a lot of breathing room in the short term," said Margery E. Obrentz, health-care analyst in the high-yield research group at Kidder, Peabody & Co. Inc., New York.

The principal amount $745 million refinancing package consists of a mix of zero-coupon and current-pay bonds. The principal amount of the guaranteed zero-coupon and current-pay bonds is $240 million, while the non-guaranteed bonds total $505 million. The offering provides net proceeds of $554 million.

The $365 million redemption amount of non-guaranteed zero-coupon senior subordinated debentures, due Dec. 1, 1999, was priced to yield 16.5% until Dec. 1, 1991. The issue thereafter will pay interest semiannually at a rate of 16.5% to maturity. The non-guaranteed $140 million tranche of senior subordinated debentures, due Dec. 1, 1999, was priced at par to yield 15.25%.

The $110 million redemption amount of zero-coupon guaranteed subordinated debentures, due Dec. 1, 2002, were priced to yield 11.6% until Dec. 1, 1991. Thereafter, the debentures will pay a semiannual rate of interest of 11.6% until maturity. The $130 million of guaranteed subordinated debentures due Dec. 1, 2002, were priced at par to yield 11.25%.

Drexel Burnham Lambert Inc., New York, is the sole manager of the offering, which was priced May 25.

HCA last year sold 104 hospitals and other assets in a $2.1 billion leveraged buy-out in which the cash portion was mostly financed by $810 million lent to the HealthTrust employee stock ownership plan. The ESOP, the largest in the United States, owns 90% of HealthTrust's common stock on an undiluted basis.

The shrinkage of HCA is similar to the restructuring of American Medical International Inc., Beverly Hills, Calif., which announced in May it plans to sell 37 hospitals to employees for $910 million in cash and securities.

Contributions made to the HCA defined contribution plan in behalf of the 23,000 employees who now work for HealthTrust might soon be transferred to HealthTrust, said Charles R. Gaston, vice president for administration. Preliminary indications from the Department of Labor suggest the departure of the 23,000 employees will be treated as a partial plan termination, he said, adding tentative estimates put the amount to be transferred at $200 million.

The transferred contributions will fund a defined contribution plan at HealthTrust that will be separate from the ESOP, Mr. Gaston said.

HealthTrust also stands to gain from the public offerings, which include zero-coupon issues that relieve HealthTrust from the burden of making cash interest payments until June 1, 1992.

Respite from cash interest payments will be welcome news for the company, which experienced a $65 million fixed-charge coverage deficiency for the six months ended Feb. 29, 1988. If earnings were adjusted to eliminate certain non-cash charges, HealthTrust would have reported income of $78 million in excess of fixed charges.

The offerings also buy time for HealthTrust because the covenants require dividends on previously issued preferred stock be paid in kind before Dec. 31, 1992.

Cash payment of interest and dividends will kick in when other debt service obligations "are expected to be substantially reduced from current levels," according to the preliminary prospectus filed last month.

Still, the ability of HealthTrust to service its debt remains in doubt.

"There's a certain amount of cash flow stability at HealthTrust by virtue of the essentiality of hospital services, but with half the beds unoccupied and margins being squeezed by costs that can't be passed through, the company has its work cut out," said Michael Kaplan, a health-care analyst at Standard & Poor's Corp., New York.

HealthTrust's future should be analyzed in the context of the prospects for the health-care industry, said Roger Gordon, a high-yield bond analyst at Donaldson, Lufkin & Jenrette Securities Corp.

"While some people perceive that hospital utilization trends have turned in the early part of 1988, my own feeling is that it might be more of a temporary phenomenon than a real indicator of a strong industry turnaround," he said.

Standard & Poor's gave a BBB+ rating to the guaranteed debt and a CCC+ rating to the securities not guaranteed by HCA. Moody's assigned a Baa1 rating to the guaranteed debt and a B3 rating to the other tranche.

HCA backing boosted the credit rating of the $110 million issue of zero-coupon guaranteed subordinated debentures due 2002 and the $130 million issue of guaranteed subordinated debentures due 2002. Proceeds from this offering, together with the concurrent offering, will refinance $240 million of privately placed increasing-rate debentures due 2002 that bore an interest rate of 8.875% April 1, 1988. The base interest rate, 200 basis points over the London interbank offered rate, increases its spread over LIBOR by 50 basis points each quarter after issuance.

Because the guaranteed debentures themselves have an increasing-rate structure, HealthTrust has an incentive to refinance before maturity. If cash flow levels reach specified amounts starting in 1992, the interest rates on the guaranteed debentures increase to a rate 100 basis points higher than the coupon rate or the interest rate paid on comparable securities, whichever is greater. The revised interest rate will be increased by an additional 100 basis points every 90 days thereafter.

In addition to guaranteeing the debentures, HCA also provides credit support by agreeing to purchase up to $40 million of preferred stock if certain cash flow goals are not achieved before Aug. 31, 1990.

Proceeds from the offerings will be used to refinance $303 million of privately placed increasing-rate senior subordinated notes due 1999. Those notes bore 12.375% interest rate April 1, 1988. The base interest rate, 550 basis points over LIBOR, increases its spread over LIBOR by 50 basis points each quarter after issuance. ■

## Suspect enters not guilty plea

CHICAGO — Morton Scherl, former chairman of DuPage Boiler Works in Naperville, Ill., has pleaded not guilty to fraud charges that arose from the alleged diversion of the company's profit-sharing funds to his own use.

The U.S. attorney's office in Chicago brought charges against Mr. Scherl and two associates last year (*Pensions & Investment Age*, June 1). Mr. Scherl, who had been missing since Oct. 9, 1986, was arrested by FBI agents April 26 in Baltimore, where he had assumed a new name.

The indictment issued last year alleges Mr. Scherl diverted DuPage Boiler Works' profit-sharing assets to his own use. The company had $741,000 in its profit-sharing plan, of which $681,000 is alleged to have been diverted by Mr. Scherl; the remainder was a penalty for withdrawal from an annuity contract in which the plan was invested.

DuPage Boiler Works went out of business in 1986, leaving 50 workers without jobs or retirement funds. Mr. Scherl is charged with several counts of fraud, including violation of the Employee Retirement Income Security Act.

Two associates also were charged with fraud and diversion of profit-sharing assets. Jack Eberwein, DuPage Boiler Works' former president, pleaded guilty to the charges and cooperated in the prosecution of William B. Goodstein, former secretary of the company. Mr. Goodstein was convicted in December and sentenced in February to three years in a federal prison in California. Mr. Eberwein is in a work-release program in Ohio.

## Moving up, on

*Continued from page 2*

investment analyst of the company's pension fund, reporting to Jack Miller, who recently joined the Philip Morris Cos. Inc., New York.

"My husband was going to grad school in Muncie and the job was open," she said. "I enjoy pensions."

Mr. Miller has been replaced by Fred W. Ruebeck, former controller of the pharmaceutical division at Eli Lilly.

Mr. Adams had been with PacTel for more than four years, overseeing the $8.5 billion fund's international and fixed-income investments.

His resignation follows that of Jeffrey Winter and Daniel Braswell, who formed Quantologic, a tactical asset allocation firm.

Since then, Andy Fagan has been named a portfolio manager at PacTel and Douglas Taylor has been named executive director-investment management.

Parametric Portfolio Associates, Seattle, a quantitative domestic and international equity manager, runs $450 million, mostly for U.S. tax-exempt clients.

At Brunswick, Mr. Dolsen replaces Beverly Madore, who left for a job unrelated to investment management. His replacement at Blue Cross has not been named.

Mr. Dolsen said his new job at Brunswick will allow him to concentrate on pension asset management, while at Blue Cross he had several additional responsibilities. Each company has about $600 million in pension assets.

In New York, Mr. Ballard said he isn't quite ready to fully end his 40-year real estate career.

"I ain't about to retire and I don't think I ever will," Mr. Ballard said. "It's just a little change in lifestyle. I'm happy as heck. I'm getting close to 60 years old and I'd like to put something back to this industry that's been so good to me."

In addition to working part time at Goldman, Sachs, he said he is talking to some universities about teaching.

Mr. Ballard, who owns several farms, also plans to take a more active role in the agricultural business. ■

## Surplus

*Continued from page 3*

eral taxes on reversions, declining interest rates raising the present value of liabilities, and October's upheaval in the stock markets, sending reminders of investment risks, according to pension industry executives.

Among other reasons, they cite fears of balance sheet liabilities under the Financial Accounting Standards Board Statement 87 if the accrued present value of benefits is underfunded.

Last year, 169 plans were terminated, resulting in $1.43 billion in reversions, according to the PBGC. That was the lowest level since 1983, when there were 164 plans terminated with $1.6 billion in reversions.

Since 1980, there have been 1,634 terminations, with reversions totaling $17.87 billion, according to the PBGC. With additional reports from companies that had major terminations, the reversions rise to a total of $18.08 billion.

Using the revised figures, 25 companies have received 43% of all the reversions; Exxon alone accounts for 9%.

EBRI's Mr. Piacentini points out that for all the concern about reversions, they have involved only a small share of the 240,000 corporate defined benefit plans.

David M. Walker, assistant secretary of labor, said the Great Atlantic & Pacific Tea Co.'s termination in 1981 first heightened the awareness of the value of surplus pension assets.

Mr. Walker, who was acting executive director of the PBGC until 1985, also cited AM International Inc., Chicago, as another early astute user of terminations. It terminated both overfunded and underfunded plans, while it was in bankruptcy proceedings between 1982 and 1984.

AM International recaptured the surplus from one plan, but dumped the deficit from the other onto the PBGC. Jack Ambraister, senior vice president, secretary and general counsel of AM, said the company later made a settlement with the PBGC over the deficit plan. He couldn't recall the figures.

But Mr. Ambraister noted the reversion of the surplus "was very, very significant" in the company's successful reorganization. "Without the reversion, we would have had to give more equity to creditors and less to shareholders." ■

Investment Age

# Texaco fight intensifies

Chairman Alfred DeCrane, noting he has been in charge for less than two years, vows a special effort to gain the confidence of Texaco's investors.

By Marcia Parker

Texaco Inc. management and corporate raider Carl Icahn have stepped up 11th-hour appeals to institutional investors, the pivotal players in deciding the bitter, too-close-to-call proxy battle for control of the company.

Interviews with more than 24 of Texaco's largest institutional investors uncovered eight — representing several million shares of Texaco — that will support management at Friday's annual meeting. But only the California Public Employees' Retirement System, which owns about 763,000 shares, agreed to publicly reveal its position. Many others were undecided or would not reveal their decisions.

At least six others said they support Mr. Icahn. Several said they would vote for him not because they prefer his offer over Texaco's restructuring, but because they are angry with Texaco's board for not allowing shareholders to vote on Mr. Icahn's offer.

One large money manager with significant Texaco holdings said his firm is reviewing a vote for Texaco management that the firm cast prior to Mr. Icahn's $60 per share offer. He said a final decision hadn't been made, but the firm is "leaning toward supporting Mr. Icahn."

Several money managers and pension fund executives said they felt almost under siege as they fielded a flurry of calls on behalf of Texaco and Mr. Icahn.

"It's my impression there's a high degree of pressure being brought to bear on this Texaco situation," one money manager said. "Texaco management is pulling out all the stops to get their friends to vote for them."

*Pensions & Investment Age* interviewed Texaco Chairman Alfred DeCrane and Mr. Icahn last week. Both men, confident of victory and convinced their respective plans for Texaco are in the best interests of stockholders, lobbied hard for institutional support.

Some investors, meanwhile, have extracted promises from management in return for their support, an unusual move that represents a significant expansion of the growing activism of many institutional investors.

After at least two face-to-face meetings with Texaco management in recent weeks, Dale Hanson, executive director of the California fund, secured in writing a "personal commitment" from Texaco Chief Executive Officer James Kinnear to discuss procedures for choosing the board of directors in time for possible implementation by Texaco's 1989 meeting. Together they would try to develop a mechanism to allow shareholders to nominate their own candidates to a minority of board seats.

If that proposal is worked out, it would be the first time shareholders have had that opportunity. It could go a long way toward extending their influence in corporate affairs.

In another first, an advisory committee of large, long-term Texaco institutional investors is being set up by the California pension fund "to provide Texaco with a responsible, stable

# DOL requests voting records

WASHINGTON — Carrying through on its vow to step up monitoring of proxy voting, the Department of Labor last week sent out letters to money managers seeking voting records in dozens of companies — including Gillette Co. — with significant proxy disputes in 1988.

Charles Lerner, director of enforcement, confirmed the letters had gone out and the department requested results on a number of proxy votes. He declined to elaborate, citing the department's long-standing policy of not commenting on pending investigations.

A number of money managers and pension fund executives — none of whom wished to be identified — said they had received the letter and planned to provide the requested information. The department indicated in the letter it would use its subpoena power if investors did not comply voluntarily.

Sources in the investment and legal community said the Labor Department initially has targeted institutional investment managers in five regions — New York, Boston, Chicago, Los Angeles and San Francisco — that held large blocks of stock on behalf of tax-exempt funds in specific companies that had significant proxy disputes.

A complete list of the targeted proxy contests could not be obtained by press time, and it appears the list of com-

# The thrill of victory

## Tallies reveal two 'firsts'

By Marcia Parker

Activist institutional investors are savoring victory in 1988, having scored more significant triumphs on shareholder resolutions dealing with corporate governance issues than ever before.

First of a two-part series

The average shareholder vote for anti-poison pill proposals at 18 companies was 38.2% this year, nearly nine percentage points higher than last year's totals, according to the Investor Responsibility Research Center Inc., Washington.

The votes supporting rescission of poison pills or putting them to a shareholder vote ranged from 26.3% to 61.1%, excluding abstentions. And shareholders at Sante Fe Southern Pacific Corp. overwhelmingly approved a proposal to eliminate the company's poison pill, the only anti-poison pill resolution ever passed.

Five anti-greenmail proposals averaged support of 28.4% this year, compared with a 12.9% average for two proposals last year. One proposal — at Gillette Co. — was approved, the first such proposal to pass.

Secret-ballot proposals fared well considering this was the first year they were a major issue and, therefore, some institutions had not developed voting policies. Nine confidential-voting proposals averaged 9.9% of the shares voted. Three companies agreed to voluntarily implement confidential proxy voting in response to shareholder proposals.

Five resolutions calling for shareholder access to the proxy statement averaged support of 8.78%.

"The message of all this seems to be that shareholders

The California Teachers' fund withdrew an anti-greenmail plan for Dayton-Hudson because of existing provisions in state law.

## LATE NEWS

### PacTel picks pension executive

SAN FRANCISCO — Richard P. McGahan has been named director of pensions at Pacific Telesis Group, San Francisco, replacing Jeffrey Winter, who was promoted to executive director-investment management, in February.

Mr. McGahan will handle all investment policy of the $8.5 billion pension fund. Prior to joining PacTel, Mr. McGahan was vice president-client service at Fred Alger Asset Management Inc., San Francisco. Until mid-1986, he was manager-pension investments at Monsanto Co., St. Louis.

He said he is returning to the pension sponsor side of the industry "because it is the area I have the most interest in. PacTel is a great company."

### Change urged in New York law

NEW YORK — New York state should adopt a prudent-investor rule and drop its legal list requirement to allow greater diversification, according to the state's Permanent Commission on Public Employee Pension and Retirement Systems.

Alternatively, the legal list should be liberalized to expand the state's "basket clause" to 25% of assets from 7.5%, the commission wrote in a report submitted to the Legislature last month. That clause permits investment in assets not on the list, such as foreign securities, leveraged buy-outs, venture capital, mortgages and real estate.

The state investment law affects eight retirement systems of the state and New York City, with combined assets of $85 billion.

A study prepared by Buck Consultants Inc., New York, submitted with the commission's recommendations, said the systems soon will reach the 7.5% limit.

### Pennsylvania ups foreign bonds

HARRISBURG, Pa. — The $8 billion Pennsylvania State Employes' Retirement System has increased the amount it will allow a manager to invest in international bonds, said Kenneth G. Mertz II, chief investment officer.

Miller, Anderson & Sherrerd, Bala Cynwyd, Pa., which manages $1 billion in fixed-income assets for the fund, now can put up to 20% in foreign bonds, up from 10%. The program has been in effect since 1985.

The fund is very pleased with "the greater opportunities and diversification it gives us," Mr. Mertz said.

The system is studying whether to go into international equities, he said.

### Yale taps international manager

NEW HAVEN, Conn. — The Yale University endowment has hired Grantham, Mayo, Van Otterloo & Co., Boston, to manage $100 million in international equities, and has appointed Morgan Stanley Trust Co., New York, as a global custodian.

The international manager will weight countries in the portfolio according to relative gross domestic product, instead of market capitalization, which is traditionally used to weight international index funds, sources said.

To save on transaction costs, Yale acquired a slightly smaller portfolio that Grantham, Mayo, Van Otterloo had managed for General Electric Co., which had brought its money in-house.

The Yale fund totals $1.74 billion, according to the 1988 Money Market Directory.

### State Street hired to run GICs

MCKEESPORT, Pa. — G.C. Murphy Co. hired State Street Bank and Trust Co., Boston, to manage a guaranteed investment contract portfolio for its $18 million 401(k) plan, said Rich Rose, director of compensation and benefits.

Mr. Rose said the separately managed GIC account will total about $7 million initially as existing contracts expire and are rolled into the account.

He said all GICs in the salary reduction program will be managed by State Street because of consolidation of the plans of G.C. Murphy and Ames Department Stores Inc., Rocky Hill, Conn. Ames acquired Murphy in 1985.

### Moore gets new duties at Aetna

HARTFORD, Conn. — T. Jerald Moore, president of Aetna Capital Management Co., has been named vice president-Eastern region, insurance marketing and administration for Aetna Life & Casualty Corp.

The area covers traditional insurance products, alternative health services, client servicing, and new product marketing and pricing.

Mr. Moore, who will start his new duties July 5, will retain his current title of vice president-employee benefits division.

His successor as head of the pension and financial service marketing department has not been named.

# Futures recovering from crash injuries

By Trudy Ring

Optimism is creeping back into the derivatives markets, as volume on exchanges worldwide slowly rises and industry leaders ease their post-crash criticisms.

Granted, volume in the Standard & Poor's 500 stock index futures, the most popular contract for institutional use, still is down more than 40% from year-ago levels. But exchange officials and both proponents and opponents of the strategies believe the instruments will make a comeback.

"Statistically, we're about where we were in 1986," exchange spokesman Andrew Yemma said. "If you take the point of view that 1987 was an abnormal year, we're basically pretty well positioned for further growth in the product."

Alger B. Chapman, chairman of the Chicago Board Options Exchange, said activity in options and futures is down about the same amount as stock volume, once volume attributed to dividend plays is deducted from stock figures.

"I haven't found that the volume has been poor enough to hinder any of the strategies we use," said Jeffrey Geller, vice president of BEA Associates Inc., New York. BEA, with $7.2 billion in tax-exempt assets under management, uses futures heavily.

Mr. Geller added he believes stocks and derivatives are one market. "The futures volume is really just echoing the lack of liquidity in the equity market today," he said. "I don't believe the tail can ever wag the dog."

"If you're asking if the futures markets will persist and grow,

# Taking a worldly view

## $100 million fund starts global allocation strategy

By Marlene Givant

WALTHAM, Mass. — The $100 million Dennison Manufacturing Co. defined benefit retirement plan is embarking on a global tactical asset allocation strategy, incorporating hedging with futures, options and currencies.

Global tactical asset allocation is rare among pension funds, and almost non-existent among funds the size of Dennison's.

The $40 billion California Public Employees' Retirement System, Sacramento, made a similar decision late last year; that mammoth fund, however, initially will invest only 1% to 2% overseas. In contrast, Dennison's new strategy will put the fund 20% in global investments, a significant amount for any fund, especially one with $100 million.

Dennison is restructuring its portfolio and will base the fund's asset mix on the asset allocation strategies of two managers it just hired.

"We feel that (asset allocation) expertise should be left with the experts . . . That's why we're giving managers latitude," said Karen Edlund, pension and employee stock ownership plan manager of Dennison. The company manufactures paper, stationery products and industrial products such as fasteners and provides data processing and marking systems for retailers.

"When we talked to (international management) candidates we listened to their models and strategies, and that convinced us they could enhance returns when given more flexibility."

Both of the asset allocators the fund hired — Mellon Capital Management, San Francisco, and WorldInvest Ltd., London — may hedge, and they have no asset class targets to meet.

"The desire to further diversify the fund into international and extend the duration of the pension portfolio to better match liabilities" prompted the restructuring, Ms. Edlund said. Bond

First RepublicBank is the latest bank to leave the benefit record-keeping services area.

# Texas bank cuts record keeping

By Fred Williams

DALLAS — The decision by First RepublicBank to drop its employee benefit record-keeping program was made to save money and save face, and was not directly related to problems stemming from the bank's troubled loan portfolio, according to bank and industry officials.

First RepublicBank, which announced its decision in a letter to clients last month, is the most recent of several large banks to leave the record-keeping business.

At least eight major banks have quit the business in the past two years, including Security Pacific National Bank, Continental Illinois National Bank & Trust Co. and Manufacturers Hanover Trust. Experts say banks are trying to reduce costs and return to core trust services, and they lack a commitment to the complex area.

Lou Valentino, consultant and manager of the defined contribution practice for the Wyatt Co., New York, said the pull-out "is a function of how the organization perceives the business and whether they are committed. No one is interested in providing a loss-leader."

He said record keeping is expensive and complex: "In the record-keeping area there are hundreds of things to worry about, and numerable permutations of things that can go wrong. It is inherently complex."

Gail Kellogg, partner and practice leader for defined contribution plan administration at Hewitt Associates, Deerfield, Ill.,

# Funds, advisers assail SEC plan

By Brad Rudin

Public pension plans and the sponsors of closed-end real estate funds have blasted a proposed change in Securities and Exchange Commission rules that would prevent many public funds from investing in the real estate funds and other private placements.

The proposed rule would disqualify state and local government pension plans from accredited investor status unless plan officials delegate investment responsibility for private placements to a bank, savings and loan, insurance company or registered investment adviser.

Currently, such responsibility may be retained by fund officials without losing accredited investor status.

A public pension plan also would be disqualified unless it established fiduciary principles that were the same as, or similar to, those contained in the Employee Retirement Income Security Act of 1974.

Issuers are allowed to sell private placements without going through complicated registration procedures only to qualified investors.

Several critics said the SEC is trying to get around Congress' 14-year-old decision to exclude public funds from ERISA.

They also said the proposal would limit arbitrarily the investment options held by public funds.

"Why should we be restricted in not being able to buy things that are advantageous to the pension fund?" asked Bobby J. McKee, general manager of the Kentucky Retirement Systems, Frankfort. "We're here to make money for our constituents."

Mr. McKee and other public fund officials voiced their criticism in comment letters to the SEC last month.

"This is an important investment for public pension funds," said Keith Johnson, acting general counsel of the State of Wisconsin Investment Board, Madison. "It's been an especially lucrative investment for us, and we don't want to be in a situation where the basis upon which we're qualified to make these investments under the securities laws is put into question."

Critical letters also came from officials of the Chicago Policemen's Annuity & Benefit Fund and the Los Angeles County Employees' Retirement Association.

The SEC proposed the new definition of an accredited investor in March; the comment period expired May 13.

It remains unclear when the commission will take action on the proposal.

If adopted, the rule would modify Regulation D, which provides safe-harbor exemptions from federal securities law disclosure requirements.

The proposed rule change also affects the sponsors of commingled closed-end real estate funds that depend in large measure on public pension funds.

For example, public funds invested about half of the capital for Heitman Advisory Corp.'s four closed-end real estate funds since 1984, said David Glickman, president of Chicago-based Heitman. Other managers have similar percentages of public fund money, he added. ■

## CORRECTIONS & CLARIFICATIONS

- **Oppenheimer Capital** was incorrectly identified in the May 23 money managers' profile issue.
- **Cullen Bank**, Houston, Texas, was omitted inadvertently from the May 16 PIPER equity five-year listings. The bank returned 18% for the period, putting it in the top decile.
- The names of **Dennis Brush** and **Michael J. Connelly**, managing directors at **Lepercq, de Neuflize & Co.**, New York, were transposed in a photo caption in the May 16 Financing section.

## DOL to probe 23 on proxies

By Marcia Parker

Gillette Co., Allied-Signal Inc. and Texaco Inc. are targets of the Department of Labor's proxy monitoring "hit list."

*Pensions & Investment Age* also has learned the chairmen of Gillette and Allied-Signal made written appeals to fellow chief executives requesting they talk to their pension fund managers about voting proxies in support of those companies' managements.

The Labor Department earlier this month requested proxy voting records from fiduciaries of several companies as part of its stepped-up proxy monitoring program (*P&I Age*, June 13). At the time, only Gillette, which recently won a hard-fought proxy contest between management and The Coniston Group for company control, was known to be on the list of 23 names.

The Labor Department is seeking to ensure proxy voting practices are well-planned and well-documented, and no improper pressure is being applied to those who hold proxy voting authority.

According to a full list of target companies obtained since by *P&I Age*, the others are: Santa Fe Southern Pacific Corp.; USAir Group Inc.; Media General Inc.; Coleman Co. Inc.; International Paper Co.; Kerr-McGee Corp.; Martin Marietta Corp.; Pitney Bowes Inc.; United Technologies Corp.; Champion International Corp.; Upjohn Co.; Boise Cascade Corp.; Tenneco Inc.; Champion Spark Plug Co.; Honeywell Inc.; Lockheed Co.; Unocal Corp.; Amoco Corp.; Chevron Corp.; and Mobil Corp.

The Labor Department's target companies include some of the most hotly contested proxy battles of the 1988 season as well as others involving corporate campaigns to defeat shareholder-sponsored corporate governance resolutions.

The letters sent by Gillette and Allied-Signal executives are a twist on a letter-writing campaign launched during last year's proxy season. A controversy erupted when several chief executives wrote their counterparts asking them to use their influence with pension fund managers to support management's positions on shareholder resolutions, especially withdrawals of poison pills (*P&I Age*, April 6, 1987).

The 1987 letter-writing campaign is believed to be the catalyst of the Labor Department's 1988 proxy monitoring initiative, its widely circulated warning letter to Avon Corp. on proxy voting, and the guidelines for pension plan fiduciaries it issued this year.

Pension fund executives, money managers and institutional investors said they would be watching to see how the department views the latest letters and the aggressive campaigns launched this year to defeat raiders who waged proxy battles and corporate governance shareholder resolutions.

The Labor Department is not believed to view

*Continued on page 35*

## Social issues abate

### Resolutions find only limited support

By Trudy Ring

The 1988 proxy voting season was less than stellar for shareholder resolutions dealing with social issues, but sponsors still saw a few bright spots.

Average support for shareholder resolutions seeking corporate withdrawal from South Africa fell somewhat, but for the first time there was significant support for resolutions that called for ending non-equity ties, such as licensing agreements, in that nation.

A record number of companies faced resolutions on their operations in Northern Ireland, but support for such resolutions dropped at most companies where the issue had been raised previously. Support rose on average, however, in part because of one large vote.

In all, 87 resolutions on South Africa came to votes. Twenty asked companies only to withdraw their operations from that nation; 33 asked them to withdraw and sever other ties; 15 asked companies without direct investment to cut non-equity ties; and the remainder addressed such issues as endorsement of the Statement of Principles (formerly the Sullivan Principles) and sales to the South African government, police and military.

**10 largest vote-getters among South Africa withdrawal resolutions**

| Company | Shares voted in favor |
|---|---|
| Gillette [1] | 21.9% |
| Gillette [2] | 21.4 |
| Colgate-Palmolive | 17 |
| Goodyear | 16.1 |
| MCA | 15.6 |
| NCR | 15 |
| Baker Hughes | 14.8 |
| Tenneco | 14.5 |
| Squibb | 14.2 |
| Caterpillar | 14.2 |

[1] Withdrawal only
[2] Withdrawal and cut all other ties
Source: Investor Responsibility Research Center

South Africa withdrawal resolutions won support from 20% or more of the shares voted at only one company, Gillette Co., compared with five companies in 1987. (All IRRC vote data excludes abstentions.)

Support for New York-based Coniston Group's nearly successful bid to take over Gillette apparently spilled over to other dissident shareholder resolutions, said Carolyn Mathiasen, director of the social issues service at the Investor Responsibility Research Center, Washington.

The New York State &

## LATE NEWS

### Moratorium gaining momentum

WASHINGTON — A bill that would place a moratorium on employers using the surplus assets of terminated pension plans unexpectedly picked up speed last week when it was attached to an appropriations bill.

Amid objections by leaders of the Senate Finance Committee as well as the administration, the Senate Appropriations Committee voted to keep the proposal in the bill, which contains appropriations for the departments of Labor, Health and Human Services, and Education.

The bill will be considered on the Senate floor this week.

### Merger of 2 Russell units seen

TACOMA, Wash. — The Frank Russell Trust Co. and the Frank Russell Investment Co. reportedly will be combined under the command of Lynn Anderson, president and chief executive officer of the investment company.

Frank Russell Investment was launched in August 1981 as a mutual fund offering a series of commingled funds. Shares of the fund are only open to bank trust departments and tax-exempt funds that enter into an asset management agreement with Frank Russell Co., which is the manager of managers for the funds.

Frank Russell Trust Co. is also a manager of managers offering 10 pooled funds as well as separate accounts. The company is headed by Paul Kaltinick, president and chief executive officer.

The Frank Russell Co. declined to comment because the changes haven't been finalized.

### LaSalle seeks partner for capital

CHICAGO — LaSalle Partners Inc., Chicago, is looking for a minority partner, and among the candidates mentioned by sources are Dai-Ichi Mutual Life, Japan's second largest insurance company, and San Francisco-based Transamerica Corp.

William Sanders, chairman and chief executive officer of LaSalle, issued a statement saying "LaSalle Partners has been in discussion with several corporate and institutional organizations — both domestic and foreign — regarding a minority limited partnership investment in its firm."

Sources said Dai-Ichi and Transamerica are among those that have held discussions with LaSalle officials. Dai-Ichi, however, is considered the more likely candidate because Transamerica "wanted a little more involvement" in the firm than LaSalle executives were willing to permit, according to one source.

Some sources had said Dai-Ichi would pay up to $150 million for a 40% stake in LaSalle Partners and would provide its pension advisory division with another $1 billion in assets to manage. Mr. Sanders called those figures "totally inaccurate."

### Sponsors, advisers change jobs

Several pension industry executives have announced job changes recently.

• Charles P. Dunn, director-pension finance and investments at North American Philips Corp., New York, will join Reich & Tang L.P. July 11 as a vice president responsible for client servicing, marketing and development of new products.

He is replacing Gene Hoots, the former president of RJR Investment Management Inc. (now part of RJR Nabisco Inc., Atlanta). Mr. Hoots is joining Watnik and Son, a Springfield, N.J.-based pension consulting group.

• James Penner was expected to be named investment officer of the Montana Board of Investments, Helena, last week, replacing James Howeth, who is resigning effective June 30.

David Lewis, executive director of the board, which oversees nine state retirement plans with more than $2.6 billion in assets, said the expected appointment would be for a "probationary" period of three to six months, after which he expects Mr. Penner to be given the job permanently.

Mr. Howeth has formed his own investment firm, The Anna Corp., in Helena.

• In San Francisco, two Hambrecht & Quist Equity Management executives — Bill Welty, director of research, and Pat McBaine, executive vice president and head of institutional sales — are leaving the firm this summer to start separate investment management companies.

Mr. Welty will be succeeded by Barney Hallingby, now in institutional sales in the company's New York office; Mr. McBaine's successor hasn't been named.

• James E. Heard, who joined T. Boone Pickens' shareholder rights group United Shareholder Association six months ago as executive director, left to join Analysis Group Inc., to advise institutional investors on proxy voting issues.

Mr. Heard and a spokesman for USA said Mr. Heard's interests and the group's needs did not mesh and they reached a mutual decision to part ways.

Before joining the USA, Mr. Heard was deputy director of the Investor Responsibility Research Center in Washington, where he had worked for about nine years.

# Funds gird for tax

## Australian plans move to domestic stock

SYDNEY, Australia — The Australian government's almost-certain imposition of taxes on domestic pension funds has caused a rush into domestic equities, and might augur significant shifts in funds' investment strategy.

The changes, proposed in the government's May 25 minibudget, already have generated a move into high-yield stocks, although some observers think that might have been premature. But pension experts believe the tax changes might lead to increased use of passive investment vehicles and decreased investments in bonds. And views differ on whether funds will cut overseas equities.

For all investors, the outlook for the previously lagging Australian stock market has brightened, as lower corporate taxes and higher inflation prospects have given it a boost.

The taxation of previously tax-exempt Australian funds has global significance, as many governments, including the United States, have looked to pension funds as a source of revenue. Last year, New Zealand imposed similar taxes on its pension funds.

The changes in the Australian system are expected to generate $770 million in new revenue as part of an expected $2.36 billion budget surplus. (All amounts reflect U.S. dollars.)

The growing Australian pension market has about $66 billion in assets.

The changes affecting Australian pension funds — known as superannuation funds here — take effect July 1, although industry is lobbying for postponement of some of the effective dates.

The new rules would impose a 15% tax on:

• investment income, including rents, dividends and interest;

• realized capital gains (measured as those exceeding the inflation rate — if the security is held for at least one year) in the year in which the asset is sold; and

• deductible employer contributions.

Pension funds, however, might be able to completely offset any taxes. Under the rules, funds will get a 39% tax credit on fully franked dividends — dividends from profits on which corporate tax has been paid. But the "imputation credit" cannot be used to offset taxes withheld by other countries on foreign stocks, thus lessening the allure of foreign markets.

But the availability of capital gains tax rates will make all equities — domestic and foreign — more attractive than bonds, making the impact on foreign stocks a wash, said Craig Ueland, managing director of Frank Russell Australia, Sydney.

The Australian stock market, which had lagged other world markets in recovering from last October, surged after the minibudget was announced. Although still far below its pre-crash 2,300 level, the All Ordinaries index climbed to 1600 in mid-June from 1470 May 25.

# Hedged indexes mulled

By Marlene Givant

Currency and asset allocation experts are urging pension fund executives to adopt fully hedged international portfolios and benchmarks — moves that could transform the investment management and risk/return profile of overseas investments.

The use of hedged benchmarks could revolutionize the way plan executives look at international investments as an asset class, causing the executives to focus just on underlying security returns, and separating the currency factor. An increased demand for hedging and adoption of hedged benchmarks also could force managers to build their hedging capabilities.

Only a few funds are starting to experiment with hedged benchmarks, but many are looking at the idea. The $3.5 billion endowment of The Common Fund, Fairfield, Conn., which has $1 billion in international equities and global bonds, sometimes uses a hedged benchmark, the Salomon Brothers Hedged World Government Bond index, to measure the volatility of global bond accounts.

Its primary global bond benchmark, however, is the Shearson Lehman Hutton Government/Corporate bond index, said Curt R. Tobey, vice president.

Many funds are considering adopting a full- or partial-hedge policy.

"Hedging is an issue we're actively looking at these days. We sort of believe the dollar is in a narrow trading range, but we're more serious (about hedging) now than a year ago," said Charles C. Weaver, director-pension funds of the $6 billion Southwestern Bell Corp. pension fund, St. Louis, which has 5% in international equities.

Most pension executives leave hedging decisions to their managers, who generally hedge into the U.S. dollar when they want protection from a rise in the currency. But the practitioners think funds should hedge not only when managers are bullish on the dollar but also when they are neutral.

Funds should only lift the dollar hedge when they expect to gain by doing so, the practitioners say.

Currency gains have accounted for much of the returns from international investing during the past few years, and some pension fund executives are looking to hedge because the party might be over.

Some observers fear increased demand for hedging and the use of hedged benchmarks by pension funds could force managers to hedge more than they otherwise would.

"There are strong academic arguments for being fully hedged as a normal position. My concern is

# Bank in record-keeping

NEW YORK — Manufacturers Hanover Trust Co. has been active in employee benefit participant record-keeping since 1984 and remains committed to that area for both defined benefit and defined contribution plans, according to Renee San Marco, vice president.

Manufacturers Hanover was listed incorrectly in a June 13 article as being among eight major banks to withdraw from participant record-keeping in the past two years.

"We feel our system can handle most employee benefit plans in existence today with no problems," said Eugene Bacich, vice president in charge of the bank's participant record-keeping department.

"The bank has made a major commitment to master trust and employee benefit trust services and record-keeping is part of that commitment for both defined benefit and defined contribution trusts."

Mr. Bacich said the bank plans to enhance its participant record-keeping system soon to handle daily valuations for unit accounts or company share accounts.

He said the Manufacturers Hanover system is flexible enough to support multiple vesting schedules or an individual vesting schedule for each fund included in a plan. In addition, the system can handle any combination of 99 investments and funding sources. ■

# International spurs indexing

**By Curtis Vosti**

International index fund assets managed by 13 leading international indexers grew nearly 57%, to more than $9 billion, since Nov. 30, a *Pensions & Investment Age* survey shows.

Adjusted for market valuations — for the six months ended May 31, the Morgan Stanley Capital International Europe Australia Far East index returned 16.7% — international indexing still grew 40.4%.

The growth in international indexed assets, however, was not enough to offset sluggish growth in the domestic equity and fixed-income indexed arena, where the growth in total assets did not match the expected growth from market appreciation.

All told, 49 top index managers surveyed recently report indexing $178.3 billion in domestic and international accounts for tax-exempt clients.

Of the 36 managers surveyed both for May 31 and Nov. 30 figures, the total amount indexed increased to $168.52 billion from about $157.01 billion — an increase of only 7.3%.

The Nov. 30 figures in each of the three categories, adjusted for market appreciation, would have been expected to grow to $176.61 billion.

After adjusting the Nov. 30 figures for market growth, domestic equity indexing was down $11.1 billion, while domestic fixed-income indexing was up slightly.

Domestic equity index investments totaled $120.9 billion May 31 among the 49 index fund managers; domestic fixed-income index funds accounted for $47.5 billion.

On Nov. 30, 37 money managers cited $107.5 billion in domestic equity index funds and $43.7 billion in domestic fixed-income funds.

Of the 36 firms common to both surveys, domestic equity indexing increased to $113.39 billion from $107.45 billion, an increase of 5.5%.

For the six months ended May 31, the Standard & Poor's 500 stock index advanced 15.8%.

Among the 36 managers common to both surveys, the amount invested in domestic fixed-income indexed accounts rose to $45.99 billion from $43.74 billion, an increase of 5.1%.

For the six-month period ended May 31, the Shearson Lehman Hutton Government/Corporate bond index returned 3.7%.

Indexed accounts run in-house by 15 of the top 200 pension funds dropped $4.8 billion to $21.8 billion May 31, from $26.6 billion as of Jan. 1.

Those 15 sponsors reported $19.4 billion in domestic equity indexed accounts, with the remaining $2.3 billion in domestic fixed-income indexed accounts.

The assets of the 13 money managers that run international indexed accounts grew to $9.1 billion from $5.8 billion as of Nov. 30.

State Street Bank and Trust Co., Boston, reported the biggest gain in international indexed assets, $1.14 billion since Nov. 30, for a total of $4.33 billion.

Wells Fargo reported a $1.039 billion gain — to $1.8 billion — in assets indexed internationally.

"There's been a tremendous growth in international investing in general," said Peter Braun, vice president/director of marketing for State Street's asset management division. Large public pension funds, "think perhaps the best way to establish a core international portfolio is through an index process," he said.

Other factors he lists as favoring international indexing are the "pretty overwhelming" underperformance the last five years of active international managers when compared with the EAFE index and the relatively high costs of active international management.

While international indexing booms, the virtual stagnation of domestic indexing is due in part to the "maturing" of that industry, according to David Hurley, vice president for Investment Index Technologies Inc., Newark, N.J., a subsidiary of Prudential Asset Management, Newark, N.J. Prudential manages $1.2 billion in tax-exempt accounts spread between domestic equity and fixed

# Favia Hill shut down

## Chemical moves to stem more losses

**By Joel Chernoff**

NEW YORK — Chemical Bank's dismantling of its ill-fated Favia, Hill & Associates Inc. subsidiary is viewed as the final chapter in the firm's troubled five-year life span.

For now, the move is seen as a way to help Chemical staunch further losses of the unit's remaining equity business. Favia, Hill has $1.2 billion in equity assets, down substantially from its peak of $3.2 billion at year-end 1983.

It is an attempt to "salvage what they could on the equity side and not disappear into the night," said Eric Weissenberger, formerly a marketer for Favia, Hill and now director of marketing and client services for Home Capital Services Inc., New York.

"It's probably a good idea for them to consolidate the business," echoed Joseph Scarella, a consultant at Wyatt Asset Services, New York.

Clients have the choice of having their equity accounts transferred to one of three other Chemical equity management units: Texas Commerce Investment Management Co., Houston; Quantum Investment Management Inc., New York; or Investment and Capital Management Corp., Rolling Meadows, Ill.

Clients whose accounts had been run by Kenneth Rolland, chief investment officer of the disbanded unit, may retain him. Mr. Rolland is a managing director of Chemical Investment Group, which is the holding company structure for five of Chemical's investment management firms.

Outsiders, however, expect Chemical might lose many of its remaining equity accounts.

Favia's $3.8 billion in fixed-income assets and cash have been merged with the bank's Treasury Asset Management unit into a new subsidiary, Chemical Investment Management.

Chemical's Edward Madden said the bank is maintaining its commitment to equities.

Continuing to oversee the bond accounts in the new unit is William Budd, managing director-fixed-income management. Alexander Laird, recently hired from Hutton Asset Management, will continue to have responsibility for the $3 billion in cash management accounts brought from Treasury Asset Management.

Edward E. Madden, managing director for Chemical Investment Group, said the bank is maintaining its commitment to equity management and money management overall. Rumors had circulated earlier this year that Chemical might sell its money management operation, following the course of Citicorp and Manufacturers Hanover Corp.

Mr. Madden noted the bank is working on a plan to give key professionals a 19.9% stock interest in Chemical Investment Group, reflecting its commitment to money management. While the group's revenue is not disclosed, Mr. Madden said it is better this year than last year.

"There is no doubt that Chemical is committed to this business," he said. Chemical Investment Group has $13.7 billion in total assets under management.

Still, some observers believe Favia's history, including poor equity performance and turnover in key personnel, reflects the bank's sometimes half-hearted efforts to build an independent money management subsidiary.

"Chemical never jumped in and supported it," said an official at another New York money-center bank.

Greta Marshall will jump into starting her own investment firm after her stint with the California Public Employees' fund ends this week.

# Marshall diving into new waters

**By Curtis Vosti**

SACRAMENTO, Calif. — Avid skyjumper Greta Marshall is ready to take the plunge into entrepreneurship when she ends her three-year association with the $45 billion California State Employees' Retirement System this week.

Ms. Marshall is planning to start her own investment firm as soon as she can get commitments from the "two or three or four" partners she wants.

"I think it's coming together eventually, perhaps in a week" she said, adding "timing" prevented her from releasing the names of those who are expected to work with her.

It's another challenge the 50-year-old sportswoman and invest-

PORTFOLIO MANAGEMENT

FEATURE

# Fee schedule impact

## Individuals' pay affected

By Gregory Keshishian

As the use of performance-based fees gains greater acceptance, it might complicate the incentive compensation plans used by investment management firms.

Corporate clients need to understand these compensation trends and their effect on motivating portfolio managers to achieve desired performance. Sponsors have an indirect, but still influential, impact on compensation policy when negotiating performance-based fees.

The use of such fees might force compensation designers and decision-makers to focus even more heavily on individual contribution, possibly having an adverse effect on team effort.

If firm profitability is adversely affected by the new performance-based fee structures, there simply may not be enough money available to direct incentive compensation dollars strategically around the firm. Under certain circumstances, even the top-performing portfolio manager may not be assured an adequate bonus if firm profitability is hurt.

Behaviorally, this situation might reinforce internal competitiveness rather than cooperation, and would require management leadership to overcome possible divisiveness and lack of team spirit.

Providing high-quality professional talent with strong individual motivation to outperform the competition is still the primary focus of incentive plans. The challenge will be to achieve this when overall fees are under pressure, while preserving a collegial atmosphere.

In assessing current programs, an essential task is to determine whether the system is well-aligned with a firm's overall business objectives and human resources strategies.

To make it meaningful, there should be a retrospective evaluation of the compensation system's effectiveness and a willingness to fine tune or substantially modify it.

The introduction of performance-based fees may influence the revision and redesign of these systems.

Gregory Keshishian is a senior consultant with Handy Associates, New York, a compensation consulting firm.

This evolving parallel between management fees based on performance and portfolio manager compensation for performance may dramatically change the expectations of investment professionals as to what constitutes a fair and competitive reward.

The designers of pay plans in the industry have been faced with the dilemma of rewarding individual investment performance in the context of firmwide results. This has been complicated by the desire to achieve an equitable distribution of incentive dollars based on the asset size of portfolios managed (by individual portfolio managers) and firmwide fee income derived therefrom.

In the past, firm managements often have attempted to direct dollars to those individual portfolio managers whose personal investment performance was superior, even if overall firm performance was lackluster. Their ability to make such incentive distributions was attributable to the fact the primary determinant of firm revenue and profitability was total assets under management.

While there undoubtedly has been a cause-and-effect relationship between comparative investment performance and the movement of pension assets, the revenue stream from existing accounts continued as long as these accounts were in place. Thus, the flexibility to move compensation dollars to high individual performers was often retained, even if overall firm performance was not fully competitive in a given year.

How will firms deal with the

# Crash puts drag on searches

CHICAGO — Money management searches are down 30% since the October crash, according to one major consultant's engagement activity.

Searches the firm has undertaken largely have been for non-equity investments, almost the reverse of the bullish sentiment before Oct. 19. An exception to the new bearishness is the post-crash upswing in interest in small-capitalization stock managers.

Based on its own activity, SEI Corp., Wayne, Pa., reports it was engaged for 45 searches in the six months ended April 30, down 30% from its 64 search engagements in the six months ended Sept. 30.

Of its post-crash searches, only 36%, or 16 searches, were for domestic equity managers (excluding small-cap stock managers).

By contrast, in the pre-crash period, 73%, or 47 searches, were for domestic equity managers (again, excluding small-cap managers).

Broader data compiled by SEI from published accounts in *Pensions & Investment Age* and elsewhere of non-SEI searches during the same periods confirm its own trend in search activity.

That data of non-SEI engagements show the number of searches fell 40% to 187 in the six post-crash months, from 309 in the pre-crash period. Of these post-crash searches, only 31%, or 58 searches, were for domestic equity managers (excluding small-cap searches), in contrast to 47%, or 145 searches, in the six pre-crash months.

"People are more conservative after the crash and are looking for less volatile investments, particularly, real estate and fixed income," said Dave O'Donovan, SEI vice president in Chicago, commenting on the survey.

In addition, he said, "They are looking at international (investments) for diversification."

SEI's Dave O'Donovan says funds are seeking less volatile investments after the crash.

The international move "doesn't fit as neatly into the conservative notion," he added. "But international markets are not as closely correlated with U.S. markets," underscoring their role in diversification, he added.

"Everyone is concerned about being vulnerable like they were in October," Mr. O'Donovan said.

Also, he noted many sponsors have undertaken asset allocation studies since the crash, putting off any searches. Comparison data on this activity weren't compiled.

In the period after the crash, SEI was engaged for five small-cap, one international fixed-income and nine real-estate searches, together comprising 33% of its consulting searches. By contrast, it was engaged in no searches for any of the three asset classes in the six months before the crash.

SEI's post-crash domestic fixed-income searches also were up, although only in relative terms considering all types of searches were down. SEI had 11 domestic fixed-income searches, representing 24% of all SEI search activity. In the pre-crash period, they totaled 12, or only 19% of its searches.

SEI's international equity searches fell in relative terms to three, or 7%, of total activity, in the post-crash months, compared with five, or 8%, in the pre-crash period.

The broader non-SEI search activity, however, showed international equity searches were up in relative terms, to 36 searches, or 19% of all searches, compared with 45 searches, or 14.5%.

SEI reported its search activity for October separately. In that month, it was engaged in seven searches — three for domestic equity, one for international equity and three for real estate.

The non-SEI data show a decidedly domestic fixed-income tilt. Of the 30 non-SEI searches in October, 12 were for domestic fixed income, 14 for domestic equity, three for international equity and one for real estate.

Other data for the non-SEI searches in the post-crash period, show that nine, or 5%, were for small-cap stocks; 28, or 15%, for real estate; 46, or 25%, for domestic fixed income; and 10, or 5%, for international fixed income.

By contrast, in the six pre-crash months, the non-SEI searches data show that five searches, or 1.6%, were for small-cap; 36, or 11.7%, were for real estate; 73, or 23.6%, were for domestic fixed income; and five, or 1.6%, for international fixed income. ■

A FUNDAMENTALLY GOOD INVESTMENT WITH 3 LEGS TO STAND ON.

If there's one thing that many energy investments lack, it's more than one thing. All their eggs are in one basket, so to speak. They're either mostly exploration or mostly gas distribution or transmission.

Utah-based Questar, on the other hand, is diversified from the underground up—with operating divisions in oil and natural gas exploration and production, gas storage and transmission, and retail gas distribution through a growing public utility.

Combine that with a conservative financial structure, a strong balance sheet, and the fact that we've paid 174 dividends in a row, with 15 increases in the last 15 years, and you'll see the fundamentals of a wise investment in Questar. Call (or write) for more information.

# Performance

*Continued from page 13*

possible effects of performance fees on profitability and annual incentive pay? One answer might be the strengthening of multiyear "consistency" measures in plan designs. In order to receive top rewards, successful fund managers may more often be required to produce top-quartile investment results over rolling two- or three-year periods.

One year's results might affect the target incentive award in the next year, or alter the payout of a prior year's award that had been deferred for the purpose of employee retention. This approach would smooth out the major variances in incentive pay, avoiding both windfalls and shortfalls.

Another approach might be to accept a much greater volatility in individual awards, regardless of firm performance. Thus, a top-performing portfolio manager would receive top pay even if the firm suffers a down year. Conversely, the annual bonus of a poorly performing manager would not be cushioned by firm profitability even in an overall up year.

This sink-or-swim mentality might become pervasive if firms cannot absorb the effects of significantly reduced revenue caused by poor portfolio results directly attributable to economic events or individual performance.

To understand why investment management firms are adjusting their incentive pay systems, it's helpful to understand the common shortcomings of current incentive compensation programs for professional portfolio managers.

One shortcoming is the failure to select and use appropriate criteria for performance measurement. Selecting the appropriate comparative universe or established market index is critical to the fairness and effectiveness of any pay for performance system.

The initial selection should not be a static one. Management firms and pension sponsors must reassess the appropriateness of their competitive "yardsticks" on a regular basis.

Periodic reviews of criteria ensure that changing economic conditions and market factors, as well as competitors' strategies, are factored into the incentive pay equation. Many firms find a combination of criteria is the fairest and most accurate way to assess performance.

A second problem area is uncertainty in determining how much to pay for the desired level of performance. Most firms strive to pay their portfolio professionals at competitive levels, or even aggressively when superior levels of investment performance have been achieved.

Common sense, as well as most existing annual incentive formulas, dictates high payouts be linked to high comparative performance and that low or no payouts will result from poor comparative performance. In an era of highly volatile firm revenue and earnings, beating the competition and market indexes in the relative sense might not be enough to justify aggressive compensation.

A distinct weakness of some plans is the failure to set appropriate targets for annual incentive pay. In many cases, the key to deriving real incentive (motivational) value from a compensation scheme is the firm's ability to communicate a potential target level of award to successful portfolio managers.

It is this simple quid pro quo that represents the essential element of annual incentive pay plans for investment professionals.

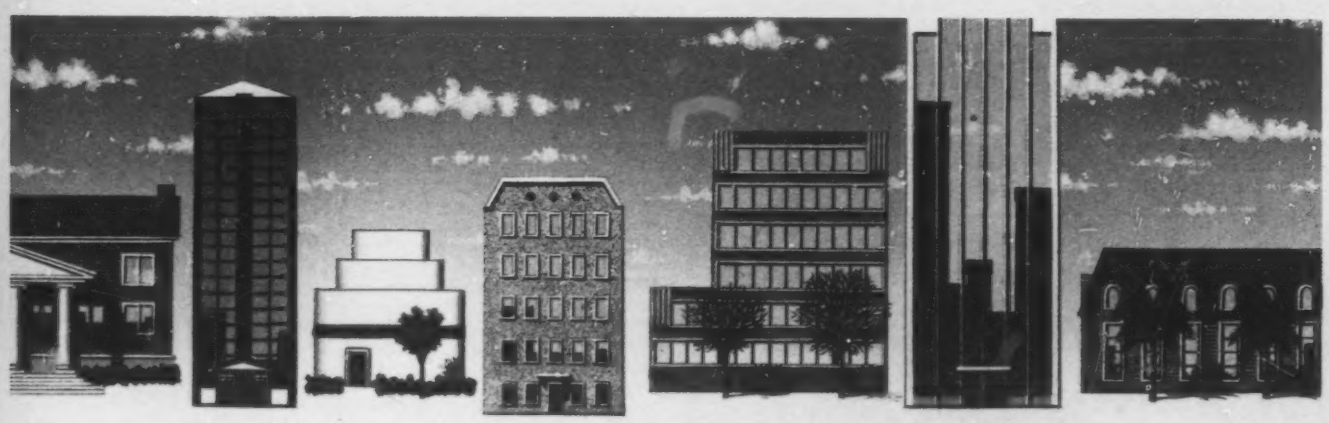
The top players need to know the rules, and what they stand to win or lose. This is what promotes energetic effort and gives added impetus to those who fulfill the responsibilities of institutional portfolio manager or corporate investment professional.

Finally, incentive pay programs often fail to support the investment and organizational strategy of the firm, both short and long term.

The internal structure and dynamics of the compensation arrangements must be consistent with the kind of individual and group behavior desired.

A plan should be designed to reinforce behavior that promotes the objectives of the firm (e.g., team play vs. star system) and to discourage non-productive behavior.

The incentive compensation issue is evolving rapidly and will be the subject of much further discussion. Firms should anticipate and address the potential effects (both positive and negative) of performance-based fees on their ability and willingness to pay, before financial circumstances limit their compensation flexibility. ■



# Your First Wachovia Master Trust Is As Individual As Your Company.

No matter what type of Master Trust your company needs, First Wachovia can offer one that's right for you.

Our service is built around one simple premise: package services based on customers' needs. Not ours. And we never lose sight of that objective.

We start with an extensive service offering. We build in the flexibility that lets your company select only what you need. Then we add an Account Manager, who's backed by the most sophisticated technology and innovative thinking in the field.

The outcome is a personalized program that meets your company's needs today, and can change to meet them in the future.

Our years of experience have made us a leader in the field. So if your company is ready to put the most advanced Master Trust service to work, call Jane Fisher at (919) 770-6348.

# Management firm spun off by Kemper

CHICAGO — Kemper Financial Services Inc. has spun off its investment management division into Kemper Asset Management Co. in order to position itself for expansion and acquisition.

The new subsidiary of the financial services company, widely known for its mutual fund and life insurance units, also will give its investment advisory services a higher public profile and enable the company to retain talented people and attract others, according to Len Spalding Jr., senior managing director of the new subsidiary.

Kemper Financial Services manages about $41 billion. Kemper Asset Management is managing the $3 billion in tax-exempt assets previously managed by Kemper Financial. Kemper Asset has about 50 clients, primarily pension funds.

Kemper's tax-exempt total is down about $1 billion from last year, because of the loss of one client, which Kemper officials would not name.

"The loss of one large client made Kemper realize that this thing won't swim by itself," Mr. Spalding said.

"We need to become known as our own entity, rather than as a part of Kemper. We also need to make people inside the Kemper organization aware of us."

"We're trying to build a base for substantial growth over the next several years," he said. "The company is interested in making it much bigger. We want to acquire other companies. We want to grow by acquisition and by managing money."

Kemper hopes to acquire companies for which it can provide strong marketing and sales abilities and through which it can develop hybrid investment products tailored to the needs of the client.

Mr. Spalding said Kemper might acquire a West Coast firm to support its clients there. ■

THE 50 LARGEST INTERNATIONAL MANAGERS

# Fixed income fuels growth

By Marlene Givant

Despite positive international equity performance and strong new flows into the asset class during the year ended March 31, international and global equities managed by the top 50 international investment advisers declined during the period.

If it were not for substantial growth in fixed-income accounts (to $9.621 billion from $6.8 billion), total international and global assets managed by the 50 advisers also would have decreased in the period.

The drop in equities to $38.235 billion from $39.009 billion puzzled industry experts but could stem from several factors, including the withdrawal from equities by some very large pension funds following Oct. 19, the loss of market share among the top 50 managers as domestic managers gained international business, and inaccuracies in figures firms reported the previous year.

After nearly doubling in the year ended March 31, 1987, U.S. tax-exempt assets in accounts with international and global mandates rose only 4.5% to $47.865 billion as of March 31, from $45.809 billion 12 months earlier, despite a flood of new money invested in 1987, according to the Money Mover Scorecard (*Pensions & Investment Age*, Feb. 8).

Assets in global accounts, which may invest in the United States, increased 8% to $9.49 billion vs. $8.762 billion a year earlier.

International accounts, which may not invest in U.S. investments, increased about 3.6% to $38.374 billion from $37.047 billion. Global accounts remain a small fraction of total equity assets but represent more than a third of fixed-income assets, up from 30.4% a year earlier.

The top four managers in last year's survey — State Street Bank and Trust Co., J.P. Morgan Investment Management Inc., Capital Guardian Trust Co. and Morgan Grenfell Investment Services Ltd. — held their standing in 1988, although assets of all the firms except State Street decreased.

The top two fixed-income managers among the top 50 — First Chicago Investment Advisors and WorldInvest Ltd. (former BA Investment Management International Ltd.) — run more bonds than equities with $1.482 billion and $1.148 billion, respectively, in fixed income.

Among all managers, Boston-based State Street for the second year led the rankings of combined global and international account assets, gaining 24% to $4.031 billion from $3.249 billion the previous period.

The gain represents a slowdown from the previous year when its assets more than doubled. Still, growth exceeded the 16.8% return of the Morgan Stanley Capital International Europe Australia Far East index, which most of State Street's accounts replicate.

The slower pace of indexing, as evidenced by State Street's growth, puzzled some observers.

"That's surprising," said Linda MacPherson, marketing manager of the WM Co., New York, noting the EAFE's good 1987 performance despite October's crash. "Maybe it's just a maturing market and people happy with the level of passive management are starting to pull back to active."

The slight drop in equities overall might have resulted from some very large funds liquidating their assets after the crash and from domestic managers starting to run international money at the expense of the top 50, she said.

Firms with less than $1 billion under management had the strongest percentage growth during the 12-month period, which is not surprising given they were building from a smaller asset base. The growth often was from new business, as some of the firms suffered badly in the stock market crash.

Julius Baer Investment Management Inc., New York, was the top gainer, with $610 million in assets — more than 2.5 times its total a year earlier. Barrie Martin, marketing director, attributed the enormous growth to good first-quarter 1988 performance and big injections from two funds — the Kansas Public Employees' Retirement System and the Illinois Municipal Retirement Fund.

Bankers Trust Investment Management Ltd., New York, whose assets rose 142% to $607 million, also had good performance and several new clients. Seven major clients were added, as the firm "initiated a dedicated global marketing and sales effort specifically for the U.S. tax-exempt market which was not in place before," according to a marketing assistant.

Brown Brothers Harriman & Co., New York, more than doubled its international and global assets to $646 million because the firm gained two large public fund accounts and because non-pension tax-exempt clients might have been omitted last year, which would have understated 1987's figures, said Paul A. Legvold, manager.

Other big gainers included SBC Portfolio Management International Inc., with a 73% increase; Posthorn Global Asset Management (formerly American Express Asset Management) with 69%; Alliance Capital Ltd. and Warburg Investment Management

# Style hard to classify

## Foreign managers defy pigeonholing

By Marlene Givant

Trying to pinpoint investment styles is not as easy in the international arena as it is in the domestic.

The fixed-income approach of Mellon-Pictet International Management Ltd., London, for example, emphasizes "getting the big picture right," according to its May 23 profile in *Pensions & Investment Age*.

The investment approach of its Pittsburgh-based sibling, Mellon Bond Associates, on the other hand, "establishes a performance benchmark for each actively managed account, followed by strict control of duration, yield, income and cash flow structure. Value is added by sector/quality spread valuation and issue selection."

The difference in the two descriptions highlights the lack of defined styles among active international managers. Foreign methods might be as disciplined and effective as domestic approaches, but many foreign managers prefer doing whatever works to being pigeonholed into one style category.

International markets also don't lend themselves as readily to style differentiation as U.S. markets. For instance, most foreign bond managers buy only high-quality government issues.

There are no signs of more defined styles catching on soon, although a number of international firms based in the United States or run by Americans — such as Grantham, Mayo, Van Otterloo & Co., Boston, and Morgan Stanley Asset Management, New York — use U.S.-type investment approaches.

Most international equity approaches are top-down in country selection and bottom-up in stock selection; there are few fixed-income approaches. For domestic investments, however, there are more than 10 general equity and about six fixed-income styles.

Ronald Boller, director-benefit finance of Owens-Illinois Inc., Toledo, Ohio, and chairman and director of Harbor Capital Advisors, the company's investment management subsidiary, said he can identify three dominant international equity styles: the use of small stocks; large-capitalization growth-oriented stocks; and large-cap value-oriented stocks. He said there are only two fixed-income styles: use and non-use of futures.

Owens-Illinois has more than 15% of its $2.3 billion in pension assets — including about $300 million from Brockway Co., a recent acquisition — in international.

"Styles really haven't developed yet; it'll come," Mr. Boller said. "When I got the job eight years ago there were only a few international managers. Now there are 80, 90 or 100. It's an embryonic industry, but it's growing very fast. With that will come more attitudes and styles."

He thinks new styles will emerge every year, encompassing "all the bells and whistles you see in this country."

Global asset allocation and quantitative approaches are coming on the scene slowly, but most managers don't think the international markets are as efficient as the U.S. market, so relying on fundamentals is the best way to yield results, said Chris Swain, investment consultant at Callan Associates, San Francisco.

"Most people I see tell me they're fundamental-oriented, active stock pickers. Some have a more defined system of developing a matrix of different factors they use to decide asset and country allocation, but breakdowns into value, growth and yield — I haven't seen (those) at all," Mr. Swain said.

Managers use a research-oriented, bottom-up process to find inefficiently priced stocks, a process they think qualifies them

### ABD International Management Corp.

10 E. 53rd St., New York, N.Y. 10022; (212) 319-5020

| | |
|---|---|
| Total assets managed | $496,800,000 |
| Non-U.S. pension assets | $131,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $359,000,000 |
| International | $343,000,000 |
| Global | $16,000,000 |
| U.S. tax-exempt clients | 4 |
| Minimum separate account | $15,000,000 |

ABD International Management Corp., a subsidiary of Dresdner Bank, Frankfurt, and Hypo-Bank, Munich, managed $343 million in international equity accounts for U.S. tax-exempt clients as of March 31.

The international equity assets were committed most heavily to the United Kingdom, 18.5%; Germany, 6.4%; France, 5.7%; Japan, 46%; and Australia, 3.9%.

As of the same date, it had $16 million in global fixed-income accounts.

The firm is equity-oriented and seeks growth stocks with an emphasis on industry rotation worldwide and within markets. It concentrates especially on the effects of currency and reducing currency risk. It works toward the goals of protecting base currency value and obtaining high returns with low risk.

Analysts or portfolio managers are in Frankfurt, New York, Tokyo, Hong Kong and Singapore.

The firm reported a $192 million net loss in U.S. institutional tax-exempt business in the year ended March 31 for international and global accounts.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1980.

William D. Rutherford, president, is chief executive officer; Julie K. Boeder is client contact.

### Alliance Capital Ltd.

43 Upper Grosvenor, London W1X 9PG, U.K.; 011-44-1-493-9606

| | |
|---|---|
| Total assets managed | $1,806,000,000 |
| Non-U.S. pension assets | $1,205,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $601,000,000 |
| International | $578,000,000 |
| Global | $23,000,000 |
| U.S. tax-exempt clients | 13 |
| Minimum separate account | $15,000,000 |

Alliance Capital Ltd., a subsidiary of Alliance Capital Management L.P., managed $578 million in international equity accounts for U.S. tax-exempt clients as of March 31.

The international equity assets were committed most heavily to the United Kingdom, 11.9%; Germany, 17.8%; Netherlands, 17.4%; Japan, 16.6%; and Canada, 12.6%.

As of the same date, it had $23 million in global equity accounts.

The global equity assets were committed most heavily to the United Kingdom, 10.4%; Germany, 10.2%; Netherlands, 8.4%; Japan, 10.3%; and the United States, 49.6%.

The firm had $140 million in commingled accounts and $140 million in mutual funds.

The firm has an active growth-oriented philosophy. Research is used to identify investment opportunity through undervalued markets, currencies, industries and economic sectors.

Analysts or portfolio managers are in New York, London and Tokyo.

The firm reported a $175 million net gain in U.S. institutional tax-exempt business in the year ended March 31 for international and global accounts.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1971.

Dave Williams is chief executive officer; client contacts are Norman Bergel and in New York Carol Zipkin at (212) 969-1044.

### American National Bank & Trust Co. of Chicago

33 N. LaSalle St., Chicago, Ill. 60690; (312) 661-5586

| | |
|---|---|
| Total assets managed | $12,000,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $11,300,000,000 |
| International | $221,000,000 |
| U.S. tax-exempt clients | 200 |

American National Bank & Trust of Chicago, a subsidiary of First Chicago Corp., managed $221 million in international equity accounts for U.S. tax-exempt clients as of March 31.

The assets were committed most heavily to the United Kingdom, 13%; Germany, 5%; France, 4%; Switzerland, 3%; and Japan, 65%.

All assets were in commingled index accounts.

The firm bases its indexed investment approach on the EAFE index.

Analysts or portfolio managers are in Chicago.

The firm reported a $200 million net gain in U.S. institutional tax-exempt business in the year ended March 31 for international accounts.

The firm has non-U.S. currency hedging capability.

John R. Tilton is chief executive officer; Ken Sobolewski is client contact.

### Julius Baer Investment Management Inc.

330 Madison Ave., New York, N.Y. 10017; (212) 949-9055

| | |
|---|---|
| Total assets managed | $610,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $610,000,000 |
| International | $496,000,000 |
| Global | $114,000,000 |
| U.S. tax-exempt clients | 14 |
| Minimum separate account | $10,000,000 |

Julius Baer Investment Management Inc., a subsidiary of Bank Julius Baer & Co. Ltd., Zurich, managed $31 million in international equity and $465 million in international fixed-income accounts for U.S. tax-exempt clients as of March 31.

The international equity assets were committed most heavily to the United Kingdom, 15%; France, 7%; Switzerland, 10%; Netherlands, 7%; and Japan, 48%.

As of the same date, it had $114 million in global fixed-income accounts.

The firm had $100 million in mutual funds.

The firm uses very active currency allocation, emphasizing strong stable countries and highly liquid, high-quality securities. Short- to medium-range securities are used.

Analysts or portfolio managers are in London and Zurich.

The firm reported a $250 million net gain in U.S. institutional tax-exempt business in the year ended March 31 for international and global accounts.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1983.

Peter Widmer is chief executive officer; Jay Dimberger is client contact.

### Bankers Trust Investment Management Ltd.

280 Park Ave., New York, N.Y. 10015; (212) 850-2082

| | |
|---|---|
| Total assets managed | $67,010,000,000 |
| Non-U.S. pension assets | $6,063,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $60,947,000,000 |
| International | $460,000,000 |
| Global | $147,000,000 |
| U.S. tax-exempt clients | 340 |
| Minimum separate account | $10,000,000 |

Bankers Trust Investment Management Ltd., a subsidiary of Bankers Trust Co., managed $313 million in international equity and $147 million in international fixed-income accounts for U.S. tax-exempt clients as of March 31.

The equity assets were committed most heavily to the United Kingdom, 18%; Germany, 8%; France, 5%; Japan, 44%; and Canada, 4%.

As of the same date, it had $147 million in global fixed-income accounts.

The firm had $313 million in commingled accounts and $149 million in index funds.

OOPS.

How not to take a bath when investing overseas.

Overseas investments.
Either your ship comes in.
Or it's man the lifeboats.

One way to help avoid the treacherous waters of international investing is to be sure your Master Trustee utilizes the worldwide global custody experience and expertise of Mitsubishi Bank of California.

MBC is one of the world's largest global custodians and part of the world's fourth-largest bank with over $210 billion in assets. Its Trust Services Division has been selected to watch over $8 billion of international assets for a large, distinguished roster of customers. Including ten of the United States' 30 largest Master Trust banks.

For good reasons. Amongst them: a multimillion dollar computer system dedicated to supporting trust services; a worldwide network of agent banks; superbly-trained international staff; customized reporting; a geographic location which permits dealing with London and Tokyo within the same business day; and an exclusive policy of working only with Master Trustee banks.

Call Gearey Johnstone at (213) 621-1305 for more information on how the Mitsubishi Bank of California can work with your bank to assure smooth sailing and safe passage for your international portfolios.

The best kept secret in global custody.

# Partners debate fees

By Nancy White Norkus

Developers and investors are haggling over fees in joint ventures, with payments as a percentage of construction dollars averaging 5% to 6% plus leasing and property management fees.

The variation in fee payments project cost differences and industry clout. Big investors spend billions of dollars annually developing real estate but pay next to nothing for developer input.

For example, Aetna Realty Investors Inc., Hartford, Conn., pays construction cost "plus 1% to 2% as long as executive salaries and other miscellaneous fees are excluded," said James Richmond Jr., president. The goal of fee negotiation "is to get to the costs — how many people were involved and for how long," he said.

"We'll cover the developer's out-of-pocket costs, but not much more, since they are also earning ownership interest in the property and will share in its returns. Actual development is not supposed to be a profit maker," Mr. Richmond said.

Those with fewer dollars to spend, however, will pay more for developer expertise.

Differences in design can also skew developer costs. "With office space or hotels the fee tends to be lower — 2% to 3% — because of pattern repetition." Retail projects "might run 5% to 6% or higher because no two design elements are the same," said Jay A. Rosenfeld, executive vice president of Indianapolis' Melvin Simon & Associates.

"Sometimes contracts are worded to make a fee sound low, but in actual dollars, the amount is high," cautioned Edward P. Griffin, president of the financial services group, The Koll Co., Newport Beach, Calif.

"Sometimes management and leasing fees are included, sometimes they're not. It depends upon the developer," he said. In "the wonderful world of bidding," actual costs can be buried within contractual jargon, and variation is often the result of project size and market positioning."

The fee is "purely a condition of the strength from which you deal," such as the developer's position in the market and its financial health, said Stewart H. Buckle III, vice president of Norfolk, Va.-based Goodman Segar Hogan, a developer.

"The bigger players can do most of the projects on their own, while smaller firms lack the capital to operate without financial backup" and are less well-rewarded.

One small developer, Rosen Associates, Jericho, N.Y., charges 5% to 6% for big projects, and 10% to 12% for $2 million to $25 million deals.

Big players in real estate investing also profit through magnitude, cutting better deals with developers than can some smaller investors.

Both sides of a joint venture have "a gut need to receive compensation for their services. These include developer expertise, and, on the other side, cash or multinational prestige," noted Leonard I. Korman, partner, The Korman Co., a developer in Trevose, Pa.

Koll's Mr. Griffin said his firm's fees are higher — 3% to 6% — because payment must cover both hard costs (mainly construction) and soft costs (such as architectural work and interest payments on the land).

Confusion over fees often is caused by contractual provisions or exclusions.

Joint venture fees at The Nichols Co., Voorhees, N.J., are "in the 5% range," but include property management and leasing expenses, said Peter Corcoran, project manager.

Such expenses are excluded from many developer's joint venture fees and are negotiated separately, based on the going market rate said Koll's Mr. Griffin. ■

## Developer fees in joint ventures

| | Square feet developed (per year) | Specialty | Fees* (%) |
|---|---|---|---|
| American Continental Properties New York | 1,500,000+ | Retail/ hotel | 0-3 |
| Goodman Segar Hogan Norfolk, Va. | 150,000+ | Retail | 3-5 |
| The Hahn Co. San Diego | 2,000,000+ | Retail | 3-6 |
| The Koll Co. Newport Beach, Calif. | 2,500,000+ | Office/ industrial | 3-6 |
| The Korman Co. Trevose, Pa. | 250,000+ | Mixed use | 4-6 |
| The Nichols Co. Voorhees, N.J. | 2,000,000+ | Office/ warehouse | 4-5 |
| Rosen Associates Jericho, N.Y. | 500,000-1,000,000 | Retail/ mixed use | 10-12** 5-6 |
| Melvin Simon & Associates Indianapolis | 4,500,000+ | Retail/ mixed use | 5-6 |
| The Zaremba Center Point Co. Lakewood, Ohio | 800,000+ | Community retail | 3-6 |

* Fees are a percentage of "hard dollar" construction costs
** 10%-12% for under $25 million; otherwise, 5%-6%

# Ad campaign spells defeat for initiative

Voters in Orange County, Calif., defeated a slow-growth initiative earlier this month that was attacked through a $2 million advertising campaign.

Measure A would have required developers to provide improved traffic flow, fire protection, police protection and park services in unincorporated areas of the county they developed.

Supporters, who had only $48,000 to spend on advertising, blamed their defeat on opponent's heavy use of television commercials, largely funded by development and construction companies.

The measure was defeated by about 53,000 votes.

Had the initiative passed, both sides expected it would spark the introduction of similar measures nationwide. Another slow-growth initiative was defeated in Pasadena, but one was approved in San Clemente. ■

The firm offers active and passive international equity approaches. The active approach uses macroeconomic analysis to select investments in countries, sectors and companies that can sustain above-average relative growth. Its global fixed-income approach employs active currency management and limited portfolio duration, active sector selection and value swapping. Its short-term fixed-income approach uses active currency and issue selection.

Analysts or portfolio managers are in New York, London, Tokyo, Zurich and Sydney.

The firm reported a $62 million net gain in U.S. institutional tax-exempt business for international and global accounts in the year ended March 31.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1982.

Jonathan F. Lubran is chief executive officer; Lynne S. Minard is client contact.

### Baring International Investment

9 Bishopsgate, London EC2N 3AQ, U.K.; 011-44-1-623-5264

| | |
|---|---|
| Total assets managed | $2,060,000,000 |
| Non-U.S. pension assets | $158,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $1,902,000,000 |
| International | $1,902,000,000 |
| U.S. tax-exempt clients | 26 |
| Minimum separate account | $10,000,000 |

Baring International Investment, a subsidiary of Baring International Management, managed $1.492 billion in international equity and $410 million in international fixed-income accounts for U.S. tax-exempt clients as of March 31.

The international equity assets were committed most heavily to the United Kingdom, 15%; Germany, 8%; France, 4%; Switzerland, 5%; and Japan, 39%.

The firm had $176 million in commingled accounts and $116 million in index funds.

The firm places particular emphasis on country selection and weighting from a top-down perspective. Stock selection is based on company fundamentals in local market contexts. Changes in the rate of profit growth are important to the strategy.

Analysts or portfolio managers are in London, Tokyo, Hong Kong, Seoul and Sydney.

The firm reported a $252 million net gain in U.S. institutional tax-exempt business in the year ended March 31 for international accounts.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1980.

Peter S. Hartley, managing director, is chief executive officer; John F. McNamara is client contact at (617) 357-9074.

### Batterymarch Financial Management

600 Atlantic Ave., Boston, Mass. 02210; (617) 973-9300

| | |
|---|---|
| Total assets managed | $8,051,000,000 |
| Non-U.S. pension assets | $44,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $7,180,000,000 |
| International | $1,016,000,000 |
| Global | $944,000,000 |
| U.S. tax-exempt clients | 77 |
| Minimum separate account | $10,000,000 |

Batterymarch Financial Management managed $1.016 billion in international equity accounts for U.S. tax-exempt clients as of March 31.

The assets were committed most heavily to the United Kingdom, 17%; Germany, 13%; France, 11%; Japan, 25%; and Canada, 14%.

As of the same date, it had $944 in global equity accounts, committed most heavily to the United Kingdom, 5%; Germany, 5%; Japan, 11%; Canada, 4%; and the United States, 60%.

The firm had $628 million in commingled accounts and $519 million in mutual funds.

The firm uses global corporate valuation models, applying its contrarian, value-oriented philosophy using a disciplined, efficient, automated investment process. Primary emphasis is placed on the systematic identification of undervalued stocks to capture stocks that are inefficiently priced by the market.

Analysts or portfolio managers are in Boston.

The firm reported a $599 million net gain in U.S. institutional tax-exempt business in the year ended March 31 for international and global accounts.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1969.

Dean LeBaron, trustee, is chief executive officer; Susan Weiner, trustee, is client contact.

### The Bessemer Group Inc.

630 Fifth Ave., New York, N.Y. 10111; (212) 708-9296

| | |
|---|---|
| Total assets managed* | $5,300,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $636,000,000 |
| International | $190,000,000 |
| U.S. tax-exempt clients | 75 |
| Minimum separate account | $5,000,000 |

*Total figure only is as of Dec. 31, 1987

The Bessemer Group Inc. invested $190 million in international equity accounts for U.S. tax-exempt clients as of March 31.

The assets were committed most heavily to Japan, 39%; the United Kingdom, 17%; Spain, 8%; Switzerland, 5%; and France, 4%.

The firm uses a top-down orientation with a focus on macroeconomic analysis, control of currency exposure and analysis of emerging economies, technologies and companies. Active management of sectors and geographic commitments are its principal focus.

Analysts or portfolio managers are in London and New York.

The firm has non-U.S. currency hedging capability.

John R. Whitmore is chief executive officer; Jane N. Abitanta is client contact.

| International | $320,000,000 |
| U.S. tax-exempt clients | 9 |
| Minimum separate account | $10,000,000 |

Arnhold & S. Bleichroeder International managed $320 million in international equity accounts for U.S. tax-exempt clients as of March 31.

The assets were committed most heavily to the United Kingdom, 32%; France, 6%; Denmark, 5%; Australia, 17%; and Hong Kong, 10%.

Securities, not countries, are emphasized in the investment approach. The firm evaluates the fundamental criteria of a company and compares absolute and relative price-earnings and price-cash flow. It targets a 50% rate of return for each 30-stock portfolio over a 12- to 24-month time hori-

# OUR VIEW OF INVESTING OUTSIDE AMERICA

Following the period of retrenchment in the wake of the October crash, fund managers in America are once again looking overseas. But performance in the different markets has not been uniform in either equities or bonds. With the help of James Capel, a global investment house with close to 200 analysts covering 5000 companies on 25 stock markets around the world, institutional investors have more access to more international opportunities than ever before. The benefits associated with diversifying investments internationally are familiar to the experienced fund managers. Risk is spread and as the selection of stocks is increased, so too are the opportunities.

To make the most of these opportunities requires discipline, experience and the ability to interpret the implications of currency, macro-economic influences and market sentiment. Analysts must have the support of colleagues in different markets, across different time zones, in order to provide a perspective on their own specialty. Whether investing in a major market like Tokyo or an emerging market like Manila, the analyst advising you, or the salesman executing your instructions should not be working in isolation.

Our reputation is well established among the more sophisticated investors based in the United States and James Capel is not new in the international investment community. Nor are we a minor player. We were established over two hundred years ago and now have the largest market share of the institutional broking business in London. Our analysts have consistently topped surveys undertaken by the Institutional Investor magazine, Extel, the financial information service, The Association of Corporate Treasurers in London, The Sunday Times/MORI poll, Taylor Nelson, the market research firm, and many others. We are primary dealers in the UK gilt market, major participants in the Eurobond market, associated with the US Treasury experts CM&M and world leaders in many specialist services such as portfolio trading.

Corporate Finance is becoming an increasingly important part of the business and our clients are benefitting from our own global network of offices. It puts us in twenty one cities on four continents. We are also members of the HongkongBank Group.

So when it comes time to place some of your investments outside America, use the investment house which can offer you experience, expertise and execution. Talk to Peter Green at James Capel.

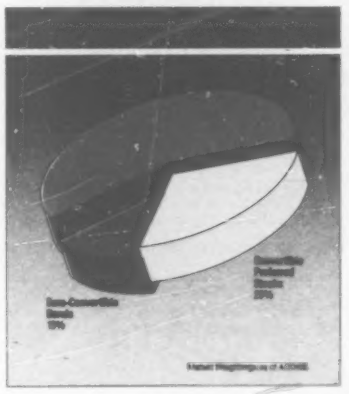
*Merrill Lynch Capital Markets has long been a leader in developing and delivering market indices. Now we've created two new ones.*



*Introducing the Merrill Lynch Global Bond Index and the Merrill Lynch Convertible Securities Index.*

*The Global Bond Index encompasses government and non-government issues in eleven currencies. The Convertible Securities Index encompasses domestic and Euro-convertible issues.*

*Even more important, with our custom index model you can create indices that meet specialized investment objectives. A tailored benchmark adds flexibility to the difficult business of evaluating investment strategies. And only with Merrill Lynch Capital Markets are results available on-line–making it possible for you to closely monitor your custom index. Our Structured*

analyses form the basis for country weightings of model portfolios. Stock selection emphasizes favorable balance sheets, low p/e ratios, profitability and earnings growth. The fixed-income approach centers on analyzing and forecasting currency and interest rate trends. Currency and interest rate scenarios are weighted against each other; those markets offering the greatest potential for gain from both factors are given the highest weighting.

Analysts or portfolio managers are in Frankfurt/Main, Dusseldorf, Geneva, Zurich, New York, London, Tokyo and Melbourne.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1984.

Rudolf Heinz, managing director and chief investment officer, is chief executive officer; Michael Tintelnot, general manager and vice president, is client contact.

### Chase Investors International

Woolgate House, Coleman Street, London EC2P 2HD U.K.: 011-44-1-726-3364

| | |
|---|---|
| Total assets managed | $2,200,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $250,000,000 |
| International | $250,000,000 |
| U.S. tax-exempt clients | 10 |
| Minimum separate account | $10,000,000 |

Chase Investors International, a subsidiary of Chase Investors Management Corp., managed $200 million in international equity and $50 million in international fixed-income accounts for U.S. tax-exempt clients as of March 31.

The equity assets were committed most heavily to the United Kingom, 13%; Germany, 7%; Switzerland, 9%; Netherlands, 6%; and Japan, 37%.

The firm had $250 million in commingled accounts.

Its investment approach is based on economic forecasting. Detailed analysis of major macroeconomic variables determines the outlook for currencies and markets on a rolling time horizon. The portfolios are characterized by separating the asset and currency decision within each market; differing exposures are reconciled by the use of forward foreign exchange contracts.

Analysts or portfolio managers are in New York, London and Tokyo.

The firm reported a $20 million net gain in U.S. institutional tax-exempt business in the year ended March 31 for international accounts.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1972.

J. Richard Zecher is chief executive officer; Gail K. Campbell is client contact.

### Fiduciary Trust Co. International

2 World Trade Center, New York, N.Y. 10048; (212) 466-4100

| | |
|---|---|
| Total assets managed* | $9,352,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $6,050,000,000 |
| International | $116,000,000 |
| Global | $444,000,000 |
| U.S. tax-exempt clients | 183 |
| Minimum separate account | $10,000,000 |

*as of Dec. 31, 1987

Fiduciary Trust Co. International managed $91 million in international equity and $25 million in international fixed-income accounts for U.S. tax-exempt clients as of Dec. 31.

The equity assets were committed most heavily to the United Kingdom, 27%; Europe, 14%; Japan, 45%; and Far East, 8%.

As of the same date, it had $444 million in global fixed-income accounts.

The firm had $90 million in commingled accounts and $76 million in mutual funds.

Its investment approach emphasizes stock selection within a macroeconomic framework. The active style produces concentrated portfolios in stocks and markets. Country allocations vary from EAFE weightings according to the firm's market assessment. Currency and market diversification are used to reduce risk. Long-term hedging may be used.

Analysts or portfolio managers are in New York, London, Geneva and Los Angeles.

The firm reported a $33 million net gain in U.S. institutional tax-exempt business in the year ended Dec. 31 for international and global accounts.

The firm has non-U.S. currency hedging capability.

Lawrence S. Huntington is chief executive officer; George Mullin and Belinda Gibbs are client contacts.

### First Chicago Investment Advisors

3 First National Plaza, Chicago, Ill. 60670; (312) 732-6474

| | |
|---|---|
| Total assets managed | $9,768,000,000 |
| Non-U.S. pension assets | $85,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $9,458,000,000 |
| International | $2,198,000,000 |
| Global | $116,000,000 |
| U.S. tax-exempt clients | 79 |
| Minimum separate account | $10,000,000 |

First Chicago Investment Advisors, a subsidiary of First Chicago Corp., managed $828 million in international equity and $1.37 billion in international fixed-income accounts for U.S. tax-exempt clients as of March 31.

The international equity assets were committed most heavily to the United Kingdom, 16%; Germany, 11%; France, 5%; Japan, 35%; and Canada, 8%.

As of the same date, it had $4 million in global equity and $112 million in global fixed-income accounts.

The global equity assets were committed most heavily to the United Kingdom, 9%; Germany, 6%; Japan, 21%; Canada, 5%; and the United States, 36%.

The firm had $632 million in commingled accounts.

The firm actively manages core international equity and fixed-income portfolios. It uses internally developed valuation models, risk systems and other quantitative techniques in a structured decision process. The equity approach is value-oriented and identifies mispriced markets and securities. Fixed income is treated as a separate asset class, with interest rate and currency forecasts integrated into strategic forecasts.

Analysts or portfolio managers are in Chicago, Tokyo and London.

The firm reported a $108 million net gain in U.S. institutional tax-exempt business in the year ended March 31 for international and global accounts.

The firm has non-U.S. currency hedging capability.

Gary P. Brinson, president and chief investment officer, is chief executive officer; Rodney G.D. Smith, vice president and international product manager, is client contact.

At Babson-Stewart Ivory, we provide international investment management services for a broad range of institutions and individual clients. And as different as these clients may be, they have one thing in common: a desire to maximize investment return on an international basis.

When you consider that more than 65% of the market capitalization of all publicly traded companies in the free world is represented by companies *outside* the United States, it's clear where an abundance of investment opportunities lies.

Babson-Stewart Ivory can make all the difference in the world. Our staff on both sides of the Atlantic has the kind of experience you look for in an investment manager.

In Edinburgh, our professional staff and its predecessors have been investing in foreign markets for over 100 years. The result: our investment experience – in Continental Europe, Asia, Australia, Canada and, of course, Great Britain – is second to none.

In Boston, our staff members have been managing client portfolios for close to five decades.

What all this adds up to is an international investment manager who can provide you with *direct links* to every major market in the world. An international investment manager who can make timely decisions in any time zone.

Where in the world, then, should you look for a good investment? Babson-Stewart Ivory International.

For more information about what we can do for you, call Martin Begien, Managing Director, at (617) 225-3800. Or write: Babson-Stewart Ivory International, One Memorial Drive, Cambridge, MA 02142.

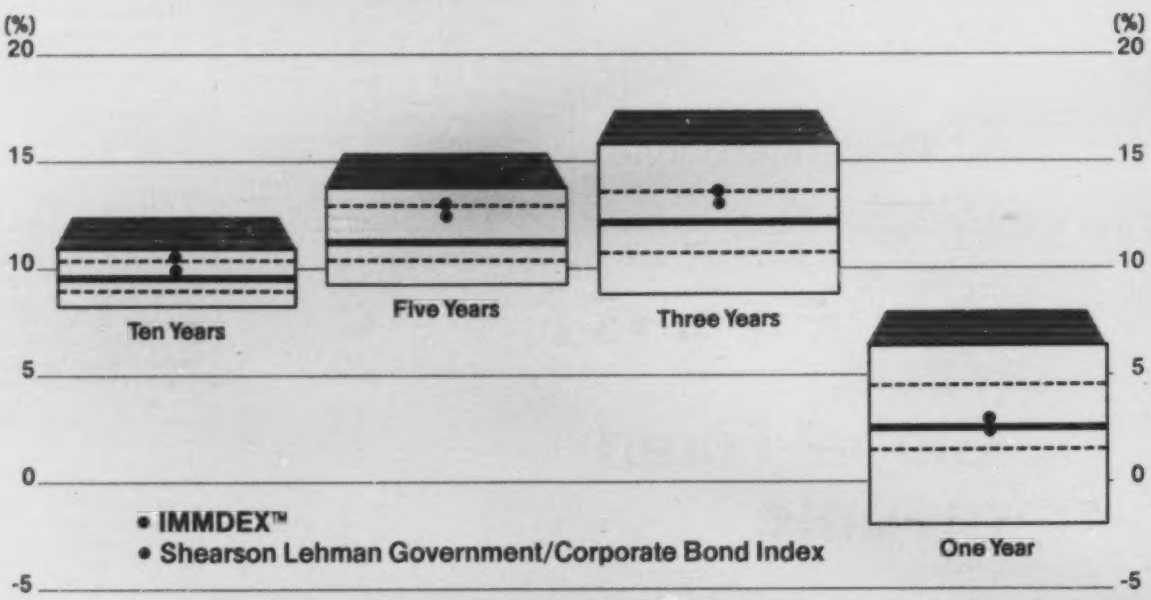
# Bond Indexation with the IMMDEX™ advantage.



Bond fund total rates of return for periods ended December 31, 1987. Source SEI.

The Shearson Lehman Government/Corporate Bond Index has provided superior performance when compared to active fixed income managers. The Index has consistently provided first or strong second quartile returns over most time periods.

Immdex is a unique bond management system in which the annual return will **match** or **exceed** the index rate of return. On the basis of actual experience, **IMMDEX has added an average of 65 basis points of excess annual return to the Shearson Lehman Government/ Corporate Bond Index.**

Immdex accomplishes this objective through two strategies:

- The index rate of return is achieved through a proprietary duration-matching strategy.
- Immdex capitalizes on market opportunities to further enhance total return.

First Wisconsin Trust Company is a leader in the area of quantitative fixed income management and we believe that the Immdex advantage will prove to be an attractive alternative to your current bond management approach.

Let us review how Immdex provides positive tracking to the Shearson Lehman Government/ Corporate Bond Index and enhanced market returns through the use of bond management techniques. Call Robert Aubrecht at (414) 765-4906 or Charles Groeschell at (414) 765-4789 or write First Wisconsin Trust Company, First Wisconsin Center, Box 2054, Milwaukee, Wisconsin 53201.

| Minimum separate account | $10,000,000 |

N.M. Rothschild International Asset Management Ltd., a subsidiary of N.M. Rothschild Asset Management (Holdings) Ltd., managed $536 million in international equity and $626 million in international fixed-income accounts for U.S. tax-exempt clients as of March 31.

The equity assets were committed most heavily to the United Kingdom, 19%; Germany, 6%; France, 4%; Japan, 38%; and Canada, 5%.

As of the same date, it had $59 million in global equity accounts, committed most heavily to the United Kingdom, 12%; Germany, 4%; Japan, 25%; Canada, 5%; and the United States, 32%.

The firm is an active top-down asset allocator. Through a process of fundamental economic analysis, assets are concentrated in markets expected to outperform. Currency allocation is decided separately and currency hedging is used extensively.

Analysts or portfolio managers are in London, Tokyo, Hong Kong, Sydney, Melbourne, Paris and Zurich.

The firm reported a $120 million net gain in U.S. institutional tax-exempt business for international and global accounts in the year ended March 31.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1980.

Richard Katz is chief executive officer; Peter Flynn is the client contact in New York at (212) 757-6000.

**Global Fixed Income**

Lower risk. Reduced standard deviation. Higher incremental return. CMI's global fixed income component.

It's a matter of interest.

## Frank Russell Trust Co.

1201 Pacific Ave., Tacoma, Wash. 98402; (206) 272-4097

| | |
|---|---|
| Total assets managed | $3,400,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $3,400,000,000 |
| International | $349,000,000 |
| U.S. tax-exempt clients | 170 |
| Minimum separate account | $5,000,000 |

Frank Russell Trust Co., a subsidiary of Frank Russell Co., managed $349 million in commingled international equity accounts for U.S. tax-exempt clients as of March 31.

The assets were committed most heavily to the United Kingdom, 17%; Germany, 7%; Netherlands, 5%; Australia, 6%; Japan, 35%; and Hong Kong, 5%.

The firm uses a multimanager approach, diversifying by manager style. It offers three international funds using seven advisers. Because it does not directly manage the assets, its figures are not included in the survey's aggregate data.

The firm reported a $25 million net gain in U.S. institutional tax-exempt business for international accounts in the year ended March 31.

Paul R. Kaltinick is president and chief executive officer; Virginia P. Sirusas, senior vice president, is client contact at (212) 486-7744.

## SBC Portfolio Management International Inc.

1 World Trade Center Suite 9051, New York, N.Y. 10048; (212) 938-7465

| | |
|---|---|
| Total assets managed | $400,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $251,000,000 |
| International | $236,000,000 |
| Global | $13,000,000 |
| U.S. tax-exempt clients | 14 |
| Minimum separate account | $5,000,000 |

SBC Portfolio Management International Inc., a subsidiary of Swiss Bank Corp., managed $205 million in international equity and $31 million in international fixed-income accounts for U.S. tax-exempt clients as of March 31.

The equity assets were committed most heavily to the United Kingdom, 8%; Germany, 7%; Switzerland, 6%, Netherlands, 5%; and Japan, 38%.

As of the same date, it had $13 million in global equity accounts, committed most heavily to the United Kingdom, 5%; Germany, 4%; Switzerland, 3%; Japan, 20%; and the United States, 35%.

The firm structures its top-down philosophy, process and allocation of resources with an emphasis on country selection. Strong bets against the EAFE index are protected by aggressive currency hedging where appropriate. Stock selection uses value screens and favors small-capitalization stocks where market liquidity permits.

Analysts or portfolio managers are in the United States, United Kingdom, Switzerland, Japan, Hong Kong, Singapore and Australia.

The firm reported a $135 million net gain in U.S. institutional tax-exempt business in the year ended March 31 for international and global accounts.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1982.

Peter J. Morant is chief executive officer; John W. Conlin is client contact.

## Schroder Capital Management International

787 Seventh Ave., New York, N.Y. 10019; (212) 841-3830

| | |
|---|---|
| Total assets managed | $2,200,000,000 |
| Non-U.S. pension assets | $300,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $1,736,000,000 |
| International | $1,600,000,000 |
| Global | $136,000,000 |
| U.S. tax-exempt clients | 34 |
| Minimum separate account | $15,000,000 |

Schroder Capital Management International, a subsidiary of Schroders PLC, invested $1.6 billion in international equity accounts for U.S. tax-exempt clients as of March 31.

The assets were committed most heavily to the United Kingdom, 14%; Germany, 6%; France, 5%; Switzerland, 8%; and Japan, 46%.

As of the same date, it had $136 million in global equity, committed most heavily to the United Kingdom, 8%; Switzerland, 8%; Netherlands, 6%; Japan, 22%; and the United States, 31%.

The firm had $60 million in commingled accounts and $614 million in mutual funds.

Its investment process begins with

country allocation, emphasizing stock selection in the countries with the best economic prospects, based on two-year economic projections. After country guidelines are established, an active, aggressive approach to stock selection is employed, focusing on emerging growth stocks as the core of the portfolio.

Analysts or portfolio managers are in London, New York, Tokyo, Hong Kong, Singapore, Zurich and Sydney.

The firm reported a net gain of $330 million in institutional tax-exempt business for international and global accounts in the year ended March 31.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1979.

David M. Salisbury is chief executive officer; Sharon L. Haugh is client contact.

### Walter Scott International

626 Wilshire Blvd., Suite 410, Los Angeles, Calif. 90017; (213) 623-2800

| | |
|---|---|
| Total assets managed | $237,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $237,000,000 |
| International | $217,000,000 |
| Global | $20,000,000 |
| U.S. tax-exempt clients | 5 |
| Minimum separate account | $10,000,000 |

Walter Scott International, a subsidiary of Walter Scott & Partners, managed $217 million in international equity accounts for U.S. tax-exempt clients as of March 31.

The assets were committed most heavily to the United Kingdom, 9%; France, 4%; Netherlands, 6%; Japan, 64%; and Hong Kong, 11%.

As of the same date, it had $20 million in global equity accounts, committed most heavily to the United Kingdom, 4%; Sweden, 2%; Japan, 24%; Hong Kong, 8%; and the United States, 58%.

The firm had $45 million in commingled accounts.

The firm's objective is to provide a 6% real rate of return. Portfolios are structured by identifying the top quartile of world growth sectors and owning companies with internal growth rates of more than 20%. Geographic allocation is a result of the identification process.

Analysts or portfolio managers are in Edinburgh.

The firm reported a $50 million net gain in U.S. institutional tax-exempt business in the year ended March 31 for international and global accounts.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1985.

Walter G. Scott is chief executive officer; Richard Miller is client contact.

### Scudder, Stevens & Clark

345 Park Ave., New York, N.Y. 10154; (212) 326-6200

| | |
|---|---|
| Total assets managed | $38,435,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $11,052,000,000 |
| International | $492,000,000 |
| Global | $73,000,000 |
| U.S. tax-exempt clients | 625 |
| Minimum separate account | $10,000,000 |

Scudder, Stevens & Clark managed $492 million in international equity accounts for U.S. tax-exempt clients as of March 31.

# KfW 1987
# Well Prepared for further Growth

In 1987 KfW succeeded once more in reaching its goal for the year and at the same time strengthened its potential for future development. Domestic investment loans were concentrated in two areas: small and medium-sized enterprises (DM 5.0 billion) and environmental protection (DM 2.1 billion). German exporters benefited from total credits of DM 3.2 billion. Development assistance funds appropriated by the Federal Government (DM 2.7 billion) were mainly used to finance projects in Africa and Asia, including for the first time structural aid to improve the macro-economic framework.

In the coming years KfW will see a considerable increase in domestic investment loans – not least as a result of the DM 21 billion financial programme for local authorities and small and medium-sized enterprises launched recently by the Federal Government.

A copy of KfW's 1987 Annual Report is available upon request.

KfW Kreditanstalt für Wiederaufbau

P. O. Box 111141
D-6000 Frankfurt am Main 1
Federal Republic of Germany

heavily to the United Kingdom, 17%; Germany, 8%; France, 5%; Switzerland, 4%; and Japan, 52%.

As of the same date, it had $121 million in global equity accounts, committed most heavily to the United Kingdom, 9%; Germany, 3%; France, 2%; Japan, 45%; and the United States, 33%.

All international and global assets were in commingled index funds.

The firm's international index funds are designed to replicate the performance of the world's capital markets. It has the capability to accurately replicate the EAFE, the Goldman Sachs FTA Europe & Pacific, the Salomon Russell PMI Europe-Pacific Composite and the Salomon Brothers World Government bond index.

Analysts or portfolio managers are stationed in San Francisco.

The firm reported a $291 million net gain in U.S. institutional tax-exempt business in the year ended March 31.

The firm has non-U.S. currency hedging capability and has been registered with the SEC since 1985.

Frederick L.A. Grauer, chairman, is chief executive officer; Michael L. Henman, senior vice president, is client contact.

### Wertheim-Philippe International

230 Park Ave., New York, N.Y. 10169; (212) 370-6140

| | |
|---|---|
| Total assets managed | $601,000,000 |
| Non-U.S. pension assets | $452,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $171,000,000 |
| Global | $171,000,000 |
| U.S. tax-exempt clients | 3 |
| Minimum separate account | $10,000,000 |

Wertheim-Philippe International, a joint venture between Wertheim Asset Management Services Inc. and the Philippe Group, managed $171 million in global equity accounts for U.S. tax-exempt clients as of March 31.

The assets were committed most heavily to the United Kingdom, 15%; Germany, 10%; France, 11%; Japan, 21%; and the United States, 14%.

The investment style incorporates both top-down and bottom-up methodologies. Equal weight is placed on country, sector and stock decisions. It is active in country and sector decisions and moderate in use of cash equivalents. Portfolios are diversified with approximately 100 securities. Generally, one-third of the holdings are in smaller-cap issues and 30% to 40% are not in the representative indexes.

Analysts or portfolio managers are in New York, Paris and Luxembourg.

The firm reported a $28 million net gain in U.S. institutional tax-exempt business for global accounts in the year ended March 31.

The firm has been registered with the SEC since 1982.

Beatrice Philippe, managing director, is chief executive officer; Steven W. Golann is client contact.

### WorldInvest Ltd.

55-56 Russell Square, London WC1B 4HP U.K.; 011-44-1-637-3322

| | |
|---|---|
| Total assets managed | $2,354,000,000 |
| Non-U.S. pension assets | $148,000,000 |
| U.S. tax-exempt assets managed: | |
| Total | $1,424,000,000 |
| International | $689,000,000 |
| Global | $735,000,000 |
| U.S. tax-exempt clients | 20 |
| Minimum separate account | $10,000,000 |

WorldInvest Ltd., a subsidiary of WorldInvest (Holdings) Ltd., managed $172 million in international equity and $517 million in international fixed-income accounts for U.S. tax-exempt clients as of March 31.

The equity assets were committed most heavily to the United Kingdom, 25%; France, 11%; Spain, 26%; Netherlands, 6%; and Hong Kong, 6%.

As of the same date, it had $104 million in global equity and $631 million in global fixed-income accounts.

The global equity assets were committed most heavily to the United Kingdom, 19%; France, 7%; Spain, 18%; Hong Kong, 7%; and the United States, 28%.

The firm had $98 million in commingled accounts.

The firm follows a three-step process. Objectives and risk/return parameters are mutually agreed upon. It practices active, discretionary management, with a top-down, disciplined team approach. Consensus expectations, reflected in market valuations, are assessed and compared to in-house analysis, with prospective risk/return profiles developed from alternative scenarios. Its global strategy uses common assumptions for fixed and equity that are collectively agreed upon and implemented. Sector and market currency decisions are assessed separately.

Analysts or portfolio managers are in London.

The firm reported a $330 million net gain in U.S. institutional tax-exempt business for global and international accounts in the year ended March 31.

The firm has non-U.S. currency hedging capability and is registered with the SEC.

Keith Brown, chairman, is chief executive officer; Francois Dennery, director, is client contact at (212) 755-0900.

# Who did Helene Curtis turn to for styling their Master Trust?

HELENE CURTIS

For this fast-growing national and international provider of hair and personal care products, managing a myriad of financial operations was something they did themselves—singlehandedly.

Until, that is, they learned how the team at Harris Bank could lend a helping hand; adapting to Helene Curtis' style and becoming a seamless extension of their management team.

Now, the Harris produces benefit payments, stock distributions, and profit-sharing loans, as well as providing valuable information on the investments in the company's profit-sharing and ESOP plans. It not only makes good, cost-efficient business sense in the short term, it allows Helene Curtis to concentrate on global expansion of their successful Suave,® Finesse® and other brands.

Why not see if personal care from the Harris team can smooth out the snarls in your financial operations with a more manageable Master Trust plan.

Call our Marketing Representative at (312) 461-7956.

# Swiss ID regulation causes furor

By John Parry

GENEVA, Switzerland — A new law requiring fiduciary companies to identify their clients to the government is causing an uproar among the secretive Swiss.

The law, effective July 1, requires fiduciaries buying stocks or opening bank accounts to disclose for whom they are acting. Previously, the fiduciary simply had to say it was acting on a customer's behalf.

Executives at Swiss fiduciary companies believe the government has been strong-armed by the U.S. Securities and Exchange Commission, which pushed for the law as part of its efforts to collect information on insider-trading activities.

Swiss bankers insist the law will not mean an end to Switzerland's system of numbered bank accounts. But it is designed to prevent investors from taking unfair advantage of banking secrecy here to play markets illegally elsewhere, according to President and Finance Minister Otto Stich. (Under the Swiss system, each cabinet minister serves a year as president.)

But industry officials fear the legislation is but a hole in the dike of Switzerland's secrecy laws.

Anton Keller, president, of the Swiss Investors Protection Association, Zurich, said the changes will lead to loss of business for Swiss companies. The association fought strongly against the legislation.

"What this new legislation effectively does is to make it less interesting for foreigners, and particularly institutional investors, to put their money in Switzerland because there's always the risk that information will be passed on by our authorities to the SEC," Mr. Keller said.

"This will mean that business which would normally come to Switzerland would divert to Austria and Luxembourg, which are not compelled to provide such information to foreign regulators. We are giving up our traditional bank secrecy for no good reason, just because the Americans tell us to."

An executive at one Geneva-based fiduciary company, who asked not to be identified, expects business to drop drastically if and when U.S. authorities start interpreting the law as being a license to ask for more information on investments in Switzerland.

"Of course, maybe we are crying wolf, but there is now a distinct route for the SEC or other authorities to go if they want people like ourselves to reveal who we are working for," the executive said.

"Our own business is not concerned with individual clients but corporations and other major investors who want to conduct complicated transactions through Switzerland involving the movement of millions of dollars into and out of bonds and securities through Europe. The great charm of our operation before was that this could be done anonymously. Now, the question remains, can it still?"

Rene Ruchat, head of Fiduciare Ruchat, a small Geneva fiduciary company, said the law killed plans to develop a foreign clientele for money management services. "We thought we could build up a solid foreign business. I can't see this happening now," he said.

Faith Ryan Whittlesey, U.S. ambassador to Switzerland, takes a different view. The U.S. government pressed for an agreement, signed in November, relating to the prosecution of insider-trading cases to avoid protracted court battles, Ms. Whittlesey said in a speech earlier this month. There is no hidden intent to break into Swiss banking secrecy, she added.

The main thrust of the agreement and the new Swiss law is to enable the Swiss to provide quick information on cases such as the laundering of money in the Iran-contra scandal, she said.

Swiss authorities reacted with alacrity to U.S. requests for information in that case, suspending bank secrecy to release information on numbered accounts.

Swiss banks acquiesced because they were convinced the U.S. government had a case, but might not be so ready to do so again, said Daniel Menoud, a financial analyst at Banque Cantonale Genevois, Geneva. This led to the Swiss government's rush to implement the legislation by July 1, instead of this fall as originally planned.

While the new legislation might raise some problems for institutional investors, another problem might be coming to a head.

Opponents of a trend among major Swiss companies to restrict the sale of more than 2% of their registered shares to any one shareholder (*Pensions & Investment Age*, May 30) have come up with a powerful ally — Markus Lusser, president of the Swiss National Bank, Bern, Switzerland's central bank.

"I have an uneasy feeling that this trend is limiting the liquidity of the markets," Mr. Lusser said at a recent press conference. His comments followed by two days similar criticism from the Association of Foreign Banks, which said the process effectively blocks foreign investors from taking meaningful positions in Swiss industry.

Restricting foreign ownership is exactly what the process is supposed to do, according to Patrick Kearley, a Geneva-based freelance banking consultant. The process was initiated after World War II to prove Swiss ownership of companies whose foreign assets would have been confiscated by the Allies if the companies could be proved to be German-owned. Now, according to Mr. Kearley, about 75 major Swiss companies apply the practice, although opposition to it is increasing.

"I think the fact that the president of the national bank has come out against it is going to make some of those 75 think again," Mr. Kearley said. "A Swiss company thinks twice before it goes head-to-head with Markus Lusser." ■

# Hard to classify

*Continued from page 19*

as growth equity managers, he said, noting the style's definition isn't the same in the United States.

Some international firms with specialized styles have explored whether popular domestic styles can pay off overseas. Acadian Asset Management Inc., a new international manager in Boston, and Provident Capital Management, Philadelphia, which buys stocks with low price-earnings ratios, have back-tested the efficacy of a low p/e approach in international.

Acadian, which offers a small-cap product, found evidence of a positive small-cap performance effect in the major world markets with the principal exception of West Germany, according to Ronald Frashure, executive vice president. The firm also uses low price-book, a proprietary dividend discount model, specific return reversal (used by Barr Rosenberg in the U.S. market) and inputs on earnings estimate changes from the recently launched international version of the I/B/E/S service.

The best historic results in the period from the end of 1974 to the end of 1987 came from small-cap and value criteria used together, Mr. Frashure said.

Provident, on studies of 1,500 stocks in six major markets dating back to 1978, found that low p/e stocks provide superior international returns, according to Sandor Cseh, vice president. ■

*Continued from page 19*

International Ltd., each up 59%; and Oechsle International Advisors, with 51%.

Eight firms joined the top 50 and six left the ranking.

The newcomers are: American National Bank & Trust Co. of Chicago; Walter Scott International; Boston International Advisors Inc.; Massachusetts Financial Services Co.; Wertheim- Philippe International; and The Boston Co.. Also new on the list are Wells Fargo Investment Advisors and Beutel, Goodman International PLC, which were omitted inadvertently from last year's directory.

Dropping from the list are:

BEA Associates; Baillie Gifford Overseas; Ivory & Sime International; Centerre Trust Co. of St. Louis; Kleinwort Benson International Investment Ltd.; and Eaton Vance Management, which was listed as an international manager last year because of incorrect figures from the firm.

Ten firms slipped considerably in rank. Boston-based Fidelity International Investment Advisors Ltd.'s assets fell to $1.825 billion from $2.3 billion a year earlier, ranking the firm 11th vs. sixth. Last year's assets could have been overstated because Canadian accounts might have been included, said William Fink, senior vice president.

Other firms that fell more than five notches, their ranking this year and their previous ranking, include: ABD International Management Corp., to 33 from 17; Fiduciary Trust Co. International, to 30 from 19; Daiwa International Capital Management Corp., to 32 from 26; Hill Samuel/Investment Advisers Ltd., to 43 from 32; and The Bessemer Group Inc., to 46 from 40.

Assets of Frank Russell Trust Co. and Strategic Investment Partners are not included in the totals because the firms are managers of managers.

While there were few changes in the lineup of top international managers, managers made big gains in global accounts.

Templeton International stayed on top although its assets shrunk to $2.076 billion from $2.7 billion. Batterymarch Financial Management climbed to second place from 26th because many new and existing domestic accounts moved to global investing, including one existing account of $500 million. WorldInvest was third, increasing global assets 129%, followed by PCM International, which more than tripled its assets in global accounts. ■

# Social issues

*Continued from page 1*

Local Retirement Systems, Albany, and the General Board of Pensions, United Methodist Church, Evanston, Ill., sponsored a resolution asking Gillette to leave South Africa; it won 21.9% of the shares voted. The Los Angeles Unified School District sponsored a resolution asking Gillette to withdraw its operations and cut all other economic ties; 21.4% of shares were voted in favor of it.

A withdrawal resolution also was presented in 1987, winning 18% of shares voted then.

Support for withdrawal resolutions dropped significantly from 1987 totals at some companies, according to IRRC data. At Phelps Dodge Corp., support dropped to 9.4% from 22%; at Dresser Industries Inc., it fell to 11.6% from 20.9%; at Upjohn Co., it fell to 9.4% from 18%.

Corporate managements were pleased with these results, but stopped short of saying shareholder activism is losing ground.

"We would like to believe that this represents that a large number of our shareholders agree with the company's position," said Jessyl Bradford, public affairs associate at Upjohn. Management's position, is that it is better to maintain operations and work against apartheid from within South Africa than to withdraw, she said.

She added Upjohn is a signatory of the Statement of Principles, a non-discriminatory code of conduct for companies operating in South Africa.

On average, South Africa withdrawal resolutions were supported by 11.2% of the shares voted in 1988, compared with 12.2% last year. In addition to the companies in which support for such resolutions dropped significantly, there were a few where it rose a great deal — at Colgate-Palmolive Co., for instance, a resolution drew 17% of the vote, up from 10.2% — and several where it was basically unchanged.

An encouraging note for activist shareholders was the support for resolutions calling not only for withdrawal from South Africa, but severance of non-equity ties. While the latter approach is more drastic, these resolutions drew nearly as much shareholder support, 10.7%, as withdrawal-only resolutions, Ms. Mathiasen said.

Also, resolutions asking companies that do not have assets in South Africa to break other links drew support from an average of 11.7%, she said.

Activist shareholders found these developments heartening.

"There's been a shift," said Tim Smith, executive director of the Interfaith Center on Corporate Responsibility, New York, which sponsored numerous South Africa-related resolutions. "The issue is not just are you in South Africa, but who do you sell products to there and how are they used."

The top vote-getters among resolutions asking companies without direct investments in South Africa to cut other ties were at Emery Air Freight Corp., 19.3%; and Sundstrand Corp., 19.2%. The former was sponsored by the Interfaith Center, the latter by the Los Angeles school district.

Another notable South Africa vote was at CBI Industries Inc., where a resolution asking the company to sign the Statement of Principles won 23.6% of the shares voted.

Emery, Sundstrand and CBI all have a relatively small number of outstanding shares, making it easier for a few large investors to tip the vote, Ms. Mathiasen said.

Still, votes of this size lead companies to re-examine their positions, said Jon Lukomnik, spokesman for the New York City Employees' Retirement Systems, one of the sponsors of the CBI resolution. He said the city funds' policy is not to call for companies to withdraw from South Africa, but to run operations there in a manner that is both socially responsible and good for business.

One of the New York City funds, the Teachers' Retirement System, sponsored the top vote-getter among resolutions related to operations in Northern Ireland. The resolution, at Interface Inc., was supported by 22.8% of shares voted. It asked the company to endorse the MacBride Principles, a code of conduct aimed at ending religious discrimination in Northern Ireland.

To date, no U.S. company has endorsed the principles. Several have expressed the concern, as did Interface in its proxy material, that adhering to the code could constitute reverse discrimination and therefore violate British law.

Resolutions on Northern Ireland, submitted at 16 companies, won an average of 7.6% support, up from 6.2% among 10 proposals in 1987. Support for such resolutions fell slightly at most companies that had faced them previously, but the heavy support at Interface pushed the average up. Interface also has a small number of outstanding shares, Ms. Mathiasen said.

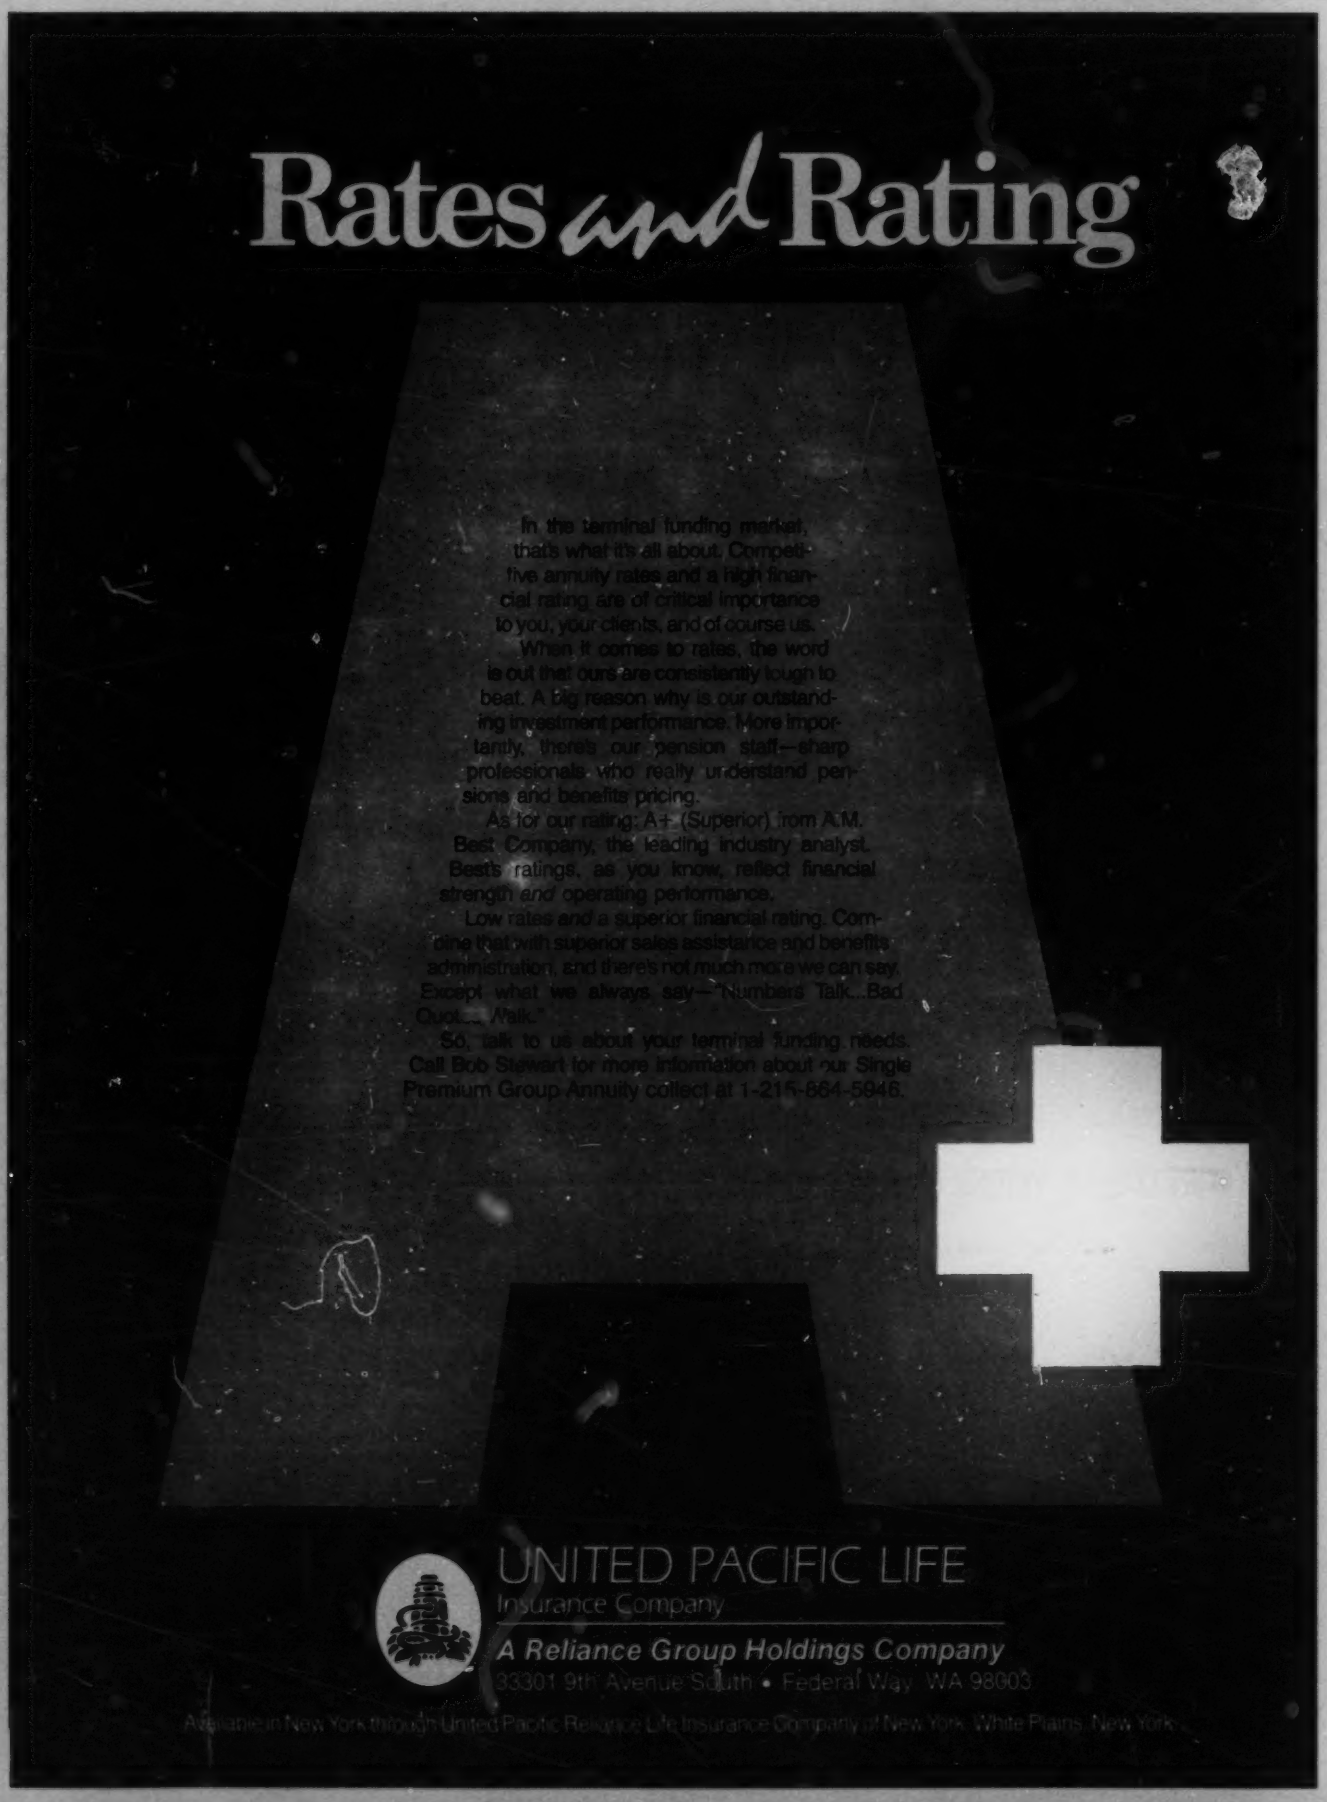
Mr. Lukomnik said shareholder activism on Northern Ireland is gaining ground after a small start.

Most of the Northern Ireland resolutions called for endorsement of the MacBride Principles or review of Northern Ireland operations; none called for withdrawal.

Other social issues prominent this year were military issues and animal testing. Of the 17 proposals on military issues, 10 are eligible for resubmission. All eight proposals on animal testing are eligible.

Most proposals on military issues asked for companies to submit plans for converting to non-military production, questioned whether they should lose their defense contracts, or report on their involvement with development of the Strategic Defense Initiative.

Seven of the animal testing resolutions asked for companies to report on progress toward phasing out such testing. The other asked for information on involvement with testing. ■



# Proxy battles spawn debate

By Marcia Parker

The 1988 proxy season is wrapped up, the results are in and the debate is on over whether shareholder opposition to poison pills is growing.

Proxy solicitors representing corporate clients and institutional investors who sponsored shareholder resolutions are quibbling over how to interpret the voting results on anti-poison pill resolutions at 19 companies, including 10 at companies whose shareholders voted on such proposals last year.

Institutional investors say shareholder support to rescind poison pills clearly is growing; companies say it's shrinking (*Pensions & Investment Age*, June 13).

According to Georgeson & Co., a leading New York proxy solicitation firm, for the 19 companies targeted with rescission proposals in 1988, an average of 26.4% of the outstanding shares voted in favor. In 1987, the 30 targeted companies averaged 20.8% of outstanding shares voted in favor.

Ten companies — United Technologies Corp., Upjohn Corp., Great Northern Nekoosa Corp., Pitney Bowes Inc., Emery Air Freight Corp., International Paper Co., Champion International Corp., AMR Corp., Santa Fe Southern Pacific Corp. and J.C. Penney Co. — were targeted with anti-poison pill resolutions both years.

But John Wilcox, managing director of Georgeson, said the voting statistics do not reveal a trend of growing shareholder support for the proposals.

"Increased institutional ownership and careful selection of target companies by the proponents, rather than increased shareholder support, appear to have been largely responsible for the higher average votes this year than last," he said. "The proponents targeted only 10 of the 30 companies that faced the same issue last year. By narrowing the selection process to those companies with the highest votes last year, the proponents ensured an increase in their average score of at least four percentage points."

Executives representing several institutional investors that sponsored anti-poison pill resolutions, including the California Public Employees' Retirement System, Sacramento, and the State of Wisconsin Investment Board, Madison, challenged Mr. Wilcox's assessment of the results.

"They are just trying to minimize any gains," said Jose Arau, principal investment officer for the California fund, one of the most activist institutional investors in the corporate governance field.

Peg O'Hara, director of corporate governance issues for the Investor Responsibility Research Center Inc., an independent Washington-based group, said she doesn't see "how anyone can deny that shareholder opposition to poison pills was higher this year than last year, as shown by the votes on these shareholder proposals. One proposal won a clear majority of the shares voted, another won a plurality; at seven companies, more than 40% of the shares voted supported the anti-poison pill resolutions, and across the board, no matter how you count the votes, the average vote was more than 9% higher than last year," Ms. O'Hara said.

"To say it was because of higher institutional ownership or more selective targeting of companies or to quibble over how the votes should be counted seems to me to beg the question. The point is that institutions do own a lot of shares in a lot of companies, and they have a right to vote their proxies. As fiduciaries, pension plans also have a legal responsibility to vote them solely in the best interest of the beneficiaries of their plans."

She said many institutional investors believe poison pills, greenmail and other anti-takeover measures are hurting the value of their stock, so they're speaking up in the only way open to them.

"They're raising the issue through shareholder proposals, which are purely advisory, not binding on the board of directors. They're using the process to try to draw attention to the issues, trying to get management to listen to their views," she said. "If an individual shareholder owned 30% or 50% or 70% of a company, I think most managements would go out of their way to communicate with him and respect his views. What these institutions are saying is, why should it be any different with them? They are, after all, the owners of the company."

The highest anti-poison pill vote in 1988 was at Santa Fe Southern Pacific, where 77 million shares were voted in favor of the rescission proposal — 40.1% of the shares outstanding or 59.1% of the shares voted on the issue. Mr. Wilcox, however, argued Santa Fe is an extraordinary situation. Two institutional investors — The Henley Group Inc., La Jolla, Calif., and Olympia & York Development Ltd., Toronto — together owned more than 35% of the outstanding shares on the record date. Presuming they voted their shares in favor of the proposal, only 28.9% of the remaining votes cast supported the proposal, less than the average, he said.

Georgeson said its analysis of the nine companies, excluding Santa Fe, that were targeted for proposals in both years, shows the vote in favor was actually 1.3 percentage points lower in 1988 than in 1987 — 23.2% of outstanding in 1988 vs. 24.5% of outstanding in 1987. This decline occurred despite increased efforts by the proponents and a 0.7 percentage point increase in institutional ownership of the nine companies.

The proxy firm said in both 1988 and 1987 the votes in favor of the proposals tended to correlate with the percentage of institutional ownership. ■

## Manager lures away fund chief

CHICAGO — Samuel W. Anderson is resigning as executive director of the $7 billion Teachers' Retirement System of the State of Illinois, Springfield, to become chief administrative officer and managing director of First Chicago Investment Advisors.

Mr. Anderson said he will officially start at First Chicago July 1.

He has been executive director of the teachers' system for eight years.

In his newly created position at First Chicago, he will head the firm's administration division, which consists of the account management, marketing systems, control and legal units. He will direct operations and head new business development.

Also at First Chicago, Denis S. Karnosky was promoted to managing director and head of the asset allocation division from vice president. He joined First Chicago in 1987 from the Chicago office of Carroll McEntee & McGinley Inc., New York, where he directed risk management research and development.

# 'Hit list'

*Continued from page 1*

the Allied-Signal or Gillette letters or the target companies' proxy season activities as improper. The department will not comment, except to confirm monitoring is under way.

The Texaco case probably is on the monitoring list because the proxy battle was so hostile. In the end, Texaco shareholders supported management in the bitter contest with the company's largest stockholder, corporate raider Carl Icahn.

Personal appeals, newspaper ads and other tactics were used by both sides to win the support of institutional investors, investment managers and key stockholders.

Mr. Icahn has said institutional investors' votes were "bought" by Texaco's management. Texaco's chief executives promised institutional shareholders they would be more involved with the company in the post-proxy season and they might be allowed to nominate directors to the board.

At Allied-Signal, the company mounted a successful campaign to defeat a proposal sponsored by the State of Wisconsin Investment Board, Madison, that challenged the company's poison pill. Wisconsin's proposal was not approved, but did generate significant stockholder support. More than a dozen anti-poison pill resolutions were sponsored by institutional investors this year and overall support rose despite strong corporate efforts to defeat the proposals.

Edward Hennessy Jr., chairman and chief executive officer, wrote to chief executives whose pension funds own Allied-Signal stock, money managers owning company stock and other institutional shareholders, soliciting support for management's position.

Copies of the letters were filed with the Securities and Exchange Commission as proxy solicitation material — the first time any chief executive has done so. The SEC gave tacit approval to the three letters, which were tailored for particular recipients.

Colman Mockler, Gillette's chairman and chief executive officer, also wrote to fellow chief executives whose pension funds owned Gillette stock. In the letter, Mr. Mockler said he was writing to alert them of strategic block investing, "a new phenomenon, which I believe is a potentially serious danger to virtually all publicly owned U.S. companies."

After making a strong argument against strategic block investing (which occurs when an investment group, individual, company or corporate raider takes a significant equity stake in another company) Mr. Mockler cited Gillette and Coniston and asked the chief executives for their support.

"Your company, through its pension and other benefit plans, may hold stock in a number of companies that could be attacked by strategic block market players," Mr. Mockler wrote. "If you agree that the so-called strategic block phenomenon is not in the best interests of publicly owned companies, their stockholders and their other corporate constituents, including their plan participants, please make your views known in an appropriate way with due regard for the fiduciary obligations that may be involved. The next sound and successful American company to be forced to an untimely sale or break-up could be your own."

Other than Messrs. Hennessy and Mockler, no other chief executives are believed to have written similar letters this year.

Like the Gillette letter, Mr. Hennessy's letter stayed clear of any hint of pressure.

"If you agree that poison pills may help directors to preserve and maximize a corporation's value for all shareholders, I urge you to speak with your investment management people and ask them to consider the views expressed in this letter before deciding how to vote on the anti-poison pill proposal," Mr. Hennessy wrote.

"I am advised that in doing so, without any attempt to interfere with the delegated decision-making authority of your managers, you will not contravene the Department of Labor's widely circulated statement on proxy voting by plan fiduciaries."

A spokesman for Allied-Signal said company executives had not discussed the letter with the Labor Department, which isn't required, and he is not sure how department officials viewed the letter.

Investment managers, meanwhile, are scrambling to assemble the proxy voting records requested by the Labor Department. The department has identified investment managers that held large blocks of stock in the target companies on behalf of plans covered by the Employee Retirement Income Security Act. They were given 14 days from receipt of the Labor Department letter to provide the information. Most received the letter in early June. ■

# Hedged index

*Continued from page 2*

the impact on managers where hedging is not a normal part of their process," said Janice Harding, vice president of The Frank Russell Co., Tacoma, Wash.

While a manager who doesn't pay attention to currency theoretically should not mind if a client requests staying fully hedged, the manager might object if forced to sell securities to cover losses from the hedged position. Despite the risk reduction in hedging, "there's a practical consideration in hedging if the manager has to keep going to the sponsor to cover losses. No one likes to write out a check. It will make some sponsors very unhappy," Ms. Harding said.

Although currency gains are viewed as leveling over time, currency fluctuations produce short-term volatility that hedging substantially reduces.

The risk reduction more than offsets the higher correlation of hedged foreign assets with U.S. assets, barely affecting the gains, according to research by Salomon Brothers Inc. To accompany its new hedged foreign bond index, Salomon soon will launch a hedged version of the Salomon-Russell Global Indexes, hedging all 23 currencies in the index.

"At recent levels of exchange-rate volatility, hedging currency exposure greatly enhances the diversification potential of foreign investments . . . U.S. investors gain as much in risk reduction as they do by investing abroad, unhedged, in the first place," according to a study to be published in the Financial Analysts Journal by Andre F. Perold, associate professor of business administration of the Harvard Business School, and Evan C. Schulman, partner of Batterymarch: Canada and president of a new equity firm, MJT Advisors Inc., an affiliate of Mitchum, Jones and Templeton Inc., Los Angeles.

Transaction costs are low in the foreign exchange market, among the largest and most liquid markets. The cost of rolling over six-month forward contracts in major currencies is about 0.12% a year, according to the Perold/Schulman study.

Given its low cost and high benefits, some say hedging is underused. "Ironically, most global managers view currency risk as part of the risk of investing overseas," said Robert Arnott, president and chief investment officer of First Quadrant Corp., Morristown, N.J.

Without a strong belief that foreign currencies will rise against the dollar, "if you don't hedge currency risk, you're bearing a risk that provides no reward. That's inherently suboptimal," he said.

Mr. Arnott thinks by adopting a hedged benchmark, pension fund executives can encourage more hedging. "If the benchmark changes, you'll find the managers will, too."

But others don't think hedging into dollars should be a fund's normal strategy.

Jill Jordon, a partner with Matuschka Moser Partners, Greenwich, Conn., an international manager that offers active currency management and runs $700 million, said always being either fully hedged or unhedged is an overly naive solution to currency volatility.

Besides, "you can make lots of money in cross-trades (among non-dollar currencies) that you miss if you take a simplistic view," she said.

Most pension executives are not sold on the concept of being hedged as a neutral position, but many are examining their managers' hedging strategies. Some also might overlay currency management onto existing international portfolios, thereby treating currency as a separate asset class.

Susan Stannard, senior financial analyst of the $700 million Fluor Corp. pension fund, Irvine, Calif., which has $10 million in international equities, views currency and the underlying international equities as separate assets.

J.P. Morgan Investment Management Inc., London, the firm's international equity manager, generally doesn't hedge, and Ms. Stannard isn't taking steps toward a hedge policy yet because she doesn't see the dollar rising in the near future.

If the dollar rebounds, plan executives should look at their "break-even points," asking themselves "if international stocks have enough added value to justify bearing currency risk or even to justify a hedge back to the dollar," Ms. Stannard said. During the past three to four years, she noted, at least half of international stock gains have been from currency appreciation against the dollar.

The Common Fund encourages active currency bets, according to Mr. Tobey. "We're happy to have the underlying stock and bond exposure with an open currency position if (managers) feel the yen and pound will go up vs. the dollar. If they do not have an explicit decision, we'd like them to hedge back to dollars — but not necessarily fully" because there are dollar-linked currencies managers may hedge into as well, he said.

For international equities, the Common Fund uses the Morgan Stanley Capital International Europe Australia Far East index in local currency terms or the MSCI World index excluding the United States. The benchmarks are adjusted for hedging costs.

Some don't think fully hedged or sponsor-driven hedge policies will proliferate. Bobbie Parkhill, consulting manager at Ennis, Knupp & Associates, Chicago, said the firm's clients "typically don't make (the currency hedging) decision. . . . Yes, they're scared about the dollar, but I think that's why they have the manager. It's contrary to the idea of having managers if you tell them how to invest." ■

# Australian tax

*Continued from page 2*

Analysts said the increase is due to the overall impact of the budget, which lowers corporate income tax to 39% from 49%, and to inflationary pressures that favor Australia's commodity-rich economy, as well as the pension fund shift into domestic stocks.

The cut in the corporate tax rate "translates directly to the bottom line," said Jonathan Shack, client adviser at MacIntosh Hamston, a brokerage unit of Hoare Govett Ltd., London. The effect was to lower the average price-earnings ratio to 10 from 12, he said.

Other changes in the corporate tax structure include a lower-than-expected gold tax, an average cut of 22% in import tariffs, tax exemptions on dividends received by Australian companies (except for 60 designated tax havens) and elimination of accelerated depreciation schedules. Cuts in personal income tax will not be introduced until next year.

The pension changes also have abetted the market's rise, as pension funds bought up domestic equities — particularly into selected banking and industrial stocks paying fully franked dividends — in the wake of the mini-budget.

The new taxes also are expected to affect financing of Australian corporations, which might be pressed to raise their dividends to perhaps 6% a year from a historic average of 4.5%.

Some think the move into stocks providing fully franked dividends will be short-lived, especially given the shortage of such stocks.

"There will be a short-term obsession with imputation — people will end up paying a dollar to get a 20-cent tax saving," said Bruce Thomas, senior investment manager at Hambros Australia, Sydney.

"Strategies will change over time. A higher content of imputation stocks will emerge, and the more franked dividends the better, but you must question the value of the franked dividend.

"Some of the quality second-liners might be attractive — the banks have a low dividend payout. I still believe we have to look for the best overall growth — the franked dividends are less important than the capital gain."

Keith Trevallion, investment manager of PNC International Financial Services, Sydney, said the tax on earnings should be kept in perspective.

"It will be kept in balance, but at the end of the day they will pay some tax," he said.

Jean Brunel, director and general manager of J.P. Morgan Investment Management Australia, Melbourne, said the sudden move into stocks was inappropriate. "It's a knee-jerk reaction," he said. "Structuring a portfolio so that it pays no tax will mean a lesser return at an enormous risk."

The consulting firm of TPF&C, Sydney, warned its clients not to alter their risk profiles for tax reasons alone. Instead, the risk-reward ratio now must be determined on an after-tax basis.

Frank Russell's Mr. Ueland said the lessons of October, when Australian equities lost 40% of their value, should not be lost, and funds should stick with their investment objectives and tolerable levels of risk.

The minibudget is expected to hurt smaller money management firms, which will be hit with higher costs, and firms that have shunned equities since October and have missed the ride up the market. In addition, brokerage firms are expected to see lower trading value and increased demand for sophisticated services.

Benefiting from the changes are managers such as Melbourne-based ANZ Capital Markets Corp., which maintained the same equity weighting it had in October.

Also being helped are index fund managers, as pension funds seek to minimize turnover and thus taxes on realized capital gains.

"Index funds have something to gain," said Nick Basile, investment manager of MLC Asset Management Division, Sydney.

"Fully replicated index funds will do well. On the other hand, synthetic index funds, made up of futures which have no dividends, are a thing of the past as far as superannuation funds go." ■

# Passive funds

*Continued from page 1*

since 1980.

Polaroid's strategy has changed recently on the fixed-income side. Earlier this year, it made its first move into fixed-income indexing, said Philip E. Ruddick, director-treasury operations. "We've been successful with indexing on equities, and we wonder if there is logic we can apply to fixed income."

Polaroid committed only $10 million to fixed-income indexing, leaving under active management the bulk of its fixed income, currently about half of the fund.

"We don't believe the entire fixed income should be indexed," he said. "On fixed income, we believe there is opportunity to get additional return without taking additional risk."

In equities, Polaroid plans to remained indexed, he added, a testimony to its pension committee's belief in the efficiency of the stock market and the expense of active equity management.

Mr. Ruddick said the strategy also underscores the importance Polaroid's pension committee places on asset allocation. Less time spent on manager searches and performance monitoring means more time to devote to asset allocation.

The entire fund, including equities and fixed income, returned 8.4% last year, he said. By contrast, the median return in a pension fund universe tracked by SEI Corp., Wayne, Pa., was 3.9%.

He attributes the result to reduction in equities before the October crash. He said the fund had gradually cut its equity allocation to 35% in September from a percentage in the 50s in January.

Since then, its equity mix has increased to 38% because of rising stock prices rather than an active allocation decision, he added.

"Basically over the long haul we believe you can't beat the (stock) market," Mr. Ruddick said. As a result, "we adopted a policy we call 'no leakage.' We don't want to pay a lot of management fees and commissions."

Eagle-Picher might be the only fund with more than $100 million in assets that is completely passive.

At a recent conference, Harry A. Neely, Eagle-Picher treasurer, termed the approach "a fairly different, almost perverted approach because it is almost entirely passive."

Its fund is evenly split between equities and fixed income. In contrast to Polaroid, Mr. Neely said the fund has kept the 50-50 split since the indexing began, rebalancing every quarter.

Mr. Neely estimates his fund saves 125 to 150 basis points annually in active management fees and commissions.

According to other pension industry executives, active equity management fees often range between 50 and 100 basis points annually; stock index funds typically charge less than 25 basis points. Index trading costs also are less because of lower turnover, lower commissions and little or no market execution impact on price.

In its move to index fixed-income assets, Polaroid hired Wells Fargo Investment Advisors, San Francisco, to run about $10 million in a Shearson Lehman Hutton Government/Corporate bond index fund, Mr. Ruddick said.

The bulk of its fixed income continues to be run actively by Merganser Capital Management Corp., also of Cambridge. Merganser, Polaroid's former in-house fixed-income investment management unit, had been the fund's sole fixed-income manager.

Polaroid's equities are divided about evenly among three passive managers, he said. Wells Fargo and Mellon Capital Management Corp., also of San Francisco, each runs Standard & Poor's 500 stock index funds; American National Bank & Trust Co. of Chicago runs an index fund of non-S&P 500 small stocks.

Mr. Ruddick said Polaroid was one of the early pension sponsors to use indexing, first in 1980 with Wells Fargo for the bulk of its equity allocation. During the next two years, the fund gradually moved the rest of its equities to indexing.

Eagle-Picher has 60% of its equities in-house, run in an equal-weighted Standard & Poor's 500 index fund. Unlike the traditional market capitalization-weighted index, the equal-weighted structure allows price moves by smaller stocks to influence the index as much as those by larger stocks.

"At the time, there was a feeling secondary stocks would do better," said Joshua E. Adams, Eagle-Picher assistant treasurer. He noted that historically, smaller stocks have performed better over the long term.

The equal-weighted approach also imposes a disciplined buy and sell process on the portfolio.

Mr. Neely said the equal-weighted portfolio has about kept up with the traditional S&P 500 index, although returns were unavailable.

The other 40% of its equities are with American National Bank in two index funds that emphasize smaller stocks.

The Cincinnati office of Scudder Stevens & Clark runs the fund's fixed income in a passively managed portfolio of laddered maturities. According to Mr. Neely, the portfolio consists of securities with maturities in each of the years from one to 10, with 10% of the fixed-income assets allocated to each maturity.

The idea is "so we average interest rates over time," Mr. Adams said. The portfolio is mainly composed of Treasury securities.

Mr. Neely said the cumulative return for the fund since the passive strategy began places it between the 25th and 35th percentile of Trust Universe Comparison Service pension fund universe. The return was unavailable.

From 1981 through 1987, the fund returned 13.9% compound-annualized.

Turner had $54.8 million of its assets in S&P 500 index funds March 31, all run by Wells Fargo, according to Lars Lofas, assistant to the senior vice president.

Its S&P index funds include $37.3 million in a static allocation. The other $17.5 million in S&P index funds comes from a $43.8 million asset allocation fund, also run by Wells Fargo. The manager allocates the $43.8 million in indexed equities, indexed fixed income and cash, as it perceives the market changing.

Mr. Lofas said Turner had 70% of its total fund allocated to equities through much of the bull market. Then about 18 months ago, the equity commitment was reduced to 65%. At the beginning of the year, Turner adjusted its asset allocation again, shifting 40% of its total fund to Wells Fargo's asset allocation fund, he added.

In absolute terms, equity indexing paid well in the 1980s.

According to Wilshire Associates, Santa Monica, Calif., the median active equity portfolio for the seven years ended Dec. 31 returned a compound annual 14.29%.

In the same period, the S&P 500 returned a compound annual 13.8% and a index of small stocks, 12.6%, according to Ibbotson Associates Inc., Chicago. ■

# Favia Hill shut

*Continued from page 3*

Favia, Hill was spun off in October 1983 with $9 billion under management, part of a trend of banks creating independent units. The idea was to instill them with entrepreneurial vigor, enabling them to attract and retain key personnel and regain market share.

But that didn't seem to happen.

"The bank had a lot of average, working-class managers," said one New York money manager. "Chemical decided all they had to do was repackage" its efforts, he added.

Those in charge didn't understand the investment management business, said a former employee. Spinning off the unit reflected "me-tooism" that was common within the industry, he added.

The naming of the firm after its two principals — in the hope of making it sound like an independent firm — also was viewed as a mistake by some. Less than two years after the unit was formed, Robert Hill left to join Pleasantville A&T Corp., New York, a private firm managing family endowment money. Jack Favia retired in April.

Meanwhile, the firm's equity performance sagged under its growth orientation that played on themes. While insiders said performance was weak before the spinoff, the market of the past five years has been tough on growth managers as a whole.

For the five-year period through 1987, Favia, Hill's composite account returned a compound annual rate of return of 13.3%, underperforming the 16.5% return for the Standard & Poor's 500 index, but exceeding the 12.6% return for the Lipper growth manager index.

Those numbers probably overstate Favia's overall performance, because the composite consists only of accounts managed by Mr. Rolland and other large accounts. Also, one of Favia's problems, Mr. Madden said, was dispersion of results among some of its portfolio managers, some of whose returns are not included in the composite.

In three years, the firm lost 50 tax-exempt clients, slipping to 117 on Jan. 1, 1987 from 167 Jan. 1, 1984. During that same period, tax-exempt assets under management dropped to $5.3 billion from $8.7 billion.

Among equity and balanced accounts reduced or lost during that period were Burroughs Corp. (now part of Unisys Corp.), the Los Angeles Fire & Police Pension System and the National Automatic Sprinkler Industry.

All was not well on the bond side, either. While performance was better, the firm lost more than $4 billion in assets from two New York City public funds, in part because of performance. Sources said Favia, Hill did well relative to other bond managers, but had made an interest-rate bet that went in the opposite direction of its normalized benchmark.

In late 1986, Managing Director Kenneth L. Dowd Jr. was brought in from the bank's trust and investment division to oversee development of Chemical's institutional investment management services.

Among other things, Mr. Dowd hired Mr. Madden in April 1987 to head marketing efforts for all of Chemical's money management units. Previously executive vice president at Fidelity Management Trust Co., Boston, and senior vice president of Chase Manhattan Bank, New York, Mr. Madden is known as an outstanding marketer.

Sources said too much weight was given to marketing and portfolio managers lost their voice in the firm's direction.

"Here, a lot of people wanted to run the business," Mr. Madden said. "But that's not what they're paid for. Their responsibility — with very little time to do it — is managing the portfolio."

By last fall, Chemical decided to focus Favia, Hill's attention on larger accounts, increasing client visits and raising fee schedules. In the process, the firm resigned up to 50 client relationships, representing up to 100 accounts but only $290 million in assets.

The increased fees also resulted in the loss of some clients, Mr. Madden said.

When Mr. Favia retired, efforts were made to replace him but no candidate was offered the job, Mr. Madden said. Another key equity portfolio manager, Terence Carmichael, also decided to leave, Mr. Madden noted.

Chemical officials, with the input of consultants and others, eventually decided to close the firm's doors.

Now, Chemical Investment Group will focus on building the rest of its business. "At this point, the name of the game is not to be the biggest, but to be a quality organization," Mr. Madden said.

The *P&I Age* monthly indexes track the changes in the Standard & Poor's 500, Frank Russell Co.'s Russell 3000 stock index, the Ryan Index of fixed-income securities, the Shearson Lehman Government/Corporate bond index and the Salomon Brothers Broad Investment Grade bond index.

ment manager will plunge into eagerly, but one she hopes will have better fortune than the last of her 13 skydiving jumps, which resulted in a broken ankle, still on the mend.

The ankle, however, doesn't figure to slow her down. "If I start on July 1, I can be managing money by Aug. 1," she said.

As the firm grows, it will seek to offer top job opportunities to women and minorities, two groups she believes have not reaped a fair share of the fruits of the investment industry.

Ms. Marshall hopes to distinguish the firm in other ways, too: "I always said I never wanted to start another 'me-too' investment firm."

She plans to use investment systems she has developed through her stints as investment manager at the California fund; president of BayBank Trust Services, Boston; and director of investments at Deere & Co., Moline, Ill.

"I believe I can offer a superior investment system," she said. "The key will be a systematic discipline screen and valuation of securities," she said, including segmentation of the equities and bond markets into value, growth and large and small capitalizations.

Ms. Marshall said her firm will focus on reducing execution costs by making trading as efficient as possible, using a trading system designed to get the lowest possible transaction costs and through lower-than-normal management fees.

The trading system will use an "urgency code" to determine the best time to buy and sell particular stocks and bonds, she said. "It will be very attractive to the buyer and the seller who doesn't have to act immediately," she said.

At first, the system will be used to make the firm attractive to larger clients. "Once the systems are in place, the challenge will be to market to the smaller companies," she said. "That's the big underserved market."

Once Ms. Marshall's decision not to renew her contract with California became known, she received, and declined, job offers from across the country. "I want to try to piece this together," she said. "That was my first option. I like challenges."

Her years at California were marked by the fund's increased computerization, heavier use of international investments and involvement in corporate governance issues.

"I'm proudest of having put in a series of systems that will continue to operate after I'm gone," she said.

Her activist approach to shareholder involvement in corporate governance stood out during the fund's involvement with Texaco Inc. in its legal battle with Pennzoil Co., Texaco's subsequent bankruptcy proceedings and then its fight with corporate raider Carl Icahn.

"Texaco was one of the most disheartening experiences I had," she said.

Although the California employees' fund voted its 763,000 shares for management in Texaco's successful efforts against Mr. Icahn, Ms. Marshall called it "a choice between the lesser of two evils."

"I was appalled," she said. "Shareholders were badly served by everyone involved."

Despite her move to the other side of the desk, Ms. Marshall remains outspoken on a number of issues.

She opposes poison pills, supermajority rules, mergermania — "the majority (of mergers) do not create any real value" — and social restrictions on investment portfolios, such as the South Africa-free requirements soon to be imposed on the California fund through state law.

"I resent the fact that pension funds are supposed to be the major tool of social policy," she said. "It is far more damaging to lose sales than to lose shareholders. Shareholders will always be replaced."

She also is an outspoken supporter of program trading, which has been strongly criticized by some for contributing to the severity of October's market crash — a time when Ms. Marshall and the California fund quickly snatched up $40 million in stocks.

"The market crash was a reflection of a more efficient market," she said. "You want real values reflected as quickly as possible. Computerized trading is a good idea. Those who oppose it are the equivalents of the Luddites that broke the machinery."

(The Luddites were a group of English laborers who opposed the imposition of labor-saving — and hence, job- and wage-reducing — machinery in textile mills.)

The move back to private industry — not to mention a different function — will pose other challenges for Ms. Marshall.

"In the public sector, people get ahead by being different, standing out," she said. "In the private sector, people get ahead by being part of a team."

Although she hopes to distinguish her new firm, she recognizes her high profile in the California job will not guarantee success.

"This will not be a Lone Ranger operation," she said.

But with the computer age, it will be a long-distance operation. Ms. Marshall said she sees no reason her partners all need to be in the same office.

"In my opinion they should stay where they are. It almost doesn't matter where the firms are located," she said. "In a global economy, what's critical is the product you offer."

So while she hopes to have offices in Boston ("where the best systems and operations people are"), New York ("the financial center") and San Francisco (close to home), Ms. Marshall thinks the small firm will manage with her in contact with all points.

"I'll probably be up in an airplane," she said, laughing.

And, no doubt, hoping her jump into the money management field doesn't land her on that bad ankle. ■

# Index growth

*Continued from page 3*

and international indexed accounts.

"Plans are still taking their money out just because they feel they have too large an exposure in equities because of the increased valuations," he said. "We see asset allocation decisions instead of anti-indexing. Foreign (investment) is attractive because it is a young business, a lot of room for growth."

In general, money managers said pension executives are interested in international indexing as well as "enhanced," "tilted" and "customized" funds for both fixed-income and equity assets.

"We see a continued and probably growing interest in fixed-income products for several reasons," said Edward Swan, manager of the asset management group at WR Lazard & Co., New York. "We're beginning to see a lot of increased interest from institutional investors after they've looked at returns where active fixed-income managers have underperformed the market. Plan sponsors are seeing that specialized bond indexes can be developed to capture specific types of characteristics with less volatility and a high certainty of return.

"You combine that with the realization you can create a specific universe, and it's a very cost effective way to manage money."

"Increasingly, plan sponsors are interested in branching out beyond stereotypical index product," added Kirk Barnaby, vice president for Mitchell Hutchins Institutional Investors Inc., New York.

Brian Mattes, vice president for the Vanguard Group, Valley Forge, Pa., pointed out that, according to INDATA, Stamford, Conn., almost two-thirds of active managers underperformed the S&P in 1987. "You'd have to go back to 1982 for where the majority of equity managers outperformed the S&P," he said.

Mary Ellen Stanek, vice president for First Wisconsin Trust Co., Milwaukee, sees the growth in all forms of indexing as a natural progression.

"I think it's an evolution," said Ms. Stanek. "People who like the strategy are saying if active managers aren't beating the market, perhaps it's a better mousetrap. The wave of sponsors moving to enhanced vehicles isn't going to slow down."

One happy voice was that of Jon Victor, president of Security Capital Management Inc., Stamford, Conn., as his domestic fixed-income index funds grew $374 million — or 92% — since Jan. 1.

Mr. Victor said market uncertainties have limited new clients in the indexed portfolios offered by Security Capital: "I think the markets are continuing to be volatile. The bulk of the asset growth has been in contributions (from existing accounts)."

Mr. Hurley, of Investment Index Technologies, said he sees movement in the domestic equity side toward broader based indexes, such as the Wilshire 5000 and the Russell 2000, "simply because the small-cap stocks have been so robust," he said. "As soon as you get outside the S&P, you're moving to smaller cap firms."

Small-cap issues returned a 13.37% in the first quarter, according to the NASDAQ industrial index of over-the-counter stocks, while at the same time, the S&P 500 returned 5.7%.

Small-cap manager Dimensional Fund Advisors, Santa Monica, Calif., reported a 64% increase in indexed tax-exempt assets managed to $5 billion from $3.1 billion Nov. 30. David Booth, chairman, said the firm creates small-cap indexes to serve as benchmarks for its indexed funds. ■

# Global assets will surge

By Marlene Givant

U.S. pension funds are expected to invest $1.3 trillion in international markets by the year 2000, 14 times the amount they have invested today, while their allocation to international investments should jump to at least 20% of assets from about 3% currently.

The growth should come both from large funds preparing to make their second wave of overseas investments and from public and smaller corporate funds with few, if any, current foreign investments.

(The percentage estimate was derived from interviews with pension executives and applied to a projection of $6.3 trillion in total pension assets from Rodger Smith, a partner at Greenwich Associates, Greenwich, Conn. Pension funds now have more than $2 trillion in total assets, of which $60 billion is invested abroad.)

In interviews, most pension executives agreed their international exposure will increase — probably to about 25% of total assets — but they differ on how that will happen.

Some say domestic investments will be globalized; others say their peers will make conscious decisions to raise their allocations to non-U.S. investments.

Said Keith E. Tucker, vice president of E.I. du Pont de Nemours & Co., Wilmington, Del., which has 10% of its $12 billion in pension assets invested abroad: "Foreign markets are much larger today as a percentage of the total market than they were 10 or even five years ago. We can no longer ignore that, and if we do, it's at our own peril."

The impact an increase in international investing would have on the U.S. capital markets, however, is not clear; the offsetting effect of foreign inflows is difficult to call.

"If you try to forecast (the net effect on) U.S. securities markets in a systematic fashion, you can't. . . . It leads to very misleading forecasts," said Peter L. Bernstein, president of Peter L. Bernstein Inc., New York, an economic consulting firm.

But the benefits of being diversified are reinforced by the fact that foreign markets recovered more quickly than the U.S. market from October's stock market crash and by the continuing globalization of financial markets.

However it happens, the spurt of growth has begun. For example, the internally managed $27 billion Teachers Insurance and Annuity Association-College Retirement Equities Fund, New York, is raising international exposure to 15% from 10%; Bell Atlantic Corp., Philadelphia, with $11.5 billion in pension assets, is believed to be approaching a long-term international target of 25%; and the $420 million fund of McGraw-Hill Inc., New York, soon might increase its foreign investments slightly from the 7% it now has in global equities.

Sherri Williamson, pension investment administrator of McGraw-Hill, said large funds will have to look overseas for good values because as institutions make up a bigger part of the U.S. equity market, there might not be enough attractive domestic stocks.

Another reason to diversify is the increasing size of

*Continued on page 53*

# Utility controls its contribution by asset shifts

By Curtis Vosti

HAMMOND, Ind. — Quick action on an asset/liability study last year allowed Northern Indiana Public Service Co. not only to lock in its gains from the bull market, but also to have a more stable level of contributions.

In part as a reaction to the balance sheet requirements of the Financial Accounting Standards Board's Statement 87, the study, done by the Chicago office of Goldman, Sachs & Co. Inc., prompted the Hammond-based utility a year ago to shift $114 million of its $300 million in assets to a bond portfolio with a duration of 12 years.

A recent follow-up study shows the company's shift from stocks has "locked in" equity gains from the five-year bull market; the new bond portfolio more than covers the duration of its liabilities; and contributions to the plan are relatively more stable at a slightly lower level than they would have been without the shift to fixed investments, according to Francis Girot, NIPSCO's manager of finance.

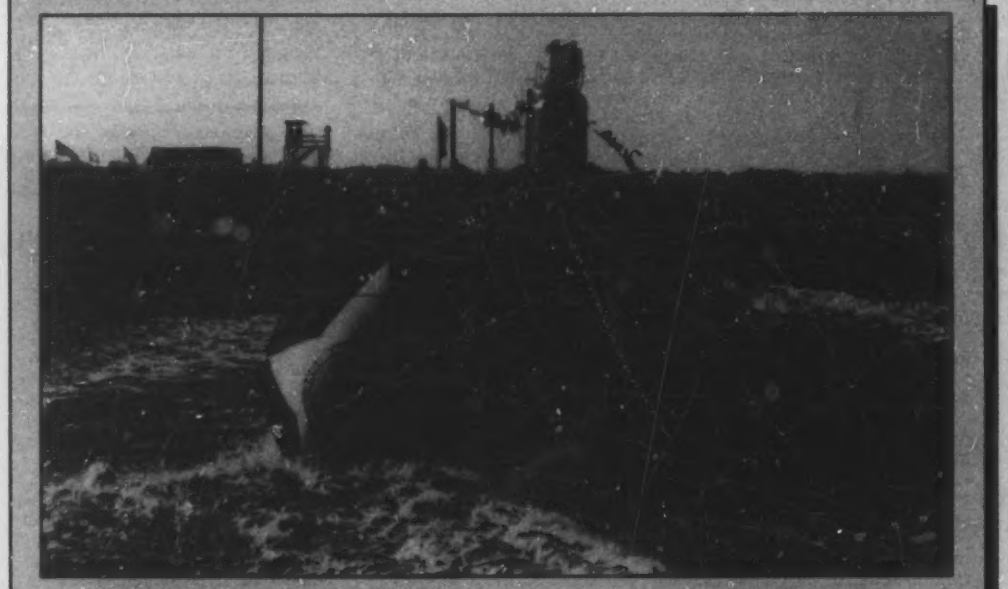
"The (Goldman) study showed that there would be volatility without the switch to bonds," Mr. Girot said. Though he declined to give details, Mr. Girot said "There was very substantial savings depending on what happened in the market.

"The approach we have now will reduce a lot of the volatility (in contributions) we faced with FASB," he said.

The imposition of pension liability balance sheet requirements by FASB 87 and the new limitation on deductions for overfunded plans have spurred many funds to do asset/liability studies.

Four years ago, Mr. Girot said, NIPSCO had a "substantially underfunded" plan, with only 60% of the assets needed to cover liabilities. At that time, the utility switched to a

*Continued on page 53*



General Dynamics Corp., which manufactures an array of military and commercial products, has trimmed the number of its plan's outside managers to 16 from 30 during the past few years.

# Trimming the team

## Large funds cutting manager rosters

By Nicky Robertshaw and Fred Williams

Some large pension funds, overloaded with money managers hired through the years, are beginning to cull their manager rosters.

The reductions are being achieved quietly and gradually, by allocating additional assets to existing managers, to index funds or to in-house management when money managers are dismissed.

In at least five companies, a total of 40 managers have been dropped since the mid-1980s.

Consultants, more than money managers and pension executives, believe the time for consolidation has come.

"The pendulum may have swung a little too far in terms of diversification, so that it's hard to make a case for replacing those managers," said Roger C. Bransford, national director-asset planning for TPF&C, Atlanta.

"This may be the front edge of a total examination by plan sponsors."

R.E. Shultz, vice president-pension asset management at RJR Nabisco Inc., Atlanta, said pension executives might be overdi-

## LATE NEWS

### GAO report confirms findings

WASHINGTON — A General Accounting Office study confirms earlier research that most private pension plans had net increases at the end of 1987 despite the Oct. 19 crash.

In a study of 174 pension plans sponsored by 92 companies and unions to be released this week, 158 of them had declines during the fourth quarter. Of that group, all but four ended the year with more assets. It also found defined contribution plans tended to have more big winners and losers, since the values of these plan assets were tied more closely to the values of one particular stock.

The study will be the subject of hearings before the House Ways and Means subcommittee on oversight this week.

### 1-share, 1-vote rule wins kudos

WASHINGTON — Shareholder rights groups praised the one-share, one-vote rule passed Thursday by the Securities and Exchange Commission, but were critical of a grandfather clause for companies with unequal voting shares already in place.

"I think it's excellent, and it's in line with what the Council of Institutional Investors wanted," said Roland M. Machold, chairman of the executive committee of the council and director of the New Jersey Division of Investment, Trenton. With the grandfathering up to July 7, however, "there were quite a few horses that got out of the barn," he said.

Under the rule, a company that recapitalizes in such a way as to reduce the voting rights of holders of common stock cannot list its stock on the exchanges or NASDAQ.

### Keystone proposes settlement

DALLAS — Keystone Consolidated Industries Inc. has offered a $5.2 million settlement in a suit brought by pension plan participants in its National Lock division in Rockford, Ill.

The participants contended, and a federal judge agreed, Keystone executives breached their fiduciary duty under the Employee Retirement Income Security Act by investing the Keystone pension fund's assets in stock of Amalgamated Sugar Co., Ogden, Utah, in 1982 (*Pensions & Investment Age*, Aug. 19, 1985).

Even though the fund later sold the stock at a profit, the transactions were not made solely in the interest of participants and beneficiaries, the judge ruled; investor Harold Simmons, who controls Keystone, was seeking to block a merger between Amalgamated and another company so that one of his companies could acquire Amalgamated.

Keystone's settlement offer consists of $3.9 million to be paid to the pension trust in 39 monthly installments of $100,000 and $1.3 million to be paid in 13 monthly installments of $100,000 to reimburse the plaintiffs for legal fees and other expenses, said Ralph End, Keystone's corporation counsel.

Officials at the Washington law firm of Feder & Associates, which represented the plaintiffs, declined comment.

### Funds add investment managers

• JUNEAU, Alaska — The $9.6 billion Alaska Permanent Fund decided Friday to add four domestic equity managers.

IDS Equity Advisors, Minneapolis; Loomis, Sayles & Co. Inc., Pasadena, Calif.; Miller, Anderson & Sherrerd, Bala Cynwyd, Pa.; and United Capital Management, Denver, will join the fund's three current domestic stock managers.

The seven firms will get about equal portions of the $900 million the Alaska fund has in common stocks, but no decision as to the exact allocations has been made, according to James R. Wilson, chief investment manager.

• HOUSTON — The $460 million Houston Municipal Employees Retirement Fund has hired JMC Capital Management, Metairie, La., to run a $15 million equity portfolio.

The system also placed $5 million with existing manager Equitec Institutional Realty Advisers Inc., Oakland, Calif., according to Cliff Tuttle, executive director.

Mr. Tuttle said the system terminated Texas Commerce Investment Management Co., Houston, and Loomis, Sayles & Co. Inc., Boston, which had managed portfolios of about $23 million each. Allocation of the remaining $26 million will be determined during the next several weeks, he said.

## Real estate survey out

Questionnaires for *Pensions & Investment Age*'s annual directory of real estate investment managers have been mailed out.

For your firm to be included in the Sept. 19 directory, please return the questionnaire by July 27 to Christine Philip, directory coordinator, *Pensions & Investment Age*, 740 N. Rush St., Chicago, Ill. 60611-2590.

If you have any questions or have not received a questionnaire, please contact Ms. Philip at (312) 649-5217.

# DOL probes investments of manager

By Joel Chernoff

NEW YORK — The Department of Labor is investigating investment activities by money manager Joseph H. Reich and the Reich & Tang L.P. pension and profit-sharing plans, *Pensions & Investment Age* has learned.

The investigation is believed to center on stocks of at least two small companies in which the company's retirement plans co-invested with Mr. Reich, his family members and business associates at the same time Mr. Reich served as trustee of the retirement plans. In one case, assets from a Reich & Tang-run limited partnership and accounts managed by Reich & Tang L.P. also were invested.

Reich & Tang is a New York-based money manager that runs $1.3 billion in tax-exempt money and $5.7 billion in mutual funds and a jumbo certificate of deposit product. Mr. Reich is chairman of the firm, although he has taken a less active role recently.

One Labor Department investigation involves a fight for control of Bomarko Inc., a Plymouth, Ind.-based packager, in which Mr. Reich successfully blocked a tender offer. The second involves investments in PCA International Inc., a Matthews, N.C.-based portrait photography studio chain rebounding from the brink of bankruptcy, where Mr. Reich gained a seat on PCA's board and a key role in the company's restructuring because of his group's stock ownership.

Although he stepped down as retirement plan trustee Jan. 4, according to PCA's 1988 proxy statement, Mr. Reich's actions as both investor and trustee could raise a number of legal questions under the Employee Retirement Income Security Act:

- Were the plans' investments used to bolster his position as a shareholder?
- Was he able to act solely in the interests of plan participants and beneficiaries?
- Were there any violations of ERISA's prohibitions on dealings between a plan and a related party?

Reich & Tang appears to have had some concerns about the independence of the transactions. After articles appeared in *P&I Age* in 1985 detailing the investments, Reich & Tang's board transferred to a named fiduciary the right to vote and sell shares owned by the retirement plans in the two companies.

As is their policy, Labor Department officials declined to confirm or deny that any investigation is under way. It is believed, however, officials are in the early stages of their investigation.

Mr. Reich and co-founder Oscar

# Funds' focus is global hirings

By Trudy Ring

International diversification was a priority for tax-exempt investors during the second quarter, with nearly $1.2 billion in international hirings reported, $1.1 billion for international equities alone.

With that figure, international equities outpaced all other alternative asset classes and all traditional ones except domestic equities, where there were $1.7 billion in hirings reported.

The figures are based solely on manager hirings reported in *Pensions & Investment Age* during the quarter; there might have been other hirings not publicized. (A complete listing of reported hirings begins on page 43.)

Passive management appears to be coming on strong in the international area; of the total in international equities, at least $215 million — almost 20% — was indexed. Domestic equity indexing was less popular, with only $150 million in new

# Medium-term notes:

## Volume grows, but questions remain

By Brad Rudin

Despite almost a 20% increase in the volume of medium-term notes and a substantial increase in market acceptance, some investment managers still are concerned about liquidity, pricing and yield.

Some also question the value of a point touted by dealers: The product can be used to match assets and liabilities because the issuer has the flexibility to structure a security that meets the investor's maturity and size requirements.

Despite these doubts, medium-term notes win praise from investors as a substitute for conventional corporate paper, especially at the short end of the yield curve. "There is no other real supply of short-term corporates we can buy in good size," said Christopher Harms, a fixed-income portfolio manager at Bear Stearns Asset Management, New York.

(Although many corporations issue commercial paper, the maturities on those issues only go up to 270 days.)

Institutional investors, meanwhile, are buying more medium-term notes than ever before.

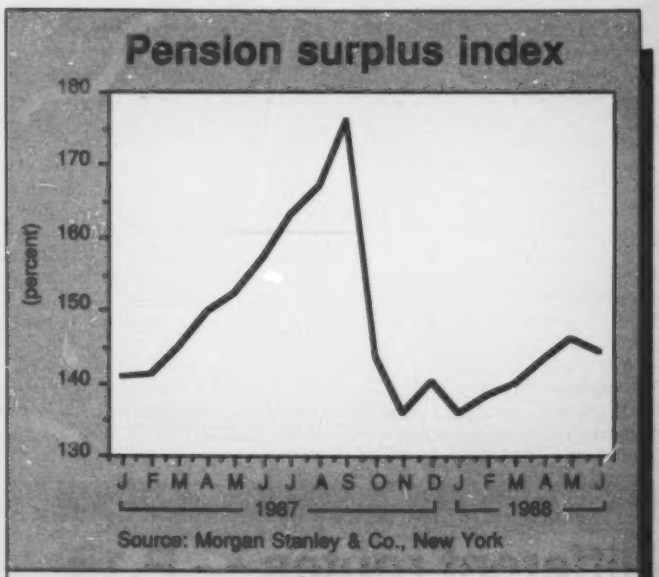
The medium-term note market grew to about $49 billion during 1987, compared with $41 billion during 1986, according to data compiled by Salomon Brothers Inc., New York. Based on annualized figures for the first quarter of 1988, the market is expected to reach about $93 billion this year.

Internally managed pension funds — government and corporate — accounted for 6.6% of the $11.5 billion in primary sales made by Merrill Lynch & Co. in 1987 compared with 3.5% of $11.2 billion in 1986, according to Alfred A. Kuskowski, senior vice president for marketing at Merrill Lynch Money Markets Inc., New York.

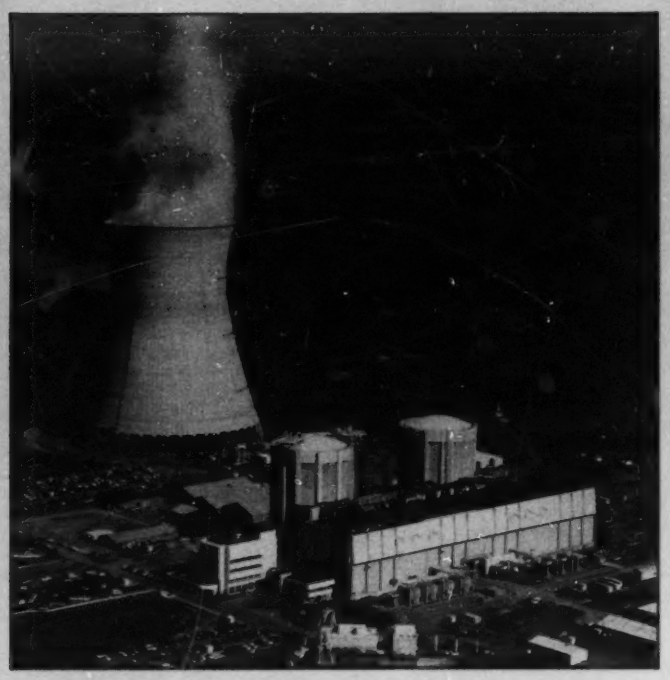
Merrill, the biggest player in the medium-term note market, could not break out how much it sold to investment management firms for pension accounts.

Figures supplied by Shearson Lehman Hutton Inc. show investment advisers and internally managed corporate pension funds accounted for 18.4% of the firm's

*Continued on page 47*



With this issue, *Pensions & Investment Age* begins publishing the Morgan Stanley Pension Surplus Index. Index values represent the ratio of assets to liabilities expressed as a percentage. The index will be published monthly.



The decommissioning of nuclear power plants, financed through external trust funds set up by utility companies, is expected to be a multibillion-dollar boon to the money management industry.

# Nuke trusts may be trove of $50 billion

By Trudy Ring

The Nuclear Regulatory Commission's new rule effectively requiring utilities to establish their nuclear decommissioning trusts with independent trustees and money managers could generate more than $50 billion in new business for the money management industry.

Prior to the NRC issuing its regulation last month, most utilities could collect money for decommissioning from ratepayers, keeping an account showing what has been collected, but not setting up a separate fund. The money generally was invested in utility operations.

With the external funding, the trust funds, like pension funds, receive contributions from the sponsoring utility.

There are two types of trusts, qualified and non-qualified. Contributions to a qualified trust are tax-deductible when made, like contributions to a pension fund, but may be invested only in certain fixed-income securities approved by the Internal Revenue Service. In a non-qualified trust, costs are not tax-deductible until the time decommissioning begins.

*Continued on page 50*

# Timers reverse cash positions

By Trudy Ring

Many of the market timers and tactical asset allocators that made big moves to cash earlier this year moved back into the stock and bond markets in June, redeploying slightly more than $1.9 billion.

In many cases, the managers moved all or nearly all of their assets under management. Lack of liquidity in the markets, the falling dollar, rising interest rates and deteriorating stock and bond prices were reasons given by various managers for moves out of the markets (*Pensions & Investment Age*, May 30); reversals in these trends accounted for the moves back in.

Among the larger moves:

• Wilmington Trust Co., Wilmington, Del., moved its $750 million in quantitatively managed bond portfolios to a fully invested position from cash toward the end of June. The trust company had moved these accounts into cash in mid-March. In its $500 million equity portfolios, Wilmington Trust retains the 10% to 12% cash position it has had since the fourth quarter of 1987.

• Consistent Asset Management Co., Wilmington, Del., switched its $300 million under management to bonds from cash the last week in June. In March, the firm, which then had $250 million under management, had gone 100% into cash from bonds.

• Davis, Weaver & Mendel Inc., Atlanta, moved its $190 million in equity accounts to full investment by June 3, after having had 60% of that amount in cash at the end of May. It also moved its $50 million in fixed-income portfolios to 100% long bonds from 100% cash in June.

• Schield Management Co. Timing Service, Denver, moved its $133 million in equity accounts to a fully invested stance as of June 22. The firm had gotten out of the equity markets May 19. In June, it also reversed position on its $2 million in bond accounts, to full investment from cash.

• Avatar Associates, New York, raised its equity allocation to between 75% and 80% from 55%. It moved to the 55% level from 100% equities during March and April. Avatar has $1.5 billion under management, shifting between stocks and cash.

• R. Meeder & Associates Inc., Dublin, Ohio, moved its $350 million in equity accounts to an 85% invested position from a 50-50 stock-cash split it had maintained since the beginning of the year. The firm also moved its $50 million in bond accounts to full investment from almost all cash, after having gone into cash two months ago.

• Lesesne & Co., Atlanta, moved its $60 million under management to 100% equities after having gone into cash in April.

• R.M. Leary & Co. Inc., Denver, moved its $20 million under management into equity mutual funds from money market funds June 1 through 9. The firm had switched to the money market funds in late April and early May.

In a smaller move, Dana Investment Advisors, Brookfield, Wis., increased the firm's $30 million in equity portfolios to a 38% invested stance from only 5%. Dana had been out of the market longer than the others, too; it had a 95% cash position in the equity portfolios since January.

Also, Matrix Capital Management, Greenwich, Conn., moved its market-timing accounts to their normal equity exposure in the past month, after having been somewhat underweighted in equities previously. The normal exposure varies for each account, said Michael A. Petrino, president; he did not have a dollar figure for the amount moved back to the market. Matrix has $200 million in market-timing accounts.

Officials at Wilmington Trust and Consistent said they were encouraged by upward trends in the prices of U.S. Treasury securities. Daryl L. Hudson, chairman of Consistent, also mentioned the rising dollar as a reason for becoming fully invested.

"The momentum of stock prices" (of stock prices) "is now the highest it's been in three years."

**Marshall Schield**
**Schield Management**

The momentum of stock prices also is encouraging, said Marshall Schield, president of Schield Management. The firm follows 4,000 stocks, looking at their current prices relative to their 15-week moving average. "The momentum is now the highest it's been in three years," Mr. Schield said.

"The bottom line is the trend and momentum have moved up,"

# Outlook bright

## Economists doubt '88 slump

By Curtis Vosti

The majority of economists surveyed by *Pensions & Investment Age* agree there is little chance of a recession by the end of 1988.

Surprised by the resilience of the economy in the first half, the economists believe the economy will moderate a bit during the remainder of the 1988.

The October market crash was still very much on their minds when they made their initial projections in December.

At year-end 1987, three of 16 economists predicted a first-half real growth in the gross national product at or above the 3.3% figure now estimated by many economists. The U.S. Department of Commerce has reported the first-quarter GNP grew by 3.6%; first-half figures are due July 27.

David Levine, chief economist for Sanford C. Bernstein & Co., New York, was one who didn't think the October crash would affect the economy's growth.

Mr. Levine had predicted a whopping 6.7% GNP growth during 1988's first half.

Most consumers don't own stock, he said, and therefore didn't lose money in the crash. Those that did weren't apt to cancel purchases that would affect the GNP.

"If you don't buy that extra Persian rug, it doesn't affect the GNP," Mr. Levine said. "If you don't buy an existing second house, it doesn't affect the GNP. If you decide not to buy a diamond, you affect the South African GNP, not the American GNP," he said.

Nonetheless, Mr. Levine said consumer spending fell short of what he expected, leading to a first-half growth rate about half of what he predicted.

In December, he predicted a 4.3% growth rate for the second half of 1988.

Mr Levine has revised that prediction to 4%.

**Recession**

In December, Robert Dederick,

# Merrill leader in underwriting

By Brad Rudin

NEW YORK — Merrill Lynch Capital Markets clung to its top-ranked position in the domestic underwriting rankings for the first half, but lost some of its lead over second-ranked Salomon Brothers Inc.

Although new-issue volume picked up in the second quarter, volume for the first half lagged that for the same period last year. Total domestic volume stood at $143.8 billion in the first half of 1988, down 9% from the $158.2 billion in the first half of 1987, according to data provided by IDD Information Services Inc., New York.

Domestic debt volume sagged 1%, to $124.3 billion from $125.6 billion a year earlier. Common stock volume, still feeling the effects of Oct. 19, skidded about 38% to $16 billion from $25.6 billion.

The demand for capital in capacity-strained, export-oriented industries and an increase in debt-financed corporate takeovers lifted debt volume in the second quarter, according to Salomon Brothers research.

A steepening yield curve in April and May encouraged corporate borrowers to rely on commercial paper and bank loans, but a 40 basis-point drop in corporate yields in June brought issuers back to the bond market, the Salomon report said.

Increased volume in the debt market works to Salomon's advantage in the league tables because of the firm's traditional domination of the bond business. Salomon emerged as the biggest underwriter of corporate debt in the first half, after finishing in second place below Merrill in the first quarter.

Merrill took 15.1% of the total domestic underwriting business in the first half compared with Salomon's 14%; in the first quarter, Merrill had a 17.2% slice compared with Salomon's 14.3%, according to IDD.

Merrill's underwriting volume in the first half of 1988 resulted from such issues as the Templeton Global Income Fund ($1.1 billion), Mobil Oil Canada Ltd. ($500 million), The CIT Group Holdings Inc. ($500 million) and Chrysler Financial Corp. ($300 million).

Merrill's ability to finish 1988 on top depends in part on the pace of corporate debt issuance, said

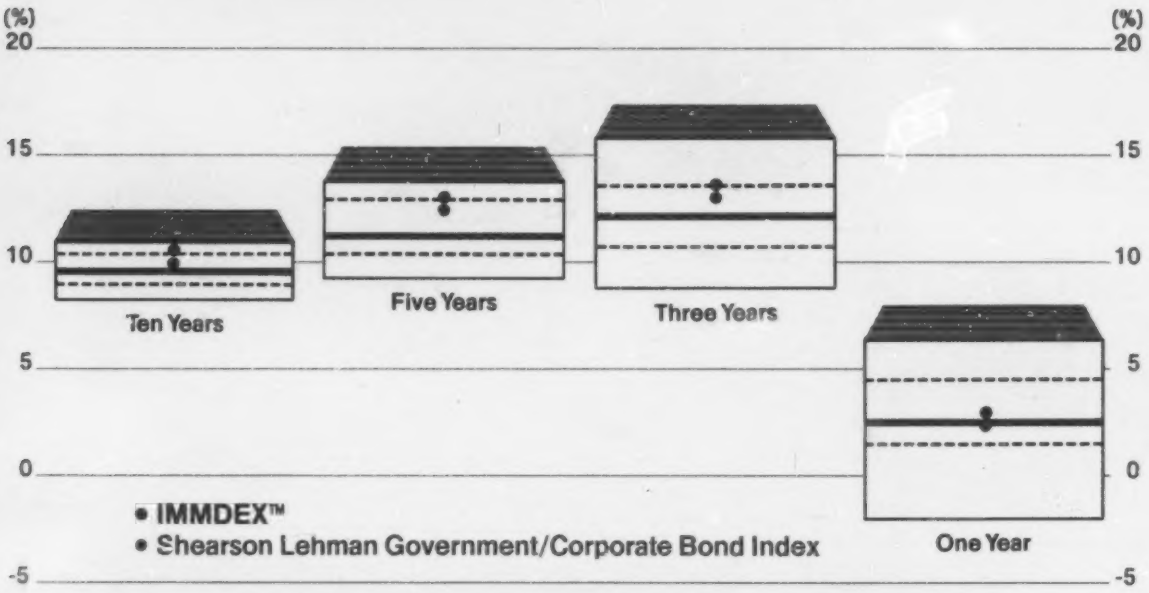
Bond Indexation with the IMMDEX™ advantage.



Bond fund total rates of return for periods ended December 31, 1987. Source SEI.

The Shearson Lehman Government/Corporate Bond Index has provided superior performance when compared to active fixed income managers. The Index has consistently provided first or strong second quartile returns over most time periods.

Immdex is a unique bond management system in which the annual return will **match** or **exceed** the index rate of return. On the basis of actual experience, **IMMDEX has added an average of 65 basis points of excess annual return to the Shearson Lehman Government/ Corporate Bond Index.**

Immdex accomplishes this objective through two strategies:

- The index rate of return is achieved through a proprietary duration-matching strategy.
- Immdex capitalizes on market opportunities to further enhance total return.

First Wisconsin Trust Company is a leader in the area of quantitative fixed income management and we believe that the Immdex advantage will prove to be an attractive alternative to your current bond management approach.

Let us review how Immdex provides positive tracking to the Shearson Lehman Government/ Corporate Bond Index and enhanced market returns through the use of bond management techniques. Call Robert Aubrecht at (414) 765-4906 or Charles Groeschell at (414) 765-4789 or write First Wisconsin Trust Company, First Wisconsin Center, Box 2054, Milwaukee, Wisconsin 53201.

FIRST WISCONSIN TRUST COMPANY

## CORRECTIONS & CLARIFICATIONS

- **Kennedy Associates Inc.**, Seattle, profiled in the May 23 issue, has $1.606 billion in real estate investments. The firm should have been 25th on the list of the largest managers ranked by equity real estate assets with $800 million and 12th on the list of the largest managers ranked by mortgage-backed securities with $726 million.
- **Michigan National Investment Corp.** is a subsidiary of **Independence One Investment Services**. Michigan National was identified incorrectly in Independence One's profile in the May 23 issue. Another Independence One subsidiary, **Morison Asset Management**, is a balanced and fixed-income manager. Its style was identified incorrectly in the May 23 issue.
- **Metropolitan Life Insurance Co.** will continue to do sale-leasebacks on its own, but also will work in cooperation on such transactions with United Trust Fund, a Miami-based sale-leaseback firm. In a June 13 article, a spokeswoman for United Trust Fund said Metropolitan Life's sale-leaseback business would be referred to United Trust.
- **Bankers Trust Co. — Investment Management Group** was omitted from a list of managers using fixed-income futures in the June 13 issue.
- **Erich Weissenberger's** name was spelled incorrectly in the June 27 story on Favia, Hill & Associates Inc.

FEATURE

# A top-down look at 'junk'

By Martin S. Fridson

With high-yield, or junk bond, debt representing 20% of the total corporate bond market, it is an asset category that is difficult to ignore, but costly to examine.

The necessary research and specific credit analyses preclude many institutions with limited management resources from investing in the debt. Investors continue to wonder whether top-down management skills they have developed in other markets can be transferred to the speculative-grade (i.e., below triple B) segment.

They see their market-timing talents of limited value, because low-rated bonds do not respond as directly as high-grade bonds to interest rate movements.

Their top-down approaches of identifying undervalued sectors of the market appear of little use if, as they might have been told, each high-yield issue trades on the basis of its unique credit characteristics, with no observable industry group effect. They believe active management strategies of the top-down sort are not productive in an environment where, they suppose, secondary market-making is sparse and dominated by a single firm.

These are proper concerns for the pension fiduciary investigating unfamiliar territory. To some extent, however, the questions reflect a lag in recognition of important changes that are making the high-yield bond sector more similar to other securities markets.

In the past few years, primary market share has been dispersed rapidly among several leading underwriters. While the perception persists among non-participants that the high-yield secondary market is monopolistic, portfolio managers familiar with the sector know that to get bigger pieces of the underwriting pie, competitors have had to expand their market-making activities as well.

This in not to deny that for many smaller issues the underwriter is the only firm providing research coverage or making a market. Such bonds represent a subsector of the high-yield market in which investment organizations lacking large in-house credit staffs may indeed be ill-equipped to operate.

There is another subsector, however, for which many pension investors are well suited. It is the so-called go-gos. These are large, liquid issues — in many cases created through recapitalizations of major companies formerly rated A or double A — and are well-adapted to the total-return style.

With perhaps six securities firms analyzing and making markets in go-gos, issues by such companies as Beatrice Cos. Inc., FMC Corp., R.H. Macy & Co. and Owens-Illinois Inc. typically trade with bid/asked spreads of about $5 per $1,000 face value. Such a spread typically is good for trades of par amounts up to $5 million, indicating the amount of liquidity available to investors without disrupting the market and influencing the bond's price.

Using this select group of go-gos, pension investors can implement top-down management strategies that resemble their approaches to other sectors and produce attractive returns at acceptable risk.

For example, an especially conservative pension fund might not be willing to allocate even a portion of its assets to a pure high-yield program, but might approve a hybrid strategy, combining high-yield bonds and Treasury securities. The proportions of the two asset classes within the hybrid portfolio can be varied, depending on market conditions and relative value. This is an active approach that will lend itself well to skills that are highly developed within many pension fund organizations.

There is sufficient volatility in the spread between high-yield bonds and 10-year Treasuries to make this hybrid strategy worthwhile. (The average maturity of junk bonds at the end of 1987 was about 10½ years.)

Between January 1986 and the end of last month, for example, the spread ranged between about 360 and 570 basis points.

Total return figures tell the same story. During 1987, high-yield bonds outperformed intermediate Treasuries through the first nine months, but were swamped (7.52% vs. 1.02% non-annualized) in the fourth quarter.

To quantify the benefits of market timing, imagine a hybrid portfolio with a maximum high-yield weighting of 50% and a minimum of 0%, with the balance invested in intermediate Treasuries.

A manager who read the market conditions correctly would have been at a maximum high yield position through Sept. 30 and fully invested in Treasuries for the balance of the year.

Allowing one full point of transaction costs on the switch, the hybrid portfolio would have returned 4.57% for the year, a significant improvement over the full-year −1.81% return provided by a pure intermediate Treasuries portfolio.

# Junk market

*Continued from page 40*

The hybrid strategy also would have reduced volatility — instead of a −6.31% loss in the third quarter on Treasuries, an investor would have lost only −3.84% with a 50/50 mix.

Another top-down technique that can be adapted from other segments of the capital markets involves swapping between industry subsectors. Today's high-yield issuers are fairly well distributed among a variety of industries, in contrast to conditions that prevailed five to 10 years ago. In 1987, the market totaled about $130 billion par value. These industry subsectors can display widely divergent returns, reflecting differing short-term and long-term credit trends, as shown in the chart.

Capitalizing on this variability of returns requires the use of a larger universe than just the go-go issues, and therefore a larger commitment of resources to individual-company credit analysis. If the resources are available, however, there can be a substantial payoff on correctly predicting the industry winners and losers.

Based on the 1987 range of total returns (from 15.08% in metals/mining to −4.12% in real estate/construction), let us suppose a manager had simply identified the industries that constituted the worst-performing quartile.

An equally weighted portfolio of the remaining 15 industries would have produced a return of 5.85%, vs. 3.81% for the passive 20-industry portfolio. (Because some high-yield issues are not classified among the industries Morgan Stanley & Co. tracks, the 20-industry return varies somewhat from the total return of 4.61% that we estimate for the entire high-yield universe in 1987.)

Correctly selecting the top half of the industry universe would have raised the portfolio's return to 8.13%, while concentrating on the top quartile would have earned 11.38%.

These results suggest a manager who is oriented toward spotting group trends need not be intimidated by the prospect of participating in a market in which bottom-up security selection has heretofore been the dominant style of management.

It is true that each year, painstaking credit work on individual issuers turns up a limited number of opportunities to realize 10% and 20% gains. The overall portfolio impact of these "home runs" might be limited, however, by single-issuer concentration restrictions — typically 5% of assets for high-yield mutual funds. ■

# Trends

*Continued from page 39*

the firm in a search.

He complained about "the inability of (some) managers to admit mistakes." He told a story about an unidentified investment manager with a big commitment to the energy sector, which began to turn around only after seven years of languishing. At risk of sounding as if he were endorsing emphasis on short-term results, Mr. Lincoln said he "found seven years beyond the pale of human tolerance."

In addition, he said he looks askance at "a manager that tries to change the name of his style to fit what's in vogue," or those that pick unique time periods, or inappropriate benchmarks, to report performance.

He also stressed that managers must be sensitive to clients. Without mentioning names, he told of a manager, vying for an assignment, who appeared before representatives of a union fund bragging about the quality of its computer-produced reports. The union, Mr. Lincoln noted, represented printers; it didn't even allow the manager to finish the presentation.

"We want people who can do (a presentation) well," Mr. O'Donovan added. "It takes a lot of skill. . . . We don't want any surprises."

He mentioned an unidentified manager pitching to a group of nuns for an assignment.

Without any forewarning, the manager "decided to do part of the presentation in Latin. The nuns didn't speak Latin." The manager didn't get the business.

Both Messrs. O'Donovan and O'Leary assailed the practice of some managers to use their track records at a former firm as part of the historical performance of their current firm. Mr. O'Donovan said the records were irrelevant because the investment process and contributors at each firm would be different.

Of the three consulting companies represented on the panel, Mercer-Meidinger-Hansen is the only one that doesn't accept soft-dollar payment. Mr. O'Leary noted Callan presents its clients with bills in hard dollars, "but 70% of clients elect to pay us in commission dollars."

"I'd love to see soft dollars go away," he added. "Unfortunately, I think they are going to be around for some time."

But Mr. Lincoln said "the public record of abuses of this will put pressure" for the elimination of soft dollars. "It's a question of when, not a question of if."

None of the panelists specified any abuses. ■

# is building tomorrow's smart network today.

BellSouth's telephone operating companies, Southern Bell and South Central Bell, serve over 14 million customers with a telecommunications system so advanced it's already the foundation of tomorrow's smart network known as ISDN.

The future of telecommunications lies with advanced, sophisticated digital network technology. And the future belongs to those companies that will capitalize on the potential of this technology both strategically and profitably. BellSouth is planning to do just that.

The BellSouth telecommunications system is capable of handling the high-speed requirements for advanced network implementation. This means BellSouth is not only working to reduce costs and improve revenues now, but is preparing for the implementation of Integrated Services Digital Network in the future.

BellSouth is working closely with the international community to develop universal standards for ISDN and is prepared to realize the potential of a network that is state-of-the-art in design and global in scope.

Developing and applying new technologies such as ISDN is consistent with BellSouth's commitment to maintain high service standards, to emphasize telecommunications and to pursue orderly corporate growth. The building for tomorrow is taking place today.

index fund accounts reported during the quarter.

Observers said domestic stock indexing might have reached a saturation point, while international indexing still has far to go.

Although active management attracted more business than indexing overall in both international and domestic investing, some of the largest single accounts were for index funds: the Employee Retirement System of Rhode Island and the New York-based Rockefeller Foundation each moved $150 million to equity index accounts. Because of this, prominent indexers are the top two firms in assets gained during the quarter: Bankers Trust Co. — Investment Management Group, New York, and Wells Fargo Investment Advisors, San Francisco.

Although international managers are predicting huge inflows into international fixed-income indexing accounts, none of the $117 million allocated to international bonds during the quarter was indexed. Of the $836 million allocated to domestic bonds, actively managed accounts drew $661 million; dedicated or immunized portfolios, $100 million; and index funds, $75 million.

Domestic balanced management accounted for $144.5 million; also, one $20 million global balanced account was reported. There was $96.5 million in accounts defined as "active" or "tactical" asset allocation; real estate accounts drew $609 million; venture capital, $61 million; and guaranteed investment contracts, $38 million.

Hirings by public pension funds again contributed to the big numbers in the international area.

The $7.2 billion Public Employees Retirement Association of Colorado, Denver, doubled its international commitment by hiring three active equity managers for up to $100 million each. The $1 billion New Hampshire Retirement System hired its first two global bond managers for $15 million each.

Passive international strategies might stand to gain because of active managers' difficulty in outperforming market indexes.

That was the reasoning behind the $1.8 billion Rockefeller Foundation's $150 million shift to an enhanced passive strategy, managed by Wells Fargo, from active international managers.

Interest in international investing, however, might be peaking, some consultants said. "We don't see the trend continuing much longer," said James E. Yanni, senior vice president of Butcher Consulting Group, Pittsburgh.

"There is interest, but people are a little bit concerned that the dollar may have hit bottom," added Keith Stransky, vice president of Evaluation Associates Inc., Norwalk, Conn.

Styles come in and out of favor, and active management might be coming in, Mr. Yanni said. One reason might be the recent good performance of small-capitalization stocks, as opposed to the large-cap issues in the Standard & Poor's 500 stock index, he said. During the first quarter, the NASDAQ industrials returned 13.4% vs. the S&P 500's 4.8%.

Paul Berg, president of Berg Fiduciary Consultants Inc., Port Chester, N.Y., said pension executives seem to have the greatest interest in quantitative equity strategies.

Quantitative managers that had large or multiple new accounts in the quarter included The Chicago Corp., Denver Investment Advisors and Pittsburgh-based Triangle Portfolio Associates.

In real estate, the past quarter's numbers were buoyed by an apartment fund offered by Security Capital Real Estate Corp., New York; it drew seven clients and $74.5 million. In venture capital, First Chicago Investment Advisors' $50 million pooled fund helped the firm show the largest number of new accounts, nine, reported during the quarter. ■

# CIBA plan adds exec, advisers

By Marlene Givant

ARDSLEY, N.Y. — The $550 million CIBA-GEIGY Corp. pension fund has appointed a new pension executive, hired four fixed-income managers and might increase its allocation to venture capital and real estate.

Bob Hunkeler, formerly controller of the pharmaceutical division of the parent company, CIBA-GEIGY Ltd., Basel, Switzerland, has been named manager of trust investments.

In his new post, Mr. Hunkeler will develop recommendations for the long-term investment policy of the pension trust and evaluate the performance of managers. He will report to William J. McHugh Jr., director of trust funds, who previously held the position.

Mr. Hunkeler's first projects will include a venture capital search using Wilshire Associates, Santa Monica, Calif. The fund plans to allocate $10 million to four partnerships to get closer to a 5% venture capital target from the 2% in venture capital now.

Mr. Hunkeler also will undertake an in-house study of real estate to see if the fund should increase its allocation to 15% from 10%.

With all these asset allocation decisions in the works, the fund has shifted $70 million to intermediate-term fixed-income accounts as an alternative to cash.

Brown Brothers Harriman & Co., J.P. Morgan Investment Management Inc. and Chase Investors Management Corp., all of New York, each will manage $15 million. NCNB National Bank, Charlotte, N.C., will manage $25 million in its Stable Capital Fund. All portfolios will have maximum maturities of four years with average durations between 1.5 and 2.5 years.

The fund, which has 15% in fixed income, has a long-term target of 20% for the asset class. "This (set of hirings) was an intermediate step," Mr. McHugh said.

Assets came from accounts run by State Street Bank and Trust Co., Boston, the fund's custodian, which still runs short-term assets.

All four managers were appointed based on their success at running other CIBA-GEIGY accounts. Brown Brothers Harriman and J.P. Morgan run fixed income for the pension fund, NCNB runs real estate, and Chase runs an intermediate-term bond account for the company's 501(c)(9) plan.

The pension fund's asset mix is 45% domestic equities, 18% short-term assets, 15% fixed income, 10% real estate, 10% international and 2% venture capital. ■

Dennison Manufacturing Co.: global balanced; $20 million.

# $50 billion

*Continued from page 3*

Investment guidelines for non-qualified trusts are set by state utility commissions and may be more liberal than those of the IRS; for instance, California allows non-qualified trusts to put up to 60% of their assets in equities.

To date, many utilities that have set up trusts have opted for the qualified type, but some have set up both types of trusts because of limits on the amount of tax-deductible contributions to qualified trusts.

Also, because the tax deduction for contributions became law in the 1984 federal tax bill, money set aside before that for decommissioning is not in qualified trusts, said Harry Haynes, principal of William M. Mercer-Meidinger-Hansen Inc., Kansas City, Mo.

The assets of qualified trusts must be invested in certificates of deposit, Treasury and agency securities or municipal bonds.

"There's going to be a lot of money flowing into these trusts over a period of years," said Richard Marsh, director of benefit investments for Ohio Edison Co., Akron, which expects to set up a decommissioning trust later this year.

"There's a lot of interest from the investment community in this," he said.

"It's sort of a sure thing from their point of view."

The managers benefiting most from such trusts may be those with expertise in fixed income and experience with taxable as well as tax-exempt investing. The trusts' profits are taxable at an annual rate of 34%.

This makes municipal bonds an attractive choice, because their coupon income is tax-exempt, although capital gains on such securities are taxable, said Gerry Barth, portfolio manager at Morgan Stanley Asset Management, New York.

At times, however, Treasuries might have better after-tax yields than municipals' tax-free ones, he said.

Mr. Barth said there are 115 nuclear reactors in use in the United States; the decommissioning cost for each one could range from $150 million to $500 million, he said.

This would mean between $17.2 billion and $57.5 billion in decommissioning trusts. Other estimates have put the expected flow into trusts as high as $100 billion.

"It's a difficult number to put your hands on as to what the size will be," he said.

No definitive figures were available on how much already is in trusts, although more than one-third of the nation's utilities have established them.

Money managers might look to decommissioning trusts to replace some of the dollars they haven't been getting from pension funds the past few years, as companies have been able to lower pension fund contributions, Mr. Marsh said.

But they might have to be patient, said Christopher C. Arvani, assistant treasurer-banking at Detroit Edison Co.

"Our fund is a tiny fund — it's not the megabucks Wall Street is looking for," Mr. Arvani said.

Detroit Edison recently set up the decommissioning fund, hiring National Bank of Detroit as trustee and manager. It expects to contribute about $2.5 million a year.

As for funding, the new regulation states internal funding is not acceptable, leaving external as the only viable option, said Scott DuBoss, a partner in the Washington law firm of Bishop, Cooke, Purcell & Reynolds.

"Economists generally agree the internal mechanism is somewhat less costly than external," Mr. DuBoss said.

But the tax advantage of the external method makes up for this, he said.

Until about two years ago, two-thirds of utilities nationwide funded decommissioning trusts internally, Mr. DuBoss said.

That number has been decreasing as more utilities opt for external funding and some states (fewer than 20) require it. ■

# Merrill

*Continued from page 6*

Brenda McCoy, an equity analyst at PaineWebber Inc.

"If the bond market continues fairly strong, then I think Salomon will come out on top," she said.

Merrill, ranked third in 1987, had to muscle its way past the biggest players in the bulge bracket to take first place.

"People are obviously feeling pretty good," said Grant Kvalheim, head of capital markets at Merrill Lynch. "We're not managing the business on a quarter-by-quarter basis. The goal is to do it for the whole year."

Merrill Lynch got to the top by "bidding aggressively for corporate debt" and by underwriting large closed-end funds, said Michael W. Blumstein, an equity analyst at First Boston Corp.

Merrill dropped to second in the global underwriting rankings for the first half, swapping places with First Boston/Credit Suisse First Boston, which had ranked second in the first quarter.

Still, Merrill Lynch has much to be pleased about. The firm grabbed the No. 1 spot in the first half in both initial public offerings and total equity offerings, categories in which it had held second and third place, respectively, in the first quarter.

Merrill also has done well in earning healthy fees for its underwriting services, IDD data show. If all credit is given to the book manager, Merrill produced a total gross spread of $314.3 million. Deals managed by Drexel Burnham Lambert Inc. earned a gross spread of $253.9 million, making the biggest underwriter of high-yield bonds the second biggest producer of underwriting fees.

Although IDD data do not show how much of the gross spread each book manager took for itself in a co-managed offering, the figures offer a rough measure of the fees collected by underwriters.

Merrill's deals earned an average total gross spread of $1.786 million while the figure for Drexel is $3.096 million. Drexel's spreads are higher than Merrill's and most other major investment banks because of its prowess in the riskier and more rewarding non-investment-grade business.

Salomon Brothers, the second-ranked investment bank based on domestic underwriting volume, produced an average gross spread of $1.14 million while the deals managed by third-ranked Goldman, Sachs & Co. generated an average gross spread of $607,000.

Among other highlights of first-half underwriting:

- Drexel Burnham emerged from the first half with 46.7% of the high-yield bond business, compared with 41.5% a year earlier. News reports of federal inquiries into Drexel's high-yield operations apparently have had little negative impact on the firm's high-yield business.
- PaineWebber and Prudential-Bache Capital Funding scrambled back into the top 10 in domestic underwriting after finishing 17 and 11, respectively, in the first half of 1987. Kidder, Peabody & Co. and Smith Barney, Harris Upham & Co. dropped out of the top 10.
- Wheat, First Securities Inc. completed the first half with more total underwriting volume than Donaldson, Lufkin & Jenrette Inc. and Dillon, Read & Co. combined. Wheat, First finished the first half of 1988 with an underwriting volume of $2.1 billion. DLJ finished with $835.1 million; Dillon had $1 billion.

Wheat, First — a Richmond, Va.-based securities house — was the only firm from outside New York City to finish in IDD's list of the top 15 domestic underwriters.

- Salomon Brothers, the traditional leader in mortgage-related securities, finished second behind Goldman, Sachs. The positions of the two firms in the mortgage area was reversed in the same period last year. ■

R. Dederick

R. Rippe

R. Chandross

D. Bostian

*Continued from page 3*

executive vice president and chief economist for The Northern Trust Co., Chicago, said the chance of a 1988 recession was 50%. Now, the stronger-than-expected first-half showing has him predicting only a 10% chance, "just because something can always happen."

Mr. Dederick had anticipated the October market crash would have had a chilling effect on consumer spending and business investment, but "neither the consumer nor the businessman backed away as much as we thought," he said.

"They acted as if it didn't happen. They dodged from the bullet that we thought would at least hit them."

**Economic growth**

"Growth has been faster than expected," Mr. Dederick said. In December, he had predicted only a 1% real GNP growth. "The export boom and the capital spending boom gave consumers the wherewithal to increase spending at a faster rate than otherwise we thought they would be able to — and they did it," he said.

John Hekman, senior economist for Claremont Economics Institute, Claremont, Calif., said the strength of business investment was the biggest factor in the stronger-than-expected growth. The institute had predicted a 2.8% growth rate for the first half.

"For us, the most surprising development in 1988 has been the boom in business investment and how that's pulling the economy," Mr. Hekman said.

"We had said investment would help lead the economy, but it boomed more than we expected."

Richard Rippe, senior vice president and economist for Dean Witter Reynolds, New York, said a very strong improvement in net exports stemming from the lower value of the dollar, and a "big year" in capital spending — he said real business growth in the first quarter increased at a 21% annual rate — caused the economy to grow more in late 1987 and the first quarter 1988 than he had expected.

However, Mr. Rippe leans on the low end of his December prediction of a 2.5% to 3% growth for the second half of the year — now he calls for a "2% to 3%" growth for the second half because of the aging of the current business cycle and the possibility of sharp fluctuations in currency exchange rates.

Robert Chandross, vice president and chief economist of Lloyds Bank PLC, New York, said the greater-than-expected demand for credit, the moderately rising inflation rate and the willingness of the Federal Reserve Board to tighten credit should lead to higher interest rates in the second half of 1988.

While in December he had predicted rates of 6.5% and 9.35%, respectively, on 90-day Treasury bills and 30-year Treasury bonds, he is now calling for year-end rates of 7% and 9.75%.

Mr. Levine notes that even with the economy growing moderately stronger than anticipated, it is still not thundering.

"A strong economy does not mean 3% or 4% growth," he said. "Growth is very volatile historically," he said, noting that in 21% of the quarters in the past 35 years the economy grew more than 6%.

**Inflation**

Inflationary pressures through near-full capacity utilization and a tight labor supply were concerns mentioned by the economists contacted by *P&I Age*.

Mr. Levine said capacity problems and tightening labor markets were two factors leading him to call for a moderate rise in inflation, to 5.1% in the second half. In December, he predicted a 5% inflation rate for the first half, rising to 5.7% in the second half. But because the GNP did not grow during the first half at his predicted 6.7% rate, he revised downward the inflation prediction.

In December, Mr. Dederick had predicted a 4% inflation rate in both halves of the year; Mr. Dederick is now predicting a 4.6% inflation rate in the second half, after an apparent 4.5% rate the first half.

He thinks inflation will pick up, although he notes that could be offset by a continued soft oil market. "At the end of the year (1987), we thought the cyclical and inflation clocks would be set back by the market crash. They weren't," he said.

Although the Farm Belt drought was of concern to many economists, David Bostian of Bostian Research Associates, New York, said he doesn't think a continued Midwest drought would boost inflation.

"The immediate impact of the drought is deflationary rather than inflationary. It takes away from consumer spending elsewhere," he said.

Claremont's Mr. Hekman said he expects continued slow consumer spending — which he said turned down after a strong first quarter — to hold inflation down. The institute is sticking with its 3.5% inflation prediction for the second half of the year.

**Deficits**

Mr. Hekman said the lower dollar plus productivity gains should level off the trade and budget deficits.

In December, the institute expected the trade deficit in 1988 to be about $150 billion; it now is forecasting only a $135 billion deficit.

Lloyds Bank's Mr. Chandross said stronger growth abroad with the lower value of the dollar, combined with increased revenues from near-full domestic capacity utilization, bodes well for both the trade and federal deficits.

While in December he predicted a 1988 fiscal-year federal deficit of $160 billion, he said he now thinks 1988 will end with about a $155 billion deficit. The 1988 trade imbalance, which in December he had predicted would be $170 billion, is now on a target of $143 billion, he said.

Mr. Bostian said even though the dollar has rallied lately, he expects the trade deficit could even dip below $100 billion because of strong overseas demand and productivity and quality improvements by American manufacturers.

"American manufacturers are incredibly competitive," he said. "They have gotten their acts together."

Some of the economists don't expect the November presidential election to have much effect on action on the deficit.

While Lacy Hunt of Carroll, McEntee & McGinley Inc., New York, said "the big difference between George Bush and Michael Dukakis is that Bush doesn't have any expensive new programs," others thought the deficit would be confronted no matter who won.

"Whoever is elected president knows something will have to be done," said Dean Witter's Mr. Rippe, adding he is almost certain of "significant" budgetary action in 1989. "It is a question more about what we do than whether we do something about it," he said.

Added Mr. Bostian: "No matter who's elected, the deficit should come down." ■

# Swiss exchange is off to a good start

**By John Parry**

ZURICH, Switzerland — A surge of interest by institutional investors got Switzerland's fully automated options and futures exchange off to a flying start last month, despite some technical glitches.

During the first 21 days of trading — May 19 through June 17 — the Swiss Options and Futures Exchange logged 145,170 option deals, a daily average of 6,921, SOFFEX President Ernst Mollet said at a press conference. Mr. Mollet, a vice president of Swiss Bank Corp., one of the exchange's founders, said June 15 was the high mark so far, with 16,731 option deals.

Most deals were on calls rather than puts, which Mr. Mollet said was due to Swiss investors' cautious approach to the new exchange.

"But this is going to change," he said in a later interview. "One of the things that has surprised and pleased us is the way institutional investors moved into the SOFFEX market in the second half of its first month's operations. This shows that we are meeting a need."

SOFFEX, in which the major Swiss banks and the country's three stock exchanges have invested some $50 million in start-up costs, claims to be the world's first fully automated exchange. There is no trading floor, no shouted instructions and no paper — everything is handled from computer terminals in the 52 members' offices. The members now are Swiss-based banks, although foreign banks are expected to join.

The system is so successful, he said, SOFFEX is selling its software to the embryonic West German futures exchange, which hopes to be operational late this year.

"This is a logical development for us," Mr. Mollet said. "The London futures exchange is working with NASDAQ and the Amsterdam exchange with Chicago, so it's logical we would have an international link of our own."

The German link might be strengthened in the future with German stock futures and options contracts being traded on SOFFEX and vice versa, he said.

"There has always been a considerable interest by institutional investors here in German stocks, so why not eventually add them to SOFFEX," he said.

For the moment, SOFFEX trades options in 11 major Swiss securities; in the fall, it will offer options on 24 Swiss stocks. Foreign stocks "are in the pipeline," Mr. Mollet said. ■

Wall Street's traditional trading activities would be overhauled under a proposal for a single-price auction system by Kidder, Peabody's R. Steven Wunsch.

# Trading plan stirs debate

By Joel Chernoff

NEW YORK — R. Steven Wunsch is attempting to foment a revolution on Wall Street that will upset its revenue stream, shrink the role of market makers and ease the way for big institutions to transact their trades — and some people are listening.

Mr. Wunsch, a vice president in Kidder, Peabody & Co. Inc.'s financial futures department, proposes instituting a "single-price auction" within the operations of the New York and other major exchanges. One market participant describes the idea as "an electronic specialist book that cannot be biased."

With scads of regulators, investigators, investors and others still debating how to fix the markets after Black Monday, Mr. Wunsch's ideas are receiving new currency, particularly from institutional investors.

"I think Steve Wunsch is doing the only honest thinking on trading on the whole Street," said Theodore Aronson, a partner of Aronson & Fogler, Philadelphia.

Mr. Wunsch thinks U.S. markets need to adopt single-price auctions or risk losing out on volume to other markets as the ability to trade from remote terminals advances, global markets become more intertwined and securities products become more fungible.

Under a single-price auction system, buyers and sellers place their orders in an open book, in which everyone can see the order flow. The settlement price would be the one that matches the maximum number of buys and sells; all trades are transacted at that price. In the event of an imbalance, a re-auction would take place.

# Fewer firms replacing folded plans

By Carol Wiley

Incidences of corporations terminating pension plans without starting any successor plans have increased dramatically since 1985, and eventually could represent the majority of pension plan terminations.

The development is a "troubling" one, indicating the government might be fostering policies that lead corporations to "prematurely" terminate their pension plans, thereby depriving employees of their full benefits, said Roger Thomas, former counsel to the House Select Committee on Aging and now a partner in the Washington office of Bell, Boyd & Lloyd.

The impact on the capital markets, however, should be

# Ruling voided

## Court OKs use of reversion

By Nicky Robertshaw

ATLANTA — A federal court decision that virtually would have eliminated employer reversions of surplus pension assets was overturned after being reheard in the 11th U.S. Circuit Court of Appeals.

In rehearing Blessitt vs. Dixie Engine Co., the panel of 11 judges ruled that under the Employee Retirement Income Security Act, participants in a terminating plan are not entitled to benefits they would have accrued had they remained in the plan until retirement. The decision overturns last year's ruling by a three-judge appellate panel (*Pensions & Investment Age*, Aug. 10).

"The several relevant statutes, the regulations and administrative interpretations, the case law and policy considerations all indicate that Blessitt's position is untenable," the July 8 opinion said.

The ruling involves a $225,000 reversion taken by Atlanta-based Dixie Engine Co. after paying benefits accrued up to Dec. 31, 1982, the

## LATE NEWS

### Barings acquires Landauer unit

NEW YORK — Landauer Associates Inc. spun off its investment management unit to one of its institutional shareholders, London-based Barings Inc.

Barings took control of the unit — Landauer Advisors Inc. — in exchange for its 31% stake in Landauer Associates. The move is part of a larger reorganization of Landauer Associates.

John Wendelboe, managing director of New York-based Barings Investment Management Holdings Inc., Barings' U.S. subsidiary that will take ownership of the Landauer unit, said discussions are under way with several institutional investors about the possibility of acquiring a controlling position in Landauer Associates. Landauer Advisors runs $752 million in real estate assets, of which $110 million is tax exempt.

### Drexel unit buy-out completed

PHILADELPHIA — The long-awaited buy-out of Drexel Burnham Lambert Inc.'s money management unit occurred July 21. The unit was acquired by present management.

James Balog, formerly vice chairman of the securities firm, is chairman, based in New York. W. Thacher Brown, formerly senior vice president of Drexel Burnham Lambert Investment Advisors, has been named president of the firm. The company, renamed 1838 Investment Advisors, has $3 billion in assets under management, including $1.4 billion in tax-exempt assets. Terms were not disclosed.

### Ironworkers protest, pull assets

CINCINNATI — Trustees of the Ironworkers District Council of Southern Ohio and Vicinity $240 million pension fund voted July 19 not to renew a $4.4 million guaranteed investment contract with the Equitable Life Assurance Society of the United States because an Equitable subsidiary hired non-union contractors for a shopping mall renovation.

Assets from the GIC, which expired July 1, will be allocated equally to two of the pension fund's balanced managers — GAMCO Investors Inc. and Dreman Value Management Inc., both in New York — according to Leroy Oberding, business agent for the Ironworkers Local 44, Cincinnati, and spokesman for the District Council. Equitable still holds $30 million in GICs for the pension fund that will be reviewed as they come due.

Equitable did not return phone calls by press time.

### PBGC grappling with LTV again

WASHINGTON — The Pension Benefit Guaranty Corp. is going another round with The LTV Corp. — this time over a much smaller pension plan that has run out of money.

LTV wants to terminate the Continental Emsco Evansville pension plan sponsored by LTV Energy Products Co. The plan has a $9.3 million unfunded liability and 300 participants and cannot afford to pay out Aug. 1 checks to retirees.

The PBGC is urging LTV to contribute the $110,000 a month necessary to keep the plan alive and continue paying full benefits.

### Funds review assets, managers

• ST. LOUIS — May Department Stores Inc. has switched its defined benefit pension plan to totally passive fixed-income and equity investments, according to a May source.

Pension fund executives at May would not comment, but the source said the plan had terminated all its active equity managers and switched to passive equity investments at the end of June. Fixed-income managers were retained, but active management was discontinued. According to the 1988 Money Management Directory May has $376 million in total pension assets.

• DANVILLE, Va. — The City Employees Retirement System of the City of Danville has hired Thompson Siegel & Walmsley, Richmond, Va., to manage about $10 million in a balanced account, according to Eleanor Hawkins, secretary of the board of directors and plan administrator.

Sovran Capital Management, Richmond, previously the $43 million fund's sole manager, retains $33 million.

• SPRINGFIELD, Ill. — The $7.1 billion Illinois Teachers' Retirement System soon will appoint two managers to overlay the fund's $500 million international portfolio with active currency management.

**If you have any questions or have not received a questionnaire, please contact Ms. Philip at (312) 649-5217.**

# Bentsen blazed trail for Houston adviser

By Fred Williams

HOUSTON — Texan Lloyd Bentsen made his mark in the money management business more than three decades before he became the Democratic Party's nominee for vice president.

Indeed, his political success — including three terms as a U.S. senator — is grounded in a 16-year business career in Houston, where he built a diversified financial services business and helped launch one of the nation's largest investment management firms.

The Criterion Group, parent company of Criterion Investment Management Co., is an offshoot of a financial services company founded by Mr. Bentsen in 1955.

Charles Miller, president of Criterion, credited Mr. Bentsen with the firm's entry into the pension industry in 1969, when the firm was known as Funds Inc., by forming Funds Inc. Investment Advisory.

Mr. Miller had resigned his position as investment officer of the Teacher Retirement System of Texas in 1966 to join Mr. Bentsen at Texas Fund Management Co., a mutual fund management company owned by Mr. Bentsen. In 1967, Texas Fund Management became Funds Inc., and was merged into Mr. Bentsen's holding company, Lincoln Consolidated. Lincoln was a diversified financial services company with insurance as its primary business through Lincoln Liberty Life Insurance Co.

"He was one of the pioneers in the concept of a single company providing many financial services . . . a department store of finance concept. Had he stayed in business and tried to do that, he would have done it very successfully," said Mr. Miller.

Mr. Bentsen's direct involvement in the business ended when he was first elected to the Senate in 1970, Mr. Miller said, but Mr. Bentsen's family retained controlling interest in Lincoln.

In 1972, Lincoln Consolidated was sold to Illinois Central Industries, a Chicago conglomerate.

**Lloyd Bentsen is no stranger to investment management.**

Funds Inc. was spun off to Lincoln shareholders — primarily Bentsen family members — as a separate publicly held company controlled by the family, said Mr. Miller.

In 1976, Mr. Miller and a group of associates formed Criterion and acquired Funds Inc. — which had about $300 million under management, about half of which was tax exempt — from the shareholders.

Today, Criterion has almost $13 billion under management.

Mr. Miller said Mr. Bentsen has no direct connection with Criterion, although Mr. Bentsen's wife, Ann, was elected to the board of directors of Criterion's mutual funds group in 1986.

Mr. Miller is reluctant to boast of his friendship with the vice presidential nominee, but does not hesitate to express his confidence in the man, and fellow Texan, who could end up a heartbeat away from the presidency.

"It's my personal opinion that he knows more about the world financial system than anybody in U.S. government, and I mean anybody," Mr. Miller said. "He knows more from a practical and theoretical standpoint. He is very much more intellectually inclined than some people give him credit for. He studies continuously and has all his life continued to learn. I can tell that by how he talks and what he says on the occasions I do get to see him and what he does in public.

"His policies have been very pro-capital market and pro-investment. When he was chairman of the Joint Economic Committee (in the late 1970s) and even before (Ronald) Reagan came in, while (Jimmy) Carter was still president, he was talking about venture capital investments and needing more capital for the sys-

# Institutions rethinking board seat at Texaco

By Marcia Parker

Several proposals have been sent to Texaco Inc. management by the California Public Employees' Retirement System officials, who are negotiating a process to involve institutions directly in the nomination of members of the board of directors.

The California fund and the New York State & Local Retirement Systems have taken the lead in pursuing board representation for institutions. They obtained an agreement from Texaco management last month to involve them directly in the selection process for board members in time for the 1989 annual meeting (*Pensions & Investment Age*, June 27).

The agreement was widely interpreted to mean institutional investors would get direct board representation through at least one board seat. But Richard Koppes, counsel to the California fund, said that idea had been shelved because of serious fiduciary and liability issues.

Since the concept of insti-

*Continued on page 39*

# World tracking dollar, not vote

By Marlene Givant

Foreign institutions plotting their investment strategies are paying greater attention to the direction of the U.S. dollar than to the equally uncertain outcome of the U.S. presidential election.

Although foreign money managers, like many U.S. voters, are unclear about the policies of Gov. Michael Dukakis and Vice President George Bush, they believe regardless of who is elected, taxes will have to be raised to bridge the budget and trade deficits.

"A fair amount of problems are being put under the carpet. Whoever lifts up the carpet in November and January will have to deal with what he finds there," said Richard Katz, chairman of N.M. Rothschild International Asset Management Ltd., London.

But several managers are heartened by the U.S. dollar's recent rally and the beneficial effects a strong dollar could have on the trade deficit and interest rates. At the same time, they believe the U.S. stock market is attractively priced.

Managers bearish on the United States base their views not on the election, but on the unwillingness of the Reagan administration and the candidates to come to grips with major economic problems.

"The deficits require firm and decisive government action, which is unlikely before an election. Therefore, we're very cautious on the U.S.," said Alan McFarlane, director of the U.K. pension division of Ivory & Sime Pensions Ltd., Edinburgh, which manages $1.2 billion for non-U.S. clients. The firm's U.K. pension fund accounts, which usually have 10% to 30% in U.S. stocks, have no U.S. equities now.

N.M. Rothschild is looking to unload U.S. stocks in favor of attractively priced European stocks in such markets as France and the United Kingdom, which have their elections behind them. It also might invest temporarily in bonds, as yields in major markets worldwide have risen considerably, said Mr. Katz.

"The strongest period of economic growth is behind the U.S. Growth will almost certainly slow, if not go negative," he said.

"Neither candidate is likely to be as helpful to business and the stock market as the Reagan administration."

The U.S. election won't only affect domestic markets. J.A. Furlong, pension marketing director of Yamaichi Capital Management (Europe) Ltd., London, which runs $112 million in Japanese equities for U.K. pension funds, fears possible protectionist measures imposed under a Dukakis administration could hinder Japanese exporters.

"We're watching opinion polls like everyone else," he said. "If Dukakis gets in and restricts Japanese exports to the U.S., Japanese exporters will have to change export strategies and move into

INTERNATIONAL

# Investors gird for EC explosion

By Marlene Givant

International investment professionals are busily picking industries and stocks set to prosper through the lifting of European Community trade barriers by the end of 1992.

While only a few have structured their portfolios specifically to reflect the 1992 theme, almost all managers and investment analysts are focusing on Europe, knowing corporate profit margins will be squeezed and mediocre companies will disintegrate.

"1992 is an obvious exciting kicker for the whole case for investing in Europe, in addition to good valuations. . . . It's important to be in the right industries and companies because some won't survive," said Beatrice Philippe, managing director of Wertheim-Philippe International, New York, which runs $200 million for U.S. tax-exempt clients.

By Dec. 31, 1992, the EC overhaul would integrate 325 million consumers into one market (the United States has 250 million consumers); remove non-tariff trade barriers; free capital flows; make sales taxes more uniform; boost labor mobility; and open bids for government contracts. The gross domestic product would total $4.2 trillion, roughly equal to that of the United States, and the EC expects GDP to increase 4.5% by the time the plan is completed. In addition, the harmonization should add 1.8 million jobs and reduce inflation by 6%, according to EC figures.

At least a few observers think the 1992 phenomenon is being overblown and key issues involving national sovereignty have yet to be resolved. "Trying to pick winners and losers is absolutely futile," said Mark Cusack, managing director of U.K. research for Hoare Govett Ltd., London.

Still, many expect dramatic changes. At the forefront of investment planning is the prospect of increased mergers and acquisitions.

Asked to identify companies and global industries most likely to benefit from the 1992 process, 18 managers and analysts interviewed by *Pensions & Investment Age* zeroed in on large service companies, primarily in the financial services and the consumer area (*see accompanying chart*).

Insurance frequently was chosen to benefit from liberalization and bridging of price differentials, while two of the most popular sectors — advertising and food and drink — are expected to gain as pan-European brand recognition becomes important for the first time.

But there are hurdles. Alastair Ross Gooby, international strategist at James Capel & Co., London, said, "One of the great myths is that you can build up world brands."

Companies the experts picked — such as **Unilever** and **Saatchi & Saatchi** — were almost all large with the capital and foresight to expand. But, noted Hamish Parker, portfolio manager at Hill Samuel/Investment Advisers Ltd., London, "any company can benefit — small or large. The big company theme is slightly overstated." Companies not listed on exchanges also could boom, some experts said.

Managers clearly are preparing for the changes. Two-thirds of the names in Wertheim-Philippe's international portfolios are 1992-related. Matuschka-Moser Partners, Greenwich, Conn., is offering a venture capital fund to invest in companies in the United States and abroad that likely will benefit from the changes. Capital Management International of Deutsche Bank, New York, has set up a team to explore implications of 1992 for investments.

Baillie Gifford Overseas Ltd., Edinburgh, Scotland, has half of the foreign equities it invests for U.K. funds and 40% of its $130 million in U.S. pension fund money invested in the Continent — but based on valuations, not the 1992 theme. "We're not clear there are obvious portfolio conclusions to be drawn from it," said Richard Burns, partner.

But Rolf Breuer, a director of Capital Management International, expects mergers and acquisitions activity to at least double in the next four years; he said the prospect is influencing many firms' buy decisions.

Activity already is under way. In the food and beverage industry, for instance, Switzerland's Nestle S.A. acquired Britain's Rowntree PLC, and Switzerland's Jacobs Suchard S.A. acquired Belgium's Cote d'Or.

For non-EC European countries it will be "critical" to obtain a foothold, said Dorian Foyil, European research analyst at UBS-Phillips & Drew Global Research Group, London, and editor of its report, "Europe 1992: Breaking Down the Barriers." Sweden and Switzerland, for example, export to the EC more than half of the goods they produce.

Non-EC companies might buy small companies with a national presence and expand them across Europe, or buy niche companies.

The Japanese are coming, too. Andrew Smithers, senior resident director of S.G. Warburg & Co. Inc., Tokyo, sees more portfolio as well as corporate investment by the Japanese in Europe. Non-EC countries like Japan are taking a "Trojan horse" approach to the process: for example, Spain's **Motor Iberica** is a subsidiary of Nissan, said Mark Edwards, vice president of Rowe Price-Fleming International Inc., Baltimore, which runs more than $2 billion for U.S. tax-exempt clients.

The Japanese, because they are the chief among low-cost producers, should excel with the 1992 plan, said Ian Henderson, director of Wardley Investment Services International Ltd., London, which runs $65 million for U.S. tax-exempt clients. U.S. companies are

# Ireland developing finance capabilities with eyes on future

By Joel Chernoff

DUBLIN, Ireland — Ireland is making its bid to become an international finance center — just in time for 1992's deregulation of European trade and financial barriers.

Proponents are touting the new International Financial Centre, being constructed in a previously run down section of Dublin, because of its low-cost advantages to other European locations. Like Luxembourg and Paris, they hope to develop a niche for Dublin in the European financial community.

Thirty-eight companies, including Citicorp and Chase Manhattan Corp., have applied for licenses to operate in the center, which is scheduled to open next year. While most of the companies are setting up business in large-ticket leasing and asset financing, center officials now are focusing on attracting European and U.S. money management operations.

Officials hope low costs, a special 10% corporate income tax rate, modern telecommunications systems and a skilled population will lure financial services companies to Dublin.

"We're really a nation of horse traders, but we've brought our horse-trading skills into the 20th century," said John C. Corrigan, director and investment manager of Allied Irish Investment Managers, Dublin, which manages $2.5 billion in assets. The subsidiary of Allied Irish Bank is a tenant.

Liberalization of European barriers on movement of capital and trade in 1992 will aid the center, proponents hope. New rules lifting barriers on unit trusts — making it possible to set up operations and market anywhere in the European Community — go into effect next year.

Even last October's stock market fall seems to be working in the center's favor, as companies have become more cost conscious, said P.J. Daley, executive vice president of the Irish Development Authority, Dublin, the firm marketing the center.

While the main sources of business are expected to come from leasing, asset financing and money management, the center also is touted as being attractive for corporate treasury management using multicurrency techniques.

Overseas companies can keep their accounts in currencies of their choice for tax purposes, an unusual feature, noted David P. Hanna, executive vice president of the Irish Development Authority. Irish subsidiaries of Digital Equipment Corp. and Texaco Inc. have signed up as tenants.

Wang Laboratories Inc.'s worldwide leasing operation also signed a lease in the 750,000-square-foot International Financial Services Centre, which officials believe can accommodate a wide array of financial activities, including money management, treasury management, banking, securities trading, insurance and back-office operations.

Other tenants include a Citicorp-affiliated securities firm, Gandon Holding PLC; British & Commonwealth Group, London, one of Britain's largest financial services firms; James Capel & Co., London, a British securities broker; and Krediet-bank, Brussels, a Belgian bank. Also, Allied Irish Bank and Bank of Ireland have committed to 150,000 and 60,000 square feet, respectively.

**The International Financial Centre, part of Dublin's Custom House Docks Development shown here, enhances Ireland's stature in European finance.**

The financial center, scheduled to take in its first tenants in September 1989, is the first phase of the $500 million Custom House Dock Development. In five years, the development will include an international trade center, four other office buildings, a hotel and conference center, and retail and residential buildings. One million square feet is expected to become available during the first two years, of which 400,000 square feet is committed.

Located beside the 18th century Dublin Custom House on the River Liffey, the project was designed by Benjamin Thompson & Associates, Cambridge, Mass., ar-

*Continued from page 29*

expected to wait for a stronger dollar before they accelerate European expansion.

As long as the EC policy on cross-border acquisitions remains unclear, activity is sure to increase. Most acquisitions are expected to take place where they are restricted least — in the United Kingdom, France and Spain.

Managers and analysts mentioned a wide list of takeover targets. Dominic Freud, senior international equity analyst at Banque Paribas Capital Markets, New York, said, "Almost any company with an interesting marketing position or an interesting brand which is not particularly enormous would be viewed as a potential target."

Many experts expect French beverage companies **Perrier** and **Pernod Ricard** and Italian paper company **Cartier Burgo** to be taken over.

Mr. Foyil mentioned **Jaguar** (when the U.K. government's "golden share" in the company expires in 1991, allowing foreign control) as a target; Mr. Burns of Baillie Gifford cited U.K. financial service company **Morgan Grenfell** as well as **Sun Life Assurance**, because it is held by many Australians, who are aggressive raiders.

Peter Chambers, vice president and head of European equities at Citicorp, which manages more than $100 million for U.S. tax-exempt clients, thinks the Spanish chemical company **Energia & Industrias Aragonesas** and **Royal Bank of Scotland** are likely targets.

Rowe Price-Fleming's Mr. Edwards cited **Feldmuehle Nobel**, a German materials and commodities company, and **Arjomari-Prioux**, a French forest products and paper company. His holdings include small companies — such as **Elsevier**, a Dutch publishing company and **Vallerhemoso**, a Spanish property company — he thinks will seek strong partners.

Despite the opportunities, the 1992 plan is met with ample skepticism. Key issues include whether the EC countries will adopt a single currency, a central bank and coordination of fiscal policies.

Hoare Govett's Mr. Cusack said harmonization is "not in politicians' own interests since they are essentially voting away their own reason for existence."

Also, less than one-third of the 300 directives due to be completed by year-end 1992 are in the works and few believe all will be ready by the deadline.

Practical concerns include the willingness of workers to move around and feasibility of looser border controls. "They could give a free reign to terrorism or soccer hooligans — how do you deal with that?" asked Henry de Vismes, managing director, Kleinwort Benson International Investment Ltd., London.

Governments still will resist foreign takeovers, as was the case in Carlo de Benedetti's failed attempt to take over Belgium's Societe General, said Philippe Piete, senior partner of World'Vest Base Ltd., Three Oaks, Mich. Restructuring through takeovers also will be difficult as EC companies might take cross-holdings in each other to prevent hostile raids.

Another obstacle includes governance of the huge market. "Who will manipulate that one rulebook (for the EC)? You could end up with each country's strictest rules," Hill Samuel's Mr. Parker said. ■

*Foreign Editor Joel Chernoff in New York and Paul Montgomery, Brussels, Belgium, also contributed to this story.*

Profiles of the leading consultants in the investment management industry will be appearing in the Oct. 17 issue of *Pensions & Investment Age*.

This is a complete list of the management firms with international/global assets under management that responded to the Top 50 survey in the June 27 issue.

OUR VIEW OF INVESTING OUTSIDE AMERICA

Following the period of retrenchment in the wake of the October crash, fund managers in America are once again looking overseas. But performance in the different markets has not been uniform in either equities or bonds. With the help of James Capel, a global investment house with close to 200 analysts covering 5000 companies on 25 stock markets around the world, institutional investors have more access to more international opportunities than ever before. The benefits associated with diversifying investments internationally are familiar to the experienced fund managers. Risk is spread and as the selection of stocks is increased, so too are the opportunities.

To make the most of these opportunities requires discipline, experience and the ability to interpret the implications of currency, macro-economic influences and market sentiment. Analysts must have the support of colleagues in different markets, across different time zones, in order to provide a perspective on their own specialty. Whether investing in a major market like Tokyo or an emerging market like Manila, the analyst advising you, or the salesman executing your instructions should not be working in isolation.

Our reputation is well established among the more sophisticated investors based in the United States and James Capel is not new in the international investment community. Nor are we a minor player. We were established over two hundred years ago and now have the largest market share of the institutional broking business in London. Our analysts have consistently topped surveys undertaken by the Institutional Investor magazine, Extel, the financial information service, The Association of Corporate Treasurers in London, The Sunday Times/MORI poll, Taylor Nelson, the market research firm, and many others. We are primary dealers in the UK gilt market, major participants in the Eurobond market, associated with the US Treasury experts CM&M and world leaders in many specialist services such as portfolio trading.

Corporate Finance is becoming an increasingly important part of the business and our clients are benefitting from our own global network of offices. It puts us in twenty one cities on four continents. We are also members of the HongkongBank Group.

So when it comes time to place some of your investments outside America, use the investment house which can offer you experience, expertise and execution. Talk to Peter Green at James Capel.

# Large funds in good health

By Brad Rudin

About two-thirds of the nation's 100 largest corporate pension plans are overfunded on an ongoing basis, according to a *Pensions & Investment Age* survey of 1987 annual reports.

The survey results actually minimize the extent of overfunding because several corporations sponsor both large overfunded and small underfunded plans. Pension accounting rules require a separate display of data for the overfunded and underfunded plans.

For example, General Motors Corp.'s overfunded plans have a $31.7 billion projected benefit obligation and assets of $38.5 billion, while the underfunded plans have a projected benefit obligation of $111.2 million and no assets.

The average plan in the *P&I Age* Corporate Top 100 had accumulated benefit obligations of $2.1 billion, projected benefit obligations of $2.4 billion and assets of $2.9 billion.

The accumulated benefit obligation is the value of all benefits earned to date, including nonvested as well as vested benefits. The projected benefit obligation is a measure of the liability for accumulated service reflecting future salary increases.

The five most highly funded plans, measured according to the amount of plan assets in excess of the projected benefit obligation, are sponsored by American Telephone & Telegraph Co., General Motors, E.I. du Pont de Nemours & Co., IBM Corp. and American Information Technologies Corp.

"Pension plans are considerably better off today than when this administration took office," said David M. Walker, assistant secretary of labor for pension and welfare benefits. About 80% of the plans were overfunded in January, compared with 59% in January 1981, he said.

The surge in the capital markets made possible by Reagan administration economic policy is the primary cause of the sound funding status, he said.

"Nothing will help pension plans as much as a fabulous equity market," said Jeremy Gold, a principal at Morgan Stanley Pensions, New York. "The best thing for the health of pension plans is a healthy American economy."

Still, legislative change could reduce the surplus that has been built up during the 1980s.

The Omnibus Budget Reconciliation Act of 1987 seems likely to reduce the surplus in overfunded plans because of a provision that sets the full funding limit at the lesser of the actuarial liability or 150% of accrued liabilities. The legislation also requires increased minimum funding requirements and increased Pension Benefit

Guaranty Corp. premiums for underfunded plans, provisions that should reduce the amount of unfunded liabilities.

"The new (funding) limitation trims back the surplus pension plans can accumulate," said Louis Kingsland, a senior vice president at Callan Associates, San Francisco. Plans that are well funded could become underfunded if their OBRA-reduced cushion were exposed to deteriorating capital markets, Mr. Kingsland said.

"Some amount of deterioration is inevitable because (plan sponsors) are not making contributions for the most part," said Lawrence Bader, a vice-president in the asset allocation group at Salomon Brothers Inc., New York. "I'd still say they are in excellent health. I'm not trying to pronounce the coming of doomsday."

The future funded status of corporate retirement plans depends in large measure on congressional willingness to continue tax-deductible pension contributions, said Samuel W. Halpern, an executive vice president at Bear Stearns Fiduciary Services Inc., New York. Federal budget deficits create a great temptation to raise revenue by further shrinking the tax-deductibility of pension contributions, he continued.

A resurgence of inflation and a faltering economy could shrink surplus pension assets in the not-too-distant future, said Roger Bransford, a consultant at Towers, Perrin, Forster & Crosby, Atlanta. "There's nothing to suggest that those kinds of things could not happen again."

The Department of Labor is studying the implications of OBRA's full funding limit, Mr. Walker said, adding that while the department supports the principle of a funding limit, it is not sure Congress acted wisely in setting the limit.

Bear markets do not pose a serious threat to overfunded plans even with the full funding limit, Mr. Walker said. "It's unlikely that market fluctuations would erode that cushion."

Review of the pension footnotes in corporate annual reports showed few of the top 100 plans posted an actual loss on assets. Loss or gain on assets — a component of pension expense — includes investment income as well as realized gains and losses from the sale of securities and the unrealized appreciation and depreciation of assets.

GM, with a $7.4 billion return, reported the largest gain on investments in the *P&I Age* Corporate Top 100. AT&T's $26.6 billion plan reported an actual gain of $1.4 billion, giving the company second place in return on assets. General Electric Co., sponsor of a $20 billion plan, came in third with $1.2 billion.

Even with investment gains, almost two-thirds of the companies in the Top 100 reported pension expense. Du Pont, however, booked pension income of $207 million while AT&T reported pension income of $316 million.

The companies surveyed were drawn from *P&I Age*'s annual profiles of the nation's 1,000 largest pension funds. Elimination of non-corporate plans, with adjustments for mergers and acquisitions, produced the *P&I Age* Corporate Top 100. ■

## Bethlehem boosts fund

By Curtis Vosti

BETHLEHEM, Pa. — Bethlehem Steel Corp. has gone on the attack against its huge pension liability and used much of the proceeds of a common stock offering to fund a $250 million contribution to the company's pension fund.

The nation's third-largest steelmaker, buoyed by strong investor interest and an upsurge in business, is aiming to reduce by more than 30% the $1.6 billion in unfunded accrued benefit obligations with which it began the year.

The unfunded accrued benefit obligation is the amount by which the company's pension fund would be underfunded if all of its 35,000 employees retired this year.

The first dent in the unfunded pension liabilities occurred in May when Bethlehem offered 10 million shares of common stock at $19 a share. A year earlier, Bethlehem's stock was mired in the single digits, partially due to investor concern about the $20 a ton the unfunded liabilities added to its steel-making costs, said Jeffrey Miller, a steel analyst with Duff & Phelps Inc., Chicago.

The offering, however, was snatched up, and about $170 million of the $184 million in proceeds from the offering was directed to the pension fund, said Gary Millenbruch, Bethlehem senior vice president and chief financial officer.

On June 1, the company contributed an additional $30 million to the fund from cash, followed by another $50 million at the end of the second quarter.

Mr. Millenbruch said if business continues as expected, Bethlehem will make additional payments this year,

# Lawsuits embroil firm

## Unauthorized trading alleged

By Barry B. Burr

EVANSTON, Ill. — Unilateral trades ordered by an ousted principal of Disciplined Investment Advisors Inc. caused a client to lose $2 million in the market, although the money management firm has never informed the unidentified client, according to allegations in a lawsuit and by representatives of the firm.

The alleged costly trades are revealed in a 16-page suit against Daniel J. Schweihs, the ousted principal. The suit was filed by Eugene M. Lerner and William J. Breen, the two remaining principals of the firm, who also are tenured professors of finance at Northwestern University's Kellogg School of Management.

Mr. Schweihs' ouster, the filing of the suit and Mr. Schweihs' subsequent countersuit mark the bitter breakup of the firm's three-man team. The three, who share ownership equally in Disciplined Investment, made the firm one of the fastest growing of the newly founded money managers of the decade's bull market. Started virtually from scratch in 1984, it now has $600 million under management in equities. The two professors continue to run the firm.

Disciplined Investment's clients, predominantly corporate pension sponsors, include the pension funds of Xerox Corp., Armstrong World Industries Inc., San Diego Gas & Light Co. and the Pension Benefit Guaranty Corp., according to a court filing listing 45 clients.

The clients, although they had been informed Mr. Schweihs had left in late April, never were told of the lawsuit that was filed some weeks later, or of the allegations contained in it, according to pension executives.

None of the pension executives was aware of the alleged unilateral trades. They declined to comment on the allegations in the suit or countersuit.

"I'm a little surprised about it," Robert J. Harmon, director of the Illinois State Board of Investment, Chicago, a client, said of the lawsuit. "One doesn't

## LATE NEWS

### 401(k) plan regulations released

WASHINGTON — In its long-awaited regulations on 401(k) plans issued late last week, the Department of the Treasury has decided to retain hardship provisions for active employees to withdraw funds from the plans.

The regulations follow the current practice of allowing an employee to withdraw money to pay for college education, catastrophic medical expenses or the down-payment on a house. Employers had urged easing the hardship standard, arguing stringent rules would deter employee participation.

### Dai-Ichi buys stake in realty firm

CHICAGO — Dai-Ichi Mutual Life, Japan's second largest insurance company, has acquired a 20% limited partner interest in LaSalle Partners Ltd., a Chicago-based real estate services firm, according to industry sources.

LaSalle has sought a partner for the purpose of infusing capital into the firm. Terms of the deal weren't disclosed.

Gretchen F. Needham, vice president-communications for LaSalle, would neither confirm nor deny the transaction. LaSalle *Partners is the parent of LaSalle Advisors Ltd.*, with about $2.22 billion in tax-exempt assets.

### Insider trading proposal gains

WASHINGTON — Investment advisers and broker-dealers would be held liable for overlooking insider-trading or for failing to police that activity under a bill passed by the House Energy and Commerce Subcommittee on Telecommunications and Finance late last week.

The bill, which would toughen penalties for trading on material non-public information, says broker-dealers and investment advisers are as liable as the individual responsible for the illegal trade if they "knew or recklessly disregarded" facts that would give them reason to believe insider trading occurred. They also would be liable for "knowingly and recklessly" failing to establish, maintain or enforce" procedures designed to prevent violations.

### Touche Remnant share acquired

BOSTON — Liberty Mutual Insurance Co. has acquired a 15% interest in Touche Remnant Holdings Ltd., the London-based holding company whose subsidiaries manage more than $6 billion in institutional and individual assets.

The investment will help Boston-based Liberty Mutual and its Chicago-based subsidiary, Stein Roe & Farnham, to offer international investment products managed by Touche Remnant. Stein Roe manages more than $13 billion.

### UAM acquiring 20th manager

BOSTON — United Asset Management Corp. agreed to buy Sirach/Flinn, Elvins Capital Management Inc., a Seattle-based manager with $700 million in assets. Terms weren't disclosed. The purchase would bring to 20 the money management companies UAM owns and increase its total assets to $28.2 billion. The five principals of Sirach/Flinn will have long-term employment contracts with UAM.

### Funds change manager rosters

• MORRISTOWN, N.J. — The $7 billion pension fund of Allied-Signal Inc., Morristown, N.J., has hired MIG Realty Advisors Inc., West Palm Beach, Fla., to make direct, separate account investments in real estate, said Edward T. Tokar Jr., vice president-investments.

No specific amount was allocated and no investments have been made yet. Assets will come from cash.

• COLUMBUS, Ohio — The Ohio Police and Firemen's Disability and Pension Board, overseeing $2.5 billion in defined benefit assets, released The Travelers Cos., Hartford, Conn., as an active equity manager and hired three other firms to run the $300 million portfolio, said Ted Hall, manager-investments.

Taking over equal shares of the Travelers account are Atalanta/Sosnoff Capital Corp., New York; Loomis, Sayles & Co. Inc., Detroit; and Oppenheimer Capital Corp., New York.

## Consultant survey out

Questionnaires for *Pensions & Investment Age*'s annual directory of investment management consultants have been mailed.

If you have not yet received a questionnaire and wish to be included in the Oct. 17 directory, contact Christine Philip, directory coordinator, *Pensions & Investment Age*, 740 N. Rush St., Chicago, Ill. 60611-2590; (312) 649-5217.

Questionnaires must be returned by Sept. 5. If you have any questions, contact Ms. Philip.

# Eastern waiver bid may hit turbulence

By Nicky Robertshaw

WASHINGTON — Eastern Air Lines Inc.'s latest effort to secure a waiver of its $105 million pension contribution is certain to fly into strong headwinds.

Failure to win government approval of the waiver request — Eastern's second in three years — would drain the company's meager cash resources and cause additional hardship for the airline, which already is beset by large recent losses, heavy debt burdens and labor problems.

Eastern — which had a projected benefit obligation of $1.5 billion while its assets at fair value were $1.2 billion, according to its most recent 10K filing — had announced its intention to apply for a waiver in connection with a restructuring that will eliminate the company's Kansas City operation and lay off 4,000 employees. (Last week a federal judge blocked the Kansas City closing; Eastern is appealing the order.)

An equally formidable challenge for Eastern, however, is last year's amendment to the Employee Retirement Income Security Act that gave the Internal Revenue Service "some basis for turning down waiver requests by companies that in all probability can't pull out" of their financial difficulties, said a pension law attorney who asked not to be identified.

Because the new standards for funding waivers went into effect only recently, this will be one of the first tests.

On July 29, Eastern asked the IRS for a waiver of the company's $105 million contribution due Sept. 15. The amount represents not only the payment owed for the 1987 plan year, but also an installment representing approximately one-third of the amount, plus interest, that was waived for the 1985 plan year.

While observers agree Eastern is undergoing financial problems, many are skeptical that the condition is temporary. In addition, the waiver amount represents about a quarter of the company's current cash position in a business where cash flow is critical, analysts said.

Eastern has about $300 million to $400 million in cash and is looking at a business drop-off after Labor Day, so $105 million is "pretty important to them," said Timothy Pettee, associate director at Bear Stearns & Co., New York. "In the airline business, cash is king."

"I tend to doubt Eastern's ability to grow and prosper," said Mr. Pettee. "Even with significant cost reductions and savings, the company won't have the necessary cost differential" compared with healthier airlines.

In addition to its labor problems and losses for the first two quarters of this year, "Eastern has humongous debts — and they're not going to go away overnight," said Charles P. Manchuso, senior airline analyst, Moody's Investors Service Inc., New York.

As of June 30, the company had $2.5 billion in total debt, he noted, with interest expenses for fiscal 1987 at about $300 million.

Eastern had losses of $31 million on revenue of $1.1 billion for the first quarter, and at press time was expected to announce deeper losses for the second quarter.

As of March 31, it had $2.4 billion in long-term obligations: $1.7 billion in long-term debt and $700 million in capital leases. That compares with total non-redeemable preferred stock and common shareholder equity of $28 million. During the quarter, Eastern paid out $71.4 million in debt service.

James Balog, left, calls himself the "part-time" chairman of the newly christened 1838 Investment Advisors. W. Thacher Brown is president and chief executive officer of the reborn firm.

# Faster growth mapped out by ex-Drexel unit

By Joel Chernoff

PHILADELPHIA — Free of the tarnish of the government investigation of former parent Drexel Burnham Lambert Inc., 1838 Investment Advisors will move to increase its product line and expand its marketing effort domestically and abroad.

The July 21 sale of Drexel's former money management arm — Drexel Burnham Lambert Investment Advisors — to its managers and an outside investor will help the firm move into a new era. The new firm's name reflects its 150-year-old beginnings as part of the original Drexel & Co. It has $3 billion in assets under management, 56% of which are tax-exempt.

"I think it's very positive in that they changed the name and they're trying to get away from the Drexel stigma," said Annette Calderwood, a research analyst at SEI Funds Evaluation Services Inc., Chicago.

"The Drexel name has hurt" the firm's business prospects in the past year, said Terry Bilkey, senior vice president, Butcher Consulting Group, Pittsburgh.

Officials at 1838 Investment Advisors denied the investigation was the reason for the sale, instead saying they wanted to control their destiny and infuse an entrepreneurial spirit into the firm.

Seventy-five percent of the firm was purchased by management, with a 25% passive equity piece purchased by Lambert Brussels Associates L.P., part of The Pargesa/Groupe Bruxelles Lambert

# Bailout by NCNB leaving no wake

By Fred Williams

DALLAS — The bailout of First RepublicBank Corp. by NCNB Corp. is not expected to have major repercussions in the trust investment divisions of the two banking giants for several months, and is having little immediate impact on clients.

H. Edward Anderson, chairman of First RepublicBank Asset Management, said he believes the two investment management sections "will be run as two separate organizations. We serve two different markets."

Don Berdine, senior vice president and chief investment officer at NCNB, said, "For the foreseeable future we will have two outstanding trust departments and it will be well into 1989 before we begin talking about what will happen (in the trust investment area). I'm optimistic. They have strengths we don't have and by combining the products of the two entities, hopefully they will become a stronger money manager and trust department as we will."

Most institutional trust clients of the former First RepublicBank, now NCNB Texas National Bank, said it is too early to decide what will happen, but

# Credit quality better

## Rating scenario upbeat for second half

By Brad Rudin

Reversing a long-term decline, credit quality improved in the second quarter on the strength of improving fundamentals in the energy sector and a favorable international competitive position for industrial credits generally.

"Underlying this favorable rating trend is a demonstrably strong domestic economy which has provided a healthy operating environment for most firms," Duff & Phelps Inc., Chicago, reported in its assessment of second quarter credit quality.

Looking ahead, Duff & Phelps noted its Watch List of credits under review "bode(s) well for the remainder of 1988."

Both Moody's Investors Service and Standard & Poor's Corp. presented a cautiously upbeat view of the future of credit quality.

Downgrades as a percentage of total rating actions fell at each of the five credit rating agencies.

At Duff & Phelps, downgrades as a percentage of total rating actions stood at 29% in the second quarter compared with 55% in the first quarter. At Standard & Poor's, downgrades accounted for 55% of rating actions in the second quarter, compared with 69% in the first; at Moody's, 63% vs. 69%; at McCarthy, Crisanti & Maffei Inc., 60% compared with 88%; and at Fitch Investors Service, 54% against 64%.

S&P reported the main impetus for the positive shift in credit quality came from the energy group, where 18 ratings were upgraded and only one was downgraded. The firm cited the upgrades of Texaco Inc., which was discharged from Chapter 11 bankruptcy proceedings, and Mobil Corp., which has strengthened its balance sheet and achieved better pricing.

For industrial credits generally, S&P said the healthy economy resulted in affirmed ratings for credits vulnerable to downgrade, but the agency's report added, "this does not necessarily portend a flurry of higher ratings in the third and fourth quarter." Corporate restructurings are likely to limit improvements in industrial credit quality, according to the report.

While the upgrades equaled downgrades in the industrial companies rated by Standard & Poor's, downgrades exceeded upgrades in the financial institutions, utilities and transportation sectors.

Of the 23 companies upgraded by Moody's, 15 were in basic industries and related sectors. Successful restructuring, cost cutting and a weakened dollar are responsible for the uptick, Moody's said.

But Moody's also cautioned expected corporate restructurings in retailing, electronics and construction likely would weaken credit quality in those industries.

Houlihan Lokey Howard & Zukin Inc., Los Angeles, which ranks corporate credits according to stock market-based data, noted second-quarter credit quality improvements among oil and steel companies.

Recapitalized companies such as Harcourt Brace Jovanovich Inc. and Viacom International Inc. are rapidly improving credits because the healthy economy eases concerns about leverage, Houlihan Lokey reported.

Houlihan Lokey also noted credit quality deteriorated in the health-care sector, where declines were especially evident in hospital administration and medical products. ■

# Legal fight now rests with judge

CHICAGO — Attorneys for Navistar International Corp., the Pension Benefit Guaranty Corp. and a Wisconsin Steel Co. bankruptcy debtors group have presented their closing arguments in U.S. District Court in the Wisconsin Steel unfunded pension liabilities case.

The judge's decision could determine the extent of the PBGC's reach in seeking assets from a corporation involving a former subsidiary that subsequently was unable to pay pension benefits.

Judge James B. Moran has taken the case under advisement and is expected to render a decision near the end of this month.

Judge Moran could award treble damages, totaling $900 million, to the plaintiffs if he convicts Navistar in the bench trial for fraud, racketeering and bankruptcy violations. Navistar faces $300 million in claims, including $146 million in unfunded pension liabilities and interest.

Attorneys for the PBGC and a creditors bankruptcy group contend Navistar, then called International Harvester Co., fraudulently sold the Wisconsin Steel unit in 1977 to dump the unit's unfunded pension liabilities, then totaling about $70 million, onto the PBGC.

They argue Navistar knew the buyer, Envirodyne Inc., would be unable to make Wisconsin Steel a viable economic entity. The steel unit filed for bankruptcy in 1980 and subsequently was closed.

Navistar attorneys argue Envirodyne's business proposals for the steel company were sound and that the PBGC reviewed the pension plans before and after the sale, indicating no imminent worries about continued funding.

Envirodyne isn't involved with the suit, having paid the PBGC a $2 million settlement. ■

# 1S growing by design.

BellSouth's telephone operating companies, Southern Bell and South Central Bell, continue their remarkable growth, offering new products and services to an expanding customer base of over 14 million homes and businesses.

At the same time, BellSouth is committed to growth through developing new businesses that are a natural outgrowth of BellSouth's telecommunications expertise.

On January 1, 1986, BellSouth Enterprises was formed. Its purpose: To direct all BellSouth subsidiaries in businesses other than regulated services provided by Southern Bell and South Central Bell.

Today BellSouth Enterprises consists of three groups comprising a rapidly growing number of companies and joint ventures operating throughout the U.S. and around the world.

**An Industry Leader In Directory Advertising And Publishing**

The companies of the BellSouth Advertising and Publishing Group include the leading publisher of traditional and specialized directories. In addition, these vertically integrated companies also offer expertise in advertising sales, computer-based pre-press production and photocomposition, graphics, printing and binding, and are on the leading edge of four-color print production technology.

**Helping Companies To Manage Information**

The BellSouth Communications Systems Group markets the products and services that keep BellSouth in the forefront of the telecommunications industry. Throughout the U.S. and Europe, the Group offers a range of products from office automation equipment to computer leasing and maintenance.

**Focusing On The Booming Cellular Market**

The companies of the BellSouth Mobile Systems/International Group focus primarily on the rapidly growing mobile telephone market. Already in many major American cities, BellSouth companies and joint ventures are quickly penetrating cellular phone markets in England, Western Europe and Australia.

In the years to come, BellSouth Enterprises will continue to play an important role in BellSouth's commitment to maintain high service standards, to emphasize telecommunications and to pursue orderly corporate growth. With such a strategy, it's no wonder the future looks so exciting for BellSouth.

MUTUAL FUNDS

# Institutions keep industry growing

By Carol Wiley

Retail investors, wary of the real or perceived risk of the market, have shunned equity mutual funds since Oct. 19, while institutional investors, accustomed to the ups and downs of the long haul, account for the increased use of mutual funds.

Rather than pull out of the market entirely, investors are moving assets into bond and short-term funds, or, at the very least, into conservative, blue-chip stock funds to minimize risk.

The mutual fund industry, meanwhile, attempting to reassure the customers it already has, is concentrating on more and better service and products, including customized investment plans that provide small clients with all of the sophisticated bells and whistles the big guys use.

Statistics from the Investment Company Institute, the national association of the mutual fund industry, confirm what several industry experts have reported.

Sales of stock, bond and income mutual funds were down $2 billion in May from April, and down $6.1 billion from May of 1987. Sales totaled $7.1 billion in May, compared with total sales in April of $9 billion, $9.1 billion in March, and $13.5 billion one year ago.

"Activity levels in general have been subdued as investors are apparently continuing to assess their investing strategies," said Ann Anderson, ICI assistant vice president of research.

Total assets of all mutual funds decreased $7 billion in May from April, and $1.5 billion since May of 1987. Total assets decreased in May to $803.8 billion, from $810.8 billion in April and $805.3 billion in May 1987.

"The decline in assets of long-term funds reflects lower bond prices in May, as well as shifts of assets from long-term funds to money market funds and other investments," Ms. Anderson said.

Government bond funds earned the sales lead in May with $1.4 billion in total sales, including reinvested dividends, followed by long-term municipal bond funds at $900 million.

Total May redemptions, which include transfers between funds, were down $100 million from April's $8.1 billion, and down $1.7 billion from $9.7 billion one year ago. Net sales of stock, bond and income funds in May were a negative $900 million, compared with $900 million in April and $3.9 billion in May, 1987.

Banks and insurance companies, which are prohibited from owning a mutual fund company or underwriting the funds but are free to manage funds, also are getting into the act because "it's the viable way for the average individual to invest," according to

# Bond funds reap gains from fall of stock market

By Trudy Ring

Dollars flowing into fixed-income funds have been the major cause of asset growth at the mutual fund companies that have prospered since the Oct. 19 stock market crash.

Most of the companies had few clients pull money out after the crash, but had transfers to fixed-income funds from equity funds.

The companies also report some growth in conservative equity funds — but fixed income is by far the biggest draw.

Prudential Mutual Fund Management Inc., New York, has had stellar asset growth in the post-crash environment. As of July 22, its mutual funds had assets of $27.45 billion, up from $23.25 billion Oct. 1 and $23.35 billion at year end.

Although Prudential — like most companies surveyed — couldn't provide an exact breakout of how much growth was due to market appreciation vs. new commitments, Michael Downey, president of the mutual fund group, said new commitments were the major reason for the growth.

The biggest draws for new commitments have been fixed-income funds that concentrate on U.S. Treasury and government agency securities, he said.

Massachusetts Financial Services Co., Boston, reported its mutual fund assets grew to $18.1 billion by June 30, from $14.6 billion at year end and $14.4 billion Oct. 1.

"In the months immediately following Oct. 19, the enhanced government funds far and away were the most popular funds, and continue to be the biggest seller by a wide margin," said William W. Scott Jr., senior vice president. These funds concentrate on Treasury and agency securities.

However, their popularity is being challenged by funds investing in municipal, high-yield or intermediate-term bonds, and total return (balanced) funds also have come on strong, he said.

Kemper Financial Services Inc., Chicago, has been another big winner, with $33.3 billion in mutual funds as of June 30, up from $30.5 billion at year end and $31.5 billion at the close of the third quarter.

The high-yield bond area has been the most popular for Kemper, said T.V. Williams, executive vice president and managing director-mutual funds. The decline in the fourth quarter was due largely to the decline in the market value of equities, he said.

"We had an awful lot of switching" to fixed-income funds from equities after the crash, Mr. Williams said. "In terms of pure redemptions, it was much less than we would have imagined or you would think."

Some other big mutual fund companies have had more

# Covering the globe

## Assets going overseas triple in 4 years

By Marlene Givant

At $31 billion, global and international funds comprise the fastest growing sector in the mutual fund industry with bond funds fueling the recent momentum.

Mutual funds, like pension funds, have tripled their global and international assets since 1984, according to figures supplied by the Investment Company Institute, Washington, and global and international bonds, the new darling of pension fund investments, are leading the mutual fund scene as well.

Global and international bond mutual funds totaled $2.8 billion as of May 31, less than one-third the amount of foreign bonds managed for U.S. tax-exempt funds (*Pensions & Investment Age*, June 27), but the assets are growing furiously, fueled by booming sales. Assets in international and global bond funds totaled $2.8 billion as of May 31 vs. $64.4 million in 1985, according to the ICI.

"Foreign bond funds have attracted people interested in the international story but concerned about stock market valuations here and overseas," said George Murnaghan, vice president of Rowe Price-Fleming International Inc., Baltimore, which manages the 2-year-old T. Rowe Price International Bond Fund, whose $420 million in assets rivals the 8-year-old T. Rowe Price International Equity Fund's $654 million.

Given the parallels with pension funds, it's no surprise international and global mutual funds attract substantial interest from institutions. In the past two years, institutions have held slightly more than one-third of the assets in international and global equity mutual funds. They're lured by management expertise at prices

Dick Loos, managing director of Marinvest, New York, with $1.2 billion in mutual funds under management.

"The industry is very much alive and very well, even though there have been downtrends in sales, because it's the ideal way to invest," Mr. Loos said. "Even though the industry is oversupplied, there is a tremendous retail market still available.

"When they become more comfortable with the market, they will go back in."

Results from an ICI survey a month after the crash revealed 75% of the respondents ranked safety and stability as the most important reason for their investment choices, according to Charles Mizrahi, president of Hampton Advisors Inc., New York, which manages $21 million in mutual funds.

"It used to be about 75% of the customers were willing to lose 15% to 20%, but now only about a quarter of them are," he said.

Until the comfort level returns, retail investors, instead of making redemptions, are "transferring within the family, retailoring their investments," Mr. Mizrahi said.

And mutual fund companies are making sure they retain the clients they have.

Money market funds are advertising, normally, they don't have to. "Most regard a short-term fund as a temporary parking place" while waiting for interest rates and the market to move, said Stan Egener, president of Neuberger & Berman Management Inc., New York. The firm has $1 billion in mutual fund assets.

Since Oct. 19, the average load or service charge for about 20 mutual funds has dropped to 5% from 8.5%; some funds have done away with loads all together.

Mutual fund companies have installed more telephone lines for customers, and, with a few taps on their Touch-Tone phones, can obtain information about their accounts and transfer money from one fund to another.

"We're seeing tremendous interest in providing cost-efficient, quality service to the customer, because we don't want to lose the customer," said Donald Hearn, executive vice president of The Boston Co. Advisors, which has $1.2 billion in mutual fund assets.

Mr. Hearn, who also noted a shifting of assets into fixed-income accounts from equities, said mutual fund managers, particularly banks, also are creating new products to attract and retain customers. The Boston Co., for example, has an asset allocation system, so the customer can designate an asset mix for his or her investment.

Alliance Capital Management Corp., New York, also has a customized product, pegged to the Standard & Poor's 500 stock index, according to Jack Horney, vice president. Alliance has $10 billion in mutual fund assets.

Meanwhile, while the retail market was taking a beating, the institutional side of the industry is growing, reaping the assets from defined contribution plans and specifically 401(k) plans.

Twenty-five percent of all pension funds use mutual funds, according to Denman Zirkle, managing director of Marinvest, and mutual funds' "inherent advantages will continue to appeal to institutional users."

"The institutional market is long term, and there is no evidence the institutional mutual fund market is declining," said Mr. Zirkle.

Marine Midland Bank, the New York-based parent of Marinvest, has added an intermediate bond fund and an equity fund and is looking at investment products from Hong Kong and Shanghai to round out its offering of mutual funds.

"There is more interest than ever" in mutual funds as 401(k) options, said Laura Henry, assistant vice president-institutional marketing for Fidelity Investments Institutional Services Co., Boston. Fidelity has $75 billion in mutual fund assets.

More flexible funds will continue to be developed in response to proposed Department of Labor regulations that reduce the employer's fiduciary responsibility if the employer offers a broad range of investment options, Ms. Henry said. ■

STATISTICALLY SPEAKING

# GIC rates rise slightly

## Fears of inflation, moves by Fed explain increase

By Curtis Vosti

Rates on guaranteed investment contracts offered by insurance companies increased slightly in the second quarter, while spreads between the GICs and comparable Treasuries continued to be tight.

Observers agree the higher rates primarily are due to concerns of inflation and two second-quarter cinches of interest rates by the Federal Reserve Board.

Although "the old heydays of 100 to 150 basis points over Treasuries is over," the demand for GICs is still heavy, according to Sharon Morell, a GIC contract negotiator for Morley Capital Management, Lake Oswego, Ore.

"There is a steady stream of buyers, even though the spreads were not as high as they had been at the end of last year," said John Knight, president of Lamberson Knight Investment Securities, a Short Hills, N.J., GIC brokerage firm.

"They (investors) finally realized that this is where the spread is going to be," Mr. Knight said.

Insurers are looking to expand product lines in light of the continual tight supply of GICs because of the increasing demand, as well as the stepped up marketing by banks and savings and loans of their versions of guaranteed contracts, according to Peter Bowles, president of Fiduciary Capital Management Inc., Boston, an GIC investment manager.

Bankers Trust Co., New York, reports $300 million in new clients this year for its bank investment contract product.

The demand for guaranteed investment products is so great some insurers had to stop accepting business because they were approaching or had reached their capacity limits, Ms. Morell said.

"We saw several insurance companies step back (during the second quarter) and saw they had done well over 50% of their GIC business (capacities)," she said.

Because this is the time of year when many plans seek bids on GICs for 1989, Mr. Bowles said there will be an increasing strain on insurance companies, which by law are restricted in their GIC capacities through specific reserve requirements.

However, this seasonal strain is being offset partially by the "BICS" and "SLICS" offered by banks and savings and loans, and through the practice of some major plan sponsors of bidding out their GICs several times a year instead of just once a year, Mr. Bowles said. "That spreads the strain on the insurers over a much longer period of time," he said.

Gene Gochenour, president of GIC Inc., Beaverton, Ore., a GIC broker, said an additional benefit of increasing the number of times a year plan sponsors go out for GICs is that it allows them a chance at a better rate and allows employees to participate in up and down markets as they choose.

He said that as the GIC industry matures, plan sponsors are looking at variations of the traditional window or bullet plans. "We have seen quite a few requests for 'ladder' GICs to allow for diversification of insurance companies and maturities," he said.

Scott Sokol, director of investments for Chambers, Dunhill, Rubin & Co., a Beverly Hills, Calif., investment banking firm, said the open-ended floating rate GICs, where rates change monthly, have been one vehicle for new insurers to enter the GIC market and thus expand capacities.

"The insurance companies are definitely not having any problems filling capacities," he said.

GIC Inc. and Lamberson Knight provide insurance company rate quotations on representative five-year, single deposit, simple interest, $1 million GICs for June 30 and March 31, as follows:

- Allstate Life Insurance Cos., Northbrook, Ill.: June 30, 8.61%; March 31, 8.41%.
- American United Life Insurance Co., Indianapolis: 8.77%; 8.36%.
- Banker's Life Assurance Co., Des Moines, Iowa: 8.44%; 8.12%.
- CNA Insurance Co., Chicago: 8.7%; no quote.
- Confederation Life Insurance Co., Atlanta: 9.13%; 8.85%.
- Connecticut Mutual Life Insurance Co., Hartford, Conn.: 8.71%; 8.37%.
- Crown Life Insurance Co., Toronto: 8.79%; 8.25%.
- Great West Life Assurance Co., Denver: 8.85%; 8.06%.
- Hartford Life Insurance Co., Hartford, Conn.: 8.81%; no quote.
- Home Life Insurance Co., New York: 8.7%; 8.21%.

STATISTICALLY SPEAKING

# Basic industry is leader in quarter

By Trudy Ring

KANSAS CITY, Mo. — Basic industry stocks led the market in the second quarter, while the best-performing bonds were U.S. government issues, according to the consulting firm DeMarche Associates.

The basic industry sector gained 8.8% in price in the quarter, compared with 5.5% for the Standard & Poor's 500 stock index. All stock return figures are price appreciation only.

"Investors are showing faith that the economy will be strong," Robert F. Marchesi, president of DeMarche, said of the sector's and market's performance.

Basic industry stocks gained 13.5% in the first half of the year and lost 6% in the 12 months ended June 30. The S&P 500 gained 10.5% for the half and lost 10.5% for the year.

Stocks sensitive to interest rates were the quarter's second best performers, up 7.8%. They gained 10.5% for the first half and lost 6.4% in the 12-month period.

Technology stocks were up 6.8% in the quarter. They had the worst performance for both the longer periods, with a gain of 5.5% in the half and a loss of 15.1% for the year.

Stocks related to consumer spending gained 2.6% in the quarter. For the half, they gained 10.8%; for the year, they lost 12.8%.

After leading the market in the first quarter, the energy sector was the only negative performer in the second, off 1.1%. The sector was up 12.2% for the half and down 13.3% for the year.

The 10 best-performing industries for the quarter were banks, up 18.7%; cars and trucks, up 16.6%; aluminum and copper, up 15.9%; paper, up 15.2%; office equipment, up 15.1%; miscellaneous metals and minerals, up 14%; textile products and apparel, up 13.3%; miscellaneous financial companies, up 12.2%; building materials, up 10.9%; chemicals, up 9.4%.

The bottom 10 industries were integrated domestic oil, down 7%; oil service and equipment, down 6.3%; tobacco, down 4.1%; truck transportation, down 1.6%; drugs, down 0.6%; food packagers and processors, also down 0.6%; special machinery, down 0.5%; integrated international oil, up 0.7%; rail transportation, up 1.4%; and consumer household products, up 2.8%.

Besides analyzing stocks by economic groups, DeMarche groups them by quality, growth and yield.

As measured by quality, stocks in the below-average quality quartile, based on several balance sheet variables, outperformed others for all periods. They were up 6.8% in the quarter and 16.7% in the half and down 5.4% for the year.

As ranked by company growth patterns, variable-growth stocks led for the quarter and half, with 6.7% and 13.4% respectively. As rated by yield, low-yield stocks had the best price appreciation for the quarter, 6.9%.

U.S. government issues led the bond market for the quarter with a total return of 1.6%. The market, as measured by the DeMarche Pension Fund Bond Index of 6,000 issues, returned 1.5%. All bond figures are total return.

Government bonds returned 5.7% for the six-month period, while the index returned 5.5%, and 8.5% for the year ended June 30, when the index returned 8.6%.

Financial company bonds were second for the quarter with a 1.5% return. They were up 5.3% for the half and 8.4% for the year.

Industrial, utility and Canadian bonds all returned 1.4% in the quarter. Industrials were up 5.5% in the half and 8.8% for the year; utility issues gained 5.8% for the half and 9.2% for the year; and Canadian bonds were up 5.9% for the half and 8.5% for the year. ■

NEW MANAGERS - Ibbotson Capital Mgmt.

# Scholar uses timing model

By Barry B. Burr

CHICAGO — Ibbotson Associates Inc., a consulting firm headed by Roger G. Ibbotson, is forming an investment management subsidiary to offer tactical asset allocation, according to key executives.

Mr. Ibbotson will be chief investment officer of Ibbotson Capital Management Corp., Chicago. In the mid-1970s Mr. Ibbotson, with Rex A. Sinquefield, developed the historical rates of return series in stocks, small stocks, bonds, Treasury bills and inflation widely used in performance comparison, asset allocation and forecasting.

Mr. Ibbotson is president of Chicago-based Ibbotson Associates and finance professor at Yale University's School of Management in New Haven, Conn.

Marvin B. Waring, Ibbotson Associates managing director, said the firm plans to apply in the next couple of weeks to the Securities and Exchange Commission to register as an investment adviser.

Mr. Waring, who will also be managing director at Ibbotson Capital, said he expects the new firm will have its first clients, mostly likely Fortune 500 pension sponsors, soon after the SEC authorization.

"We're confident we can get the money," Mr. Ibbotson said. "We're not anxious to take it too quickly" without a reasonable expectation of success.

At the outset, he said the firm will advise clients on the allocation strategy and sell the signals of when and how much to move between capital market asset classes. The clients will implement the strategy themselves.

Mr. Waring said he expects Ibbotson Capital ultimately to implement the strategy directly and manage assets for clients on a discretionary

NEW MANAGERS - Goldman Sachs Asset Mgmt.

# Fixed income shop planned

By Barry B. Burr

NEW YORK — Goldman, Sachs & Co. will begin offering separate account investment management this fall under a newly formed asset advisory unit that will be led by a top fixed-income strategist, executives involved in the new operation disclosed.

Goldman Sachs Asset Management will specialize in fixed income, marketing separate accounts to corporate and public pension sponsors and other tax-exempt funds, said Alan Shuch, partner in charge. Goldman already runs $13 billion in mutual funds for institutional investors only.

Jess B. Yawitz, a leading strategist who helped bring structured fixed-income strategies such as immunization from academic research to widespread institutional use in the past decade, will be the chief investment officer. Mr. Yawitz, who confirmed his appointment, is a vice president and financial strategist at Goldman's St. Louis office.

Mr. Shuch provided the abbreviated details about the new separate account venture. He said Goldman wanted to withhold further information until details on setting up the unit are completed, probably within the next several weeks.

Mr. Shuch declined to elaborate on the investment stra-

# Foreigners place $55B with firms

By Joel Chernoff

U.S.-based money managers invested $54.6 billion in U.S. markets for foreign institutional clients as of March 31, according to a survey by *Pensions & Investment Age*.

Fully half — 50.9% — of those assets, or $26.6 billion, came from foreign sovereign governments. Of that total, nearly two-thirds, or $17 billion, is believed to come from Middle Eastern governments, according to survey data and *P&I Age* estimates.

While the growth in assets was held down by last year's global stock market crash, all signs are that foreign-based business will continue to grow.

Major institutions, particularly New York money center banks, have been building this business even before the 1973-74 oil embargo started piping barrels of money into the coffers of Middle East governments, which in turn sought to invest the overflow of assets.

As markets have become global, institutions are becoming more international in their investment policies, and as contributions to U.S. private pension plans have dried up, more entrants are trying to gain a foothold in the potentially lucrative area.

"Large financial institutions have obviously been in an advantageous position, simply because they've been on the spot," said C. Nicholas Potter, president of J.P. Morgan Investment Management Inc., New York. Attracting overseas business "will get increasingly competitive" just as domestic markets have, he added.

**INSIDE: U.S. managers eagerly engage foreign clients — Page 49**

J.P. Morgan, whose foreign business has doubled during the past five to seven years, led the rankings, with $11.5 billion in foreign-based assets invested in U.S. markets, accounting for 21% of the total reported.

Following were: Citicorp Investment Management Inc., with $7.8 billion; Chase Investors Management Corp., $4.9 billion; Morgan Stanley Asset Management, $3.7 billion; Richard Ellis Inc., $2.7 billion; Bankers Trust Co., $2.6 billion; Fisher, Francis, Trees & Watts, $2.2 billion; Chemical Investment Group, $2.2 billion; and Alliance Capital Management Corp., $2 billion. All of the firms are based in New York.

The survey, believed to the first of its kind, also revealed:

- Assets run for foreign institutional clients in U.S. markets grew 13.4% during the 12-month period ended March 31. The unavailability of March 1987 data for a few firms, however, artificially buoyed that figure; *P&I Age* estimates the true growth rate was closer to 10%.

During that period, the Standard & Poor's 500 index dropped 8.4% while the Shearson Lehman Hutton Government/Corporate bond index gained 4.4%. Also, during that time currencies represented in the Morgan Stanley Capital International Europe Australia Far East index gained about 15% against the U.S. dollar.

- Active equity products captured the largest amount of assets — $16.3 billion — with balanced accounts at $15.5 billion. Active fixed-income drew in $10.6 billion, while real estate attracted $7.6 billion.
- Assets invested in passive equity products were one-tenth the size of those invested in active equity, though overseas interest in quantitative products is just starting to

## LATE NEWS

### Institutions finance realty firm

BOSTON — Four major institutional investors have invested $40 million in the form of participating senior-term notes in The Krupp Cos., a Boston-based real estate firm.

The syndicate is headed by U S WEST Financial Services Inc., Englewood, Colo., which invested $20 million. Other investors are Benefit Capital Management Co., the in-house pension fund management operation of Union Carbide Corp., Danbury, Conn., $10 million; Security Benefit Life Insurance Co., Topeka, Kan., $3 million; and Erie Insurance Exchange and Erie Family Life Co., Erie, Pa., $7 million. Tom Mitchell, a senior account executive for U S WEST Financial, provided the identity of the investors and the amount invested.

The increased capitalization will allow Krupp Cos. to accelerate development of commercial and multifamily properties.

### California Employees allocates

SACRAMENTO, Calif. — The $43 billion California Public Employees' Retirement System has decided on allocations for its 12 managers in its $4.25 billion foray into international markets.

The decision was made to follow the recommendations of its asset allocators, First Chicago Investment Advisors, Chicago, and TCW Global, Los Angeles, each of whom will manage up to $100 million, said Basil Schwan, acting investment manager.

Global equity managers County NatWest Investment Management Ltd., London, and Fidelity International Investment Advisors, Boston, each were allocated $350 million; State Street Bank and Trust Co., Boston, was allocated $1.05 billion for passive equities; Nomura Capital Management, New York, $200 million for Pacific Basin regional equity; Warburg Investment Management International, New York, and Fiduciary Trust Co. International, New York, were each allocated $500 million for global fixed income; Baring International Investment LTD., Boston, $500 million for international fixed income; and $200 million each was allocated to active international equity investors Morgan Grenfell Investment Services Ltd., London, Oechsle International Advisors, Boston, and Schroder Capital Management International, New York.

Mr. Schwan said the allocations will begin next month and will be funded monthly through cash reserves and $300 million-a-month cash flow.

### Post-retirement draft completed

NORWALK, Conn. — The Financial Accounting Standards Board at its Aug. 10 meeting put the finishing touches on a proposed rule concerning accounting for post-retirement benefits.

An exposure draft is expected to be presented before the end of September with a final standard issued in late 1989. At the meeting, FASB executives decided net periodic benefit cost should be spread out over the period that extends from the date of hire to the expected retirement date. The board also decided the minimum liability would be measured as the unfunded accumulated benefit obligation for retirees.

### Funds make manager changes

• WASHINGTON — The $1.1 billion District of Columbia Retirement Board has purchased an $8.5 million interest in Chicago-based JMB Institutional Realty Corp.'s Group Trust I and has terminated Affirmative Investment Management, New York, said Adrien Anderson, executive director.

The JMB Group Trust I, a $158 million closed-end fund, invests in retail and office properties. The board acquired the shares from an undisclosed investor. The assets came from cash flow.

Affirmative, a unit of Daniels & Bells, was terminated because of reorganizational changes that directly affected the firm's relationship with the board, Mr. Anderson said.

• OKLAHOMA CITY — The $1.3 billion Oklahoma Public Employees Retirement System has shuffled its investment management mix to reflect a recent asset allocation study.

Rex Privett, executive director, said First Investment Management, Oklahoma City, will manage a $650 million balanced portfolio; Sun Bank Investment Management Group, Orlando, Fla., $200 million in equities; JMC Capital Management, Metairie, La., a $7 million small-capitalization portfolio; and Wright Investors Service, Bridgeport, Conn., $200 million in bonds.

Wright and First Investment had managed balanced portfolios along with Bank of Oklahoma, which was let go.

The fund hired Northern Trust Co., Chicago, as its master custodian. SEI Funds Evaluation, Houston, assisted.

• LOWELL, Mass. — The $18 million Colonial Gas Co. pension fund has hired Keystone Investment Management Corp., Boston, to run $7.5 million in a balanced account, said Charles A. Cook, vice president-human resources.

The assets came from a reduction in the the assets run by Webster Capital Management, New York, its sole balanced manager. Hoenig Investment Advisory Service, Boston, assisted.

# Pension funds win with bet on Bayou

By Trudy Ring

LA PLACE, La. — A contrarian investment in a steel mini-mill operator during the steel industry's trough has produced handsome returns for pension funds and venture capitalists.

Bayou Steel Corp., La Place, went public in late July with an offering of 3.8 million shares at $13 each. Investors who put up equity financing for the company in 1986 have seen the return of their entire initial investment, plus retained common stock in the company, valued at six times the original cost.

A group of investors bought the company in September 1986 from Voest-Alpine AG, an Austrian state-owned corporation, with $21.5 million in equity capital and the issuance of $60 million in high-yield bonds. Principal shareholders include the Allied-Signal Inc. pension fund, Morristown, N.J.; Alan Patricof Associates Inc., a venture capital firm; First Capital Corp. of Chicago, a bank venture capital operation; Allen & Co. Inc., New York, an investment banking firm; and Howard M. Meyers, the entrepreneur who assumed management of Bayou Steel.

The 3.8 million shares in the public offering were newly issued; previous shareholders retain 9 million shares and have agreed not to sell or transfer them until either three years from the time of the offering or until Bayou Steel's tax-loss carryforwards have expired, been fully used or become subject to limitations under the Internal Revenue Code.

Allied-Signal put $2 million of its $4.5 billion defined benefit assets into Bayou Steel equity, said Edward T. Tokar Jr., vice president-investments.

"It was bought at a very attractive price, has outstanding management, and the cycle turned in a significant way in our favor. You add it together and it's a home run," he said.

Alan Patricof Associates invested $2.5 million from three of the funds it runs. The firm made the $2.5 million back at the offering and carries stock valued at six times that amount, said John Baker, vice president.

APA's limited partners in the deal include the New York State and Local Retirement Systems and New York State Teachers' Retirement Fund, both of Albany; the Texas Instruments Inc. pension fund, Dallas; the Gannett Co. Inc. pension fund, Arlington, Va.; the Ontario Municipal Employees' Retirement System, Toronto; and venture capital managers, First Chicago Investment Advisors and Mitchell Hutchins Institutional Investors Inc., New York.

APA was attracted to the deal because of the involvement of Mr. Meyers, who became chairman, president and chief executive officer upon the investor group's acquisition. Several years ago, the firm had backed Mr. Meyers in RSR Corp., a Dallas-based smelting business of which he also is president.

"We start out asking ourselves, 'Is the guy a money maker?' " Mr. Baker said. Mr. Meyers already had shown he was one with RSR and did so again with Bayou Steel, Mr. Baker said.

John Canning, president of First Capital Corp., echoed those sentiments. "You had a fabulous manager in Howard Meyers. You had a battle-weary shareholder (Voest-Alpine) who wanted to get out of the operation and you had a tremendous manager."

First Capital was the deal's largest investor with $7 million. First Capital is a subsidiary of First Chicago Corp.; it invests the banking firm's own capital.

At Bayou Steel, Mr. Meyers and his management team rearranged the mill's equipment to smooth out production flow and increase capacity; renegotiated a contract with the United Steelworkers of America to increase flexibility in operations while providing pay and benefit increases; and emphasized the use of low-cost barge transportation on the neighboring Mississippi River, Mr. Baker said.

Bayou Steel had a net loss in each fiscal year from 1981 until 1986. The company posting net income of $3.2 million for the year ended Sept. 30, and $12.8 million in the six months ended March 31. ■

# Global flows change

## Assets moving to Europe

By Marlene Givant

International stock managers are pouring money into Continental Europe and smaller Pacific Basin markets, attracted by what they consider good values.

During the second quarter, the median international stock portfolio analyzed by InterSec Research Corp., Stamford, Conn., had 27% in Continental Europe vs. 24.8% the previous quarter. Continental Europe represented 18.9% of the Morgan Stanley Capital International Europe Australia Far East index as of June 30.

Meanwhile, the median portfolio's exposure to Pacific Basin markets, excluding Japan, escalated 24% to 9.2% from 7.4% as of March 31. That's almost double the 4.7% the region represents in the EAFE index.

In addition to cheap companies, Continental Europe has rosier growth prospects, noted managers bullish on the region.

Alliance Capital Management, London, invests a hefty 45% in Continental Europe, mainly in Germany, Switzerland and Holland.

"At last there's some earnings momentum, and I think earnings there will beat the estimates," said Mark Breedon, vice president of the firm, which runs $800 million for U.S. tax-exempt clients. In Germany, the firm favors chemical companies **Bayer, Hoechst** and **BASF** and engineering firms such as **MAN** and **Thyssen**.

Acadian Financial Research Inc., Boston, which runs $42 million for U.S. tax-exempt clients, is overweighting a number of Continental European markets in its risk-control core portfolios, largely because the region's price-earnings ratio is only 12.

"Continental Europe is more attractive than capitalization weights in the index would indicate," said Ronald Frashure, executive vice president. Investors might have underestimated the region's prospects given measures to harmonize intra-European trade by 1992, he added.

Acadian has more than 5% each in Switzerland, France, Belgium and Italy. French holdings in the firm's small-cap portfolios include **Penarroya**, a non-ferrous metals company, and **Vallourec**,

## Japanese wary of America

By Joel Chernoff and David Kilburn

**Despite the U.S. dollar's recovery against the yen this year, Japanese institutional investors are taking a cautious approach to investing in U.S. markets.**

**Japanese investors were severely burned by the dollar's 50% fall against the yen during the past three years.**

**"I think people are still very cautious about investing outside Japan due to the exchange rate situation," said Kiyotoshi Aiba, director-investment management, Yamaichi International Capital Management Co. Ltd., Tokyo.**

**"In overall terms, the Japanese institutional investor is still extremely cautious and it is unlikely they will make any major decisions regarding investment in the U.S.A. until they have a clearer picture about exchange rate movements, interest rates and improvements in the U.S. economy," said Yasukazu Akamatsu, senior managing director, Daiwa International Capital Management Co. Ltd., Tokyo.**

MASTER TRUST

# Pension execs, advisers content with services

By Trudy Ring

Corporate pension executives and money management firms report a high degree of satisfaction with master trust banks' services, according to *Pensions & Investment Age's* biennial surveys on the subject.

Pension executives and money managers were surveyed separately and asked to rate master trust banks on a scale of 1 (poor) to 5 (excellent) in a variety of categories. Overall ratings were derived from category responses. In both surveys, every bank rated by at least three respondents received an overall rating no lower than 3.

Mellon Bank, Pittsburgh, was tops among corporate pension executives; it got a perfect 5. That was derived from ratings of 5 in each category of the survey: personnel, cash management, reporting and computer programs. Mellon Bank was rated by six respondents.

The bank's rating rose from the 1986 survey, when it received an overall 4.1 and ranked third. It was rated by 11 pension executives that year.

Boston Safe Deposit & Trust Co.'s rating from corporate pension executives dipped to 4 this year from its 1986 rating of 4.5; it topped the survey in 1986. It was rated by four respondents this year, down from six two years ago. It had an average rating of 4 in each category.

National Bank of Detroit, which ranked second with 4.3 in the 1986 pension executives' survey, had an overall rating of 4 this year from four respondents. It received that rating in each category except personnel, where it received a 5.

Although pension executives did not hesitate to give ratings of 3 or 4 to their master trustees, they were selective about giving perfect ratings. The only other bank to receive a 5 rating in any category was Harris Trust and Savings Bank, Chicago, which got that mark for its cash management services. It received a 4 in each of the other categories and a 4 overall.

The banks rated by the greatest number of pension executives were Bankers Trust Co., New York, rated by 16 respondents; Northern Trust Co., Chicago, rated by 15; and Chase Manhattan Bank, New York, rated by 11. Each had an overall rating of 4.

Pension executives also seem to be satisfied with their master trust banks' fees. Sixty-two respondents called their master trustee fees average, 10 called the fees high and seven called them low.

Money managers also indicated satisfaction in their dealings with master trust banks. The lowest overall rating assigned to any bank ranked by at least three managers was 3.1.

Managers were asked to rate banks on security clearance; updating of cash and transaction activity; automatic investment of cash balances; prompt crediting of cash; reporting accuracy; capabilities of the account representative; cooperation of the institution; global custody services (where applicable); and overall.

Managers, in a ratings to smaller, regional banks. Marshall & Ilsley Trust Co., Milwaukee, received the best overall rating, 4.5. It was rated by six money managers.

Following it were Ameritrust Co., Cleveland, and Wilmington Trust Co., Wilmington, Del., both with 4.4 overall. Ameritrust was rated by nine managers and Wilmington Trust by five.

None of those three had enough responses from pension executives to be included in the results for that survey. Only 12 master trust banks drew ratings from at least

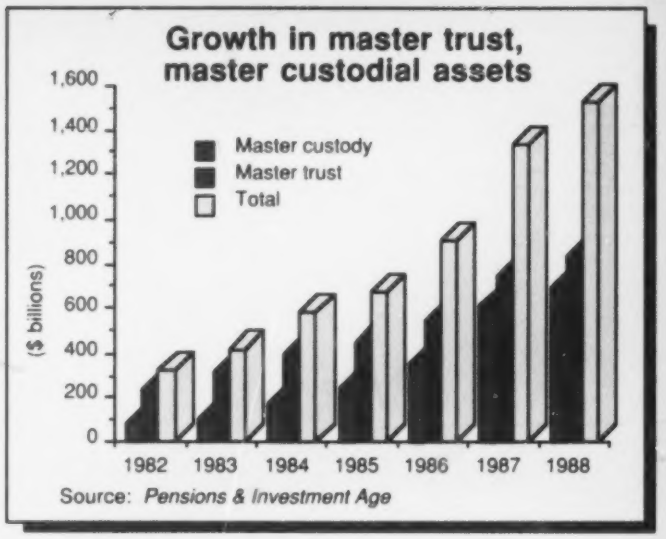
# Custodians pace moderate growth

By Carol Wiley



Tax-exempt assets held in the nation's largest master trustee and master custodial banks increased by a comparatively modest 12.6% for the 12 months ended June 30, and, once again, master custodial assets increased at a higher clip than those in master trustee accounts.

Tax-exempt assets held by the 30 largest master trust and master custodial banks rose to $1.526 trillion from $1.355 trillion the year before, according to data obtained in a survey by *Pensions & Investment Age* of banks with at least $2 billion in combined master trust and master custodial assets. During the year ended June 30, 1987, assets had increased 46%, primarily triggered by the bull market and new business.

In the year ended June 30, 1988, master custodial assets rose almost 14% to $693 billion from $608 billion; master trust assets rose 11.5%, to $832 billion from $747 billion.

The increase in master custodial assets is due to the increased use of custodians by public pension plan sponsors, according to Rodger F. Smith, partner, Greenwich Associates, Greenwich, Conn.

Because of the growing complexity of record keeping, more public funds are opting for master custody banks rather than handling the job internally, Mr. Smith said.

Master trust banks are legally responsible for multiple plans with multiple managers, and for single plans with multiple managers. Master trustees provide unitized reporting, accounting and performance measurement services for their clients, which primarily are corporate pension plans. Master custody banks provide the same services, but their clients — primarily public funds, endowments and foundations — retain legal trusteeship.

Larger pension funds, which usually have multiple managers, most often use master trust banks.

A Greenwich study confirms the increased use of master custody banks by public pension funds. Ninety-one percent of the 290 public pension funds surveyed in 1987 reported using a master custody bank, up from 89% in 1986, 88% in 1985 and 85% in 1984.

Master trust use, however, has not increased in the past two years, according to Greenwich statistics. The study shows 73% of the 1,005 large corporate pension plans surveyed use master trusts, the same percentage as in 1986. Seventy percent in 1985 used master trust banks, 66% in 1984 and 64% in 1983.

More than 90% of the 200 largest industrial companies and more than 90% of the plans with assets of more than $500 million now use master trusts, according to the survey.

New, large pension clients no longer account for growth in master trust assets because, as the Greenwich statistics bear out, most pension plans already have selected their master trust banks, according to Mike Wright, consultant with The Wyatt Co., Boston.

New business now comes from clients unhappy with their current master trustee, and from corporate spinoffs, in which new divisions or subsidiaries need a master trustee and hire one different from the parent company, Mr. Wright said.

The major master trust banks also are going after smaller pension funds.

"The big ones — the Mellons, the State Streets — are taking smaller accounts, those in the $50 million to $100 million range, because the others have penetrated the market," Mr. Wright said. "And with all of the merger and LBO activity, there are more pension funds that need master trustees."

State Street Bank and Trust Co., Boston, was again the largest provider of master trust and master custodial services in the *P&I Age* survey, gaining half a percentage point in market share although its total assets were down $655 million from 1987 figures. State Street's assets declined to $190.235 billion, from $190.89 billion in 1987. Its share of the market, however, went to 12.5% from 12%.

State Street lost close to $2.4 billion in master trust assets, dropping to $90.83 billion, and gained about $1.7 billion in master custodial assets, reporting $99.4 billion.

"Overall, a lot happened (in the year ended June 30) that had tremendous impact on the values of the master trust/master custodial marketplace," said Ronald Golz, State Street executive vice president.

"The market effect in October was fairly substantial. Assets

# Many believe global fees extreme

By Marlene Givant

Many pension fund executives think global custody fees are high and the quality of service average, according to a *Pensions & Investment Age* survey of corporate pension plan executives.

Assets under global custody for pension funds, endowments and foundations total $73.13 billion with the top five banks accounting for almost two-thirds of the assets.

State Street topped the list with $17.85 billion. It was closely trailed by Chase Manhattan Bank with $16.036 billion. Bank of America ranked third with $5.5 billion, followed by Bankers Trust with $5 billion and Irving Trust with $4.5 billion.

Many banks included on the list actually appoint other banks to provide global custody for them on a wholesale basis. One such wholesaler, Mitsubishi Bank of California, which does not work directly for pension funds, administers $6.3 billion in global custody assets for master trust banks. The $18.2 billion Chase has under global custody for other banks exceeds the $16.036 billion it has under global custody for U.S. tax-exempt funds directly. Chase's figures were as of March 31.

In the global custody survey, 35 of the 44 corporate pension fund executives responding said they use their domestic master trustee for global custody. This makes it difficult for new players to make inroads.

Mellon Bank/Pictet & Cie was chosen the top global custodian, earning an average rating of 5 on a scale of 1 (poor) to 5 (excellent) for overall global custody service. Northern Trust, State Street and Mitsubishi Bank averaged a 4 rating while Chase Manhattan and Bankers Trust averaged 3 in rank. All of these institutions were rated by at least two corporate pension executives.

In addition to custody, global custodians generally handle numerous other functions. According to Janet E. Potter, vice president and manager-capital markets services marketing and development of the Bank of America, San Francisco, these include: settlement; cash management; client reporting of realized/unrealized gains and losses for securities and cash in both local and base currencies; income accruals and receivables including dividend and tax reclamation; consolidated reporting for multiple portfolios; and global portfolio performance analysis, both historically and against world indexes.

Recent innovations in global custody include securities lending, multicurrency short-term investment funds and refined customer information systems, specifically PC-based interface technology, she added. Custodians also are boosting capabilities in emerging markets.

Pension executives are less pleased with service and charges for global custody compared with domestic accounts.

While almost all of the 83 pension executives surveyed on their domestic trustees rated the institutions a 4 (above average), only half of the 44 executives responding to the global custody survey rated over-

# Banks focus on fees

## Move on to trim global custody costs

By Marlene Givant

Cost-cutting is a top challenge of global custodians in the wake of increasing industry competition and client concern over high fees.

"Right now, I'm putting all my emphasis on how to reduce costs through automation," said Murray Steinberg, senior vice president in charge of global operations of Boston Safe Deposit & Trust Co., Boston.

"With competitive prices, people are beginning to use more than one global custodian, but it's difficult to administratively manage more than one," said Susan Beacham, vice president of Mitsubishi Bank of California.

Global custody fees range from three to 15 basis points for a passive international portfolio and 25 to 35 basis points for an active portfolio, assuming in either case a separate account of $100 million to $300 million or a commingled fund of $300 million to $1 billion, according to Mr. Steinberg.

Fees are high largely because of the number of middlemen. Global custodians generally use other banks overseas as subcustodians. "Sixty to 66% of all cost is because of subcustodial banks," said Mr. Steinberg.

Global custodians need U.S. staff to deal with foreign subcustodians and multicurrency accountants who might keep accounts in a client's base currency as well as local currencies.

And subcustodial banks overseas charge different fees; many charge extra for each separate account and each security issue as well as corporate action processing.

Some countries tax U.S. investors for such services as trading ex-dividend. And where investors can recoup tax payments, the subcustodian must do the expensive paper work.

Cross-border communications among all parties to a trade, foreign exchange transactions and physical securities settlement with various settlement periods and procedures among markets adds to the complexity and overall cost.

Adding an extra layer, some U.S. banks use other banks as global custodians for their clients.

Eliminating middlemen and boosting efficiency is the key to lower costs. Although failed trades still persist, representing about 40% of all trades, said Mr. Steinberg, progress is being made.

The Depository Trust Co. Trade ID System in the United States is working to create book-entry settlement of securities overseas, and Euroclear — a clearing system and central custodian for international markets — is putting certain common stocks worldwide in its system on a book-entry-type system like that used in the United States.

Meanwhile, banks are taking their own action. Northern Trust Co. bases prices of global custody services on the makeup of each client's portfolio in terms of size, transaction volume, countries invested in and special accounting and reporting requirements.

State Street Bank and Trust Co., Boston, recently unbundled its custody fees, using regional fee schedules and weighting fees according to where a client invests.

Mr. Steinberg said Boston Safe's volume doesn't yet justify an unbundled fee structure. Instead, Boston Safe is putting terminals in its banking and subcustodians' offices that can reach its Boston system directly to "increase productivity and reduce manual intervention."

Where automation with Boston Safe isn't feasible, a subcustodian will transfer settlement information to its U.S. office for forwarding to Boston Safe. Boston Safe also might open new offices abroad.

Bank of America is planning to expand its client base in key markets in Asia and Europe and provide services to regional financial institutions in the United States.

Morgan Stanley Global Services offers Morgan Stanley Capital International research, trade execution with Morgan Stanley & Co., foreign exchange and settlement and global custody through Morgan Stanley Trust Co. or any combination of the services. MSGS has a global data network linking transnational and domestic clearing organizations, agent banks and brokers. All parties are technologically linked, replacing the more common telex and facsimile.

In February, Bankers Trust Co.'s Global Fiduciary Services Group introduced Globe*Net, an international subcustodial network and integrated securities movement and cash control system for its global custody product, GlobeTrust. It also provides global accounting, reporting and performance measurement through its subsidiary, The WM Co., Edinburgh. ■

Many of these banks appoint other banks to handle at least some global custody assets.

When Ameritech needed a Master Trust who did they dial for information?

AMERITECH

They were born a giant in the telecommunications field. But that didn't make it any easier to manage the eighth largest pension fund in the country. So Ameritech called up Harris Bank.

That's because the Harris approach to Master Trust planning is a flexible one. Rather than a preset service package, we offered Ameritech a custom-tailored plan to meet their specific needs. A plan that can be further adapted, as their needs grow and change.

This kind of cooperative planning means we do more than respond to requests. We initiate ideas. And offer expert help, not just from one source person, but from various levels of our Master Trust department.

For Ameritech, the Harris brand of flexible teamwork made the best Master Trust connection. See what we can do for you. Call our Marketing Representative at (312) 461-7956.

The Harris. Move up to the Banking Lion.

Harris Trust and Savings Bank, 111 W. Monroe St., Chicago, IL 60603. Member FDIC, Federal Reserve System.

MASTER TRUST

# Banks key on problem solving

By Carol Wiley

In the competitive master trust business, banks are working harder than ever to hold on to their clients by solving problems as they arise.

Accuracy and timeliness of reports are still the common complaints of pension fund sponsors, and in the current competitive atmosphere, banks must address problems or risk losing clients.

"Large, corporate pension fund clients are few and far between," said Ronald Golz, executive vice president of State Street Bank and Trust Co., Boston, the nation's largest provider of master trust/master custodial services. "If they were to move because of poor service, every competitor would be after that piece of business. It's intensely competitive."

According to sponsors, consultants and bank officials, most complaints center on inaccurate reports. The most common ones heard by consultant Asghar Alam of The Wyatt Co., New York, are that the master trustee has not recorded stock purchases or sales on the right dates, and that the trust report does not balance.

"The basic problems continue to be basic capabilities — accuracy and how quickly the reports are delivered — the ABCs of the business," said Rodger F. Smith, partner with Greenwich Associates, Greenwich, Conn.

Mistakes in record keeping always have been — and always will be — an issue, according to Mike Wright, consultant with Wyatt's Boston office. There is no error-proof system, but "how quickly the bank corrects the mistakes is the issue . . . and how fast it can get the reports out," Mr. Wright said.

"Banks are upgrading their systems to adapt and to modify to meet changing needs," Mr. Smith said. "It takes a considerable amount of money for systems technology and the people who can use the system in a productive way. Every organization needs a major overhaul now and then."

Clients also complain about personnel, Mr. Wright said. "The first and easiest complaint is always about the account relationships," he said. "Is the master trust officer responsible; is he treating the sponsor the way he should be? As a result, there's an ongoing shuffling of personnel."

The client might leave because the bank is experiencing difficulties elsewhere in its business, not just on the master trust side, Mr. Golz said.

Such was the case for Vulcan Materials Co., Birmingham, Ala., which moved its business to The Northern Trust Co., Chicago, from First Republicbank, Dallas (now NCNB Texas National Bank), because of the Texas bank's financial difficulties, according to Robert W. Lee, vice president-compensation and risk management.

Also, clients of smaller master trust banks might find they have outgrown the services of their bank. For example, the client might want global custody services the bank does not provide, or the bank might not offer services for specialized investments, Wyatt's Mr. Alam said.

The $1.3 billion plan of North American Philips Corp., New York, has found "a lot of pass-throughs and other types of investments are hard for banks to price and collect income and credit properly," said Kathleen Pino, pension finance administrator. Some banks have a different pricing system for bonds or might rely on different reports for information than the pension fund's investment managers, she said.

The Long Island Railroad, Jamaica, N.Y., whose defined benefit plan totals $115 million, experienced a two-day delay cabling assets to its master trustee, National Westminster Bank, New York, for purchases; encountered variations in pricing of zero-coupon bonds; and learned Natwest made mistakes in purchasing securities issues for its portfolios, according to Vincent Wing, manager of investment analysis.

To correct the problems, North American Philips and the Long Island Railroad hired Hamilton & Co., Princeton, N.J., a consulting firm that works with master trustee banks.

Hamilton & Co. provides monthly audits of the master trust procedure by replicating the entire process for its clients, comparing its reports with bank reports and reconciling the differences with the bank. What results, according to Susan Crotty, Hamilton's managing director, "usually leads to better management on everyone's part."

"Normally, you get better service from the custodian, because you have someone looking and watching over their shoulder, and you have the client calling with the problems," Ms. Crotty said.

Banks have responded favorably to the audit process, she added. ■

## Austin funds select bank as custodian

AUSTIN, Texas — Two Austin municipal funds have chosen The Northern Trust Co., Chicago, as master custodian for their combined assets.

The $549 City of Austin Employees Retirement and Pension Fund and the $50 million City of Austin Police Retirement Fund chose Northern Trust as the first master custodian for the two funds. Custody of the funds previously had been with the city treasurer.

Cathy Harrington, city pension officer, said Northern was selected following a nationwide search conducted by the city with assistance from its consultant, Callan Associates Inc., San Francisco.

"We were impressed with their (Northern's) internal capabilities and with the quality of people assigned to our account," said Ms. Harrington.

The primary service the city sought was in the custodial area, but the city also plans to make use of other services, such as securities lending, offered by Northern Trust. ■

# First Penn set to compete

By Fred Williams

PHILADELPHIA — America's oldest commercial bank might not be the largest, but First Pennsylvania Bank has emerged as a major player in the master trust/master custody business by carefully targeting its clientele and making a strong commitment to the business.

While still considered a regional bank, First Penn — established in 1782 — has grown to become the 14th largest master trust/master custody bank in *Pensions & Investment Age*'s annual survey, with $32.5 billion in combined assets, $28.6 billion of which is in master custodial accounts.

Officials at First Penn challenge the prevailing sentiment among many consultants and money center banks that the master trust/master custody business will be consolidated among the top five or six master trust banks.

"There have been questions because we are smaller relative to other banks like Chase and Northern Trust, but we have committed substantial dollars to this business, we have committed to stay in the business and will commit whatever dollars it takes to maintain our systems," said Stuart Saunders Jr., executive vice president and head of First Penn's trust and investment services group.

First Penn targeted the master trust/master custody business in 1983, said Mr. Saunders. Its first account was the $8 billion Commonwealth of Pennsylvania Retirement System, and the bank has focused its attention on public pension plans. It since has been named master custodian for the $1.6 billion City of Philadelphia Municipal Pension Fund and the $4.2 billion Alaska State Retirement System.

An official in the Alaska state treasurer's office, Juneau, said the system had been using Bank of America, San Francisco, before hiring First Pennsylvania in 1984.

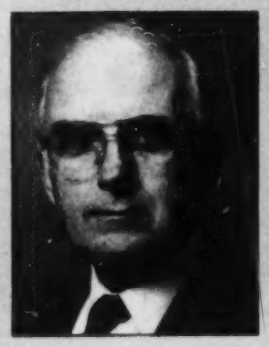
"We went through the normal state contracting procedure in requesting proposals, and we decided on a smaller regional bank where we would be a more significant customer," the official said.

He said the distance between Juneau and Philadelphia isn't a problem because of technological advances in electronic data transmission and the telephone.

For items requiring a signature, the system uses a facsimile to send and receive documents.

Alaska's officials might not mind the bank not being nearby, but other clients selected First Penn because of its location.

Rudolph Peins, senior vice president at Hunt Manufacturing Co., Philadelphia, said Hunt "looked at the market" before selecting First Penn. "But our primary objective was to work with a Philadelphia firm. We believe they provide the type of service we wanted, but they had to be a Philadelphia firm where we would have access to someone in the bank when we needed them."



**First Penn's Stuart Saunders Jr. (above) and James F. McHale say the bank is holding its own in master trust/master custody business.**

He said he has been "delighted" with First Penn's performance as master trustee for its pension assets. He declined to specify the total assets in the Hunt plan, but as of October 1986 the fund had $11.2 million, according to the 1988 Money Market Directory.

Tim Roof, consultant in the Philadelphia office of Hewitt Associates, said he's not surprised First Penn has been successful in the master trust/master custody area.

"I get the impression that they have taken a strategic approach to the business and picked their target and made the commitment to the business."

First Penn offers the traditional range of master trust services, including securities lending, accounting, asset administration, portfolio analysis, performance measurement, reporting and global custody. One distinguishing feature is an on-line interface with the bank's accounting system that provides account information regarding transactions, asset data and performance measurement. The system can be customized to provide specific files for clients, said Mr. Saunders.

"We don't think anyone in the country has one like it," he said. "The system was designed internally by trust bankers to serve this business."

Client terminals are provided at the user location and allow the user to view asset positions as well as a chronological listing of account activity from the last report date up to the past three months.

James F. McHale, senior vice president and manager of First Penn's trust business development department, emphasized the role of smaller regional banks in the master trust business.

"We have been told by the top five or six master trust banks that there is no room in this business for second-tier master trust banks. We strongly disagree. The top five or six banks have asset levels of over $120 billion each. It is very difficult to give quality services to users at that level.

"Second-tier banks with $30 billion to $50 billion, as long as they have the proper systems to be in the business, can compete effectively." ■

## Ameritrust Co.

900 Euclid Ave., Cleveland, Ohio 44101; (216) 687-4089

| | |
|---|---|
| Domestic master trust | $3,715,000,000 |
| Domestic master custodial | $10,463,000,000 |
| Global custody | $91,000,000 |
| Domestic master trust clients | 42 |
| Domestic master custodial clients | 17 |
| Global custody clients | 4 |
| Account supervisors | 3 |

Ameritrust Co.'s domestic master custodial assets increased $7.177 billion in the year ended June 30.

The primary accounting method is trade date. Accrual accounting is offered.

Services offered in the basic master trust/master custodial agreement are automated cash management, pension benefit payments, security processing, custody services, performance measurement and Ameriscan on-line inquiry.

Services available for additional fees are TUCS, participant record keeping and investment management services.

Monthly transaction reports are available in five business days; asset and liability reports, in five business days; and performance measurement reports, in 15 calendar days. All are available on-line.

Fees for domestic services are based on market value of assets and individual services; fees for global services are based on transactions and asset size.

Countries covered by the global custody services are Canada, Italy, South Africa, France, Denmark, Japan, Sweden, Finland, Belgium, Norway, the Netherlands, Mexico, Australia, Singapore and Hong Kong.

The client contact is Gary W. Queen.

## The Bank of New York

48 Wall St., New York, N.Y. 10015; (212) 495-1784

| | |
|---|---|
| Domestic master trust | $43,884,000,000 |
| Domestic master custodial | $54,100,000,000 |
| Global custody | $263,000,000 |
| Domestic master trust clients | 88 |
| Domestic master custodial clients | 19 |
| Global custody clients | 29 |
| Account supervisors | 16 |

The Bank of New York's domestic master trust assets rose $2.784 billion in the year ended June 30; domestic master custodial assets rose $2.1 billion; and global custody assets rose $118 million.

The primary accounting methods are trade and actual settlement date. Average cost, tax lot basis, amortized cost and liability accounting are offered.

Services offered in the basic master trust/master custodial agreement are global safekeeping, full trust administration services, cash management, fail float, portfolio accounting, custom reports, integrated on-line services, ERISA reporting and client training.

Available for additional fees are automated equitable accounting, benefit payment services, PC-driven report enhancer, performance measurement and analytics, securities lending and consulting services.

Monthly transaction reports are available on-line the next day and in hard copy form in 3 to 5 days; asset and liability reports, next day on-line; and performance measurement reports, in 20 days. All reports are available on-line.

Fees for domestic services are negotiated individually based upon asset value, portfolio structure and other required services; fees for global services are calculated by country and activity.

Countries covered by the global custody services are Australia, Belgium, Canada, Italy, Mexico, France, West Germany, Switzerland, Spain, the United Kingdom, Norway, Sweden, Japan, Finland, Denmark, Hong Kong, the Netherlands and South Africa.

The master trust and global custody client contact is Roy P. Lanza, vice president.

## Bankers Trust Co.

280 Park Ave., 8 West, New York, N.Y.; (212) 850-2037

| | |
|---|---|
| Domestic master trust | $135,586,000,000 |
| Domestic master custodial | $35,500,000,000 |
| Global custody | $5,000,000,000 |
| Domestic master trust clients | 301 |
| Domestic master custodial clients | 85 |
| Global custody clients | 58 |
| Account supervisors | 60 |

Bankers Trust Co.'s domestic master trust assets rose $7.905 billion in the year ended June 30; and domestic master custodial assets rose $1.841 billion.

Its primary accounting methods are trade and contractual date, on a fully accrued basis.

Tax-lot and cost-basis accounting are offered.

Services offered in the basic master trust/master custodial agreement are cash management, safekeeping of assets, transaction processing, accounting, reporting, investment manager liaison and legal and regulatory updates.

Services available for additional fees are securities lending; global custody; performance measurement and analytics; on-line access to accounting and performance data as well as external data bases, customized reporting and graphics; benefit payments; investment management; actively managed STIFs for ERISA and non-ERISA assets; discount brokerage; consulting; dividend reinvestment program; trade execution monitoring; and participant record keeping.

Monthly transaction reports are available in three business days; asset and liability reports, in seven to 10 business days; and performance measurement reports, in 15 business days. All of these reports are available on-line.

Fees for domestic services are negotiated based upon the costs associated with each client's specific requirements; fees for global services are based on transaction volumes, assets size and distribution across markets.

Countries covered by the global custody services are Australia, Austria, Belgium, Canada, Denmark, Finland, France, West Germany, Hong Kong, Ireland, Italy, Japan, Luxembourg, Malaysia, Mexico, the Netherlands, New Zealand, Norway, Portugal, Singapore, South Africa, Spain, Sweden, Switzerland, Thailand and the United Kingdom.

The client contact is Frederik L. Bailey, vice president.

## Boston Safe Deposit and Trust Co.

1 Boston Place, Boston, Mass. 02108; (617) 722-7314

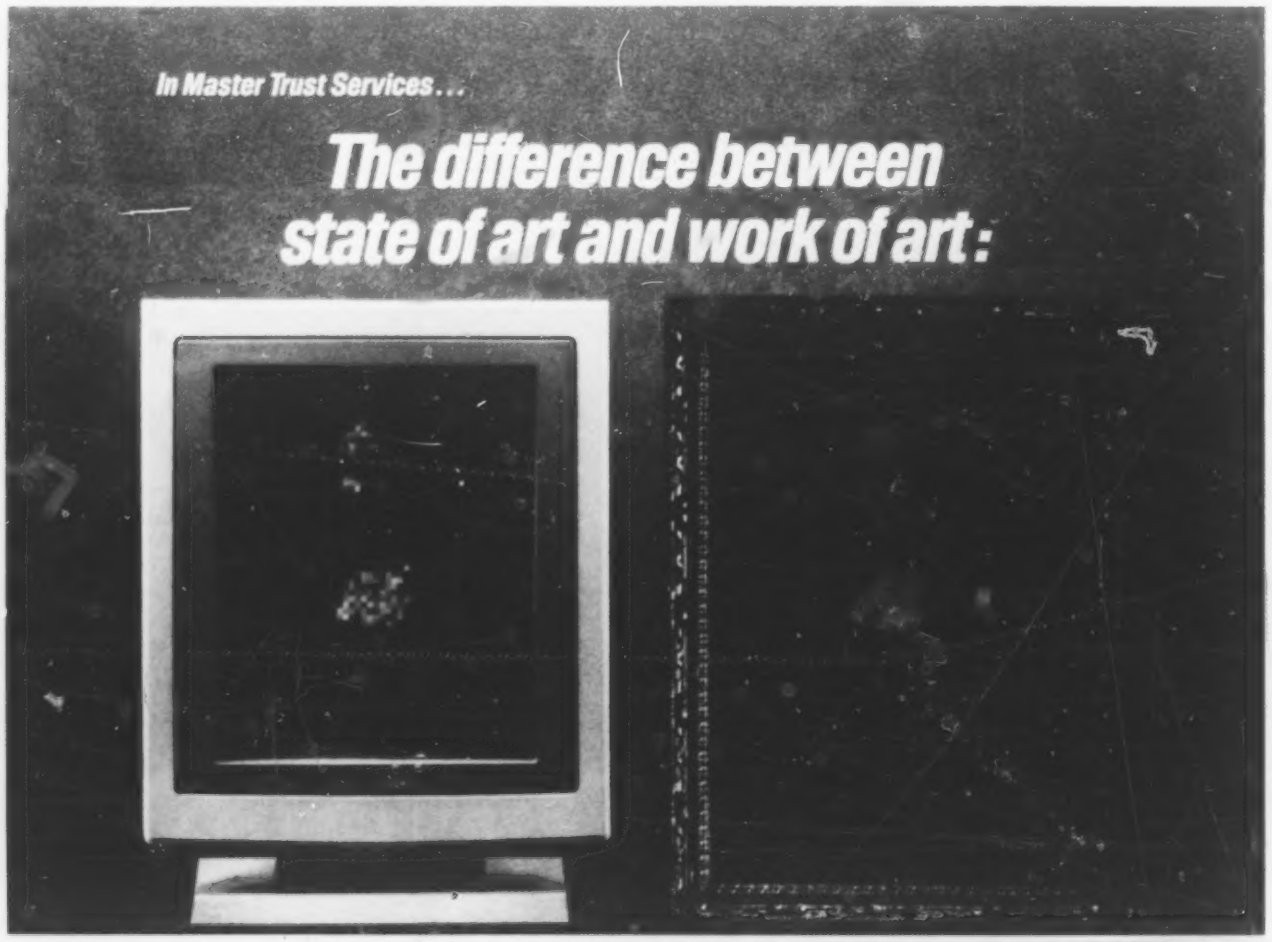
| | |
|---|---|
| Domestic master trust | $38,623,000,000 |
| Domestic master custodial | $75,996,000,000 |
| Global custody | $4,259,000,000 |
| Domestic master trust clients | 47 |
| Domestic master custodial clients | 31 |
| Global custody clients | 32 |
| Account supervisors | 23 |

Boston Safe Deposit and Trust Co.'s domestic master trust assets rose $4.895 billion in the year ended June 30; domestic master custodial assets rose $22.763 billion; and global custody assets increased $1.906 billion.

The primary accounting method is a true trade date, daily full accrual, multicurrency accounting system. The accounting system also interfaces daily with a cash basis securities control system.

Services offered in the basic master trust/master custodial agreement are safekeeping of assets, cash management and securities processing, and daily full accrual trade date-based accounting and reporting.

Available for additional fees are securities lending, global custody, benefit payments, participant record keeping, structured investment products, real estate, active management, performance measurement and analysis, on-line access, Master Workstation and consulting services.



*the hands of a master.*

At First Pennsylvania Bank, advanced technology is only part of the picture. Our clients receive personalized service from a staff of professionals well practiced in the art of master trust/custody administration ...over $30 billion in assets and growing.

This experience and individual attention to your account allow us to design an administrative plan for you that's flexible and responsive, from a palette of services that includes portfolio reporting, analysis and comparison, securities lending, direct dial-up access, and more. And each plan is as distinctively different from any other as a work of art is from a computer portrait.

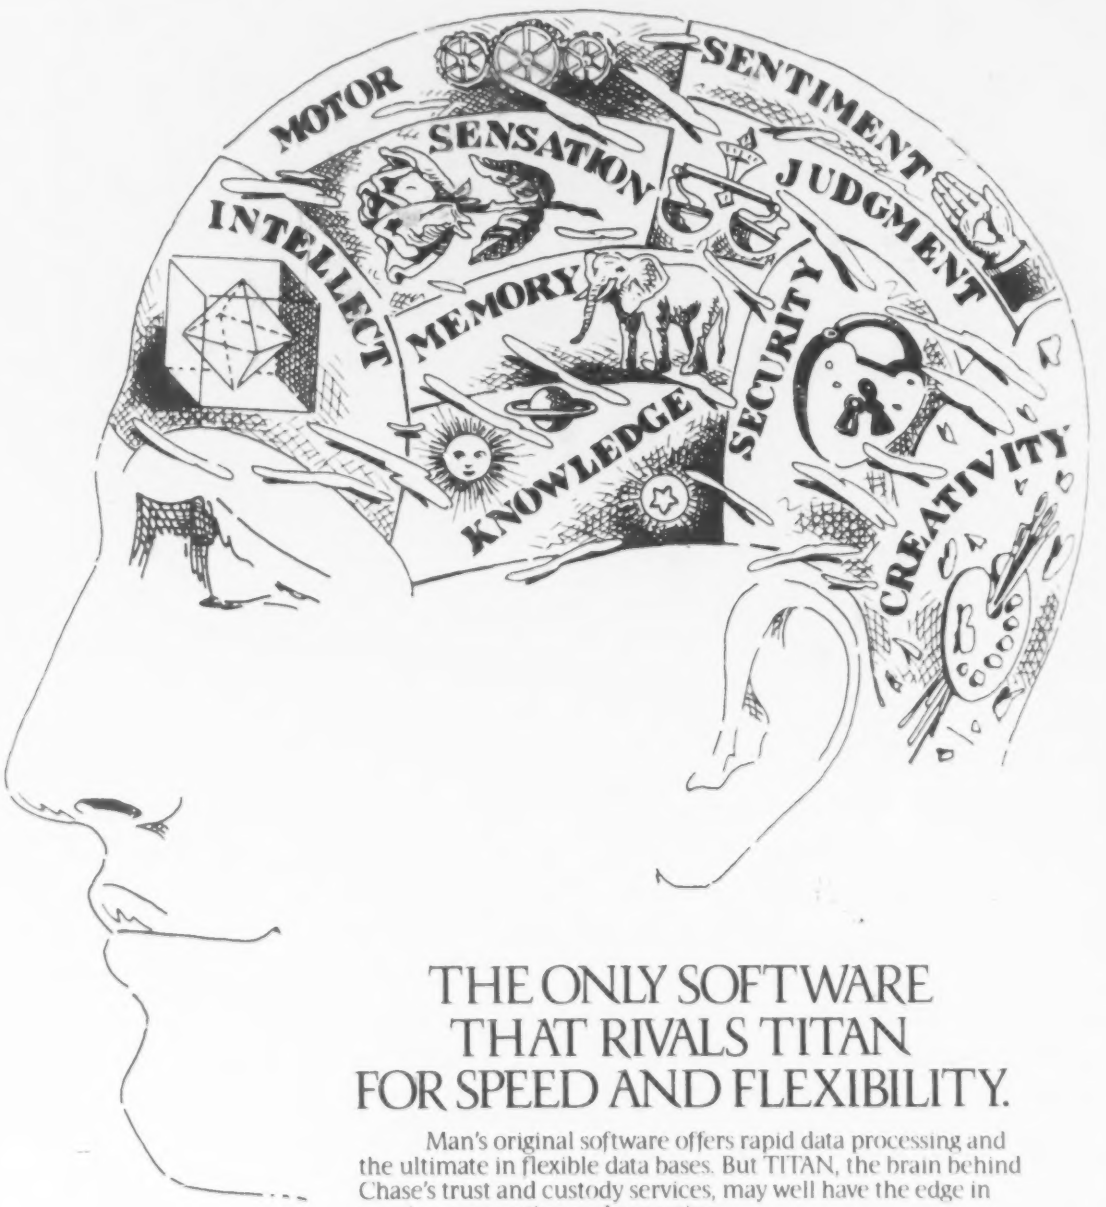
Services offered in the basic master



THE ONLY SOFTWARE THAT RIVALS TITAN FOR SPEED AND FLEXIBILITY.

Man's original software offers rapid data processing and the ultimate in flexible data bases. But TITAN, the brain behind Chase's trust and custody services, may well have the edge in pension accounting and reporting.

Unlike the mind, TITAN is reinvented and rereleased twice a year. TITAN is tireless in its ability to sort, segregate and crunch data. TITAN never sleeps.

And though the brain may approach its speed and flexibility, to err is human. To TITAN, it's alien.

For more information contact Jack Federico, V.P., (212) 730-2641.

# Your First Wachovia Master Trust Is As Individual As Your Company.

No matter what type of Master Trust your company needs, First Wachovia can offer one that's right for you.

Our service is built around one simple premise: package services based on customers' needs. Not ours. And we never lose sight of that objective.

We start with an extensive service offering. We build in the flexibility that lets your company select only what you need. Then we add an Account Manager, who's backed by the most sophisticated technology and innovative thinking in the field.

The outcome is a personalized program that meets your company's needs today, and can change to meet them in the future.

Our years of experience have made us a leader in the field. So if your company is ready to put the most advanced Master Trust service to work, call Jane Fisher at (919) 770-6348.

FIRST WACHOVIA

In addition to the Standard Master Trust services, we will custom design services to meet your individual needs. • Securities Lending • Global Custody • Performance Analytics • Trust Universe Comparison Service® * • Options/Futures Administration • Plan Sponsor On-line • Client Seminars • Investment Consulting • Participant Recordkeeping • 401(k) Administration • Real Estate Management • Venture Capital Management • PAYSOP Administration • Legal Administration • Timberland • Flexible Reporting • Fixed Income Management

BEAR STEARNS

Our 4 Year Old Has Been Around For 65 Years.

In 1984, Bear Stearns formed Custodial Trust Company.

Before we opened the doors, we already had 61 years experience. Bear Stearns experience. And all the talent and systems that go with being one of the nation's leading securities processors.

This unique combination enables Custodial Trust Company, a New Jersey State bank, to provide exceptional, yet inexpensive, custody and master trust services for institutional investors.

Securities lending, options and futures reporting, and the handling of mortgage backed securities are among the services in which we excel. Global custody, on-line reporting, performance measurement and a variety of vehicles for sweeping uninvested funds are all provided.

If you're interested in joining the pension funds, endowments, foundations, insurance companies, mutual funds and other institutions who've already discovered the trust company that's wise beyond its years, call Michael Minikes, Treasurer, The Bear Stearns Companies Inc. at (212) 272-2089 or Sandra J. Kinet, Director, Custodial Trust Company at (212) 272-2087.

# Is Your Equity Manager's Style A Mystery To You?

© 1988 Dave Groesman Illustration Design

## Introducing The TUCS Manager Style Performance Report

As a plan sponsor, you know that long term success of a multiple manager approach depends upon identification of superior managers and equally important, manager investment styles. As manager styles become more specialized, so does the need for comparison performance reporting.

The TUCS Manager Style Performance Report enables you to:

- Contrast his results to other managers of similar style
- Compare your manager's stated style with his actual style
- Analyze the impact of style on your fund's performance

TUCS®

## To Solve This Mystery With Style, Contact Your TUCS Custodian

TUCS® and Trust Universe Comparison Service® are registered service marks of Wilshire Associates, Santa Monica, California

Royal Trust Corp. of Canada's domestic master trust assets rose $957 million in the year ended June 30.

The primary accounting method is settlement date. Full adjustment to trade date in statements is offered.

Services offered in the basic master trust/master custodial agreement are full safe-custody; Canadian, U.S. and overseas settlement and income collection (income anticipated on Canadian and U.S.); corporate changes; automatic credit for maturities redemption; expiry date notification; full financial reporting, including total fund and component return calculations; and full benefit payment services.

Services available for additional fees are performance measurement and analysis; securities lending; on-line entry and inquiry; downloading; asset/liability forecasting; global custody; and domestic and foreign investment management.

Monthly transaction reports are available in three to four days; asset and liability reports, in 10 to 20 days; and performance measurement reports, in seven weeks.

Transactions, assets, trade status, cash forecasting and asset valuations and analysis reports are available on-line.

Fees for domestic services are based on asset value, transactions and report changes; fees for global services are based on asset value.

All countries are covered by global custody services.

The client contact is Richard Holloway, director-pension services.

### Security Pacific

333 S. Grand Ave., Suite 1740, Los Angeles, Calif. 90071; (213) 229-2996

| | |
|---|---|
| Domestic master trust | $4,200,000,000 |
| Domestic master custodial | $51,000,000,000 |
| Global custody | $1,200,000,000 |
| Domestic master trust clients | 17 |
| Domestic master custodial clients | 40 |
| Global custody clients | 8 |

*Continued from page 23*

were down, but also, pension fund sponsors put a lot of decisions on hold about international investments, asset allocation and so forth. There was a wait-and- see attitude that lasted from Oct. 19 to the first quarter when not a lot was happening."

Mr. Golz confirmed that was not the case, however, on the master custody side, as public fund sponsors decided to hire master custodians.

Surpassing State Street in master trust assets this year are Bankers Trust Co., New York, and Northern Trust Co., Chicago. Bankers Trust, whose combined assets of $171 billion make it No. 2 on the chart, has $135.5 billion in master trust assets. Bankers Trust excluded $46 billion in thrift assets in last year's survey, which partly accounts for the increase this year.

Northern Trust has $104.1 billion in master trust assets and combined assets of $139 billion, ranking fourth overall.

Bankers Trust this year usurped Chase Manhattan Bank's position as the second largest provider of master trust/master custodial services, even though its market share declined to 11.6% from 12%.

Chase Manhattan reported combined assets of $148.2 billion, with a market share of 9.7%, up from 8.3% a year ago. Northern Trust's market share increased to 9.1%, up from 8.8%, and it remained the fourth largest provider of master trust/master custodial services.

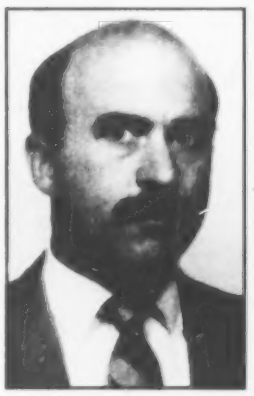
Boston Safe Deposit & Trust Co. reported combined master trust/master custodial assets of $114.6 billion, for a market share of 7.5%. It moved to the No. 5 position, up from No. 8 last year.

Of the remaining five banks in the top 10, Mellon Bank, Pittsburgh, has 6.9% of the market; Citibank, New York, 6.7%; Bank of New York, 6.4%; Irving Trust Co., New York, 3.4%; and Security Pacific, Los Angeles, 3.6%.

Missing from this year's list is Bank of America, San Francisco, which no longer is in the market. In last year's survey, Bank of America reported $16.3 billion in master trust/master custodial assets.

In January, after months of problems with its trust accounting system, BankAmerica Corp. shifted most of its institutional trust business to a subsidiary, Seattle First National Bank. The bank had spent $60 million to improve the malfunctioning MasterNet system, which cost $20 million. ■

Rodger F. Smith, a partner of Greenwich Associates (above), and Mike Wright, a consultant with The Wyatt Co.



Report
from Number One Wall Street

*Assisting institutional investors. At Irving Trust, it's a matter of course.*

Services available for additional fees are investment and analytic services, on-line access, securities lending, global custody, pension disbursement and participant record keeping.

Monthly transaction reports are available in one day; asset and liability reports, in two days; and performance measurement reports, in 14 days. Monthly transaction and asset and liability reports are available on-line.

Fees for domestic and global services are based on asset value and transaction charges.

Countries covered by the global custody services are Austria, Australia, Bahamas, Belgium, Brazil, Canada, Channel Islands, Denmark, France, Finland, West Germany, Greece, Hong Kong, Ireland, Italy, Japan, Luxembourg, Mexico, the Netherlands, Norway, the Philippines, Singapore, South Africa, Spain, Sweden, Switzerland, Thailand and the United Kingdom.

The client contact is Barbara A. Uberti, assistant vice president.

# California glides to success

## Master custody set-up runs smoothly

By Trudy Ring

SACRAMENTO, Calif. — Setting up the nation's largest master custodial account — for the $46 billion California Public Employees' Retirement System — was a challenging exercise that has paid off.

In January 1987, the California fund selected Boston Safe Deposit & Trust Co., Boston, as its first master custodian after a change in state law allowed the fund to use an outside custodian rather than the state treasurer's office.

When the treasurer had custody of the fund, securities were housed at various locations; the three primary ones were the treasurer's office and two depositories. Pulling everything together required a great deal of work on the part of the new custodian, said Basil Schwan, assistant executive officer in charge of the fund's investment operations.

"It's always easier, of course, if you are dealing with a single predecessor," said Robert Mainer, senior vice president and deputy manager of the institutional markets group at Boston Safe. "We had multiple sources of information (on the securities held by the fund). That made it, admittedly, more challenging than if it had all been in one place."

But the account was up and running by May 1987. Most of the lag time was due to contract negotiations, often a time-consuming process; once those were settled, Boston Safe geared up to service the account.

"We thought their ability to do that quickly was quite amazing," Mr. Schwan said.

"It was quite a challenge for Boston Safe to identify everything and make that conversion" to the new account, he said.

At the peak of the preparation for taking over the account, Boston Safe had 48 people working on it; they were involved in such aspects as transferring information to Boston Safe's computer system, modifying the system as needed and reconciling securities, Mr. Mainer said. Of this group, 16 were on a team dedicated primarily to the project; the others came in as needed.

The effort was almost exclusively Boston Safe's, Mr. Schwan said; the California fund had two staff members working on getting the information to the custodian.

Problems that sometimes crop up when changing custodians — such as mistakenly accounting for securities a fund really doesn't hold, or missing some it does — didn't occur to any significant extent, thanks to Boston Safe's skill, Mr. Schwan said.

Mr. Mainer noted Boston Safe had an elaborate plan and schedule for taking over the account, identifying each necessary step and the person responsible for it, so this kept problems at bay.

Also, he said, the retirement system's money managers were satisfied with the transfer's smoothness — something they don't always find.

After the information was gathered, Boston Safe was well prepared technologically to service the account, Messrs. Schwan and Mainer said.

"The systems impact, despite the size of the account, was moderate," Mr. Mainer said. "Largely, that was a matter of adaptation of existing systems to the particular requirements of California PERS."

Certain customization of the system was involved in setting up computer links among the Boston Safe headquarters, the pension fund office and the California treasurer's and controller's offices.

The fund staff has on-line access to Boston Safe's data on the account, including information on transactions, cash flow and portfolio makeup and analytical material on investment managers' strategies, risks and returns.

This is far from the California fund's previous, manual system of keeping records.

"The currency and the accessibility is mind-boggling," Mr. Schwan said. "We've gone light-years in just one year."

The treasurer's office didn't have such technology, a major factor California fund officials considered in their master custodian search. "We were most interested in somebody who would make a commitment to get us up to speed in a very short time," he said.

**Basil Schwan of the California Public Employees' Retirement System**

Any of the five finalists in the search likely could have done the job, but Boston Safe was rated highest by the fund's staff, Mr. Schwan said. The other finalists were Bank of New York, Bankers Trust Co. and Chase Manhattan Bank, all of New York, and State Street Bank and Trust Co., Boston. "We have not had any regrets" about choosing Boston Safe, he said.

Nor has Boston Safe regretted taking on the account. "It's a stimulating account, because it's great to work with people who are front runners in whatever field they're in," Mr. Mainer said. ■

# Execs content

three pension executives; 32 had that many responses from money managers.

Mellon Bank, while tops among pension executives, was 11th among trustee banks rated by managers. It had an overall score of 4, with responses from 21 managers.

Harris Trust — which was ranked first by managers in 1986 with a 4.4 rating — was 17th this year with a 3.9 rating. It was rated by 21 managers, up from 18 two years ago. This year's champion, Marshall & Ilsley, was third in 1986, with a 4.3 rating from managers.

Master trust banks rated by the greatest number of managers were Northern Trust, with 30 responses; State Street Bank & Trust Co., Boston, and Bankers Trust, with 28 each; and Chase Manhattan, with 27. ■

**Overall ranking of master trust banks by investment managers**

| | Rating | Number of responses* |
|---|---|---|
| 1. Marshall & Ilsley Trust | 4.5 | 6 |
| 2. Ameritrust | 4.4 | 9 |
| 3. Wilmington Trust | 4.4 | 5 |

# Global

*Continued from page 23*

all service a 4; more than a third rated service a 3.

Fees didn't earn good marks either (*see related story, page 24*).

While only 13% of executives said their domestic master trustee fees were high, 37% of respondents to the global custody survey said their fees were high; 78% said domestic master trust fees were average, compared with 60% who rated global custody fees as average.

Fees might come down as competition heats up. One newcomer, Morgan Stanley Trust Co., already has $1.67 billion in global custody assets.

Irving Trust, now using Mitsubishi for global custody, will launch its own global custody product by the end of the year, according to Robert Almanas, vice president and global custody product manager.

In addition, Barclays Bank PLC, New York, will plug into the existing global custody system at its London headquarters to accommodate U.S. clients by Jan. 1, said Joseph Vierno, vice president-global custody group. ■

# Phoenix Mutual hits $2 billion

HARTFORD, Conn. — The Phoenix Mutual Life Insurance Co. has reached the $2 billion milestone in pension fund assets under management with the addition recently of $88.2 million from three new clients.

H. Russell Irving, vice president-pensions, attributed the 25% annual growth rate to the insurance company's "outstanding investment performance in equities, real estate and guaranteed investment contracts, and to aggressive marketing."

Phoenix Mutual Life, which manages $7.7 billion in assets, has significantly broadened its geographical mix of clients in the past three years. ■

"We wanted a shop that had
the broadest possible range
of investment alternatives for
nuclear decommissioning trusts."

"So who'd you choose?"

"Chase Investors' Fixed Income Shop...obviously!"

MASTER TRUST

# 1980s prosperous for Boston Co.

BOSTON — By any objective measure, The Boston Co. Inc. ranks as one of the major success stories of the 1980s in the investment management and trust business.

Since 1982, tax-exempt assets under management have increased to $14.4 billion from $5.3 billion; master trust and master custody assets have increased to $110 billion from $14.6 billion; and the company's own assets have increased to $15.3 billion from $664 million.

Those are impressive growth figures, especially for a company that seemed to have lost its way in the late 1970s when it sold off a number of investment counseling subsidiaries acquired in the early part of the decade.

At the end of 1981, The Boston Co.'s chief subsidiary, Boston Safe Deposit & Trust Co., ranked 963 among trust organizations in terms of assets. It now ranks 20th.

The surge in growth dates from the firm's acquisition in 1981 by Shearson Lehman Brothers Inc., and the appointment in 1982 of James von Germeten as president and chief investment officer.

The company was searching for a new sense of direction in 1982, Mr. von Germeten said in an interview. It set out to identify those market opportunities that offered a lot of potential for growth and that were large enough for a new entrant to make an impact, even if it faced entrenched competition.

"Then we decided to focus our resources on a handful of these opportunities — master trust, mutual funds, quantitative investment management and individual client business — while building the company's balance sheet," he said.

"In every case we were told we were too late to be successful, that there was too much competition already."

The Boston Co. committed a substantial amount of capital and talent to the targeted areas. In the master trust area, for example, investments for system development and enhancement were $1.7 million in 1983, $1.9 million in 1984, $2 million in 1985, $3.9 million in 1986, $5 million in 1987 and an estimated $6.8 million for 1988.

The company's executives realized that to be successful, they would have to invest incrementally in the systems, said Jean C. Tempel, executive vice president and head of the corporate operations group. They knew they could not make an initial investment and then relax. "This is an evolutionary development process. You must keep investing."

One reason the company has been able to grow in its chosen niches, said Robert C. Mainer, senior vice president, is that it has been able to reinvest all of its profits. It has paid none of its earnings to its parent, Shearson Lehman Hutton Inc., since 1981.

According to Mr. von Germeten, this is because the return on equity of the Boston Co. has been so high — 35% to 40% per year — "this is as good a place as the company has to invest money."

The result, said Mr. Mainer, is a company able to invest in systems and hire people ahead of needs.

Boston Safe Deposit & Trust won its first major master trust account in 1978 when it was hired by the then-Mountain Bell pension fund, a $600 million account. Soon after, Eastman Kodak Co., Rochester, N.Y., hired the company. Last year, Boston Safe Deposit & Trust was hired by the nation's largest pension fund, the $44 billion California Public Employee Retirement System, as master custodian.

Besides master trust and master custody, The Boston Co. now manages $14.4 billion, with $10.1 billion of that in active accounts and $4.3 billion in passive accounts.

As with master trust, The Boston Co. was late getting into the index fund arena, beginning seriously only in 1983, but it has gained rapidly.

Rapid growth apparently has not hurt the quality of the company's services.

Claude R. Perrier, executive director of the $1.4 billion Maine State Retirement System, said his fund was well satisfied with The Boston Co.'s services. Besides serving as master custodian, it is running close to $400 million for Maine, said Mr. Perrier. These assets are in an index fund and in a cash management program.

In addition, The Boston Co. carries out a securities lending program for the fund. "All in all, they have a nice range of services," he said. ■

# Program set to accredit consultants

SCOTTSDALE, Ariz. — The Institute for Investment Management Consultants is offering a national certification and accreditation program for investment consultants and those interested in the profession.

The national, non-profit organization is embarking on a major membership campaign as a prologue to developing continuing education and recognition programs for consultants.

Veteran consultants can earn designation as chartered certified investment management consultants by meeting eight criteria based on expertise, comprehensive services provided and longevity in the profession. The chartered CIMCs will make up a national certification board, which will establish certification criteria for future CIMCs.

Consultants who do not satisfy the charter certification criteria and those who want to build their credentials as investment management consultants can participate in the IIMC accreditation program, which will consist of home-study courses resulting in the designation accredited investment management consultant.

Money managers who regularly work with consultants can join as associate members. Consultants and those interested in the profession qualify for general membership.

Information about membership, certification and accreditation can be obtained by contacting IIMC, P.O. Box 6123, Scottsdale, Ariz. 85261, or by calling (602) 482-6705. ■

**Your Master Trust Service should fit just right.**

Not all organizations have the same set of measurements.

That's why, at Trust Company, we custom-tailor Master Trust and Master Custody Services to fit your company or institution exactly. We take into account your needs, your people, and your particular ways of doing business.

And along with state-of-the-art technology, we offer you the kind of personalized attention that some banks just can't deliver.

So when you go shopping for Master Trust or Master Custody Service, make sure you talk to Trust Company Bank. We just might suit you to a T.

PIPER

# 'Junk' turns into gold for fund

By Trudy Ring

Small bond funds concentrating on high-yield and high-coupon instruments fared well in the quarter and year ended June 30, according to Pensions & Investments' Performance Evaluation Report.

The report ranks 288 pooled fixed-income funds run by banks and insurance companies. During the quarter and year, the median PIPER bond fund return topped the Shearson Lehman Hutton Government/Corporate bond index, returning 1.2% and 7.7% respectively, against the index's 1% and 7.5%.

For longer periods, however, the median return trailed the index. For the three years ended June 30, the median fund had a compound annual return of 10.2%, compared with the index's 10.7%. For the five years, the median was 11.5%, vs. 12.2% for the index, and for the 10 years, the median fund returned 10.4% against 10.8% for the index. All returns for periods of more than a year are annualized.

In the quarter, First Variable Life Insurance Co., Little Rock, Ark., took top honors with a 5.6% return for its high-yield fund. The $2 million fund invests in junk bonds, but is particular about the quality of the issuing company.

"We are extremely selective in what we buy," said Rebecca H. Gartner, vice president of Amherst Investment Management, Little Rock, an affiliated company that runs the fund. "We buy for the long haul — we do not buy for the flip."

The fund was second for the year, with 11.5%. It also finished in the top 10% for the three- and five-year periods, with 13.6% and 14.1% respectively. The fund is too new to be included in the 10-year period.

Ms. Gartner attributed the fund's success to buying bonds of companies that are high-quality operations despite the below-investment-grade status of the securities. Investments in **Lorimar-Telepictures Corp., Knoll International Holdings Inc., Borg-Warner Holdings Corp.** and **Tonka Corp.** made big profits for the fund recently, she said. The fund's average maturity is 17 years.

Another high-yield fund, Washington-based Union Labor Life Insurance Co.'s Separate Account B, was first for the year with 12.7%. It was sixth for the quarter, with nearly 3%, and in the top 20% for the three- and five-year periods, with 11.8% and 12.6% respectively. It also is too new for the 10-year period.

The $15 million fund concentrates on bonds of basic-industry companies that have solid fundamentals or turnaround potential, said Barbara Riley, senior security analyst. It is about evenly divided among bonds rated BAA, BB and B. Maturities now range from seven to 15 years, slightly shorter than in the first quarter of 1988, because the fund has assumed a defensive posture against a possible interest rate increase, Ms. Riley said.

**Fixed-income funds**
**(periods ended June 30, 1988)**

| | 1st qtr. | 1 yr. | 3 yr. | 5 yr. | 10 yr. |
|---|---|---|---|---|---|
| Highest return | 5.6 | 12.7 | 15.6 | 15.7 | 13.6 |
| First quartile | 1.4 | 8.4 | 11 | 12.2 | 11.1 |
| Median | 1.2 | 7.7 | 10.2 | 11.5 | 10.4 |
| Third quartile | 1 | 6.9 | 9.3 | 10.7 | 9.7 |
| Lowest return | −1.7 | −0.5 | 1.9 | 7.9 | 6.4 |
| Shearson Lehman | 1 | 7.5 | 10.7 | 12.2 | 10.8 |

It made particularly good returns recently with securities of **Borg-Warner, Addington Resources Inc.** and **Chevy Chase Savings and Loan Association,** Ms. Riley said.

Beverly Trust Co., Chicago, which concentrates on investment-grade, high-coupon corporate bonds, was third for the year with 11.4%. It was in the top 10% for the quarter with 1.8%, the three-year period with 13.8% and the five-year period with 14.6%. It was second among all funds for the 10-year period, with 13.2%.

Beverly Trust looks for long bonds with short call provisions, said Ron Stajkowski, president. While many of the bonds in the $9 million fund might mature past 2000, most of them have calls in five or six years, he said. Call provisions keep the bonds' value from being affected by swings in the long bond market, he said.

The fund's average quality rating is in the BAA to A range, he added.

Sunburst Bank, Jackson, Miss., was second in the quarter with 3.7%. Heavy investments in convertible bonds, which suffered during the October stock market crash, hurt its performance for the year, when it was in the bottom 10% with 3.4%.

In the three- and five-year periods, its performance was excellent, placing it fourth among all funds with returns of 14.2% and 15% respectively. In the 10-year period, it was in the bottom 20% with 9.6%; this reflects the time before the fund's management team changed in 1984, said Ashby Foote, trust investment officer.

The $1.5 million fund takes a top-down approach to the market, evaluating the interest rate environment, inflation outlook and risk-reward spectrum of fixed-income securities, then assembling the portfolio, Mr. Foote said. It seeks both coupon income and capital appreciation over the long term, he said.

The fund still has a high allocation to convertibles, 57%. "We feel they offer some very good values right now," Mr. Foote said. It is about 25% in long Treasuries and zero-coupon bonds, 7.5% in straight corporates, 4% in mortgage-backed securities and the remainder in cash, he said. Average quality rating is AAA for straight bonds and B+ for convertibles; average maturity is 20 years.

United Bank of Denver, a perennial PIPER leader, topped the rankings for longer periods, with 15.6% for three years, 15.7% for five years and 13.6% for 10 years. It fell in the rankings but stayed above the median for the year, with 8%, and quarter, with 1.3%.

Delaware Trust Co., Wilmington, another frequent leader, was second for the three-year period, with 15.4%, and five-year period, with 15.7%. It was in the top 20% for the year, with 9.2%, and top 30% for the quarter, with 1.4%. It is too new for the 10-year period.

Third-place finishers were Equitable Capital Management Corp., New York, in the three-year period with 14.9%; Transamerica Life Insurance Co., Los Angeles, in the five-year period with 15.1%; and Sovran Bank, Richmond, Va., in the 10-year period with 13.1%. ■

# Returns stack up

## Quants, contrarians take equity lead

By Carol Wiley

Quantitative and contrarian investment philosophies were the successful management styles for pooled equity funds in Pensions & Investments' Performance Evaluation Report for the quarter and year ended June 30.

The top pooled equity fund for the quarter was managed by Centerre Trust Co., St. Louis. Its $67 million fund posted a return of 14.5% for the quarter, compared with 6.7% for the Standard & Poor's 500 stock index and 5.5% for the PIPER median fund.

The top fund for the year, reporting a 17.2% return vs. the S&P's −6.9% and the median's −5.2%, was First Chicago Investment Advisors' $480 million Institutional Equity Fund.

The median return of the 318 bank and insurance company pooled equity funds in the PIPER universe trailed the index in the longer performance periods, with compound annualized returns of 14.9%, 12.4% and 15.6%, for three, five and 10 years, respectively, against the index's 16.6%, 14.6% and 16.4%.

All PIPER returns for periods of more than one year are annualized.

The Centerre fund is "basically a long-term, quantitative, valuation, akin to a dividend discount model," said James McGuire, senior vice president and chief investment officer.

Although the fund benefited from "a couple of undervalued stocks and an LBO situation, mostly the market was paying more attention to long-term values, and it was a year of surprisingly few mistakes," Mr. McGuire said.

The fund sold holdings in **Chemical New York Corp.** and **First Interstate Bancorp.** when the stocks became fairly valued during the quarter and is now buying technology stocks, such as **Digital Equipment Corp.** and **Avnet Inc.**

First Chicago's fund contains large- and small-capitalization stocks that might be out of favor, and benefits from risk hedging, according to Gary Brinson, president.

"Our stock performance has been helped by individual issues, rather than industry strategies," he said.

Those issues include **MCI Communications Corp.** and **Intel Corp.**, as well as **The Chase Manhattan Corp., Citicorp** and **Security Pacific Corp.**

Two bank funds ranking in the top five for the quarter and top 10 for the year are managed by quantitative contrarian James Investment Research Inc., Alpha, Ohio — the $5. 5 million Equity Fund C of Bank One, Richmond, Ind., and the $13.5 million Cliran Equity Fund of Citizens Heritage Bank, Piqua, Ohio.

Bank One's fund was second in the quarter with 14.4% and fourth for the 12 months with 12%; the Cliran fund ranked fifth for the quarter with 11.3% and ninth for the year with 6.1%.

A third fund managed by James, the $7 million Retirement Fund C at State Bank & Trust Co., Defiance, Ohio, was sixth for the year with a return of 9.7%; first for the three years with 27.4%, and second for the five years with 19.6%.

"Since the crash, our indicators say there won't be a recession, so we're buying stock in those companies that benefit from a strong economy, such as chemicals, manufacturing, building, high-tech and computer stocks," said Frank James III, vice president.

The firm has been buying stock in **Dow Chemical Co., Ford Motor Co.** and **Businessland Inc.**, Mr. James said.

There has been an overall trimming of some stocks, but "no grand theme" among sales, he said.

Perennial PIPER equity leader Sun Banks, Orlando, Fla., reported returns for its $380 million Corporate Equity Fund that placed it in the top three for the three-year period, and first in the five- and 10-year periods. For the shorter periods, however, it dropped, placing in the eighth decile for the quarter and the fourth decile for the year, "even though we have continued to have above average holdings," according to Anthony Gray, president and chief investment officer, Sun Bank Investment Management Group.

The Sun Bank fund is actively managed, has high turnover and concentrates on large growth stocks.

**Pooled equity funds**
**(periods ended June 30, 1988)**

| | 1st qtr. | 1 yr. | 3 yr. | 5 yr. | 10 yr. |
|---|---|---|---|---|---|
| Highest return | 14.5 | 17.2 | 30.2 | 24.5 | 23 |
| First quartile | 6.6 | −2.2 | 16.9 | 14.7 | 16.8 |
| Median | 5.5 | −5.2 | 14.9 | 12.4 | 15.6 |
| Third quartile | 4.4 | −8.1 | 12.9 | 10.7 | 14.1 |
| Lowest return | −2 | −32 | 4.6 | 3.3 | 8.7 |
| S&P 500 | 6.7 | −6.9 | 16.6 | 14.6 | 16.4 |

"Two torpedoes hit us: **Tandem (Computers)** and **Liz Claiborne (Inc.)** had bad earnings reports, and technology stocks killed us," Mr. Gray said. "The problem really is a large number of stocks have done poorly for us this year; the smaller companies are doing great, but their stocks aren't doing well."

Food and large growth stocks continue to do well, he said, and the fund is holding positions in **Alberto-Culver Co., Ralston Purina Co.** and **Quaker Oats Co.**

First Fidelity Bank of Newark, N.J., had two funds that ranked highly in the short-term periods. Its $46 million employee benefits common stock fund reported 12.8% for the quarter, ranking third, and the $16 million discretionary common stock fund returned 13.3% for the year, also ranking third.

The employee benefits fund tends to emphasize large-cap, high-quality companies, such as **IBM Corp.** and **General Electric Co.**, said Richard Nicholson, senior vice president, and regional banks, such as **Shawmut Corp.** and **PNC Financial Corp.**

The fund picks stocks that are driven by earnings, projected over three years, and strives for long-term continuity, Mr. Nicholson said.

The discretionary fund is value-oriented, combined with quantitative screening for small companies with very low beta (a measure of the stock's volatility relative to the S&P 500).

For the quarter, the fund held stock in consumer discretionary companies, such as **Bassett Furniture Industries, Hartmarx Corp.** and **Russ Togs Inc.**, and in producer durables, such as **General Signal Corp. The Timken Co.** and **West Point-Pepperell Inc.**

United Bank of Denver's $26 million equity fund returned 12.6% for the quarter, 15.6% for the year and 22% for the three years.

W. Lon Schreur, president of United Capital Management, the bank's investment management arm, said the fund's "hard-core contrarian" philosophy focused on the metals industries, such as **Bethlehem Steel Corp., Inland Steel Industries Inc.** and **KaiserTech Ltd.**; capital goods, such as **Clark Equipment Co., GATX Corp.** and **Caterpillar Inc.**; and special equities, such as **Long Island Lighting Co.**

The fund is now fully invested, and no stocks are being sold, Mr. Schreur said. ■

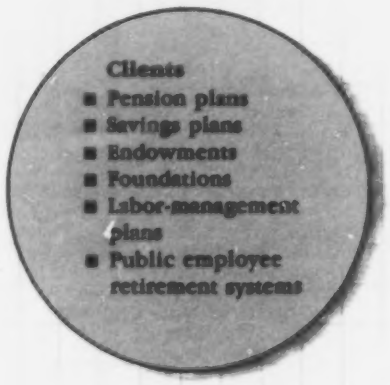
# The Prudential Asset Management Group

The Prudential Asset Management Group is a uniquely structured organization providing investment management services to employee benefit plans, endowments, foundations and other institutional clients. The Group consists of separately managed investment firms, which are either components or affiliates of The Prudential Investment Corporation, Prudential's principal investment management subsidiary.

Each investment firm is run independently but has the financial backing of The Prudential. All share a singular commitment to provide superior investment performance to institutional clients.

To find out more about The Prudential Asset Management Group, call Jim Blanchard at (201) 877-7041.



An affiliate of The Prudential

# Casino issue may be gamble

By Brad Rudin

ATLANTIC CITY, N.J. — The planned $675 million first mortgage bond offering that will finance developer Donald Trump's purchase and completion of the Taj Mahal gambling casino and hotel might be considered a gamble by investors.

Investor concerns about the lack of operating history and publicly available financial projections could result in a wide spread on the high-yield issue.

The scale of the project — the Taj Mahal will be twice as big as any other hotel/casino in Atlantic City — injects an added element of risk because management does not have experience in operating a gambling complex of this size, according to the preliminary prospectus.

Intense competition on an already crowded boardwalk is another factor. Indeed, the Taj Mahal will compete with two other Trump casinos in Atlantic City.

"The Taj Mahal formula is a sure thing in Atlantic City. However, the Taj opening, along with several other casino floor space additions, may up the ante in the competitive war for labor and patrons in Atlantic City," said Stephen C. Freidheim, the gaming and lodging analyst in the high-yield research group at Kidder, Peabody & Co., New York.

High-yield investors, whose risk tolerance is lower than that of Atlantic City's high rollers, also might be concerned that the casino and hotel that back the debt are not yet complete. The Taj Mahal is expected to open in December 1989.

Still, Mr. Trump — a hugely successful and highly visible New York real estate developer — has a reputation that probably will generate investor interest in the offering. Mr. Trump has a 100% equity stake in the partnership that owns the Taj Mahal. Bond analysts said it was too early to gauge investor interest in the 15-year issue, which is expected to be priced in September.

## Financing

Neither Moody's Investors Service nor Standard & Poor's Corp. has yet assigned a rating to the offering.

Mr. Trump bought the partly finished Taj Mahal from entertainer/businessman Merv Griffin in a $261 million transaction completed in May. Simultaneously, Mr. Griffin bought Resorts International Inc. from Mr. Trump for $302.6 million.

Depending on the amount of available cash flow from operations, Mr. Trump will be able to recover his $75 million investment in the Taj Mahal if it turns out the project was overfunded.

If the Taj Mahal opens when anticipated, bondholders can expect the casino's 3,000 slot machines and 160 gaming tables to start pumping out the cash needed to pay half of the third interest payment due under the indenture. The other half of the third payment — due March 1, 1990 — would come from proceeds from the offering. The first two payments — due March 1, 1989 and Sept. 1, 1989 — also are to be funded with the proceeds.

Funds for interest payments after March 1, 1990, are expected to come from operating revenue, but the partnership could borrow — subject to certain limitations — additional money to finance these payments. Specific plans for this contingency have not been drawn up, said Joseph Silver, assistant general counsel of the Trump Organization in New York.

Failure to substantially complete the project by March 1, 1990, is an event of default unless the delay results from extraordinary events not under the partnership's control. The trustee for the bondholders can then rely on Mr. Trump's guarantee that the Taj Mahal will be substantially complete by March 1, 1991. If the project were not completed by that date — unless extraordinary events caused the delay — the trustee could then take charge of the project and bill Mr. Trump for the cost.

A delayed opening would put investors at risk because foreclosure on the incomplete buildings wouldn't fetch enough to service the debt. And the $460 million in cash held by the company issuing the bonds — Trump Taj Mahal Funding Inc. — would not be available to investors because of a provision in the indenture that excludes cash and other instruments from the collateral.

In the event of default, investors have no recourse against Mr. Trump.

Investors, who start out as secured lenders, would have the status of unsecured lenders when it came time to collect the difference between the value of the collateral and the amount needed to service the debt, according to the registration statement filed by Trump Taj Mahal Funding. Merrill Lynch Capital Markets is the sole manager of the issue, due in 2003.

Net proceeds from the offering, $649 million, will be used to finance the $353.3 million needed to complete the Taj Mahal. The proceeds also will be used to fund $109.7 million in interest payments for a period 15 months from issuance and to repay $186 million used to finance a portion of the acquisition cost.

The bonds can be called any time after Sept. 1, 1991, but redemptions made before Sept. 1, 1993, are barred if the call is financed with borrowings carrying a coupon of less than a certain rate. That rate was not specified in the preliminary prospectus. ■

## City ordered to contribute

NEW ORLEANS — A municipal court judge has ordered the city of New Orleans to continue making monthly contributions to one of the two plans administered by the New Orleans Fire Fighters Pension and Relief Fund.

The city had ordered contributions temporarily halted to the pay-as-you-go plan because it had built up assets of about $5.8 million. City officials wanted the fund to use the cushion to make benefit payments and spare the budget-strapped city from making contributions to the plan for the last seven months of 1988.

Plan executives petitioned the civil court claiming the asset cushion was necessary to guarantee future benefit payments and to maintain the system as actuarially sound.

The court ordered the city to continue its $850,000 monthly contributions, but said the contribution may be reduced to prevent the fund from exceeding the $5.8 million ceiling.

A second fund, with assets of $60 million, was not affected by the legal proceedings.

# Assets moving

*Continued from page 2*

a machinery company. Belgian holdings include **CMB**, a transportation and shipping company.

"The (German) market is not very exciting, but the values are excellent and should one day be recognized," said the July International Investment Commentary of Kemper-Murray Johnstone International Inc., Glasgow, Scotland, which is looking at cheap stocks in many Continental European markets.

As of July 15, the firm had 6.2% in Germany vs. the index's 4.3%. Core holdings include **Siemens**, an electronics company, and **Allianz Aktie**, an insurer.

Kemper-Murray Johnstone is emphasizing small Pacific Basin markets. As of July 15, it had 6.6% in Hong Kong, dwarfing the EAFE index's 1.3%. Holdings are mainly hotels, which fill up with Japanese tourists, and trading companies, which benefit from accelerating trade with China, the publication said. A 7.4% weighting in Australia vs. the EAFE's 2.4% is mainly for the metals play.

Alliance prefers Canadian to Australian mining companies. The firm has slashed Australian holdings to 2% from 6% since the beginning of the year, selling such companies as **CRA Ltd.** and **Western Mining Corp. Holdings Ltd.** during the second quarter.

"We found comparable, more interesting and cheaper mining stocks in Canada," Mr. Breedon said.

In addition, "we've been confident in the U.S. dollar since January. Values in mining look cheap," he said. The firm, which has 13% in Canada, is buying the mining companies **INCO Ltd.** and **Comalco Ltd.**

Japan and the United Kingdom shifted less dramatically in InterSec's median portfolio than small Pacific Basin markets. The yen's weakening against the dollar during the second quarter caused Japan to sink as a percentage of the InterSec median portfolio, falling in U.S. dollar terms to 37.8% as of June 30 from 39.9% as of March 31. Japan's weighting in EAFE dipped to 62.6% from 64.4%.

Japan's disappointing results in the second quarter don't frighten Walter Scott & Partners, Edinburgh, Scotland, which had a near-index weighting of 60% in Japan as of June 30.

Japan needs continued increases in productivity in the manufacture of high-technology electrical components and finished goods to offset shrinkage of the work force from an aging population, according to a Walter Scott report.

"It is in Japan's national interest to maintain and encourage these areas of manufacturing excellence to which we expose our portfolios," the report said, noting the average Japanese autoworker is 10 years older than his U.S. counterpart.

Acadian has 57% to 58% in Japan — far more than the median portfolio, but still below the index weighting. Mr. Frashure said the Japanese market recovered strongly in July after a poor second quarter and the long-term trend is for strong corporate profits and real gross national product growth.

"Local market volatility in (local currency terms) is less in Japan than in the United States, which should mean higher p/es," Mr. Frashure said.

Alliance, however, like many U.S.-based international managers, has long been underweighting Japan. The market has represented only 20% to 25% of Alliance's international portfolios for a year.

As for the United Kingdom, some of the investment managers interviewed have sliced U.K. holdings, although the market's representation in the InterSec median portfolio and EAFE index changed little during the second quarter.

Acadian has only 7% in the United Kingdom because "our tactical asset allocation models have been very sensitive to rising interest rates in the U.K.," Mr. Frashure said.

Alliance cut U.K. exposure to 12.5% from 18% during January and February, Mr. Breedon noted. ■

## Index based on economies

NEW YORK — Morgan Stanley Capital International has introduced an international index weighted according to the size of world economies instead of stock market capitalizations.

Called the MSCI EAFE (GDP) index, it weights countries by their gross domestic product unlike the firm's Europe Australia Far East index, which weights countries by market capitalization.

The major difference in weightings between the two indexes is a reduced weight for Hong Kong, Japan and the United Kingdom and increased weights for most other markets — particularly France, Germany and Italy.

Because of the reduced representation of Japan, the EAFE (GDP) index was up 8.8% during the first seven months of this year vs. EAFE's 12.8% increase for the same period.

EAFE (GDP), like the firm's other indexes, is to be calculated daily. ■

# Fixed income

*Continued from page 1*
tegies the new unit will follow, though he noted it will use domestic and international fixed-income instruments.

"Our intention is to begin to solicit fixed-income separate account business and expand our family of mutual funds offered to institutions," Mr. Shuch said.

Mr. Shuch said the company wants the organization — including portfolio managers and marketing executives — in place before soliciting separate account clients. The process will take until fall to complete.

Along with the separate account venture, he said Goldman will expand its mutual fund business. The company is investment manager for 14 mutual fund portfolios, all money-market funds, except for one intermediate-term government securities fund. Goldman markets its mutual funds to banks and trust departments, which sell them to their institutional clients. One of the funds, totaling $400 million, is offered exclusively through Centerre Trust Co., St. Louis.

Goldman began its mutual funds group in 1981. Mr. Shuch said the expansion will involve creating more fixed-income mutual funds under new strategies, which he declined to identify. The mutual fund business will continue to be based in Chicago and led by Jack Whitman, president. Mr. Shuch also oversees the mutual funds group.

Goldman also serves as administrator for a $2 billion money-market fund of Northern Trust Co., Chicago. Northern Trust manages the investments of that fund.

Although not involved in separate account asset management, Goldman has for many years actively marketed specially tailored portfolio restructuring and trading strategies to pension funds, indicating its expertise in addressing particular investment and asset-liability situations. As such, the company acts as a leading adviser in setting up structured bond portfolios, such as dedications; pension fund restructurings; and sweeping asset allocation moves, such as buying or selling baskets of bonds in program trades.

In these pension services, Goldman often works jointly with pension sponsors and their money management firms. Goldman, working jointly with National Investment Services of America Inc., Milwaukee, in 1984 helped the American Information Technologies Corp. pension fund set up a $2.4 billion dedicated bond portfolio.

Mr. Shuch had headed these activities, though in his current position he is no longer involved. ■

# Scudder U.S. partner in international triad

**Three major money management firms have joined forces to provide global investment management services.**

**The new joint venture, called IBJ Global Investment Management S.A., was formed Aug. 5 in Luxembourg. Tokyo-based IBJ Capital Management Co. Ltd., an affiliate of the Industrial Bank of Japan, owns 60% of the joint venture: Scudder, Stevens & Clark Inc., New York, and Pictet & Co., Geneva, the oldest private bank in Switzerland, each own 20%.**

**Under the joint venture, IBJ is responsible for investments in Japan; Scudder is charged with handling investments in the rest of the Pacific Basin, the U.S. and Canada; and Pictet is responsible for investments in Europe.**

**Earlier this year, Scudder arranged to exchange investment views and trainees with Mitsui Trust & Banking Co. Ltd., Tokyo; the U.S. firm also is running money for a major client of the Japanese bank.**

**Last year, Scudder formed a joint venture with Nippon Kangyo Kakumaru Securities Co. Ltd., Tokyo, under which Scudder provides global investment management services while Nippon Kangyo is responsible for marketing to Japanese investors.**

# Foreigners put

*Continued from page 1*
pick up.

Managers running passive equity products are Wells Fargo Investment Advisors, $765 million; State Street Bank and Trust Co., $647 million; Chase Investors, $120 million; Harris Trust and Savings Bank, $43 million; Alliance Capital, $40 million; Bankers Trust, $23 million; and IDS Advisory Group, $10 million.

In contrast, only Chase Investors reported running passive bond money, with $554 million under management.

- The leading active equity managers were J.P. Morgan, $3.7 billion; Morgan Stanley, $2.1 billion; Citicorp, $2 billion; Alliance Capital, $1.7 billion; and Batterymarch Financial Management, $1.1 billion.
- Morgan dominated the balanced manager category, with $6.8 billion under management. Following were: Citicorp, $4.5 billion; Chase Investors, $752 million; Morgan Stanley, $489 million; and Atlanta Capital Management, $463 million.
- In the fixed-income area, Fischer, Francis led all managers, with $2.2 billion. Following were: Chemical, $1.8 billion; Bankers Trust, $1.4 billion; and Chase Investors and Morgan Stanley, each with $1 billion.
- Richard Ellis led managers with real estate accounts, with $2.7 billion; Chase Investors recorded a strong second with $2.5 billion. Also running U.S. real estate portfolios for foreign investors were: Schroder Real Estate Associates, $825 million; Prudential Asset Management Group, $636 million; J.P. Morgan, $494 million; Equitable Real Estate Investment Management, $256 million; and Citicorp, $150 million.
- Of alternative investment products, The Capital Group Inc. managed $155 million in convertibles, and State Street ran $109 million in futures contracts. Three managers reported running venture capital accounts: Citicorp, with $95 million; INVESCO MIM International Ltd., $40 million; and Prudential, $6 million.
- Several managers reported running sizable cash accounts, including Citicorp, with $720 million; J.P. Morgan, $304 million; Irving Trust Co., $299 million; and Chemical, $291 million.

The survey was based on mailings to more than 650 money managers. It excluded assets invested in U.S. markets by foreign-based investment management organizations, even if they had U.S. subsidiaries. Their responses are listed separately.

In total, 61 managers responded they did have foreign assets under management. Managers were asked to include solely those assets invested in U.S. markets; where they ran global accounts, they were asked to include the target allocation to U.S. markets only.

While all provided total assets under management, a few major institutions did not provide breakdowns from what types of institutions or from which geographic areas accounts came, citing confidentiality. In those cases, *P&I Age* estimated the sources of those accounts.

For most managers, foreign-based business represents only a small portion of their overall asset management business, averaging 5% of total assets under management. Respondents had a total of $1.1 trillion in assets under management worldwide.

Some have developed foreign business into a significant portion of their overall revenues. Michael Fisher, managing director of Bankers Trust Co. — Investment Management Group, said 85% of the unit's revenues come from U.S. sources, but he expects a decrease to 50% by the early 1990s.

Bankers has increased its marketing in London and Tokyo "because of the enormous potential growth in those markets," he said.

Institutions whose foreign business invested in U.S. markets represents more than 20% of assets under management are: Burgess Capital Corp., 78.4%; Richard Ellis, 74.9%; Schroder Real Estate, 63.5%; Citicorp, 59.2%; Atlanta Capital, 34.3%; Travelers Asset Management International, 28.8%; Morgan Stanley, 26.1%; Chase Investors, 22%; and J.P. Morgan, 21%.

Some major institutions that have long-established business abroad have developed markets in a variety of geographic areas and among different kinds of institutions.

Alliance Capital's $2 billion in foreign assets under management in U.S. markets come from institutional investors in Continental Europe, Japan, Australia and the Middle East.

Some officials reported they initially had been hired to run U.S. accounts but their mandate is being expanded to global accounts.

While foreign pension funds primarily are seeking balanced managers, other types of institutional investors — such as sovereign governments, insurance companies and banks — are hiring Citicorp for global accounts instead of U.S.-only accounts, explained Robert Troxler, executive director of Citicorp Investment Management, London.

Investment experts expect the foreign influx to continue as institutions become more sophisticated, and much of that money will flow into the hands of U.S.-based money managers.

Foreign investors seek U.S. managers for investments in U.S. markets because they would know their markets better than foreign-based managers, said Charles H. Salisbury Jr., vice president and director of T. Rowe Price Associates Inc., Baltimore. ■

## Foreign institutional assets managed by U.S. firms in U.S. markets

# Overseas advisers also eye America

Foreign-domiciled managers are taking a piece of the asset pie of non-U.S. money invested in U.S. markets.

Some of these managers have established subsidiaries in the United States to handle investment management while also marketing to U.S.-based prospective clients for investing overseas.

Their foreign connections give them a leg up in building on existing institutional business.

As of March 31, U.S. subsidiaries of foreign-domiciled money managers with at least $100 million invested in U.S. markets for foreign clients included:

- Nikko & Associates Inc., New York, a subsidiary of Nikko International Capital Management Co. Ltd., Tokyo. The firm ran a total of $920 million for foreign institutional investors, of which $349 million was for Japanese clients.
- G.T. Capital Management Inc., San Francisco, invests $573 million in U.S. markets for foreign clients. Half of the firm's assets came from the United Kingdom, where its parent, G.T. Management PLC, is based.
- Nomura Capital Management Inc., New York, a unit of Nomura Investment Management Co. Ltd., Tokyo, which managed $354 million in U.S. markets, mostly for Japanese clients.
- Daiwa International Capital Management Corp., New York, which invested $212 million on the behalf of foreign clients. Twenty-seven percent of those assets are from Japanese investors. The parent company is Daiwa International Capital Management Co. Ltd., Tokyo.
- Deutsche Bank Capital Management (USA) Corp., New York, a subsidiary of Frankfurt-based Deutsche Bank. The firm invested $176 million in U.S. markets for clients from various locations.
- Warburg Investment Management International Ltd., a unit of Mercury Asset Management Ltd., London. Warburg ran $100 million in U.S. markets. Three-quarters of the firm's assets came from Canada, with the rest coming from Bermuda. ■

| J.P. Morgan | 500 |
| Chase Investors | 300 |
| Ballard Biehl & Kaiser | 200 |
| Matrix | 187 |
| Webster | 50 |
| TOTAL | 38,374 |

Source: *Pensions & Investment Age*

**By Carol Wiley**

Tactical asset allocation managers have $38.374 billion under management in the product, an increase of 41% from last year.

Fifteen managers with a specialty in tactical asset allocation surveyed by *Pensions & Investment Age* reported assets of $27.214 billion last summer. The managers also gained 138 pension fund clients during the 12 months ended Aug. 30, bringing the total number of tactical asset allocation clients to 838.

Tactical asset allocation comprises quantitative and model strategies to make short-term switches among asset classes — traditionally stocks, bonds and cash equivalents, although lately new classes are being added — in an attempt to add value in varying market conditions. Futures or index funds are used to achieve the shifts. Some pension funds use only futures and options overlays to achieve the effect of moving the assets.

Wells Fargo Investment Advisors, San Francisco, reported the most in tactical asset allocation, $9.127 billion, an 86.9% increase from $4.882 billion as of July 31, 1987. The firm added 38 clients during the period, bringing its total to 107.

The firm with the most growth for the year, however, was The Boston Co., Boston, which experienced a 133% gain to $2.3 billion under management from $987 million as of June 30, 1987. The number of clients increased to 25 from 12.

The Boston Co., and tactical asset allocation managers in general, continued to add clients because of the disappointing results of portfolio insurance during the Oct. 19 market crash; the awareness that asset allocation adds value; and the realization that asset allocation is the "single biggest" factor in determining performance, according to Richard Crowell, senior vice president and manager of structured investment products at The Boston Co.

Patricia Dunn, president of Wells Fargo, concurred.

"There's a renewed focus on the importance of the asset class decision and realizing after Oct. 19 that it's the asset class that explains 90% of the return, not the securities themselves," Ms. Dunn said. "That's not to say that it doesn't matter what security you're in; it's a first order, second order thing."

Interest continues to grow because tactical asset allocation now can take on the global markets, according to Gary Brinson, president of First Chicago Investment Advisors, which has offered an asset allocation product since 1981, and now has $4.5 billion under management in the product, up from $3.75 billion July 31, 1987. Clients now number 62, up from 57 last year.

# Surplus used to pare debt

**By Marcia Parker**

AKRON, Ohio — The Goodyear Tire & Rubber Co., which is in the midst of a comprehensive restructuring campaign, is using $400 million in surplus assets from a terminated retirement plan for salaried employees to pare down $3.6 billion in long-term debt.

Like many companies with excess assets in their pension funds, Goodyear is prompted to move now with the reversion because the federal government's termination policy is in flux. The reversion comes at a time when Congress is wrestling with a long-term termination policy and the thorny question of whether excess assets belong to the sponsor or the beneficiaries. Lawmakers are considering slapping a 60% excise tax on pension plan reversions occurring during the next nine months until a new policy is fashioned (*Pensions & Investment Age*, Aug. 8).

The world's largest tire company has been restructuring its capitalization and businesses since 1986 (*P&I Age*, Aug. 8).

The company was consolidated under two worldwide divisions, tires and general products. The move was designed to result in a more streamlined, flexible and responsive management structure.

In addition, Goodyear has completed a major share repurchase program, sold $1.7 billion of businesses and assets not related to its core businesses of tires and rubber products and related chemical and plastic products, closed non-competitive plants and taken a number of steps to reduce costs. Goodyear's chief financial officer Oren G. Shaffer said debt reduction has been a constant goal and although it has been pared down some, he acknowledged the company is still highly leveraged.

# Bechtel pioneers

## New asset categories show way

**By Barry B. Burr**

**SAN FRANCISCO — Bechtel Power Corp. plans to adopt a pioneering global tactical asset allocation strategy for part of its $1.2 billion pension fund and include such alternative asset classes as international securities and newly created indexes of gold-mining stocks and real estate investment trusts.**

**Bechtel hired Bailard Biehl & Kaiser Inc., San Mateo, Calif., to control the portfolio's tactical asset allocation.**

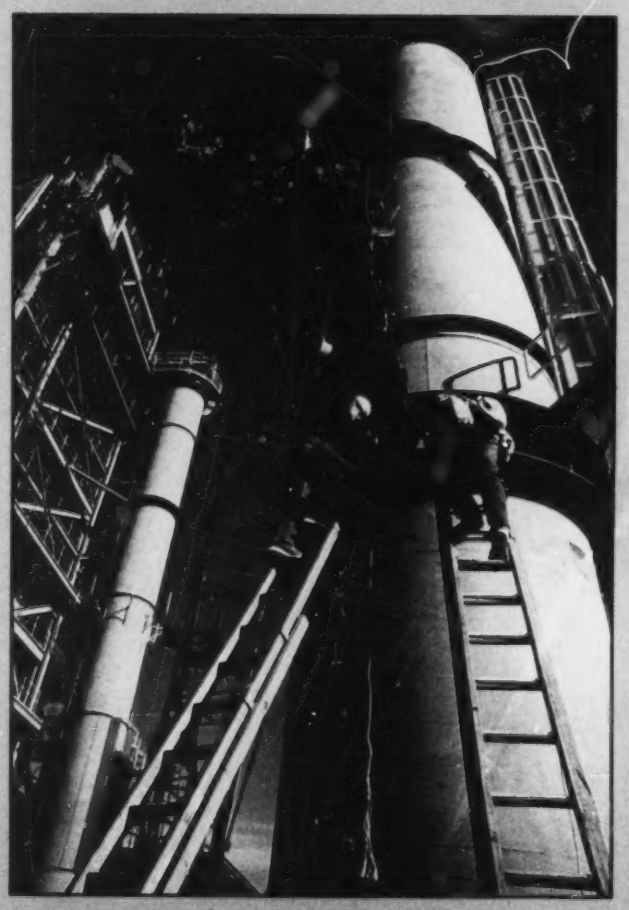
**James E. Rhodes, investment manager at Bechtel, said Bailard Biehl was assigned $25 million for the TAA strategy.**

**"I'm sure if things work out we will allocate more to BBK," Mr. Rhodes added.**

**He expects the fund to begin using Bailard Biehl's TAA model in "the next month or so. We are still working out some details."**

**"This is a global approach to tactical asset allocation,"**

*Continued on page 58*



**Bechtel, part owner of this cogeneration power plant in Bakersfield, Calif., placed $25 million in a global tactical asset allocation strategy with an unusual array of alternatives.**

## LATE NEWS

### Simpson restructuring nets 11

SEATTLE — Simpson Investment Co. added 11 managers and reassigned assets to four existing firms, restructuring its $185 million defined benefit pension fund. One manager was terminated as a result of the changes.

Simpson, the holding company for Simpson Timber Co. and Simpson Paper Co., restructured the plan after asset allocation studies, started in 1987, were completed.

Under the new strategy, 46% of total assets will be in tactical asset allocation programs run by Mellon Capital Management Inc., San Francisco; TSA Capital Management, Los Angeles; The Boston Co. Inc., Boston; and INVESCO Capital Management, Atlanta. TSA and The Boston Co. are new managers. Mellon and INVESCO previously managed equities.

Real estate equity, 12% of the fund, will be managed by J.P. Morgan Investment Management Inc., New York, and Frank Russell Trust Co., Tacoma, Wash., both new managers.

Small-cap stocks, 11% of the fund, will be run by Brandywine Asset Management, Wilmington, Del.; Fisher Investments Inc., Woodside, Calif.; and RCM Capital Management, San Francisco. Brandywine and Fisher are new managers. Large-cap stocks, 10% of the assets, will be managed by RCM, Olympic Capital Management Inc., Seattle, and INVESCO. All three were large-cap managers for the fund.

International equities, 8% of the asset mix, will be managed by Schroder Capital Management International, New York, and PCM International, Newark, N.J. Both are new managers. Special situations, 7%, will be managed by new manager Hellman & Friedman, San Francisco.

Fixed income, 6% of the fund, will be run by Dimensional Fund Advisors, Santa Monica, Calif., and Neuberger and Berman, New York. Both are new firms.

Mark Duvall, financial analyst at Simpson, declined to release the amounts allocated to each manager as well as the name of the released balanced manager. The 1988 Money Market Directory lists Columbia Management Co., Portland, Ore., as the fund's only other balanced manager.

Wurts, Johnson & Co., Seattle, assisted in the searches.

### Baer acquires share of Harbor

BOSTON — Baer Holding Ltd. of Zurich, Switzerland, has acquired a 15% interest in Harbor Capital Management Co. Inc., Boston. Terms of the deal could not be learned by press time.

Harbor Capital manages $1.6 billion, of which $1.2 billion is for tax-exempt clients. Baer Holding is the parent of Julius Baer Investment Management Inc., New York, which manages $750 million in tax-exempt assets.

### Leasing volume rose during '87

ARLINGTON, Va. — The volume of new business for equipment leasing companies increased in 1987 to $33 billion from $24 billion the previous year, a survey by the American Association of Equipment Lessors shows.

Total leasing volume in 1987 is estimated between $90 billion and $95 billion, compared with the 1986 figure of between $80 billion and $85 billion.

The survey noted there was less growth in leveraged leasing because of the lower tax rate and loss of some tax credits.

### Funds report manager changes

•AMHERST, Ohio — The Nordson Corp. pension fund and Nordson Foundation have restructured their investments, reallocating about $60 million and hiring four managers, said Raymond L. Cushing, corporate cash manager.

Hired were Disciplined Investment Advisors Inc., Evanston, Ill., and National City Bank of Cleveland, for equities: Patterson Capital Corp., Los Angeles, for fixed income, and Avatar Associates, New York, for tactical asset allocation. Mr. Cushing declined to state the allocation to each manager and the total assets of either fund, but said funding came from a balanced account with the Beachwood, Ohio, office of Alliance Capital Management Corp. DeMarche Associates, Kansas City, Mo., did an allocation study for the fund.

• BRONXVILLE, N.Y. — Sarah Lawrence College, with $11 million in its endowment fund, hired two managers for a total of $4.5 million, said David Klein, director of finance and controller.

The college hired The Common Fund, Fairfield, Conn., to manage $2.5 million in a South Africa-free bond fund, and Avatar Associates, New York, to run $2 million in tactical asset allocation between equities and cash. The assets had been run in a balanced account by Auchincloss & Lawrence Inc., New York.

• LOS ANGELES — The $4 million Dawson Co. pension and profit-sharing funds hired Cullen Fortier Asset Management, Woodland Hills, Calif., for a balanced account, replacing Harold Davidson & Associates, Los Angeles, said Bob Uchimura, controller.

# Big play, small stocks

## Wisconsin's 5% holdings

By Barry B. Burr

MADISON, Wis. — The State of Wisconsin Investment Board is buying big pieces of small stocks: large enough chunks to require what's becoming a steady stream of 13(d) filings with the Securities and Exchange Commission.

In the first 22 days of August alone, the internally managed, $15.6 billion pension fund made filings with the SEC to disclose holdings of 5% or more in 11 companies.

The 11 companies comprise almost 10% of the market value of the fund's $1 billion small-capitalization stock portfolio.

Buying such relatively large holdings resembles an investment posture of the $16.1 billion Michigan State Employees' Retirement Systems, Lansing. The Michigan fund often holds more than 5% of a stock.

Commenting on taking the large positions, Kevin A. Schmitting, assistant investment director of the Wisconsin board, said, "We do that frequently because of size considerations of some of these small companies."

Mr. Schmitting estimated the board has 25 to 30 filings outstanding. But the filings for August indicate the number possibly is higher. Mr. Schmitting declined to discuss strategy or release any details about the recent filings and the exact number of such large holdings in the portfolio.

Investors must file 13(d) statements with the SEC when their ownership reaches at least 5%. The filing also indicates whether the investor might seek to exert influence in the management or policy of the company.

Only stocks of $500 million and less in market capitalization are eligible for the Wisconsin fund's small-stock portfolio, Mr.

*Continued on page 5*

**The Wisconsin Investment Board has a habit of buying large holdings of small stocks, such as Toro Co. In the first 22 days of August, the fund revealed holdings of 5% or more in 11 companies.**

## Earnings, pension cost tied

**NEW YORK — Almost half of the annual rate of gain in pre-tax earnings reported by companies in the Standard & Poor's 500 stock index in 1982-'87 came from a $15 billion decline in annual pension expense during the period.**

**While reported pre-tax profits of the S&P 500 companies grew at a 4.8% annual rate during the 1982-'87 period, 44% of that annual gain came from the reduction in annual pension expense, according to an analysis by George H. Boyd III, a security analyst at Kidder Peabody & Co. Inc.**

**"The decline in pension expenses charged to the income statement has been an important ingredient in supporting reported earnings over the past five years," Mr. Boyd said.**

**"Pension expenses represented 18.1% of pre-tax profits of the S&P 500 in 1982. Subsequently, the appreciation in the market, which has positively affected pension portfolios, and the implementation of FASB 87, have contributed to a sharp reduction in the pension expenses of the majority of corporations."**

**In addition, Mr. Boyd said,**

# Venture cap matching '87

By Trudy Ring

Pension funds committed the same amount to venture capital during the first six months of 1988 as in the first half of 1987, despite concerns the Oct. 19 stock market crash would dampen investors' enthusiasm for venture deals.

Commitments to private, independent venture capital partnerships totaled $1.372 billion for the first half of 1988, almost exactly the same as 1987's first-half total of $1.374 billion, according to Venture Economics Inc., Wellesley Hills, Mass. Pension funds' share of the commitments was about 48% in both periods. For all of 1987, commitments totaled a record $4.2 billion, with pension funds contributing 39%.

"The thing we were all wondering about is if we would see any pullback as a result of Oct. 19," said Linda Vincent, vice president of Venture Economics. Immediately after the crash, there was concern the resulting tightening of the initial public offering market and increased investor conservatism would discourage venture capital investment.

But at Venture Economics' annual industry conference, held 10 days after the stock market plunge, participants said the phenomenon made diversification more important than ever and pointed out venture capital has a low correlation to the public equity market, Ms. Vincent said. In light of that, she's not surprised by the first-half numbers.

Other consultants agreed. "I would be surprised if there was a really big jump," said Doug Patejunas, consulting manager at Ennis, Knupp & Associates Inc., Chicago. "But, I wouldn't think there would be a reaction to pull back just from that single event."

"If there is any of that (conservatism) there's going to be an increased emphasis on diversifying," said Doug Le Bon, vice president-special investments division at Wilshire Associates, Santa Monica, Calif.

Venture Economics' data did indicate public pension funds' share of venture capital commitments increased while corporate funds' share decreased. Public funds generally are newer to venture investing and still working toward their target levels, while many corporate funds have reached the targets, Ms. Vincent said.

Public funds committed $280 million during the first half of 1988, up from $184 million during the same period of 1987, according to Venture Economics. Corporate and other private pension funds committed $382 million during this year's first half, down from $467 million for the first six months of 1987.

One public fund that made its first venture capital commitment during the first half of 1988 was the $500 million Seattle City Employees' Retirement System, which earmarked $6 million for

# Penney sets up leveraged ESOP

**By Fred Williams**

DALLAS — J.C. Penney Co. has replaced its 50-year-old employee savings and profit-sharing plan with a $700 million leveraged employee stock ownership plan and will use the proceeds of its loan to purchase up to 9% of the company's outstanding common stock in an effort to bolster its stock price.

The company will redirect its annual contribution from the savings plan to the LESOP. The 1987 contribution was $50 million.

According to Harvey McCormick, manager of corporate relations at J.C. Penney, the savings plan will be suspended and the $1.6 billion in assets will continue to be credited and accrue in existing employee accounts. The new plan will be a follow-on plan effective at year end, he said.

The company's defined benefit plan, with assets of $1.7 billion, is not affected by the change.

Under the terms of the J.C. Penney program, the LESOP trust borrowed $700 million from a group of insurance companies at an interest rate of 8.17% for 10 years.

The LESOP used the proceeds of the loan to purchase a new issue of convertible preferred stock from the company. The preferred stock is convertible into approximately 11.8 million shares of J.C. Penney common stock, about 9% of the current outstanding shares. The existing savings plan owns about 15% of the company's common stock, said Mr. McCormick. The dividend yield on the preferred stock is 7.9% compared with approximately 4% on the company's common stock. The conversion price is set at $60 per share. The common stock was trading at $46.25 as of the end of August.

Under the old saving plan, the company offered three investment options to employees: company stock, fixed income or common stock. The company contribution was in common stock. In the new plan, the same options exist, but J.C. Penney now will contribute preferred stock, Mr. McCormick said.

As part of the program, the J.C. Penney board of directors authorized the company to use the proceeds from the issuance of preferred stock to purchase up to 15 million shares of common stock as part of an expanded stock buyback program undertaken by the company in 1987. The company is purchasing up to 20 million shares on the open market. As of July 30, the company had purchased 19.1 million shares.

According to a statement from William R. Howell, chairman of the board, J.C. Penney is attempting to improve its operating performance.

He said the combined LESOP and stock repurchase program is expected to increase cash flow, earnings per share and return on equity "as well as provide our associates (employee participants) with a more attractive benefit plan." ■

## CORRECTIONS & CLARIFICATIONS

• The **Pension Benefit Guaranty Corp.** performs its statistical analysis based on termination lists it provides to Congress and not on a separate list of statistics, according to Richard Ippolito, chief economist for the PBGC.

Data provided to Congress, however, list terminations according to the date the pension plans filed for termination. The PBGC figures its statistics according to the date the termination was completed, which is why differences can occur, Mr. Ippolito said.

An incorrect statement by a PBGC spokesperson that the data supplied to Congress was inaccurate led *Pensions & Investment Age* to report in the July 25 issue that the PBGC kept two sets of data, one for Congress and one from which it derived its statistics.

• The projected benefit obligation of **Navistar International Corp.** was $2.4 billion as of Jan. 1, 1987. An incorrect figure was cited in the chart of the top 100 corporate pension funds that appeared in the July 25 issue.

PIPER

# Tapping takeovers

## 2nd-quarter leaders find stocks in play

**By Curtis Vosti**

Takeover stocks once again played a prominent role in bank and insurance company commingled special equity funds that were the top performers in the Pensions & Investments' Performance Evaluation Report for periods ended June 30.

Overall, special equity fund performance lagged that of the first quarter, and many fund managers reported increased cash positions as the third quarter began.

The median performance of PIPER's universe of 109 special equity funds returned 6.6% for the second quarter, compared with a 12.2% median performance for a PIPER universe of 106 funds in the first quarter.

The $5 million, 3-year-old special equity fund of First City Texas, formerly First City National Bank of Houston, topped the PIPER special equity category for the quarter, returning 15.6%. The Standard & Poor's 500 stock index returned 6.7% for the quarter, while the Russell 2000 index returned 7%.

The First City Texas fund also placed third for the year, with a return of 24.6%. For the same period, the PIPER median was −2.4%, the S&P 500 returned −6.9% and the Russell 2000 returned −6.5%.

Ted Davis, First City's senior vice president and chief investment officer, said the bank looks for stocks based on pure earnings and price momentum. "People use it for timing," he said. "We usually nail down profits pretty quickly."

The fund's investment managers wait for a temporary fall in a stock's price as other investors take initial profits — then pounce on the stock.

"You always get a second chance," Mr. Davis said.

Recent buys include **First Executive Corp.**, **MCI Communications Corp.** and **Farmers Group Inc.**

Mr. Davis said the fund had some luck with takeover stocks, including **Intermedics Inc.** and **Armtek Corp.**

Going into September, Mr. Davis said, the fund is 40% in cash. "It didn't look like anything was appropriate to buy."

The Supplemental Equity Fund of Connecticut National Bank, Hartford, finished second, as it did for the previous quarter, with 13.6%. The fund was the only one to finish among the top five for both quarters this year.

"For a long time, it's been a stock pickers market," said Peter Larson, Connecticut National's vice president.

He said the fund is a bit cautious, even defensive, as it entered the third quarter and recently bought insurance stocks such as **Provident Life and Accident Insurance Co. of America** and **20th Century Industries.** The fund's 6% cash position, while not a high level, reflects an uncertainty about the third quarter, Mr. Larson said.

The fund concentrates on finding cheap stocks that have value potential, he said.

Some of the better second-quarter performers include **Software Publishing Corp., Intermedics Inc.** and **Vanguard Technologies Inc.** The latter two were long-term holdings that were bought out during the second quarter.

First Wisconsin Asset Management, Milwaukee, a subsidiary of First Wisconsin Trust Co., ranked third for the second quarter with a 12.3% return on its Emerging Growth fund.

Joe Docter, assistant vice president, said the fund has $11.4 million invested, with 24 stocks in the portfolio at all times.

The fund's managers target stocks of relatively new companies that have a growth rate one-half to two-thirds of the price-to-earnings ratio and usually sell the securities when they reach 100%, he said.

The fund has recently sold some of its holdings, including **Juno Lighting Inc.** and **Mayfair Super Markets Inc.** A strong performer has been **A.M. Castle**, while buys include **Helen of Troy Corp.**

**Special equity funds**

There's not much difference between the way a skilled mountain guide helps you reach your goal and the way a unique investment advisory service does.

The conservative, risk-averse financial principles that built Republic National Bank of New York have their origins in the practices of the century-old Safra family banking traditions.

This thread also guides our investment philosophy which emphasizes investment in a portfolio of mutual funds—a most effective way to:

1. Reduce risk in today's volatile markets through a high level of diversification.
2. Preserve capital.
3. Provide a proven record of consistently rewarding results.

Each of the above is accomplished through careful asset allocation based on client guidelines and a disciplined selection of a portfolio of mutual funds representing the top money managers proven over a period of time.

Our service at RNB provides management with a much higher comfort level (no matter what the altitude) with respect to its responsibility in the supervision of pension, thrift and profit sharing plans.

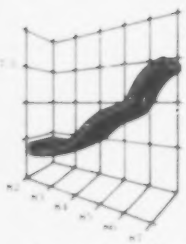
# IF WE'RE SO GOOD AT EQUITY MANAGEMENT, WHY HAVEN'T YOU HEARD OF US?



Our rates of return recorded over the most recent four and six year periods ranked well into the top one-third of the SEI Funds Evaluation Universe.

They also exceed those posted by the S & P during these time frames.

So why don't you know about us?

Noise isn't our style. Performance is. While a lot of value managers are thinking out loud, BANK ONE, INDIANAPOLIS is acting. Moving Cautiously but decisively. Tenaciously protecting what we've earned.

We have resisted the allure of short-term trends. And concentrated on the consistent accumulation of equity value over the long term.

For more on our track record and our future projections, call Phillip E. Chambers, Vice President and Investment Officer, (317) 639-8151. Ask for a copy of our *Economic Outlook* newsletter.

We'll let the numbers speak for themselves.

# "SWING" MANAGEMENT

## How to deal with today's market volatility.

An investment approach you should consider for your company's pension plan is "swing" management. By placing a portion of your assets with an active asset allocator, you may significantly enhance the performance of your plan from your roster of specialized managers, particularly in volatile periods. Our broad investment expertise, experience and flexible approach make us uniquely qualified for this role. Our asset allocation disciplines and willingness to pursue a wide spectrum of investment vehicles have enabled us to achieve consistently superior returns for our clients in both up and down markets.

To learn more about our concept of "swing" management please call or write Robert C. Elliott, Senior Executive Vice President, Bessemer Trust Company, N.A., 630 Fifth Avenue, New York, NY 10111, (212) 708-9141.

Bessemer Trust

# Takeovers

*Continued from page 13*

-- 70% in 1986. In the second quarter, the fund returned 4.8%, lagging the S&P and Russell and placing it in the eighth decile of the PIPER universe.

For the year, the median PIPER fund returned -- 2.4%, while the S&P returned -- 6.9% and the Russell 2000, -- 6.5%.

For the three-year period, the PIPER median fund returned 14.3%, while the S&P 500 returned 16.6% and the Russell 2000, 10.5%.

The median PIPER fund for the five-year period returned 8.7%; the S&P 500, 14.6%; and the Russell 2000, 6.2%.

The Emerging Growth fund of Lincoln National Pension Insurance Co., Fort Wayne, Ind., returned 27.3% for the year.

For the quarter, the fund returned 8.6%, placing it in PIPER's third decile and topping the S&P 500 and the Russell 2000.

The fund is managed by Charles Bridges, vice president at Capital Technology Inc., Charlotte, N.C.

According to Robb Rowe, president at Capital Technology, the fund is invested in very small companies with good earnings growth during the past quarter, year and three years, and low p/e multiples.

Buys within the last six months include **AAR Corp.**, **Hexcel Corp.**, **First Hawaiian Inc.** and **Applied Magnetics Corp.**

Funds managed by Shearson Lehman Hutton Asset Management for Shearson Lehman Hutton Trust Co., New York, ranked second and third for the three-year period.

The Emerging Growth fund, since renamed "new values," placed second with its return of 40.8%, while the growth fund finished third with 36.2%.

The Emerging Growth fund has a bias toward relatively modest p/e multiples, with interest in cash earnings momentum, according to David Hillson, senior vice president.

Holdings include **Salick Health Care Inc.**, **American Software Inc.**, **Evans & Sutherland Computer Corp.**, **Career Com Corp.** and **Charming Shoppes Inc.**

"The sell decision is generally a product of the stock having hit a reasonable target for appreciation," he said.

Shearson Lehman Hutton's Growth Fund looks for high-quality, blue-chip stocks, according to Steven A. Kroll, president of the the asset management firm.

He said the fund's core holdings, such as **ITT Corp.**, **Southwestern Bell Corp.**, **General Mills Inc.** and **Bally Manufacturing Corp.**, are "defensive in nature."

The fund recently took profits on cyclical stocks such as **Dow Chemical Co.**, **General Motors Corp.**, **May Department Stores Co.** and **Boeing Co.**

The tangible asset fund offered by Equitable Capital Management Corp., New York, finished second for the five-year period with a 18.4% return. Next was the separate account of Union Labor Life Insurance Co., Washington, with 16.7%.

For the ten-year period, the supplemetal equity fund of California First Bank, San Francisco, was first with an annualized 25.7% return. For the same period, the PIPER median return was 17%, while the S&P 500 returned 16.4%. ■

# Unit trusts cite $1.4 billion gain

WASHINGTON -- Unit investment trusts increased their assets through share offerings in June of $1.4 billion for a year-to-date total of $7.3 billion, according to the Investment Company Institute, the trade association of the mutual fund industry.

A unit investment trust is a fixed portfolio of investments, usually bonds although stocks can be included. The investor purchases an interest in the trust. Securities are held until the trust expires, which can be up to 30 years. Investors receive a pro rata share of the interest or dividends paid.

Tax-free debt trusts issued shares in June with deposits of $775.1 million for a year-to-date total of $4.1 billion. Issues of taxable debt trusts totaled $317.6 million in June for a 1988 year-to-date total of $1.8 billion, and issues of equity trusts totaled $338.6 million for $1.5 billion as of June 30.

There were 138 new tax-free debt trusts issuing shares in June, 16 new taxable debt trusts, and six new stock trusts.

Issues of long-term trusts -- with an average weighted maturity of more than 15 years -- were the most commonly offered in June, with $784.2 million in shareholder deposits. ■

# Bond fund leads in quarter

By Carol Wiley

PCM International, Newark, N.J., had the winning formula for its global bond funds, ranking No. 1 for the one, three, and five years in the Pensions & Investments' Performance Evaluation Report for periods ended June 30.

The International Non-Dollar Fixed Income Fund run by First Chicago Investment Advisors joined the PCM funds, placing in the top three for every period.

On the equity side, The Principal, Des Moines, Iowa; CIGNA International Advisors Ltd., London; and Provident Capital Management, Philadelphia, had the top three performers for the quarter.

Provident's International Low P/E equity fund also was the best performer for the year. Wells Fargo Advisors' international equity index fund was second, and Wellington Management Co.'s Pacific Basin portfolio was third.

Wells Fargo, American National Bank, Chicago; and Wellington funds placed first, second and third for the three and five-year periods.

Only two funds are old enough to have participated in the 10-year survey: First Chicago's international equity fund was first with a return of 19.68%, compared with the Morgan Stanley Capital International Europe Australia Far East index return of 22.11%, and the MSCI World index return of 19.14%. Morgan Guaranty's international equity fund returned 18.1% for the 10 years.

The Global Yield fund of PCM — an international investment management subsidiary of the Prudential Insurance Co. of America — returned 4.02% for the quarter, compared with the Salomon Brothers World Government bond index return of of −3.57%.

PCM's Global Bond fund returned −1.62%, making it No. 2 for the quarter.

The Global Bond fund placed first for the one-, three- and five-year periods with respective returns of 20.3%, 32.3% and 24.38%. For the one-, three- and five-year periods, the Morgan Stanley World Index returned -0.7%, 30.7% and 23.5%, respectively.

The Global Yield fund returned 19.89% for the year. PCM's Foreign Bond fund returned −6.29% for the quarter, compared with the Salomon non-U.S. dollar index of −6.96%. It was the third best performer in bonds for the three-year period with a return of 30.98%, compared with 30.71% for the World index, and was the second-best performing bond fund for the five-year period with a return of 20.56%, compared with 23.5% for the World index.

The $80 million Global Yield fund is an aggressively managed money market fund that primarily has benefited from a combination of "active hedging and its high running yield of 11.5%," according to Jeffrey Brummette, director of fixed income.

The fund was overweighted in Australia, New Zealand, United Kingdom and Canada for the first six months, performing well against the U.S. dollar, Mr. Brummette said. In the second quarter, the fund was overweighted in Australia and Canada, "avoiding the trauma of the deutsche mark and yen."

PCM's $250 million Global Bond fund is actively managed, with a focus on interest rate and currency rate anticipation, according to Ken Windheim, director-international fixed income.

The fund has "taken a lot of big moves during the year," Mr. Windheim said. "We've used all the strategies: long in bonds and shorter duration, long and short in dollars, overweighted in dollars and underweighted in bonds in December. Then, in January, we were back to a neutral dollar position and sold U.S. bonds around the world."

In the $150 million Foreign Bond fund, "we were underweighted for the bond market pre-October, neutral after Oct. 19, then underweighted until early January in anticipation of rising interest rates," he said. "In 1988, we've benefited from huge movements in the yield curves."

First Chicago's $265 million International Non-Dollar Fixed Income fund returned −2.56% for the quarter, 15.58% for the year, 32.24% for the three years and 20.55% for the five years.

The fund added 540 basis points over its benchmark during the year, mostly from an overweighting in Australian bonds, said Richard Carr, managing director. About half of the remainder came from correctly anticipating the dollar's recovery, and the rest from its defensive posture in Japan at the beginning of the period.

The $25 million Stock Separate Account run by The Principal is now 1 year old. The account is fundamentally managed and value-oriented, focusing on underpriced stocks with good track records, according to James Bell, senior analyst. Although the country allocation can reach up to 30% in Japan, the weightings remain diversified, emphasizing countries with established and stable markets and politics.

He attributed success during the quarter to the account's heavy weighting in Japanese markets.

The CIGNA International Equity account is a low-risk fund that concentrates on quality stocks in growth sectors within stable markets. The $140 million fund seeks well-financed companies with good cash flow and strong balance sheets in politically stable countries, according to Nicholas Carn, senior portfolio manager.

During the quarter, the account shifted its emphasis to markets in continental Europe from Japan.

Country allocations currently are diversified, with the largest allocation — 23% — to German markets and none in Japan, Mr. Carn said.

The $40 million Provident Capital International Low P/E Equity account buys "large-cap, low p/e stocks by country as a separate universe, selecting from the lower 40% of the market by p/e," according to Sandor Cseh, vice president-international investments.

"During the year, we benefited from the fact that low p/e did very well after the crash," Mr. Cseh said, "and low p/e since has worked worldwide."

The firm bought heavily into Japanese brokerage stocks late last year, cut back in February's rally, and then bought into Japanese utilities in June, Mr. Cseh said.

The $5 million International Stock Portfolio managed by Wellington Management Co., Boston, works in seven markets, but current allocations are 50% Japan, down from 75% during the first part of 1988; 35% in Australia; and 15% in cash, according to Jerrold Mitchell, senior vice president.

Selection of securities focuses on quality blue-chip, growth-oriented companies, Mr. Mitchell said. ■

Who offers your defined contribution plan participants the flexibility of daily telephone transfers between funds?

The same company who offers excellent investment management.

As a leading provider of 401(k) and other defined contribution plan services to more than 1,000 corporations across the country, Fidelity Investments offers a wide range of investment management and client services designed to meet the needs of both you and your employees.

**A Wide Array Of Nationally Known Funds.** With more than $70 billion in assets under management, Fidelity offers a broad choice of professionally managed mutual funds ranging from equity funds to money market funds and GIC's. The funds are available on a *no load* basis to plans with more than 200 eligible employees. And, as market conditions or personal investment objectives change, plan participants have the flexibility to transfer their investments among available mutual funds by telephone on any business day.

**Comprehensive Recordkeeping.** Fidelity's recordkeeping services are designed specifically to reduce your administrative burden. Not only can your employees call us directly to transfer existing balances, they can also redirect future contributions by telephone. Our state-of-the-art system and experienced employee benefit professionals work to ensure timely and accurate reports for both you and your employees.

**Employee Communications Support.** Fidelity will work with you to develop the communication materials needed to support your employees from enrollment through retirement. We'll help you explain your program and the available investment options clearly and effectively. In addition, your employees can call toll-free 24 hours a day, seven days a week and talk with a knowledgeable Fidelity representative about available investment options.

For more complete information about Fidelity's defined contribution plan services, including fund prospectuses covering management fees, expenses, and applicable sales charges, please call Jeffrey Paster, Vice President, at 1-800-345-5033. In Massachusetts call collect 617-570-5692.

CASH MANAGEMENT

# Executives pleased with analysis format

## Banks did transfers in October

None of the treasury management officials who participated in the 1988 *Pensions & Investment Age* cash management survey said their banks refused to wire transfer funds during the October 1987 stock market crash.

The presidential task force that studied the market crash, known as the Brady Commission, said in its report that on Oct. 20-21 "at certain points . . . 'gridlock' apparently occurred as certain banks declined to transfer funds for a customer until they had received covering funds for that customer's account from another source."

While none of the respondents reported their banks refused to complete wire transfers for them on Oct. 20 and 21, several companies, 15, reported banks did require covering funds for the account before completing their wire transfers on those two days, indicating the Brady Commission findings were not exaggerated as some had contended.

The commission report said its sources attributed the problems to bankers coming up against the daylight overdraft limits imposed by the Federal Reserve Board in March 1986 and revised in July 1987.

Banking concerns were clearly on the minds of the survey respondents.

More than 60% of the respondents said problems in the banking industry have caused them to review their

*Continued on page 22*

**By Fred Williams**

Corporate treasury and cash management officials have given the new account analysis format developed by the National Corporate Cash Management Association a ringing endorsement, according to a *Pensions & Investment Age* survey.

In the 1988 survey, 84% of cash and treasury management executives said they are pleased with the NCCMA account analysis format released with much fanfare in November 1987 at the NCCMA's annual conference in Atlanta.

While cash managers are pleased with the account analysis format, developed after several years of study and preparation, banks are slow to offer the account format, according to the survey.

Only 57% of the survey respondents said their banks were using the NCCMA format; 43% said their banks had not adopted the standard. Only 23% of the treasury officials had asked any of their banks to use the standard; 77% had not asked their banks to use the standard.

While the response to the new format was overwhelmingly positive, it is not viewed as a critical factor in evaluating banking relationships, according to the survey. Nearly all (99%) of the respondents said they would not end a bank relationship over the use of the format, but 54% said they would use the standard as a possible tie-breaker in selecting banks and for evaluating banking services.

The survey findings were compiled from 162 responses to questionnaires mailed to domestic cash and treasury management executives in 500 large corporations in June and early July. The survey asked treasury officials their views on topics ranging from how they allocate their time to what emerging issues will affect cash management in the future.

Of the respondents, 14 were corporate treasurers; 11, treasury or treasury operations managers; 50, cash managers; 19, assistant treasurers; seven, directors or vice presidents of finance; two, chief financial officers; and three, controllers. Others were treasury analysts, directors of finance, managers of cash and banking and supervisors of cash operations.

Among other findings the survey found:

- An undercurrent of concern regarding the banking industry and rising costs and risks associated with bank fiscal soundness. Comments regarding banks appeared in several areas of the survey. (*See related story.*)
- Most corporations do not hedge short-term borrowings, even in the face of rising interest rates.
- The vast majority of treasury operations at companies that are net investors do not use outside investment management firms.
- Almost half (44%) do not have any benchmark to evaluate internal investment staff or outside managers.
- One-third of the respondents (32%) admit the benchmarks could be improved but do not plan to make any changes.
- Treasury executives believe the NCCMA has been either somewhat effective in lobbying regulatory authorities about corporate concerns (79%) or very effective (11%).

In describing how much time they spend in various treasury functions, 17% of the respondents said they were dedicated to broader corporate finance issues, 5.9% with working capital management and 26.6% in the general category described as other, which includes such areas as foreign exchange, administrative duties, taxes, operations, accounting, risk management, cash forecasting, financial analysis and regulatory work. One respondent said the "other" category was for "putting out fires."

According to the survey, treasury managers spend 6% of their time on float management, 5.5% on selecting collection/disbursement banks, 3.5% selecting lending banks and 11% on other banking relations. Investing corporate cash accounted for 11.3% of their time and short-term borrowing, 6.5%. Electronic funds transfer and electronic data interchange issues now take only 3.8% of their time, according to the survey.

Only 13% of respondents employ hedging techniques against potentially rising interest rates on an average of 32.79% of their borrowings. Another 23% said they were considering a hedging program. More than half, 57%, said they had never hedged their portfolios. The treasury managers considering hedging their short-term borrowings may have been affected by the upward trend in interest rates. Rates on three-month Treasury securities have increased to 7.07% from 6.16% a year ago; on six-month securities, rates increased to 7.54% from 6.25% one year ago.

Only 27 of the 162 respondents reported using or planning to use outside investment management firms by 1989. Ten respondents used one manager and 10 used two managers; the remainder reported using more than two managers.

Corporate treasury officials continue to display some reservations about the certification program being offered by the NCCMA. Respondents reported a total of 52 people in their corporations took the NCCMA certified cash manager examination in 1987 with 35 passing the exam for a success rate of 67%, the same as reported by the NCCMA.

A total of 39 people took the exam in 1988, according to the survey, but 1988 results were not available by the time the survey data were compiled.

Of treasury executives asked whether their company considered the certified cash manager program worthwhile, 41.5% said no while 58.5% saw it of value.

A few respondents took the opportunity to provide comments

## NOTES

### *NACHA seeking chief*

WASHINGTON — The National Automated Clearing House Association hopes to name a new president and chief executive officer before the end of November to replace William R. Moroney, who announced his resignation in early August.

Mr. Moroney, who heads the search committee seeking his replacement, is leaving to start his own publishing business.

William B. Nelson, senior director of network services at NACHA, said the search committee is evaluating candidates to replace Mr. Nelson and the NACHA board of directors hopes to announce the new president at its Nov. 17 board meeting. Mr. Moroney has agreed to remain in his post until his replacement is named.

### *Program launched*

SAN ANTONIO, Texas — Diamond Shamrock R&M Inc. has initiated its first commercial paper program since being spun off as a separate company from Diamond Shamrock Corp., now Maxus Energy Corp., nearly 15 months ago.

The company issued $17 million in paper to finance working capital and reduce corporate debt.

Diamond Shamrock is authorized to issue up to $145 million but Robert C. Becker, treasurer, said the company plans a "relatively small" presence in the commercial paper market in the next six to 12 months. He said the company plans to issue "not more than $50 million to $75 million" in commercial paper during that time.

Mr. Becker said short-term financing had been handled through a series of bank revolving credit arrangements. The credit lines will continue to be maintained.

Diamond Shamrock's commercial paper dealer is Merrill Lynch Money Markets Inc., New York.

Mr. Becker said commercial paper should provide "at least" a one percentage point rate differential over bank borrowing, but declined to disclose the exact rate obtained. Access to the commercial paper market should reduce the company's overall cost of borrowing, he said.

"When we were spun off 15 months ago we had a 60% debt-to-capitalization ratio and now we have it down to 45% and rates then reflected a higher risk factor," said Mr. Becker.

Standard & Poor's Corp., New York, has assigned a rating of A-2 to the Diamond Shamrock commercial paper program and reaffirmed the BBB rating on Diamond Shamrock preferred stock.

Mr. Becker said a senior financial analyst will administer the company's commercial paper program in the treasury department.

The Diamond Shamrock commercial paper program is not hedged.

# Transfers made

*Continued from page 21*
banks' fiscal soundness more systematically. In fact, banking problems were mentioned throughout the survey responses in various other contexts such as mergers, federal bailouts and general solvency.

The trend of cash managers consolidating banking services is continuing as treasury executives reported dropping a total of 64 banks during the last year and an average of two to three banking services each, while reducing the use of 35 banks providing an average of one to two banking services each.

Services dropped or reduced covered the gamut from zero balance accounts, depository arrangements, controlled disbursement, investment and lines of credit. Lockbox services were mentioned most often as being dropped or reduced.

There has been a definite trend for the past several years among treasury managers toward paying their banks through fees rather than balances. The majority of respondents to the survey indicated the trend is continuing; 52.4% said they pay bank charges in fees and 47.6% in compensating balances. When asked their goal for 1989, respondents continued to favor fees by 55.3%, while only 44.6% plan to pay through compensating balances.

Banks have been raising fees for cash management services, according to survey respondents, primarily for lockbox services, wire transfers, balance reporting, account maintenance, check processing and controlled disbursement. Several respondents said their banks had raised fees for "all" cash management services.

Some bank services, however, became more competitively priced during the past 12 months, according to the survey. Services mentioned as becoming more competitively priced include check clearing, automated clearinghouse services, account reconciliation, controlled disbursement, and credit line fees. ■

# Executives

*Continued from page 21*
such as "we consider it a personal, NOT a professional credential," and "we encourage taking the exam, (but) do not believe it necessary to do the job," and "personal worth only."

Given the media attention over electronic payment programs and efforts to develop an electronic corporate trade payments system, the survey findings on electronic funds transfer were somewhat surprising.

Most treasury executives have no plans to initiate electronic funds transfer programs to pay vendors. By a margin of 2 to 1, respondents said they have no immediate plans to pay vendors electronically. Of those who do plan to offer an electronic payment program, most plan to start in the 1989-'90 time period.

When asked to describe two issues they think will be important to cash managers during the next few years, respondents concentrated on several areas. The areas mentioned were: EFT for paying and receiving; the Federal Reserve Board's efforts to deal with daylight overdrafts; Regulation CC, which implements the Expedited Funds Availability Act to speed check processing; the proposed 2 p.m. check presentment proposal by the Fed; electronic data interchange; wire transfer security and liability and float management and Fed efforts to eliminate float.

Other areas also mentioned include bank capital adequacy standards, continued deterioration of bank services, higher banking costs and risks in the payment system. ■

## NOTES

*Continued from page 21*
on remote or delayed disbursement practices during June by issuing for public comment a proposal to clamp down on checks written by banks on another bank in a separate processing district.

The proposed rule — which would become effective April 1, 1989 — would permit a bank to issue a check drawn on another bank only if it can ensure a depository bank in the same community as the issuing bank can receive credit for the transaction as early as a check drawn on the issuing bank.

In an accompanying memorandum, the Fed stated it "believes the banking industry has a public responsibility not to design, offer, promote, or otherwise encourage the use of a service expressly intended to delay final settlement and that exposes payment recipients to greater than ordinary risks."

The board claimed delayed disbursement results in higher transportation and processing costs and an increased possibility of check fraud.

Despite its past policy statements on the issue of delayed disbursement, the Fed said the practice is still being used.

# International fine-tuning

## GDP-weighted system includes growth projections

By Ronald D. Frashure

Much attention is being given to alternatives to market-value-weighted strategies for international equity investing.

Concern over Japan's high weighting in the widely followed indexes, especially the Morgan Stanley Capital International Europe Australia Far East index, is promoting a search for an alternative to serve as a benchmark for international indexing, or as a normal portfolio for active management.

One option to market-value weighting is weighting by gross domestic product, as discussed by David A. Umstead (*Pensions & Investment Age*, May 2). More recently, Morgan Stanley officials recognized the concern and added a GDP-weighted version of the market-value-weighted EAFE (*P&I Age*, Aug. 22).

A major drawback to a GDP-weighted strategy is that it does not consider factors accounting for valid differences in the ratios of market-value weighting to GDP weighting in each country.

One difference especially is economic growth.

Investors typically would pay more for stocks in a high-growth, developing Pacific Basin economy than for those in a cyclical growth, developed European country, which might have very cautious economic policies and a declining population (e.g., West Germany). An analogy would be investors who pass up stocks with the highest dividend yields when the dividend isn't likely to grow much in favor of somewhat lower yielding stocks with prospects for much stronger dividend growth.

A way to mitigate this problem would be to incorporate projected long-term economic growth into a GDP-weighted strategy. The obvious question is how to project GDP growth. Experienced investors know the pitfalls in relying on economists' forecasts for even short-run conditions. Also, those pursuing customized index-matching approaches usually want to avoid qualitative or subjective inputs to the process.

To get over this hurdle, I've tested to see whether long-term (10 years) historical real economic growth rates have been a reasonably good indicator of subsequent long-run growth in a number of countries. This test appears intuitively plausible. A developing economy that has been growing at an 8% to 10% real rate annually might slow to 6% to 8% but probably won't drop off precipitously — unless there is a calamitous development, economic or political. Conversely, a mature economy that has grown at a 2% to 3% rate for a long period might accelerate to 4% to 5% for a while, but probably isn't going to jump to a sustained 8% to 10% pace for an extended period.

The test used data from the Organization for Economic Cooperation and Development for countries in the EAFE index, going back to 1961. (The data for non-OECD countries in EAFE were obtained from other official sources.) I picked this starting point because most of the initial recoveries from World War II that might distort differences in national economic performance had taken place by the end of the 1950s. I computed 10-year historical real GDP growth rates country by country for each year beginning for the period 1961 to 1970 and then did a cross-sectional regression against subsequent actual moving 10-year real GDP growth rates for each EAFE country. Ten-year growth rates were used to avoid business cycle distortions over shorter periods.

Ten-year historical annualized real GDP growth proved to be a good predictor of subsequent 10-year annualized growth, with correlation coefficients ranging as we moved forward year by year from 0.66 to 0.96. (The t-statistics were also high, indicating statistical validity to the prediction, varying from 3.2 to 6.4.)

The real question is whether adding long-run GDP growth as a predictor of future growth to a plain GDP-weighted strategy can enhance investment results from the unmodified strategy. The answer is definitely yes.

Arriving at this answer required a technique for augmenting the GDP-weighted strategy with growth. Our approach was straightforward. At any point in the time period, we used trailing historical 10-year real GDP growth as a proxy for future growth and then computed the 10-year projected real GDP weighting country by country as a percentage of EAFE's total projected GDP. These projected 10-year GDP weights were used to set the country weightings in the growth-enhanced GDP strategy, as we call it.

As shown in Table 1, the growth-enhanced GDP strategy results in somewhat different weightings from a plain GDP-weighted strategy and a substantial difference from the conventional market value-weighted strategy. (The underlying GDP statistics, based mainly on OECD data, are stated on a common basis of 1980 price levels and exchange rates.)

Both GDP indexes significantly reduce Japan's weighting compared to that in the market-value index. But in the growth-enhanced GDP index, Japan's weighting is higher than in a plain GDP index. The reason is the growth-enhanced index allows for Japan's relatively high economic growth. West Germany and the United Kingdom, on the other hand, have lower weights in the growth-enhanced GDP index than in the plain GDP index, because of their relatively slow-moving economies. But their weights in both GDP indexes is significantly higher than in the market-value index, reflecting the relative size of their economies as opposed to the value of their stock markets.

At the same time, Hong Kong and Singapore/Malaysia have higher weightings in the growth-enhanced GDP strategy than the plain GDP version.

Table 2 shows the year-by-year results from a growth-enhanced GDP strategy, a plain GDP index and the market-value approach of the EAFE. (The results are net of rebalancing costs estimated at 75 basis points for buys and sells, in line with the current transactions cost; the market-value weighted index requires no rebalancing.)

The growth-enhanced GDP strategy performed in line with EAFE from 1971 to 1987, while the plain GDP strategy did about 40 basis points annually below EAFE. Each of the GDP-based strategies had a somewhat higher volatility of returns than EAFE. ■

Ronald D. Frashure is executive vice president of Acadian Asset Management Inc., Boston.

# Greece fund to be launched

LONDON — Alliance Capital Management Corp.'s London office is preparing to launch a closed-end mutual fund investing in Greece by late October, according to Mark Breedon, vice president of the firm, which manages $800 million in international assets for U.S. tax-exempt clients.

Like the firm's recently launched Spain Fund, the Greece fund likely will be offered in the United States, Europe and Japan.

The fund will be managed by Alliance and a local Greek investment adviser. Alliance runs the Spain fund — which invests 25% of its assets in unlisted securities — in a venture with Banco de Viscaya, Madrid.

In addition, the Greece fund will be financed in part by mezzanine capital. First Boston Corp., New York, was lead manager of the Spain fund, which raised $120 million. ■

**175 REASONS IN A ROW WHY QUESTAR IS A FUNDAMENTALLY SOUND INVESTMENT.**

Dividends. That's a fundamental reason to invest for a lot of investors.

Which is reason enough to take a long look at Questar.

We've paid 175 consecutive dividends, with 15 increases in the last 15 years. We are a diversified, Utah-based energy company which offers investors a strong balance sheet, steady cash flow, reliable dividends, competitive yields, and excellent opportunities for stock appreciation. So the future continues to look good.

From oil and natural gas exploration and production to gas transmission and storage to gas distribution through a public utility in one of the country's fastest-growing areas, few energy investments are as fundamentally sound as Questar.

Write (or call) for information. And we'll give you more reasons to take a closer look at Questar.

"The bulk of the money and maybe the majority of the clients are now in global," Mr. Brinson said. "More than half of our assets represent participants in global products."

Ballard Biehl & Kaiser, San Mateo, Calif., adds the categories of real estate and precious metals. "It's a tremendous opportunity for higher returns and hedging risk," said Peter Hill, executive vice president. "Sometimes it's difficult to deal with the liquidity problems, but markets grow up and mature. It's one way to expand your horizon."

Ballard Biehl & Kaiser, also an investment management consultant for pension sponsors interested in tactical asset allocation, now has $200 million under management for the product, up from $125 million as of Aug. 30, 1987, a 60% increase. Five clients were added, bringing the total to 25.

Prudential Diversified Investment Strategies, an affiliate of the Prudential Insurance Co. of America, Newark, N.J., added 2.8% to last year's amount, giving it a total of $7.1 billion in tactical asset allocation products, up from $6.9 billion as of Aug. 31, 1987. Ten clients were added, bringing the total to 155.

Mellon Capital Management, San Francisco, reported $6 billion, up 50% from $4 billion. Mellon had 48 clients as of Aug. 31, last year's client number was unavailable.

TSA Capital Management, Los Angeles, reported $3 billion, up 30.4% from $2.3 billion as of Aug. 31, 1987. Ten clients were added, bringing the total to 30.

Renaissance Investment Management Inc., Cincinnati, reported $1.51 billion this year, compared with $1.24 billion as of June 30, 1987, a 21.8% increase. The firm added 24 clients, bringing the total to 252.

Avatar Associates, New York, which has gained 10 clients in three months, experienced a 62.5% increase, to $1.3 billion from $800 million last year. It has 93 clients, up from 77.

Citicorp Investment Management, New York, also saw healthy growth, to $1.25 billion from $850 million, a 47% increase. Three clients were added since July 30, 1987, bringing the total to 13.

Bankers Trust Co. — Investment Management Group, New York, maintained its $1.05 billion in tactical asset allocation assets for 13 clients. Bankers Trust experienced neither a loss nor a gain because of the market crash, according to Steven A. Lauer, vice president and manager of the options and futures group.

J.P. Morgan Investment Management Inc., New York, which launched its tactical asset allocation product this year, already has $500 million in assets and seven clients as of Aug. 30.

Chase Investors Management Inc., New York, was the only large firm to see its tactical asset allocation assets decrease, to $300 million, from $330 million. Michael Schonberg, managing director, attributed the decrease to Oct. 19. There is one client.

Matrix Capital Management, Greenwich, Conn., gained six clients during the 12 months ended Aug. 31 for its one-year-old program. Matrix has a total of $187 million from six clients.

Webster Capital Management, New York, which also launched its tactical asset allocation product a year ago, now has one client and $50.1 million under management. ■

# Big play

*Continued from page 2*

Schmitting said.

The portfolio holds about 320 to 330 stocks, totaling $1 billion in market value, he added.

The August filings, although representing a small number of the stocks in the portfolio, involved a major part of its market value, amounting to $91 million, or nearly 10%, based on the SEC data. The board holds less than 5% of most of the stocks in the small-cap portfolio.

Mr. Schmitting is assistant to John Nelson, investment director in charge of the small-stock portfolio who was unavailable for comment.

The board has four other equity portfolios, all for stocks larger than $500 million in market capitalization. The portfolios have about $6.75 billion combined and are run or overseen by James Severance, investment director.

Mr. Schmitting noted that, as a policy, he and Mr. Nelson will retain stocks in the small-stock portfolio even after those companies' market capitalization grows beyond $500 million, if their investment outlook looks promising. He said they won't purchase any additional shares of the stocks unless their market cap again falls below $500 million.

According to the most recent SEC filings, dated Aug. 22, the board disclosed reaching the 5% threshold for:

- **Angelica Corp.**, St. Louis, with 5.4%, or 496,000 shares, valued at $11.1 million as of the closing price Aug. 26;
- **JP Industries Inc.**, Ann Arbor, Mich., 5.2%, or 580,700 shares, valued at $9.1 million;
- **Western Waste Industries**, Gardena, Calif., 5.3%, or 260,000 shares, valued at $4.5 million;
- **MTS Systems Corp.**, Eden Prairie, Minn., 6%, or 345,000 shares, valued at $6.4 million.

On the same day in another filing, the board disclosed a recent reduction in its holding of **Healthcare Compare Corp.**, Downers Grove, Ill., to 6.1%, or 345,000 shares, valued at $4.8 million. Only a week earlier, the board reported raising its ownership in Healthcare Compare to 7.9%, or 445,000. By contrast, as of March 31, the board held no shares in the company, according to SEC 13(f) filings, reported by CDA Investment Technologies Inc., Rockville, Md.

In other filings in August, the board reported boosting its holdings in:

- **United Education & Software**, Encino, Calif., to 7.3%, or 475,000 shares, valued at $2 million;
- **Pic 'N' Save Corp.**, Carson, Calif., to 5%, or 1.9 million shares, valued at $24.8 million;
- **Pope & Talbot Inc.**, Portland, Ore., to 5.4%, or 647,900 shares, valued at $10.8 million;
- **Emcon Associates**, San Jose, Calif., to 5.9%, or 145,000 shares, valued at $2.2 million;
- **Toro Co.**, Bloomington, Minn., to 7.6%, or, 731,700 shares, valued at $13.6 million; and
- **Dresher Inc.**, Bedford Park, Ill., to 6.8%, or 306,000 shares, valued at $1.7 million.

In some of the 11 companies, the board's investment would make it one of the leading institutional shareholders, able to exert a strong voice through its proxies, according to CDA's 13(f) reports. In some cases, institutions hold less than 50% of a particular company's stock. At United Education, institutions hold only 19% of its shares, based on the first quarter 13(f) reports. Based on that data, which don't reflect more recent changes in positions of other institutional investors, the Wisconsin board would be United Education's biggest institutional holder, owning more than one-third of the total institutional position. ■

# Buybacks assessed

**By Marlene Givant**

The size of the U.S. equity market could shrink to that of the United Kingdom within 30 years if net withdrawals of corporate equities from the market continue at their current rate.

The United States represents 30.8% of the Morgan Stanley Capital International World index while the United Kingdom represents only 8.7%.

Since 1984, corporations have been retiring more stock through stock repurchases, leveraged buyouts and mergers and acquisitions than they have been issuing — despite the large volume of initial public offerings in recent years.

"Sooner or later the withdrawal of equity is likely to come to an end, removing a source of support to the market," noted Sarah Gardner, U.S. analyst for UBS Phillips & Drew International Ltd., London, in an economic briefing called "American Pie."

"If (net withdrawals) carry on at this rate much longer, it will get a bit silly. But at the moment, there doesn't seem to be any end to it," Ms. Gardner said.

If inflation picks up and interest rates increase during the next two to three quarters, net withdrawals will slow, she said.

"I think we've seen a top of the U.S. market (when the Dow Jones industrial average reached near 2000) so I feel a down trend is on its way. . . . As interest rates climb, it will be less advantageous for companies to repurchase their shares. The peak of net withdrawals was after the crash. They will gradually slow into next year."

Net withdrawals in the years since 1984 have slowly become a factor in supporting the U.S. stock market.

"It's a structural change that has taken place. We're coming to an end of the cycle. Net withdrawals will soon be outnumbered by IPOs," she said.

Until now, the decline in the number of shares in the U.S. market has been overshadowed by rising equity prices.

"Now that there's a downturn in stock prices, I would imagine the U.S. market value ($3.5 trillion as of the first quarter) will level off because of the effect of net withdrawals," Ms. Gardner said.

Net withdrawals peaked after the crash. As initial public offerings immediately dried up and mergers and acquisitions activity stagnated, many companies announced stock repurchase plans, viewing their companies as cheap.

Consequently, net withdrawals rose from $75.9 billion in 1987's third quarter to $93.9 billion in the fourth quarter of 1987 and $92.7 billion in the first quarter of 1988.

In recent years, equity prices have benefitted from the declining number of total shares. Fewer shares have led to higher reported earnings per share.

Among other findings in the report:

- Despite the attention that has been focused on the overseas sector's ability to affect the U.S. market, foreign investment in the United States accounted for just 6% of market value at year-end 1987, compared with 5% in the U.K. and 3% in Japan.
- About two-thirds of U.S. corporate equities are owned by individuals, while two-thirds of the U.K. equity market is owned by institutions. U.S. pension funds own just 16% of all domestic equities, including mutual funds; the corresponding figure is 32% in the U.K. Institutions in total (including insurers) own 24% of equities in the U.S. compared with 67% in the U.K.
- The shareholder muscle of U.S. individuals is not widely dispersed. Although private investors in the U.S. owned 64% of corporate equities at the end of 1987 through direct holdings and mutual funds, slightly more than half of these equities were owned by individuals in the top 2% income bracket; 85% of the individuals earned more than $50,000 a year. ■

# Captives' assets targeted

By Trudy Ring

Domestic investment managers are making a push into the $14 billion captive insurance company market, long dominated by internationally oriented managers.

"It's an area where there will continue to be a growing pool of investible assets that will have to be managed," said Michael Witte, vice president of Citicorp Investment Management, New York. Domestic managers are certain to step up their marketing efforts to captives, he said.

Citicorp manages $125 million for captives located outside the United States, but is marketing to those in the United States as well, and finds that business is the fastest-growing portion of its $2.2 billion in total insurance company assets under management, Mr. Witte said. Citicorp might dedicate one marketer solely to the captive area, he said.

A "historical accident" has given internationally oriented managers with expertise in running Eurodollar bonds the biggest share of captive assets so far. Changes in the captive marketplace, however, could mean other types of managers and other asset classes will get a larger chunk of future cash flows.

A captive insurance company is any insurer that is owned by another company. Companies set up captives for a variety of reasons — to self-insure, to avoid fluctuations in rates charged for insurance or to gain direct access to the reinsurance markets, in which an insurer sells off a portion of the risk it has assumed.

In the 1960s and 1970s, many U.S. companies set up captives offshore because of tax and regulatory advantages. Bermuda has been the most popular domicile for captives, with about 1,300 such companies; there are more than 3,300 captives in the world. Other popular domiciles include the Cayman Islands and Barbados.

The 1986 Tax Reform Act, however, eliminated many of the advantages of doing business offshore, and several states have passed laws making it cheap and easy to set up captive insurers. Vermont, with 124 captives established through the first quarter of

Eastern Air Lines' request for a waiver of its $105 million pension contribution has come under attack by the International Association of Machinists and Aerospace Workers union.

# Eastern battle wages

## Union says second waiver not needed

By Nicky Robertshaw

WASHINGTON — The Eastern Air Lines machinists have asked the government not to waive the Texas Air Corp. subsidiary's $105 million pension fund contribution, saying the airline can afford to pay but prefers to use the money to drive out the unions.

"Texas Air and its subsidiaries have money to spend, money to lend and money for strike war chests," said Charles E. Bryan, president and general chairman of the International Association of Machinists and Aerospace Workers, District Lodge 100, in a Sept. 7 letter to the Internal Revenue Service. "No

# Realty unit's management restructured

By Andrew Reinbach

NEW YORK — Steven E. Wheeler, Morgan Stanley Real Estate Inc.'s co-managing director, is leaving the firm, and his partner William S. Bahrenburg Jr. has been shorn of administrative duties.

The moves are the latest round of what insiders say is a long-running political struggle waged by Morgan Stanley Inc. for control of its real estate group.

James M. Allwin, managing director, has moved from the mergers and acquisitions staff to assume administrative control of the unit.

Mr. Allwin reports to Eric Gleacher, head of mergers and acquisitions; the unit formerly reported to Robert Greenhill, who runs the corporate finance group.

Mr. Bahrenburg is taking the title of chairman and will concentrate on new business development. Bowen H. "Buzz" McCoy, previously chairman, will be chairman emeritus.

"I wouldn't personally use the word control, but there's an element of truth in that," said Mr. Bahrenburg in reference to the parent company's efforts. "One of the efforts here is to better integrate us with corporate finance."

The struggle between management and the real estate unit is rooted in the unit's origins as Brooks Harvey & Co., an old-line brokerage firm — credited by some with helping invent real estate investment banking — that was acquired by Morgan Stanley in 1969.

Morgan Stanley officials, realizing real estate types are different from the typical investment banker, set about integrating the new unit into the fold.

Mr. Bahrenburg helped in this effort, shifting from corporate finance to Brooks Harvey not long after he joined Morgan Stanley in the late 1960s.

But the unit's success led it in its own direction. It is widely credited with being the first to apply the concept of the internal rate of return to

## LATE NEWS

### 2 compute retiree-health liability

WASHINGTON — Two estimates of the size of the current retiree-health care liability for the private sector released last week are less than one-fourth of the $2 trillion figure floated last year on Capitol Hill.

The General Accounting Office estimates the liability for current active employees and retirees is $402 billion — $221 billion in accrued benefits and $181 billion in benefits not yet accrued.

This estimate, however, does not take into account the effect of the Medicare Catastrophic Coverage Act of 1988, which would reduce retiree-health care costs 30%, according to the Employee Benefit Research Institute, Washington.

An EBRI study estimates the liability is $169 billion for current active employees and retirees, if the Medicare act is taken into account, and $247 billion if it is not.

### Employees buy Wyatt Cafeterias

DALLAS — Shareholders of closely held Wyatt Cafeterias Inc., Dallas, sold the company to a new Wyatt employee stock ownership plan in a leveraged transaction worth an estimated $186 million.

Ten banks participated in the financing, said Mark Shackelford, Wyatt Cafeterias' chief financial officer, but he declined to name the bank network. About $35 million of the financing package was subordinated debt and $15 million, preferred equity, he said.

Westinghouse Credit Corp, Pittsburgh, provided $15 million of subordinated debt and the $15 million in preferred equity. The remainder of the debt was provided by American General Corp., a Houston insurance company.

The sale of the company to employees ended a two-month attempt by Furr's/Bishop Cafeterias L.P., Lubbock, to take over the nine-state, 120 chain of cafeterias. Wyatt shareholders rejected a sweetened bid of $91.25 per share, or $188 million, by Furr's/Bishop in favor of the leveraged ESOP, which provided shareholders $84 per share.

### Oregon acquires office building

WASHINGTON — Alex. Brown Realty Advisors Inc., Baltimore, has purchased the 1333 New Hampshire Avenue Building in Washington's central business district on behalf of the $8.7 billion Oregon Public Employes Retirement System, Salem, which is a separate account client.

The 12-story, 321,000-square-foot office building is 100% leased. The fund paid $75 million to Lehndorff New Hampshire Venture. Rosenthal-Shuler Realty Partners acted as the agent on the purchaser's behalf.

Alex. Brown has $1.3 billion in assets under management for real estate clients.

### Firm formed for realty investing

MONTVALE, N.J. — Campbell Kunz Management Corp., Montvale, N.J., is entering the real estate investment management arena, planning to capitalize on the turnaround of the real estate market.

The firm, led by Principals Kenneth D. Campbell and Raymond G. Kunz, is majority owned by Audit Investments Inc., the Montvale-based firm of which Mr. Campbell is president and founder. Mr. Kunz had been chief operating officer of London & Leeds Shopping Center Corp. and had served as a vice president with Morgan Stanley Realty Inc.

Mr. Campbell said his strategy is to make client investments in both the direct real estate and the real estate securities markets.

"We believe that sophisticated investors must address both components . . . in today's market to maximize return on their real estate allocation," he said.

Campbell Kunz will serve pension plan sponsors, foundations and endowments as well as other institutions and individual investors.

Audit Investments manages $7 million for institutional real estate clients.

### Jim Walter selects 2 consultants

TAMPA, Fla. — Jim Walter Corp. has hired Performance Analytics Inc. and its affiliate Spectrum Advisory Corp., both in Chicago, as consultants to its newly organized, $125 million pension fund.

Jim Walter was spun off from Walter Industries Inc., also in Tampa, in April, and the pension assets were transferred in June, according to John P. Borreca, chief financial officer.

Mr. Borreca said the consultants will help the new firm determine processes for manager searches, asset allocation, performance evaluations and other pension fund decisions "from soup to nuts."

# SEC is challenged

## Execs target one-share, one-vote rule

**By Marcia Parker**

WASHINGTON — America's chief executives, who largely have been quiet on the sensitive subject of corporate governance, have taken the first step toward mounting a legal challenge of a long-standing rock bed of corporate democracy — the one-share, one-vote rule.

But the Business Roundtable, the lobbying group that represents the chief executives of America's 200 largest corporations, did not spell out the grounds for its expected challenge. The group's two-page petition for review of the controversial Securities and Exchange Commission rule was filed Sept. 2 with the U.S. Court of Appeals for the District of Columbia Circuit.

The next move is for a Roundtable committee to go beyond its decision to preserve its right to challenge the rule by filing the petition. The group has 60 days to *file a more detailed complaint*. The issue was discussed at the board meeting Sept. 15, but no decisive action was taken.

After lengthy discussion and public hearings, the SEC in July adopted a limited one-share, one-vote standard for stocks listed on the nation's largest securities exchanges. There was intense debate over a 1986 proposal by the New York Stock Exchange to allow listed companies to have unequal voting rights (*Pensions & Investment Age*, Dec. 8, 1986). A number of other stock exchanges already had loosened their rules on one-share, one-vote, and the NYSE was feeling competitive pressure.

The Roundtable lobbied hard to defeat the one-share, one-vote rule. It is believed the group will mount its legal challenge to the rule by arguing the SEC has no jurisdiction in the matter, an argument critics dismissed earlier as having no merit.

"It's not surprising that the Business Roundtable has challenged the SEC's one-share, one-vote ruling. Its representatives have contended from the beginning of the SEC's hearings on the issue that the commission did not have the authority to prescribe voting rights — that that should be left to the states, not a federal regulatory agency or even Congress," said Peg O'Hara, director-corporate governance service at the Investor Responsibility Research Center, Washington.

"If that is indeed the grounds on which the Roundtable bases its challenge, it's a pretty basic issue, and you might very well see Congress react by either mandating a one-share, one-vote standard or specifically spelling out the SEC's authority to do so. Whatever happens, it's unfortunate to see such a fundamental right of stock ownership as one vote per share become a political football."

The SEC plans to respond to the petition for review after the Roundtable files a more detailed brief, said Daniel Goelzer, SEC general counsel. He said it would likely be a couple months before oral arguments would be heard, assuming the Roundtable pursues the challenge. He noted the SEC's Office of the General Counsel had advised the commission it had the authority to impose the rule.

Several groups, including The United Shareholders Association, a Washington-based group headed by Texas oilman T. Boone Pickens that led the drive to defend one-share, one-vote, and Institutional Shareholder Services, a Washington consulting firm, said they are considering filing

# $1 billion to small cap

**By Curtis Vosti**

Small-capitalization stocks, buoyed by returns of more than 13% in the first eight months of the year, have drawn more than $1 billion in new institutional investments this year.

Many more investments were acknowledged, although not enumerated, as pension sponsors said the main reason for their small-cap investments was a desire to increase diversification into what was for many, a new asset class.

The at least $1.2 billion in small-capitalization allocations since the beginning of the year were itemized through interviews and asset allocations reported in *Pensions & Investment Age*. Among the largest moves were:

- a $360 million commitment by the $8 billion Los Angeles County Employees' Retirement Association. The fund could add another $90 million by year's end;
- a $190 million allocation earmarked by the $2.7 billion Fire & Police Pension System — City of Los Angeles; and
- a $100 million investment by the $1.9 billion Board of Pensions of the Presbyterian Church (U.S.A.).

The Los Angeles County fund's move was spurred by an asset allocation study a couple of years ago, according to Administrator Charles Spencer, but the fund didn't get around to investing until this year.

"Purely for diversification," he said of the investments, but he acknowledged the strong performance of small stocks this year encouraged the fund's trustees to make the investments.

The Russell 2000, an index of stocks with between $25 million and $300 million in capitalization tracked by Frank Russell Co., Tacoma, Wash., returned 22.75% for the first eight months of 1988, while the NASDAQ composite index returned 13.9% for the same period.

In comparison, the Standard & Poor's 500 stock index has returned 8.5% through Aug. 31.

The fire and police system ventured into small-cap stocks this year because "it was just its time," said Allan Moore, assistant manager. He said an asset allocation study two years ago recommended the small-cap investment as a new asset category for diversification.

The system's small-cap managers, BMI Capital Corp., New

# Giant firms prosper as plans grow

**By Carol Wiley**

The maturing pension fund market might be signaling a trend in the money management industry toward "megamanagers" to whom large pension sponsors give the bulk of their business.

Larger managers apparently have not been hurt by several factors in the past few years that could reduce business and revenue, including the shrinking asset pool from negative cash flow and the reduction in pension fund contributions; the Oct. 19 market crash; performance fees; increased mergers and acquisitions; plan terminations; increased use of indexing; and a trend toward defined contribution plans.

While smaller managers acknowledge this trend, they also believe there will always be a place for them in the investment market because they can provide the personal service on which small pension sponsors depend.

"Within five to seven years, megamanagers will manage very large sums of money for one client and will represent the core of the client's assets," said Ronald Golz, executive vice president of State Street Bank and Trust, Boston, with $30.5 billion under manage-

# 'Junk' tops indexed stocks

## Same risk, more reward

By James L. Sullivan

I am amazed at the amount of "credit risk" being accepted by organizations that invest in stock index funds. They invest with apparent disregard to possible exposure of severe credit deterioration of non-investment-grade issuers in the indexes.

Pension sponsors, endowment funds and other institutions that invest in equity indexes could enjoy the benefits of high-yield, or junk, bond investments without accepting any additional risk exposure.

Actually, high-yield bonds, which are issued by below-investment-grade companies, have less risk than equities issued by some of the same corporations included in indexes, such as Amdahl Corp., Andrew Corp., Pan Am Corp., Prime Computer Inc. and Coleco Industries Inc.

Coleco, for example, which filed for protection under bankruptcy law, was deleted from the Standard & Poor's 500 stock index earlier this year. Bondholders will fair better in a settlement than stockholders.

Obviously, the risk to the stock index investor is not the credit risk that confronts the bond buyer; rather, it is the potential risk of loss over time from market movements. But the comparison of the indexed stocks and their credit risk presents an interesting analogy for investors to contemplate before dismissing junk bonds as an investment.

A recent Standard & Poor's Corp. credit profile of the most widely used equity index — the S&P 500 — reveals:

- 311, or 62%, of the indexed companies have investment-grade ratings;
- 62, or 12%, have below BBB, or below-investment-grade ratings; and
- 127, or 26%, have no rating.

If one assumes half of the 127 non-rated companies would have ratings below investment grade, then a total of 125, or 25%, of the companies in the S&P 500 would have ratings below investment grade.

Such an assumption is reasonable. Fewer than half of all the

# Fund to lend again

## Oct. 19 market crash halted program

By Barry B. Burr

CHICAGO — After abruptly shutting down the program within days of the Oct. 19 stock market crash over fear of possible losses, Morgan Stanley & Co. is planning to resume securities lending for the $7.86 billion Teamsters, Central States, Southeast & Southwest Areas Pension Fund.

"We're considering going back into it," said Robert M. Warner, the fund's director-financial operations. The fund didn't lose any money in the program.

Morgan Stanley, the fund's named fiduciary, is "actively deciding on re-entering securities lending," he added. Its executives are interviewing agents for the program.

"Mellon Bank is likely to be chosen," Mr. Warner said, the only candidate he identified. "If they aren't, they certainly are well up on the firms being considered." Pittsburgh-based Mellon, the Central States' custodian, ran the securities lending program before it was suspended.

"It was ended very quickly (after Oct. 19), within days," Mr. Warner said. "It was a Morgan Stanley decision. It was directly connected to the Oct. 19 problem."

"In the turmoil that followed Oct. 19, they (Morgan Stanley) called in securities that were out," he added. Mr. Warner said lending agreements allowed Morgan Stanley to require return of securities immediately.

He was unable to give the value of securities outstanding just before the October crash, the type lent in the program or the brokers and other borrowers of the securities.

As of Dec. 31, 1986, the latest available data, Central States had $384.6 million in securities on loan, according to the fund's annual report.

Mr. Warner was unable to say how much the fund earned in the program.

"The reason they moved out of securities lending is because of concern the market might rebound after the crash, and brokers and others who borrowed securities might not be able to cover (their collateral) when we made a call" for more collateral, he said.

Short-sellers borrow securities to sell them, hoping to buy them back later at a lower price to cover their positions and profit from the difference in the sale

# Stock market reaction to interest rates varies

By Barry B. Burr

Forecasts of losses in the stock market aren't necessarily consistent with a rise in interest rates, according to a new analysis.

The sensitivity of the stock market to interest rate changes isn't always symmetrical, reacting to declines in rates to the same degree it reacts to rises, it notes.

The stock market is less sensitive to rising interest rates than to falling rates, according to the analysis by Eric H. Sorensen, director-quantitative analysis, and Joseph J. Mezrich, vice president, of Salomon Brothers Inc., New York.

"There are periods in which the upward movement in earnings and/or reductions in the market risk premium may offset the negative impact of rising interest rates," they note.

The reason is that besides interest rate changes, other major factors influencing cyclical movement of the stock market are earnings accelerations or decelerations and changes in the risk premium for stocks. The risk premium is the difference in returns between stocks and risk-free securities.

The two executives analyzed quarterly returns of the Standard & Poor's 500 stock index during periods of rising and falling interest rates since 1960. As a proxy for interest rate changes, they used quarterly percentage changes in 20-year Treasury yields in the same period.

They found "the relationship between changes in interest rates and the stock market differs for periods of rising and falling rates."

In particular, they found the relationship diverges around interest rate changes above and below −5%.

"If the quarterly interest rate decline exceeds −5%, the stock market tends to rise by 0.63% for every 1% drop in relative interest rates," they noted.

"For interest rate moves above −5%, the market responds with a 0.34% move for every 1% in-

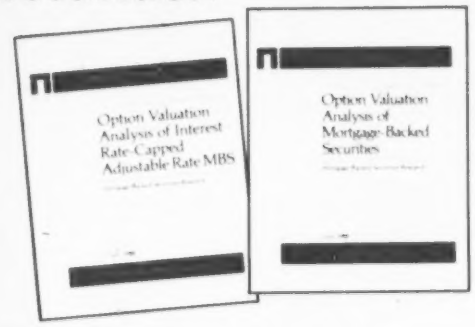
Option Valuation:
The most effective method of evaluating mortgage-backed securities.



Mortgage-backed securities (MBS) have long offered attractive yields to investors. Unfortunately, they also offer substantial exposure to interest rate and prepayment risk.

Given the many variables involved, the most effective method for analyzing the risk and return characteristics of MBS is option valuation analysis. And nowhere have the complexities of option valuation been discussed with as much clarity as in these two reports offered by Kidder, Peabody.

These reports provide an effective, detailed pricing methodology for mortgage-backed securities—one which can be extended with confidence to the burgeoning, highly complex adjustable rate market.

For anyone seeking to determine the relative values of various mortgage-backed securities, these analyses—done by the Kidder, Peabody Fixed Income Research Department—are invaluable.

For copies of these reports, call (212) 510-4590.

KIDDER, PEABODY

# 'Junk' bonds

*Continued from page 13*

hundreds of companies whose credits are evaluated have investment-grade ratings. If one assumes the non-rated companies in the S&P 500 are more typical of all the hundreds of companies whose credits are rated, rather than of only the S&P 500-rated companies, then about half of the 127 non-rated companies in the index would have ratings below investment grade.

Going through the same exercise for the Moody's Investors Service Inc.'s ratings of the S&P 500 companies, one finds:

- 284, or 57% of the companies have investment-grade ratings;
- 47, or 9%, have Baa, or below-investment-grade ratings; and
- 169, or 34%, have no rating.

Again, assuming half of the non-rated companies would have below-investment-grade ratings, then a total of 132, or 26%, of the companies in the S&P 500 would have ratings below investment grade.

Investing in the bonds issued by the 25% of the companies in the S&P 500 that have below-investment-grade ratings will involve less risk, as measured by credit risk, than investing in the equities.

The point of this analogy isn't intended as a criticism of stock indexing. But it demonstrates to index investors the investment merit of junk bonds of indexed companies and companies of similar credit standing.

Bond investors enjoy greater cash flow from the high-yield bonds than from the equities and added return of compounding interest. In the event of financial calamity, high-yield bond investors enjoy better credit standing than equity holders. Moreover, the high-yield bond market has outperformed the S&P 500 in recent years.

In the five years ended Dec. 31, high-yield bonds produced a cumulative total return of 176.5%, according to Drexel Burnham Lambert Inc.'s index on a market-value-weighted basis. By comparison, the S&P 500 returned 156.3%. On a compound annual basis, the returns were 12% and 9.3% respectively.

Because of this performance, all pension fund and endowment trustees should give consideration to using high-yield bonds in their investment programs.

For those funds that index, the argument that a pension fund cannot buy such bonds because they are below investment grade simply does not stand up to close examination. Pension funds that index already are accepting greater risk with at least 25% of the assets they have placed in stock indexing.

Trustees who approve of equity indexing establish the prima facie rationale for approving the purchase of respective fixed-income obligations of the same corporations in the index, or of companies of comparable qualities.

Index investors, in other words, ought to invest a part of their portfolios in junk bonds. They would, of course, diversify the rest of their investments among other assets, just as indexers diversify among high- and low-rated companies in the S&P 500.

Investors have gravitated toward indexing for equity performance, for its ease of execution and portfolio monitoring.

Index investors either knowingly or, more likely, unknowingly, have accepted credit risk below investment grade for their assets. They are not being compensated for that risk as they would with high-yield bonds. ■

# Interest rates

*Continued from page 13*

crease in interest rates.

"Thus, on average, when interest rates rise, the stock market is only about half as sensitive as when interest rates fall."

The study shows "the interaction between interest rates and stock prices is not linear across all possible magnitudes of interest rate moves."

"For small and modest rises (up to 10%) in interest rates, there are many quarters in which the stock market not only fails to decline, but actually rises," they say.

For interest rate rises of 5% or less, stock market declines are more rare than stock market rises. For interest rate rises of 5% to 10%, "the stock market declines only half of the time, although the up market returns are limited to very small positive amounts."

The authors attribute the asymmetry to factors not included in their analysis, namely, earnings and risk premium changes.

"When interest rates rise, nominal earnings are more likely to rise than fall," they note.

"The stock market risk premium fell from 1980 to 1988 in tandem with the secular decline in interest rates." A secular movement is long term as opposed to cyclical, short term.

They concluded "a forecast of negative returns for stocks is not necessarily consistent with a rise in interest rates. The data suggest that a 50 basis-point increase in interest rates from current levels will render a stock market rise as likely as a stock market fall." ■

# Lender

*Continued from page 13*

and purchase prices. As in the case of Central States, securities lenders require borrowers to post collateral typically worth slightly more than the market value of the securities on loan. As the securities on loan rise in price, going against the borrowers' position, lenders require the posting of additional collateral.

The Central States fund didn't sustain any losses in the program, Mr. Warner said. "We didn't lose a penny," he said.

"Morgan Stanley said that in this unsettled market, it's not a good time to have securities out on loan."

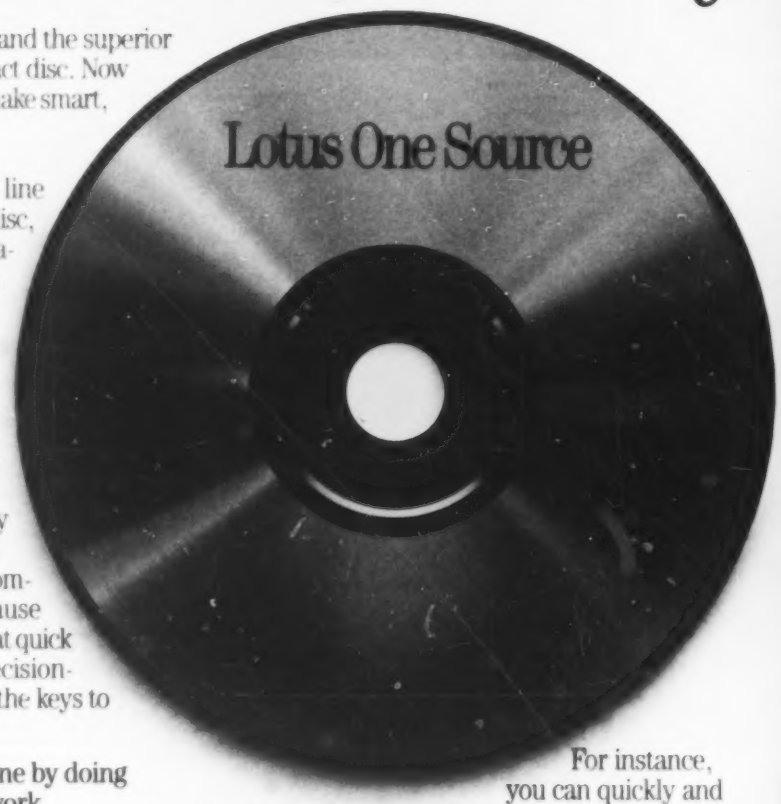
He noted the suspension of the program had nothing to do with Mellon.

Although Mellon is custodian, Mr. Warner said Morgan Stanley could select a third party for the securities lending. "A third party would have to work with Mellon to make the securities lending arrangement," he added.

He said some of the strengths Morgan Stanley is considering in an agent for the program are: the aggressiveness of its lending; the number and quality of the brokers in the program; the demand among securities borrowers; and the adequacy and control of collateral.

Mr. Warner was unable to say when Morgan Stanley would make a decision on selecting the agent. ■

# How the same improves the sound of the soundness of yo

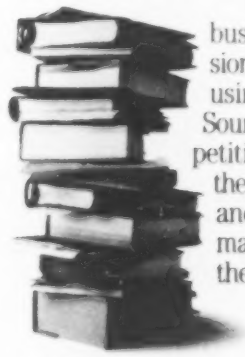


Music lovers have come to demand the superior quality of recorded music on compact disc. Now this same technology can help you make smart, fast business decisions.

How? With Lotus One Source.®

The Lotus One Source product line uses CD ROM technology (compact disc, read-only memory) and powerful analytical software to deliver a collection of business and financial databases directly to your PC for analysis.

And you can get immediate access to all that information from within your 1-2-3® spreadsheet.



*Each Lotus One Source disc contains thousands of pages of information from the most respected business and financial information sources.*

In fact, many business professionals are already using Lotus One Source to gain a competitive edge. Because they recognize that quick and informed decision-making is one of the keys to their success.

**Get more done by doing less work.**

It's estimated that the average financial manager spends 70% of the time gathering data and getting it into the PC. Which leaves precious little time to analyze it, much less to act on it.

Lotus One Source changes all that. Because the databases and software are fully integrated, giving you a flexible, powerful analytical environment. This includes menu-driven screening and a broad range of reports and graphics.

For instance, you can quickly and easily pull up last year's income statement on a company. Then with a few keystrokes, bring the data into 1-2-3 for analysis.

And, to complete your research, pull up all the recent magazine articles or security analysts' reports written about the company.

So whether you're challenged with preparing an industry or competitive report overnight, in-depth investment research, or M&A analysis, Lotus One Source gives you the information you need, right when you need it.

## Foreign clients a boon to some

Several of the firms responding to this year's real estate investment manager survey reported a significant portion of their overall business came from overseas investors.

Of the 106 firms surveyed, 38 said they had a total of $14.196 billion in assets from foreign clients. Foreign business represented about 4.6% of the $311.159 billion in total real estate assets under management.

Of the $14.196 billion in foreign business, $4.612 billion came from Japanese clients, while $8.707 billion was from non-U.S. pension funds.

For some advisers foreign business can represent a substantial part of the firm's overall business. New York-based Corporate Property Investors had total assets of $3.679 billion as of June 30, of which about $1.4 billion, or 38%, was from offshore investors.

Richard Ellis Inc., New York, with $5.067 billion in total real estate assets under management as of June 30, was among the leading U.S. advisers in terms of business from overseas clients.

As of June 30, Richard Ellis had $2.686 billion in "advisory relationships" with foreign clients. Of that total, $920 million was from two Japanese institutional clients and $1.766 billion came from non-U.S. pension funds.

David R. Hodes, senior vice president at Richard Ellis, said there were two reasons for the firm's success with foreign clients.

"In the case of our European clients, our origins as an offshoot of a British-based company may have created some name recognition," he said. And, he added, the firm has diligently marketed its services to potential clients in Japan and Europe.

Equitable Real Estate Investment Management Inc., Atlanta, with $33.705 billion in total real estate assets, had $1.282 billion in foreign business relationships as of June 30. Japanese clients account for all of the foreign business except for $50 million, which came from European and Middle Eastern investors.

Of the Japanese assets, $256 million was from Equitable Pacific Partners, a pooled fund for Japanese institutional and corporate investors; the balance was assets invested by Japanese institutions in various joint ventures with Equit-

# Firms' assets climb 22%

## Advisers stick to strategy

By Chuck Paustian

Tax-exempt assets run by the leading real estate investment management firms grew 21.9% during the year ended June 30, lagging the previous year's increase of 27%.

Tax-exempt institutional investors, however, barely altered their investment styles from a year ago.

A survey of 106 real estate investment firms showed total tax-exempt assets climbed to $94.579 billion as of June 30. The previous year's survey of 100 firms revealed $77.613 billion in total tax-exempt real estate assets under management.

For both years, the increase in assets was primarily the result of pension funds — especially public retirement systems — continuing to develop their real estate allocation programs. Many funds have either set or increased their target allocations for real estate investments, usually ranging from 5% to 20% of total assets.

"There's a certain lag time involved in the decision to diversify or in getting the legislative authority to diversify into real estate and other alternative asset classes," and actually investing the earmarked assets, said Robert L. Gernstetter, senior consultant with the Stratford Advisory Group, Chicago.

Among tax-exempt portfolios, real estate equity was clearly the preferred means of investing. Tax-exempt real estate equity assets rose 27.1% to $72.546 billion as of June 30 from $57.087 billion the previous year.

Tax-exempt hybrid debt assets increased 10.3% to $15.277 billion as of June 30, from $13.845 billion a year earlier; tax-exempt mortgage assets climbed 1.7% to $6.586 billion from $6.479 billion.

The interest rate environment during the past year has not favored hybrid debt financing, said Ronald A. Karp, president of Ronald A. Karp Associates Inc., Summit, N.J.

"Rates have been at a level that favors conventional financing — namely straight debt," he said. "If developers can get straight debt financing, why give away 50% of the equity," he said.

Tax-exempt investors, for the most part, have never been major mortgage lenders.

Total real estate assets managed by the 106 firms in this year's survey grew 17.3% to $311.159 billion as of June 30; the 100 firms in the previous year's survey reported total assets of $265.332 billion the previous year. The assets as of June 30 includes $155.763 billion in equity real estate, $19.223 billion in hybrid debt and $136.003 billion in mortgages.

This year's survey also showed investment managers will be searching the country for properties to buy, but the firms' investment strategies — and those of their institutional clients — remain relatively unchanged from the previous year.

- Of the 50 largest real estate managers, 27 will be focusing on acquisitions; all the firms in the survey have almost $14 billion to invest.
- Tax-exempt investors continue to invest the bulk of their assets through commingled funds rather than through separate accounts.
- The property mix of the tax-exempt portfolios and the amount of money invested in development deals, rather than in existing properties, showed little, if any, change from the previous year.

Most of the 50 largest real estate managers will be concentrating on acquiring new properties for their tax-exempt institutional clients. In the previous year's survey, less than half of the top 50 firms said acquisitions would be their primary focus.

"The decision to place a lot of emphasis on the deal side (of the business) is a function of the amount of capital the manager has to invest," Mr. Gernstetter said.

Mr. Karp said the managers may be feeling some pressure to get the assets invested in the market. "The manager knows if he gets (the money) invested, he has a revenue stream for some time. If he doesn't get it invested, anything could change."

He said a pension fund's actuarial needs could be altered, the client might opt for a more aggressive manager or an investor could simply choose another asset class. "If you look at the last five years, real estate has underperformed stocks and bonds," he added.

Other managers will focus on improving the portfolios already acquired. Fifteen advisers of the top 50 said their primary emphasis will be on rehabilitation and/or asset management of existing properties.

In fact, the 106 firms responding to this year's survey reported they expect to spend $1.52 billion on rehabilitation, renovation, expansion or modernization of existing properties during 1988.

Tax-exempt institutions appear to be in a holding pattern regarding the means through which they implement their real estate investment programs.

Of the $94.342 billion in tax-exempt assets that were broken out between commingled funds and separate accounts, $52.135 million, or 55.3%, was in pooled funds, while $42.207 billion, or 44.7%, was in separate accounts.

Of the total $77.6 billion of tax-exempt assets in the previous year's survey 54.6%, was in commingled funds, while 45.4%, was in direct accounts.

The property mix of the managers' tax-exempt portfolios also showed little change.

Managers responding to this year's survey reported 37% of their tax-exempt assets in office properties; 21% in retail; 19% industrial; 9% multifamily housing; 2% hotels or resorts; and 12% other, which includes land and mixed-use investments.

According to last year's survey, the tax-exempt property mix was 39% office; 20% retail; 18% industrial; 9% multifamily housing; 2% hotels or resorts; 3% land; 2% mixed-use; and 7% other.

In addition, although the actual dollar amount invested by tax-exempt investors in development projects increased, the percentage of total tax-exempt assets invested in such deals, 11%, remained unchanged.

Paul Saint-Pierre, managing director of Pension Realty Advisors, San Francisco, said the differences between the findings of this year's survey and those of a year ago, though small, are indicative of the changing nature of tax-exempt institutional investors.

"If one category changes one percentage point of two percentage points, that's a lot," he said. "There has to be a fair amount of money pouring into that sector for that to change."

As for the percentage of assets invested in commingled funds vs. separate accounts, he said several managers have introduced specialized pooled funds. "That's really placating investor interest," he said.

For example, "if there is an industrial commingled fund, then an investor doesn't have to hire a (separate account) manager to do it."

There were changes, however, among the top 10 rankings of real estate investment managers for all categories surveyed.

Among the largest real estate managers of tax-exempt assets, Copley Real Estate Advisors, Boston, and JMB Institutional Realty Corp., Chicago, vaulted ahead of other managers, primarily because of their participation in the $6.7 billion acquisition of Cadillac Fairview Corp. by Chicago-based JMB Realty Corp., an affiliate of JMB Institutional.

Copley finished first after being ranked fifth in last year's survey, while JMB Institutional placed third, up from ninth.

### Aetna Life and Casualty Co.

151 Farmington Ave., Hartford, Conn. 06156; (203) 636-6254

| | |
|---|---|
| Tax-exempt real estate assets | $4.689 million |
| Equity | $3.505 million |
| Hybrid debt | $1.130 million |
| Mortgages | $54 million |
| Commingled or pooled funds | |
| Equity | $2.806 million |
| Hybrid debt | $1.112 million |
| Direct, separate accounts | |
| Equity | $699 million |
| Hybrid debt | $18 million |
| Mortgages | $54 million |
| Total real estate assets | $26.823 million |
| Equity | $4.857 million |
| Hybrid debt | $1.130 million |
| Mortgages | $20.836 million |

As of June 30, the tax-exempt equity assets of Aetna Life and Casualty Co. had a market value of $2.47 billion. Contributions received but not invested were $207 million; contributions committed but not received were $828 million.

The hybrid debt holdings had a market value of $960 million. Contributions received but not invested were $170 million. The market value of the mortgages was $36 million. Contributions received but not invested were $1 million, contributions committed but not received were $17 million.

Of tax-exempt general account assets, $15.588 billion was in mortgages.

For tax-exempt assets, the mix by property type was 3.7% hotel/resort; 22.8% industrial; 18.5% multifamily housing; 38% office/commercial; 15.6% retail; 1.4% single family.

The total tax-exempt property portfolio is located 41.6% in the West; 13.8% Midwest; 21.6% East; 23% South.

Aetna expects to be a net buyer in the East, West and Midwest regions and a net seller in the South region.

The firm expects to be a net buyer of retail, industrial, apartments and single-family properties and a net seller of offices.

Aetna expects to spend $250 million on rehabilitation, renovation, expansion or modernization of existing properties in 1988.

The main area of concentration during the year will be rehabilitation and asset management of existing properties.

Aetna offers open-end and closed-end commingled funds, including closed-end specialty accounts, open-end participating mortgage accounts, single property and individual separate accounts.

The Real Estate Separate Account, an open-end fund has invested $1.622 billion and received but not invested $179.3 million for 270 participants. The fund makes equity investments through forward commitments or by acquiring new, substantially leased properties. The account is diversified by property type and region.

The Participating Mortgage Separate Account, an open-end fund, has invested $898.7 million and received but not yet invested $127.2 million from 287 participants. The fund makes participating mortgage investments in existing, well-leased properties or to-be-built properties through forward commitments. The fund focuses on retail, industrial and apartments in the Northeast and West.

The Union Separate Account, an open-end fund, has invested $43 million; contributions received, not invested are $43 million. The fund uses participating mortgages to invest in newer, institutional-quality properties that are union built.

The Closed End Real Estate Separate Account I has invested $166.5 million; $3.5 million is not yet invested.

CERESA II has invested $102.8 million; $1.7 million is received but not yet invested.

Apartment Development Fund I, a closed-end fund, has invested $219.4 million; $10.3 million is received but not invested; $170.3 million is committed but not received. The fund makes equity investments in to-be-built apartments.

Aetna Institutional Investors I Limited Partnership, a closed-end fund, has invested $19.2 million; $400,000 is received but not invested; $80.4 million is committed but not received. The joint venture partnership fund will invest in apartment complexes, retail centers and industrial buildings in the Northeast, Midwest, West and Northwest.

Retail Development Fund, a closed-end fund, is open for subscription. The fund will make equity investments in retail properties with emphasis on the Northeast, Midwest and West.

A subsidiary is Aetna Realty Investors Inc.

William M. Russell, senior vice president-equity and Blake W. Irons, senior vice president-mortgage financing, are in charge of making property investments. John E. Arant, vice president-financial services, employee benefits division, is client contact.

LANDAUER
ASSOCIATES, INC.
New York Atlanta Chicago Houston Los Angeles Santa Ana West Palm Beach

IT'S
A SMALL
WORLD.
ISN'T IT?

Conventional wisdom says it's a small world, a global village.

Problem is that the global village is composed of real estate.

And real estate is no small matter.

Some is appreciating. Some not a good investment at all.

Some zoned one way. Some zoned another.

Some a steal. And some drop-dead expensive.

Some easy to live with. Or on. And some very complex to manage.

To get the complexities of real estate down to a manageable size, it helps to deal with an expert who has a whole world of experience, a consultant whose grasp of detail can keep the big picture in focus and the sea of detail out of your way.

And where on earth do you find such a consultant?

At the nearest office of L. J. Hooker International.

With offices throughout the United States (not to mention Australia and Europe), L. J. Hooker International's number is probably listed in your own local phone book.

Small world, isn't it.

L J Hooker

For tax-exempt assets, the mix by property type was 40.7% industrial; 4.4% office/commercial; 44.7% retail; 10.2% apartments.

The total tax-exempt property portfolio is located 82.3% in the West and 17.7% South.

Wells Fargo expects to be a net buyer in the West, East and Midwest regions and a net seller in the South.

The firm expects to be a net buyer of retail, industrial and apartments.

The main area of concentration for the year will be acquisitions.

Wells Fargo offers open-end commingled funds and separate accounts.

The Wells Fargo Real Estate Equity Fund has $202 million in assets from 150 participants. The fund emphasizes development-oriented real estate transactions where existing properties might be upgraded, expanded or renovated. Transactions are typically structured as either joint development ventures or developmental participating mortgages.

Investment clients include Ohio Public Employees, GM and Old Kent Bank.

The parent company is Wells Fargo & Co. Wells Fargo Realty Finance is a subsidiary.

Doug Hayek, director of acquisitions, is in charge of making property investments. J. Michael Johnson, director of marketing, is client contact.

# Assets climb

*Continued from page P13*

While acknowledging the boost from the Cadillac Fairview deal, John S. Lillard, president of JMB Institutional, said the firms also were successful in other endeavors. "For example, we have put together a $200 million apartment limited partnership," he noted.

Aldrich, Eastman & Waltch Inc., Boston, and Richard Ellis Inc., New York, broke into the top 10 this year. AEW placed eighth, up from last year's 12th place ranking, while Richard Ellis moved up to 10th from 18th.

F.I.A. Associates, Sacramento, Calif., and Corporate Property Investors, New York, both fell out of the top 10.

The rest of the top 10 tax-exempt real estate managers, and this year's ranking, were Equitable Real Estate Investment Management Inc., New York, second; The Prudential Realty Group, Newark, N.J., fourth; Heitman Advisory Corp., Chicago, fifth; Aetna Life & Casualty, Hartford, Conn., sixth; RREEF, San Francisco, seventh; and The Boston Co. Real Estate Counsel Inc., Boston, ninth.

The Cadillac Fairview deal also boosted the rankings of Copley and JMB among the 10 largest tax-exempt equity real estate managers. Copley, which finished fourth last year, was ranked first, while JMB, eighth last year, finished third.

Richard Ellis also was new to the top 10 equity real estate managers, finishing ninth. New York-based Eastdil Realty Inc., whose tax-exempt equity real estate assets fell almost 75% to $394 million, dropped out of the top 10.

Martha Wallau, a vice president at Eastdil, said assets declined because, in part, the firm lost an approximately $650 million account with the California State Teachers' Retirement System, Sacramento.

"We had been their sole real estate adviser for the first three years," of their real estate program development, she said. The fund recently switched to a multiple-adviser approach.

The rest of the decrease in assets was from "opportunistic" selling of properties in various accounts, Ms. Wallau added.

The rest of the top 10 tax-exempt equity real estate firms, and their rankings, were Equitable Real Estate, second; Heitman, fourth; Prudential Realty, fifth; Aetna, sixth; RREEF, seventh; LaSalle Advisors Ltd., Chicago, eighth; and Corporate Property Investors, 10th.

Among the top 10 managers of tax-exempt hybrid debt assets, AEW leaped to the top spot from its third place ranking last year. "That's an area we first pioneered back when the firm was founded in 1981," said Kristen Fuller, marketing manager.

Hybrid debt is "something we found beneficial to our clients in the past and we continue to do it. It has been a good year for us all around," she added.

TCW Realty Advisors, Los Angeles, finished in the 10th spot, pushing Houston-based L.J. Melody & Co. to 11th.

McMorgan & Co., San Francisco, and Latimer & Buck Inc., Philadelphia, again finished first and second, respectively, among the top 10 managers of tax-exempt mortgage assets.

Two firms new to this year's survey were ranked among the top 10 firms. First Interstate Mortgage Co. of Illinois, Chicago, finished third, while ASB Capital Management Inc., Washington, was ranked eighth. Citicorp Real Estate Investment & Management, New York, also cracked the top 10, finishing ninth. ■

# Foreign clients

*Continued from page P13*

able Life Assurance Society of the United States, Equitable Real Estate's parent company.

"We were the first, back in 1981, to enter into a joint venture with a Japanese institutional client and we now have nine joint ventures with Japanese investors," said Jonathan Miller, a vice president in Equitable Real Estate's New York office.

Equitable's Japanese clients include Nippon Life Insurance, Osaka; and Dai-ichi Mutual Life, Asahi Life Insurance and Meiji Life Insurance, all of Tokyo.

"Our business is investing capital for clients in U.S. real estate. Offshore sources (of capital) are a very important part of our business," Mr. Miller said.

"We are seeking a diversification in our source of funds," added Suzanne V. Franks, also a vice president in Equitable Real Estate's New York office.

Prudential Realty Group, Newark, N.J., reported a current market value of $1.8 billion in overseas business relationships. Of that amount, $1.3 billion was from Japanese investors.

In addition, Armand Pacher, vice president-international marketing and product development for Prudential Realty, said the completion value of various projects involving offshore partners should total $2.6 billion, of which $1.1 billion represents foreign interests.

"While most of our foreign investors are represented by Japan and Europe, we have had increasing interest from other parts of the world, including other parts of Asia," Mr. Pacher said.

Other firms with substantial foreign business relationships, and the amount they reported, include:

- Schroder Real Estate Associates, New York, with $889 million from non-U.S. clients;
- Landauer Advisors Inc., New York, $639.2 million;
- Heitman Advisory Corp., Chicago, $632 million;
- RREEF, San Francisco, $403 million;
- Chesterton International, New York, $371 million; and
- Eastdil Realty Inc., New York, $325 million. ■

# Companies sold realty holdings, '87 reports show

**By Joanne Friedrick**

Sales of real estate assets paced acquisitions among porations in 1987, a PROPI review of corporate annual reports shows.

Corporations sold almost $50 million in real estate, and acquired about $280 million, according to the review of more than 200 annual reports, of which 50 detailed real estate operations.

Real estate sales were led by **Goodyear Tire & Rubber Co.**, Akron, Ohio, which sold two Arizona agricultural, development and resort hotel subsidiaries. The sale, totaling $220.1 million, was contingent on Goodyear's purchase of $40 million in assets from the Arizona properties.

**Chevron Corp.**, San Francisco, which also was busy in the acquisitions area, added to its revenues through the sale of $53 million in land, $77 million in residential units and another $12 million in agricultural and other real estate.

On a much smaller scale, **Barrett Resources Corp.**, Denver, an oil and gas company, continued on its mission to get out of the real estate acquisitions business in 1987 by selling $43,000 in real estate.

**USX Corp.**, Pittsburgh, which registered its 18th profitable year in the real estate business through its USR Realty Development subsidiary, booked $43 million from sales of realty in Alabama, California, Ohio and Virginia.

About $86 million in properties were marketed by CSX Realty, the subsidiary of **CSX Corp.**, Richmond, Va. It also evaluated 52 major parcels for future sale or development.

And JCP Realty, the real estate arm of **J.C. Penney Inc.**, Dallas, had gains of $9 million from the sales of shopping center interests; it has interests in 80 projects, about 30 of which were in the development stage in 1987.

Among the acquisitions listed in the annual reports were:

- **American General Corp.**, Houston, through its Mortgage/Real Estate Cos. subsidiary, owns 75% of American Newland Associates, which purchased the land development business of Genstar Land-U.S.A. and its joint-venture interests for $200 million.

American Newland has six master-planned residential community projects under way.

- **Chevron**, which has two real estate subsidiaries — Chevron Land & Development Co. and Huntington Beach Co. — acquired the remaining 34% interest in Huntington Beach during 1987 for $80 million.
- **Xerox Corp.** purchased a 25% interest in VMS Realty Partners, Chicago. Stamford, Conn.-based Xerox, through its Xerox Credit Corp. unit, invested $80 million in VMS and provided it $120 million in loans. VMS manages more than $6 billion in real estate.

Companies nationwide also continued or started major real estate projects during 1987:

- **Chubb Corp.**, Warren, N.J., changed its focus to institutional and international investors for its real estate products, including office projects in New Haven, Conn.; Monmouth County, N.J.; and Bucks County, Pa.; a 154-unit high-rise oceanfront residential development in Florida; and an 80-unit inland townhouse project.
- **United Water Resources**, Harrington Park, N.J., a newcomer to the real estate development business, had two joint ventures in the works in 1987. Lake Forest Park, in Emerson, N.J., will be a combined business and residential development. Faircliff Plaza, Fairview, N.J., will be an eight-story, 200-unit condo. ■

# Captive funds

*Continued from page 1*

1988, is the largest captive domicile in the United States.

According to the 1988 Captive Insurance Company Directory, published by Tillinghast, Stamford, Conn., captives have roughly $14 billion in investible money. Officials at Tillinghast, an insurance industry consultant, emphasized this is an estimate, because of the difficulty in getting data from captives.

Most of that money goes to external managers. Investment managers interviewed said a few captives might have their assets managed by the treasury department of their parent company.

Captives' offshore history means international managers, or U.S. managers with international ties, hold the bulk of the captives' asset management business. "That's a historical accident," said Keith Brown, chairman of WorldInvest Ltd., London, which runs about $500 million for captives.

Most captives also have tended to invest in Eurodollar-denominated bonds to make their offshore status clear to U.S. tax and regulatory authorities, but have avoided bonds in other currencies because their liabilities often are denominated in U.S. dollars.

Captives also often have sought to match the duration of their assets to that of their liabilities, as a pension fund would with an immunized bond portfolio. The result of this has been heavy investment in intermediate-term Eurodollar bonds.

Now, with tax advantages for offshore captives fading and more captives being set up in the United States, captive insurers feel freer to invest in U.S. Treasury securities, although Eurodollar bonds still are the most popular investment, managers said.

(Although captives never were prohibited from investing in Treasuries, to do so would have invited regulatory scrutiny, the managers noted.)

Also, as captives have grown, they have moved to a less conservative investment posture than the currency-matched, duration-matched one. This has meant investment in foreign currency-denominated bonds, usually with the currency hedged; purchase of longer-maturity bonds in all currencies; and even a few small investments in common stocks, both in the United States and abroad. An exact asset breakout wasn't available from most managers.

"With a nascent captive, we are very careful to make sure their assets and liabilities match as closely as possible," said Peter Flynn, North American representative for N.M. Rothschild Asset Management Ltd., London, which runs $1.7 billion for captives. A mature captive can go farther out on the yield curve and take a longer-term investment view, he said.

Also, as they learn more about different types of investments, executives of the insurance companies have become more comfortable with portfolios diversified beyond intermediate Eurodollar bonds, said Jeremy Lodwick, vice president of Morgan Grenfell Investment Services Ltd., London, which runs $1.3 billion for captives.

Mr. Flynn said captives need to be free to concentrate on their insurance business and not be bothered about the investment business. "We're very aware that the investment side should run smoothly," he said.

Managers who are more accustomed to doing business for pension funds need to be sensitive to the captives' different accounting and reporting requirements, added Felicity Hammond, vice president in J.P. Morgan Investment Management Inc.'s London office, which runs $2.3 billion for offshore captives. Another $300 million for U.S. captives is managed in J.P. Morgan's New York office.

Opinion is divided as to whether captives provide a growth area for money management.

"People have recognized you can make losses as well as profits from insurance," Mr. Brown said, pointing out this has dampened corporations' enthusiasm for setting up captives.

Still, captive's function as a self-insurer for their parent corporations is legitimate, said Dick Carpenter, a managing director of Chase Investors Management Corp., New York. An affiliate, Chase International Investment Group, London, manages about $1 billion for captives. ■

**Equity ■ Balanced ■ Fixed Portfolios**

Every time we insure a municipal bond, we make a promise.

A promise that no investor will ever lose a penny of principal or interest should an FGIC-insured municipal bond ever default.

We can do this because we have one of the strongest capital bases in the industry.

Backed by over $400,000,000 in cash.

We are committed to maintaining a strong balance sheet and a conservative risk-to-capital ratio.

And our financial resources are solely dedicated to supporting our financial guaranty business.

That's why every bond insured by FGIC is rated Aaa/AAA by Moody's and Standard and Poor's, respectively.

All this makes it possible for us to keep our promise.

Forever.

FGIC SM

**There is no stronger promise made than one that has to live beyond your time.**

# LBO funds' returns shine

## Go as high as 163%

By Marlene Givant Star
and Marcia Parker

Eight leveraged buy-out funds selected by a new Common Fund-sponsored program for colleges and universities boast gross annual returns ranging from 26% to 163% for periods of from seven to 19 years.

Together, those eight funds are in the process of raising more than $3 billion for leveraged buy-outs, with a small chunk coming from the schools. The bulk of the money is coming from leading institutional investors and some individuals. Most of the money will be earmarked for equity investments, with some allocated to debt investments with equity participation.

Individual investors in one of the eight funds chosen by The Common Fund, McCown de Leeuw & Co., San Francisco, include the chief executives of Wells Fargo Bank, Chevron Corp., Sutter Hill Ventures and Greylock Mountain Industries.

The Common Fund and several other leading educational institutions have set up a limited partnership called Endowment Partners 1 that is targeted to raise about $125 million from colleges, universities and independent schools for leveraged buy-outs (*See related story on this page*). The eight funds selected represent a mix of large, well-known players like Merrill Lynch Capital Partners, New York, the second largest participant in the leveraged buy-out business after Kohlberg Kravis Roberts & Co., New York, and specialists such as San Francisco-based McCown de Leeuw, which will focus on middle-market acquisitions.

Through The Common Fund's selection of these funds, a good deal of hard-to-get information on returns, management fees, profit splits and investors was made available. All of the information on the funds came from material supplied to The Common Fund.

Comparing the funds, it is clear each structures management fees differently. Profit splits are more standard at 80-20. Looking at the funds as a group, an ever growing number of institutions are investing in the funds, from corporate pension funds to public pension funds to insurance companies.

Merrill Lynch raised $13.8 billion for 18 transactions between 1981 and 1987. Its Capital Appreciation Fund I, which raised $400 million in 1985 and earned an annualized gross return of about 84% per year, is fully invested.

The New York investment bank is raising total commitments of $2.2 billion for Fund II and will invest $300 million of its own capital. The Common Fund invested $10 million from its equity fund for Merrill Lynch's Fund II and arranged to hold open another $25 million for possible investment by Endowment Partners.

Besides The Common Fund, the pension funds of Boeing Co., Eastman Kodak Co., the State of Wisconsin and Aetna Life & Casualty Co.; Equitable Life Assurance Society of the United States; Metropolitan Life Insurance Co.; Fuji Bank; Bank of America; Wells Fargo; Northwest Mutual Life Insurance Co.; and Bankers Trust Co. are among the other investors.

The annual management fee is 1.5% of capital commitments until the fund is fully invested, then 0.75%. Investors and Merrill split profits including investment banking fees paid to the fund 80-20, with investors receiving a 12% preferred return.

Clayton & Dubilier, New York, is, after KKR, the largest private equity manager not affiliated with an investment bank. It has made $5.2 billion in acquisitions to date, emphasizing operational issues as opposed to financial restructuring. The firm will invest in private companies or divisions of companies with a

## Schools seek cut of profits

By Marlene Givant Star

FAIRFIELD, Conn. — Hoping to give colleges and universities the chance to reap the high return rewards associated with leveraged buy-outs, The Common Fund and several large colleges have formed a limited partnership to pool their resources and invest in the wave of buy-outs reshaping corporate America.

If this approach catches on among endowments, it could unleash a flood of new capital to leveraged buy-outs. With assets of $55 billion, endowments are a large, untapped source of capital for private investments, according to buy-out specialists and George Keane, president of

Gerald Holly©/Vanderbilt University

**Vanderbilt University — where these students attend law school — is one of several universities believed to be interested in The Common Fund's leveraged buy-out venture. They hope to reap big returns from their investments.**

# Lease deals crossing more borders

By Marcia Parker

The hottest deals in the leasing market today are cross-border, tax-based leveraged leasing transactions, which bring together companies in one country that are trying to finance an asset with investors in other, high-tax-rate countries who can use the tax benefits associated with that asset.

Cross-border lease financing, sometimes called double-dip leasing, really took off in the early 1980s.

**Financing**

Interest has been growing steadily ever since, although the number of these very complex transactions is still relatively small.

"You have a pool of equipment in search of a pool of taxable investors," explained Robert Imershein, vice president at Bankers Trust Co., New York, an active player in cross-border transactions. "You look for high tax jurisdictions in the world and then you marry them."

Tracking the development of this segment of the leasing industry is tough. Lessees and lessors and their advisers are highly secretive about the deals they do, how they are structured, which countries are involved and who supplies the financing.

In some countries — including the United Kingdom, United States, Australia and, recently, Hong Kong — tax authorities have pulled the rug out from under these transactions, making them unattractive or impossible. And some governments — including Japan — are moving to reform tax laws and make cross-border leasing deals harder and less lucrative.

To date, airlines have been doing most of the deals, lining up financing in two key markets, Japan and France. Airlines that have done cross-border deals include World Airways, United Airlines, American Airlines, AirFrance, Airbus, Pan American Air-

LATE NEWS

## British firm extending its reach

LONDON — Tyndall Holdings PLC of London, with $2 billion under management, is rumored to be considering a $170 million bid for G.T. Capital Management PLC, London.

G.T. Capital has nearly $6 billion in assets under management. Its U.S. subsidiary, G.T. Capital Management Inc., San Francisco, managed $900 million in assets March 31.

Jim Mellon, group marketing manager for Tyndall, declined to comment on the rumor, which has been published in the Times of London. Anthony Dick, director of G.T., said, "No talks are taking place."

Last week, Tyndall acquired Newport Pacific Management Corp., San Francisco, for about $2.2 million in cash and securities. The acquired firm, which runs $85 million, will be renamed Tyndall-Newport Management.

In late July, Tyndall bought a 25% interest in Horgan Tattersall Investment Counsel Ltd., a Toronto-based money manager with $50 million in assets under management.

## AMR executive accepts new job

DALLAS — M.E. Devine, former director of banking and investments at American Airlines Inc. and vice president of short-term investments at AMR Investment Services, has left to become treasurer and chief financial officer at Evergreen Media Corp., Dallas.

Mr. Devine, who spent 13 years at American, will oversee all corporate finance activities, banking relations, cash management and borrowing at the Dallas-based media holding company.

William F. Quinn, president of AMR Investment Services, said Mike Fields, who served as primary short-term portfolio manager under Mr. Devine, will assume his former boss' responsibilities.

## Steel plans assumed by PBGC

WASHINGTON — The Pension Benefit Guaranty Corp. formally has become trustee of three Kaiser Steel Corp. pension plans covering more than 7,000 participants.

The plans were taken over through a distress termination by the PBGC in February 1987 when Kaiser, of Colorado Springs, Colo., filed for reorganization under federal bankruptcy laws. Together the plans have assets of about $30 million, and an unfunded liability of more than $200 million.

In February 1987, the PBGC became trustee of a fourth plan that was underfunded by $27 million when the plan didn't have any assets to pay retirees.

In a related but unusual step, the PBGC has given the company a $4 million line of credit to fund its litigation against former Kaiser top executives, a PBGC official said. Proceeds from the litigation, if successful, will be the company's biggest assets, and the loan is more than adequately secured, said the official.

## Funds add to manager rosters

• HONOLULU — The $12 million retirement plan of Kuakini Health Systems Inc. hired Harris Bretall Sullivan & Smith Inc., San Francisco, to manage $5 million in an equity and cash equivalent approach, according to Raymond Abe, vice president.

Mr. Abe said the account was formerly handled by Thompson/Rubinstein Investment Management Inc., Portland, Ore., but was changed on the advice of the fund's consultant, Bateman, Eichler, Hill Richards Consulting Group, Honolulu.

• LINTHICUM HEIGHTS, Md. — The $600 million Masters, Mates & Pilots Pension Fund has hired Nikko & Associates Inc. to run a $10 million global balanced account, said John Sokolowski, administrator. Assets came from other managers.

• FORT WORTH, Texas — The $400 million Employees' Retirement Fund of the City of Fort Worth has allocated $50 million to new investments in real estate and fixed income.

Pacific Financial Management Co., Newport Beach, Calif., will manage $40 million in a bond portfolio, said George Nicolaides, the retirement fund administrator. The assets had been run in a fixed-income account by Hibernia National Bank, New Orleans.

The fund also transferred a $10 million real estate investment to TCW Realty Advisors, Los Angeles, from Aetna Life & Casualty Co., Hartford, Conn. Mr. Nicolaides declined to give reasons for the terminations.

• PHILADELPHIA — The $190 million Philadelphia Gas Works Retirement Reserve fund has hired Nikko & Associates Inc., New York, to run a $5 million international equity portfolio, said Albert Childs, deputy director of finance.

The move was part of a restructuring started in April 1987.

## Candidates address USA group

WASHINGTON — Vice President George Bush, the Republican presidential candidate, said he would support legislation to promote shareholder rights if elected.

Massachusetts Gov. Michael Dukakis, the Democratic nominee, did not respond directly to the questions put to him by the

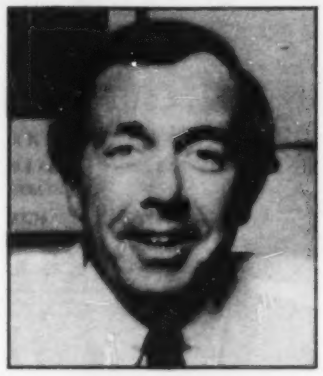
# Ramseyer exits; PRA shuts down

By Chuck Paustian

CHICAGO — William L. Ramseyer has decided to end his consulting career and join Chicago-based JMB Institutional Realty Corp. as an executive vice president.

By doing so, he closes the book on Pension Realty Advisors Inc., the San Francisco firm he founded in 1982.



William Ramseyer has decided to leave the consulting business to join JMB.

JMB also has agreed to purchase a "controlling" interest in PRA Securities Advisors L.P., a real estate securities research and investment firm, said John S. Lillard, president of JMB Institutional. Mr. Ramseyer, who was president of Pension Realty Advisors, will remain a partner of PRA Securities and a member of the firm's investment committee.

The only connection between Pension Realty Advisors and PRA Securities is Mr. Ramseyer's ownership interest in both firms.

Paul S. Saint-Pierre, managing director of Pension Realty Advisors, announced the board of directors voted to discontinue the firm's consulting business as a result of Mr. Ramseyer's departure.

As of Sept. 1, Pension Realty Advisors had eight retainer and three non-retainer institutional clients.

Mr. Saint-Pierre said he and his staff of eight will continue to offer the same consulting and advisory services — including the Closed-End Realty Fund Report, a quarterly publication on institutional real estate investment products — to institutional investors through Spear Street Advisors Inc., a San Francisco firm founded simultaneously with Pension Realty Advisors.

Spear Street Advisors "offers more services than PRA, not less," Mr. Saint-Pierre said. "We offer an entire menu of real estate consulting services, not just pension fund real estate services."

He also said Spear Street Advisors will work on a fee-based, project basis rather than on a retainer basis.

Mr. Ramseyer, who will relocate to the Chicago area from his home in Piedmont, Calif., said he decided to make the switch because he wanted to take a more active role in the formation of real estate portfolio strategies.

"In a sense I'll be doing what I've been doing in the past, only now with the ability to create the product," he said.

"I spent six good, hard years — long years — in that business.

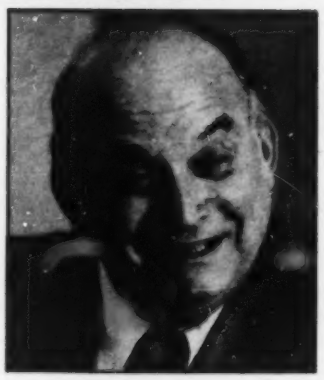
*Continued on page 31*

# Ballard curtails pioneering real estate career

By Andrew Reinbach

NEW YORK — Claude M. Ballard is retiring from Goldman, Sachs & Co. in November, soon after his 59th birthday, to tend his own investments and work part-time for Goldman. He leaves behind a career that helped define today's real estate business.

"My wife has been pushing me for years to retire. She thought she had me when I left Prudential (Insurance Co.) in 1981, but I did an end run when Goldman, Sachs made me an offer, so she's been pushing ever since," he said.



Claude Ballard will reduce his workload at Goldman, Sachs effective this November.

Mr. Ballard will be working on a consulting basis for Goldman — he said he'll keep his office in New York and will put in an average of a week to 10 days per month "wherever I'm needed, anywhere in the world" — lecturing and paying more attention to his independent real estate business.

During the past several years, he and three partners at Goldman — Eugene Mercy Jr., Lewis M. Eisenberg and George E. Doty — assembled a big portfolio of agricultural land and commercial real estate separate from Goldman, and he expects to be more active in that business from now on.

Mr. Ballard will be living in Little Rock, Ark., where he's building a house, to be near the bulk of his holdings, and in Bal Harbour, Fla., where he has owned a house for several years. He also will be keeping his New York apartment.

Mr. Ballard, together with Meyer Melnikoff, created pension fund real estate investment in the 1970s by reifying Prudential's PRISA, the first successful commingled real estate fund.

His arrival at Goldman in 1981 helped transform Wall Street real estate investment banking from service functions of most corporate finance departments into independent, transaction-based profit centers, as well as marking the beginning of Goldman's domination of that business.

"Claude is one of the great gurus of our industry, a man of thought and a man of action," said Don Williams, managing partner of the $14 billion Trammell Crow Co., Dallas, generally regarded as the nation's largest real estate developer. "He was one of the early intellectual leaders, a very strong person with very sound ideas, and he was instrumental in creating modern real estate finance."

This is high praise indeed, coming from the partner of a man who once was one of Mr. Ballard's most bitter adversaries. Trammell Crow and Mr. Ballard squared off over the mid-1970s workout negotiations for the Crow empire,

# Partners file suit to oust Brignoli

By Barry B. Burr

NEW YORK — Duane G. Roberts, John J. Curley and another partner have filed suit in federal court against Richard Brignoli seeking his removal from control of or dissolution of Brignoli, Curley & Roberts Associates.

The action, filed by the three in U.S. District Court in New York, follows the abrupt departures during the past 10 months of Messrs. Roberts, Curley and James Karanfilian, the third partner and plaintiff, from active participation in one of the most successful money management firms in recent years.

In a separate suit, filed in the same court, Mr. Roberts charges breach of contract, claiming he was terminated from employment without cause and not paid compensation, including a percentage of the fees paid by clients, as provided under an agreement. Mr. Roberts, who alone is seeking some $760,000 and costs, led the firm's marketing. He left the firm in March.

A third suit, filed in New York Supreme Court by James M. Mallick of Beverly Hills, Calif., seeks $32,432 plus interest and other costs, claiming default on a loan advanced to Brignoli, Curley & Roberts in 1984.

*Continued on page 30*

# International soars on 1 move

By Curtis Vosti

International money managers received more than $4.5 billion in new business during the third quarter — more than 90% of it from the California Public Employees' Retirement System — making it far and away the most lucrative market for new business during the three-month period.

Domestic equities drew $1.3 billion and fixed income drew just a shade more than $1 billion in new allocations during the third quarter.

Domestic asset allocators — including tactical and strategic asset allocators — and balanced accounts each drew a reported $747 million, and real estate investors placed $288 million.

The figures were drawn from reports of new manager hires listed in *Pensions & Investment Age* during the third quarter. There were other hirings reported but not itemized, such as the $900 million in equity assets to be doled out among seven managers by the State of Alaska Trust Funds. While there most likely were other unpublicized hirings, the tabulation gives insight into the third-quarter movement of vast amounts of institutional money.

The movement toward international investing should continue, according to Ed Baker, director of marketing at BARRA, the Berkley, Calif.-based consulting firm.

Public pension funds — which have been leading the latest push overseas — tend to have to go through lengthy processes before they can commit a sizable sum to a new investment strategy, Mr. Baker said, and the rush to international stocks probably won't abate because of that lengthy process.

Almost $1.5 billion in the third quarter was reported placed in indexed accounts, $1.05 billion of that in an international indexed account placed by the California Employees' fund, managed by State Street Bank and Trust Co., Boston.

Eleven other international managers hired by the California fund received amounts ranging from $100 million to $500 million. First Chicago Investment Advisors, which picked up $100 million from the fund, added $71 million from three other clients during the third quarter, making it one of the most successful managers in drawing new clients for the quarter.

The California allocation also helped some of the quarter's recipients of the most new institutional money — solely because of the size of the fund's accounts.

**Most new assets* 3rd quarter 1988**

| Firm | $ millions |
|---|---|
| State Street Bank | 1,250 |
| Wells Fargo | 660 |
| First Investment | 650 |
| Baring International | 515 |
| Warburg | 500 |
| Fiduciary Trust | 500 |

Warburg Investment Management International and Fiduciary Trust Co. International, both of New York, made the list of top recipients of institutional money with a one-shot $500 million account to each from California. Baring International Investment Ltd., Boston, picked up $500 million from California for a total of $515 million in new money for the quarter. State Street Bank added a $200 million account from the James River Corp. of Virginia, Richmond, to California's $1.05 billion.

Wells Fargo Investment Advisors placed the most new reported and confirmed accounts, with six, and also placed among the managers with the most new assets reported, with $660.4 million (without the benefit of an account from the California fund) reported from four of those new clients. Two new clients confirmed the placement with Wells, but declined to disclose figures.

First Investment Management, Oklahoma City, was tabbed by the Oklahoma Public Employees' Retirement System for a $650

# Wedtech union officials indicted

By Marcia Parker

NEW YORK — A federal grand jury has indicted two officials of Local 875 of the Teamsters union on charges of taking payoffs from officers of Wedtech Corp., the military contractor at the center of a Pentagon scandal, and of fraud and embezzlement involving the Wedtech welfare fund.

The Elmhurst, N.Y., Teamsters local served as the sole and exclusive collective bargaining agent for production workers, drivers, helpers and warehouse employees for Wedtech. The local administered the Louis Hirsch Memorial Welfare Fund, the employee welfare benefit plan for Wedtech production employees.

The grand jury indictment charges two pension fund business officials — Richard Stolfi and Frank Sasalino — with taking more than $100,000 in payoffs from Wedtech officers and employees to keep labor peace and negotiate collective bargaining agreements favorable to Wedtech; concealing thousands of dollars in kickbacks; and embezzling money from the welfare fund.

In August, a federal jury convicted Rep. Mario Biaggi, D-N.Y.; John Mariotta, Wedtech's founder and at various times its president, chief executive officer and chairman of the board; and three others of racketeering in the Wedtech corruption scandal. They were convicted of dispensing millions in bribes to win no-bid government contracts set aside for minority-owned businesses.

The Teamsters indictment charges that named but unindicted co-conspirators Mr. Mariotta; Fred Neuberger, who served at various times as vice president in charge of marketing, president and chief operating officer, chief executive and chairman of the board; and others "illegally diverted funds from Wedtech" and made "illegal payments" to officials and representatives of labor unions, welfare funds and others, including Local 875.

Mr. Stolfi was employed by and associated with Local 875, holding at various times the positions of secretary-treasurer, trustee and administrator. He also was associated with the welfare fund, and participated directly and indirectly in the affairs of both the local and the fund.

Mr. Sasalino also was employed by and associated with Local 875, holding the position of business agent. As a result of that position, he was associated with the welfare fund and participated directly and indirectly in the affairs of it and the local.

According to the indictment, Messrs. Stolfi and Sasalino "would and did extort, receive and obtain money and other things of value from Wedtech for their benefit by agreeing to use their influence and control over Teamsters Local 875 and the Welfare Fund to provide labor peace at Wedtech's manufacturing plants."

In addition, the grand jury alleges the two exercised influence and control over collective bargaining negotiations between Local 875 and Wedtech in such a way as to ensure the agreements entered between them would contain terms favorable to Wedtech.

The indictment also said Mr. Stolfi "would and did obtain money by deceiving and defrauding the members of Teamsters Local 875, the Welfare Fund and the Great American Insurance Co. by filing false and fraudulent insurance claims." The indictment also alleged Mr. Stolfi embezzled money from the welfare fund through the receipt and concealment of kickbacks on purchases of dental equipment and supplies by the welfare fund.

# Diamond Star dazzles

## Leaseback deal is largest this year

By Marcia Parker

NORMAL, Ill. — The $500 million sale-leaseback of a newly opened Midwest auto manufacturing plant operated by Diamond Star Motors is the biggest non-utility leveraged lease of the year.

The sale-leaseback of the central Illinois plant, which will produce 240,000 cars a year when it hits peak production, was completed in June. The plant, which is gearing up to full production, will have its grand opening next month.

Diamond Star is a joint venture of Chrysler Corp. and Japan's Mitsubishi Motors Corp.

Morgan Guaranty Bank and Japan's Mitsubishi Bank served as co-financial advisers to Diamond Star in structuring and sourcing the 25-year lease.

For Diamond Star, the lease financing made sense because it was low-cost financing with myriad tax benefits that will be useful to the investors. Because Diamond Star is a new concern, it will not be able to use the tax benefits for some time, so it made sense to look into a sale-leaseback and pass those benefits to investors.

The financing was structured with an equity portion provided by Mitsubishi and Chrysler entities and two debt tranches with different credit structures.

The largest piece of the debt financing was provided by the Export-Import Bank of Japan, the first time that institution participated in the debt portion of a U.S. leveraged lease.

The debt obligations of Mitsubishi Motors, which isn't yet a household name in the U.S. market, were guaranteed through a letter of credit from Mitsubishi Bank.

The rest of the debt financing was supplied through a private placement with a host of insurance companies led by John Hancock Insurance Co. Other investors include Aetna Life & Casualty Co.

Because this is a joint venture, the lease was carefully structured to ensure that if certain changes occur in ownership positions, the lease financing package will remain in tact.

While the lease was cited by investment bankers as an interesting one, few copycat transactions are expected. The Diamond Star plant became part of the transition property designated by Congress under rules that accompanied the 1986 tax reform law, thus making it eligible for investment credits and accelerated depreciation.

Chrysler and Mitsubishi each hold 50% equity interests in Diamond Star Motors, which was incorporated in October 1985; the partnership between the automakers dates to 1970.

The plant involved in the sale-leaseback is about 2 million square feet and is situated on 636 acres on the west side of Normal. The first automobile to roll off the assembly line is a new front-wheel drive, two-door sports specialty car.

Later, the plant will begin producing a four-door, compact sedan. Half of the cars manufactured at the plant will be sold by Chrysler and half by Mitsubishi Motor Sales of America. ■

**Diamond Star Motors — a joint venture of Chrysler Corp. and Japan's Mitsubishi Motors Corp. — arranged a $500 million sale-leaseback of its auto manufacturing plant near Normal, Ill. The arrangement is the largest non-utility deal so far this year.**

PORTFOLIO MANAGEMENT

# Consultant sees many bears

## Research finds few opportunities

By Barry B. Burr

CHICAGO — Few asset categories currently appear attractive to Stratford Advisory Group Inc., according to the consulting firm that recommends asset allocation the old-fashioned way, based on fundamental research.

Of 28 institutional asset categories, Stratford recommends underweighting 18 (including developmental and leased real estate and foreign equities), overweighting only four (including cash and non-dollar bonds) and weighting neutral the other six (including timberland and both fixed-income and equity index funds).

Stratford's recommendations remain substantially unchanged from those of August 1987. Then the firm was optimistic about small-capitalization stocks, a group that was hit hard two months later in the stock market crash. In November, in a special post-crash report, it recommended clients underweight small-cap stocks, just as, it turned out, they began to recover.

Stratford, which doesn't manage money, issues asset allocation recommendations every six months to about half of its 25 retainer clients, including Knight-Ridder Inc. and Fairchild Industries Inc., whose assets total some $4 billion to $5 billion.

"When there are events like the October crash, then we will re-evaluate things," said David Kudish, president. Accordingly, last November Stratford issued a special allocation report.

The firm's allocation recommendations are based on research of broad economic, political and social trends.

"In the final analysis we apply common sense," said Mr. Kudish. After analyzing data and subjective analysis of trends, he said the group asks, "Does it make sense?"

He contrasts Stratford's analytical decision-making process with active asset allocation techniques, such as the now-popular tactical asset allocation. TAA makes shifts frequently, typically monthly, relying mainly on mechanistic signals, based on the relative performance among asset classes.

Stratford calls its recommendations strategic asset allocation. Decisions are the outgrowth of long-range studies of potentially major socioeconomic issues. Such long-range research often has little immediate investment implication, Mr. Kudish acknowledged. But he said it is invaluable in forcing Stratford to look for potential trends in the investment markets.

"One thing Stratford and David (Kudish) try to do is to get as many inputs as possible" in their evaluation of the markets, said William H. Buckland, who until May was director-business development at Fairchild Industries Inc., Chantilly, Va. As such, he oversaw its treasury department and was a member of its pension committee.

"So they are not regurgitating information already on the Street," added Mr. Buckland, who now is chairman of Metro Credit Corp., McLean, Va. "They are widely read and talk to a number of different people. They have a good sense of history to put the market in perspective."

Mr. Buckland said he appreciates Stratford's "willingness to go out on a limb and give very specific recommendations."

Five of the firm's six professionals contribute to research studies. Stratford now is preparing a study of the Latin American debt problem.

FEATURE

# Retirees and health

## Voluntary plan can be funding answer

By Harvey Kesselman and Bruce Zimmerman

Much has been written about the lack of an appropriate tax-advantaged vehicle for prefunding retiree medical benefits. Options, such as 501(c)(9) trusts, 401(h) accounts and corporate-owned life insurance arrangements, have been suggested and often rejected because of their limited ability to provide a tax-free buildup of assets. A solution is to fund these benefits through a qualified defined benefit pension plan.

This funding can be accomplished by the plan sponsor replacing the current employer-paid medical plan with a voluntary retiree medical plan. The plan would would be funded through contributions made by the employee.

At the same time, the company would increase the benefit under its defined benefit plan to provide the retiree with sufficient money to pay the voluntary premium.

Thus, the benefit would be funded through the defined benefit plan and would begin when an employee retires and has attained a specific age or number of years of service. Additionally, the benefit would be structured to be reduced when the retiree becomes eligible for Medicare, much like a level income option in a pension plan integrates with Social Security.

Because the amount will be coming from a defined benefit plan, it will be taxable to retirees when they receive their monthly benefits.

Thus, the retiree will be contributing after-tax dollars to the medical plan.

Among the advantages of this program are:

- the ability to pre-fund on a tax-deductible basis;
- the tax-free accumulation of investment earnings;
- the use of excess pension assets to help fund and expense retiree medical benefits;
- a possible continuing reduction of expense if investment earnings offset costs, which has been the case historically in pension funding;
- a cap on costs of post-retiree medical benefits;
- flexibility for employees to use the additional benefits as they see fit;
- investment and administration of medical benefit funding through the pension plan; and
- use of the Pension Benefit Guaranty Corp. insurance program to protect these benefits.

The disadvantages are:

- a greater level of vested benefits for employees who leave employment prior to the age at which they otherwise would be entitled to retiree medical benefits;
- a tax to the retiree on the benefit payments used to fund the voluntary medical benefit plan;
- cash needed to pre-fund the benefits;
- use of the extra benefits by employees for other than medical coverage; and
- a possible adverse impact on PBGC premiums and level of liabilities.

These additional benefits would be paid to the employees directly from the defined benefit plan. The plan, accordingly, would have to adhere to requirements of the Employee Retirement Income Security Act and the Omnibus Budge Reconciliation Act — and would be permitted a tax deduction for the contributions to fund the appropriate benefit levels.

Furthermore, all earnings would accumulate on a tax-free basis until actually paid out.

Any surpluses now in the plan would be used to cover the additional liabilities attributable to the newly established benefit. To the extent the surplus, or surplus cushion (essentially 150% of accrued liabilities) is not eliminated, no tax deductible contribution could be made to the plan. After any surplus is used, contributions would become deductible.

The long-term cost of the program would decrease as the fund accumulates investment earnings on a tax-free basis. Also, the sponsor could completely fund effects of future medical trends without having to be concerned with the limits imposed by a 501(c)(9) trust.

Because of previous commitments, employers possibly could establish the voluntary plan for only new employees. Depending on legal precedent, corporations might have to continue to pay all retiree medical benefits under their current arrangements for retirees and current employees, making it unlikely they also could be included in a voluntary scheme.

Many plan sponsors have been seeking a way to use excess assets in their pension funds. Now, a sponsor can take the excess funding out only by terminating the defined benefit plan, subject to being taxed on the reversion at the sponsor's normal corporate tax rates, in addition to paying an excise tax of 10% of the reversion.

By implementing this program, these funds can be used without terminating the plan or facing other adverse tax consequences. Additionally, the excess assets can:

- be used to fund retiree medical benefits;
- continue to accumulate tax-free until needed;
- no longer be used against the sponsor to help finance a hostile takeover;
- continue to be managed and invested in the pension fund; and
- cushion against the risk of future balance sheet liabilities.

The Financial Accounting Standards Board expects to issue an exposure draft by year end requiring liability and expense be shown on an accrual basis for retiree medical benefits. Now, cor-

# Many bears

*Continued from page 14*

Almost two years ago the firm studied the implications of acquired immune deficiency syndrome, specifically noting the potential impact on insurance companies, the health-care system and employment practices.

Such reports, Mr. Kudish noted, don't necessarily produce an immediate call to shift into or out of an asset class. But they raise issues the firm will continue to analyze.

In its latest recommendation, grouped in five categories, Stratford views as:

- Very attractive: no asset classes;
- Attractive: Cash, non-dollar bonds, high-yield large-capitalization stocks and convertibles;
- Neutral: Large-cap growth stocks, equity index funds, bond index funds, intermediate high-quality non-callable bonds, immunized bond portfolios and timberland;
- Unattractive: Contrary value-oriented stocks, small-cap growth stocks, high-tech stocks, European equities, Pacific rim (excluding Japan) equities, venture capital, long-term high-quality non-callable bonds, intermediate-term zero-coupon bonds, existing real estate, farmland, oil royalties and precious metals; and
- Very unattractive: Japanese equities, developmental real estate, leveraged buy-outs, junk bonds, risk arbitrage and long-term zero-coupon bonds.

Explaining some of the recommended allocations, Mr. Kudish said cash, although now rated as "attractive," probably would never appear "very attractive" because of its potentially limited earning power, compared with stocks or bonds, which can return 30% or more in a year.

Stratford ranks non-dollar bonds as attractive because of the firm's pessimism on the trade and budget deficits. Those deficits, he said, mean the Federal Reserve Board "has to try to maintain interest rates at a higher spread than those in Japan, the U.K. or Germany to keep the market attractive to investors."

The firm recommends underweighting small stocks, even though "we think the relative valuation is there," he said. "We're concerned about who's buying — mutual funds, pension funds or individuals."

Although pension funds appear to be buying more small-cap stocks, he said individuals, whether on their own or through mutual funds, aren't and "have pretty much left the market."

Without individuals, he said he didn't think institutional investors, namely pension funds, alone could stem the growing pressure on small-cap prices.

"Because of the thinness (in trading) of the over-the-counter market since the crash, we want to be a little late rather than early" in moving heavily into small-cap stocks, he added. "You have time before you are compelled to buy," about six months to a year.

"I think if the market gets kicked one more time, small caps will get kicked worse," he added. "At that time, we would be interested in buying."

The prospect of 1992, when trade and other economic barriers will fall within the European Community, doesn't make Mr. Kudish sanguine. The situation reminds him of last year's Big Bang in London, when securities market regulation was eased. "Every investment banking firm licked their chops; they couldn't wait to get in," he said. "Within six months many of these guys lost their shirts."

In 1992, he said the new competition will promote economic Darwinism, making it possible many firms will be unable to survive. ■

# Retiree

*Continued from page 14*

porations footnote only their annual cash outlay.

The accrual of the expense and liability and the associated financial statement impact most likely will be determined in a manner similar to FASB 87, the pension accounting rule. This suggests any additional accruing liability incurred through the increasing of benefits under the defined benefit plan would be incurred anyway.

Because the FASB requirements for accruing retiree medical liability will not become effective until 1992, however, by adopting this program now, recognition of these liabilities will occur at a much earlier date. On the flip side, the long-term accrued liability would be lower because of the buildup of earnings through the pension plan. Under FASB 87, as well as the expected rules for accruing liability of retiree medical plans, the largest offset to expense comes from the expected earnings of the assets. The tax-free buildup of the assets will reduce significantly the long-term accrued liability and financial statement impacts for these benefits.

By making the current retiree medical plan voluntary and employee-paid, there no longer would be an expense item for the plan. The accrued medical liability would be shared under the defined benefit plan and could be lower than the currently defined retiree medical plan expense because liabilities could be limited.

Because the benefit would be defined, it would not necessarily need to be the full amount of the medical plan premium. This amount could be less than or equal to what was needed under the retiree medical plan.

The new FASB rule is expected to require the recognition of a liability, most likely the unfunded accrued liability on the balance sheet for retiree medical benefits. The buildup of assets in the defined benefit plan and current surplus assets can reduce significantly the net liability the company must report. ■

# Candidates

*Continued from page 2*
organization.

The candidates' views were contained in written responses to questions posed by the United Shareholders Association, a shareholder rights group founded by Texas oilman T. Boone Pickens.

Mr. Bush said he supports measures to require a shareholder vote on adoption of poison pills and lucrative "golden parachute" management severance contracts.

Mr. Bush also said the payment of "greenmail" by corporate managers to repel offers to shareholders is "particularly worrisome." Mr. Bush's statement is the first of his campaign on the issues of shareholder rights and the market for corporate control.

Legislation to require shareholder approval of poison pills and golden parachutes, institution of a confidential ballot in corporate elections, banning greenmail payments, reforming the corporate proxy system and mandating a one-share/one-vote guarantee for publicly traded stock is gaining support in Congress.

In June, corporate management interests withdrew their support for a tender offer bill on the Senate floor after a strong show of support for a series of shareholder rights amendments. Action on the bill was suspended, but the issues are likely to be addressed again in the next Congress.

Mr. Bush said he is skeptical of assertions by corporate managers that defensive tactics, such as poison pills and greenmail, are needed to maintain long-term development objectives.

Noting a company's stock price is a reflection of publicly available information, he added: "Sometimes it seems that managers use these tactics to save themselves from the competitive pressures of the market for corporate control, not to protect the interests of the shareholders. Greenmail is particularly worrisome — it strikes me that when managers pay greenmail, they might be violating their duties to the stockholders."

At the same time, however, the vice president said he was hesitant to "criticize some of these devices too strongly." He indicated certain defensive tactics might be appropriate where a company's stock price does not reflect still-secret research.

Mr. Bush said he is reluctant to have Congress enact legislation that would overrule the growing role of the states in regulating corporate takeovers.

"There is much to be said for encouraging states to compete to determine which regulations are best for shareholders — and lower the costs for corporations to raise capital," he said.

"Many of these laws are very new. It is not clear yet how they affect hostile tender offers in practice," he said. While they may appear to "unduly burden interstate commerce," Mr. Bush said, "a target company's management must consider other factors. Remember, if managers arbitrarily refuse an offer, they may be breaching a fiduciary duty to shareholders."

He said he would "ask the Securities and Exchange Commission to propose new legislation if these state laws do, in practice, restrict the interstate securities markets."

During the campaign, Mr. Dukakis has said "mergermania" is "tearing companies apart."

He has been an active ally of corporate America, helping companies in his home state fend off unwanted suitors. When Revlon Group made a hostile bid for Boston-based Gillette Co., Mr. Dukakis played a key role in getting the state Legislature to enact an anti-takeover law. When Campeau Corp. pursued Federated Department Stores, a chain that includes a leading Boston store, he asked the Federal Trade Commission to review the acquisition.

Mr. Dukakis also has said corporate takeovers are part of the business of doing business, but corporate managers should understand their jobs do not come with a lifetime guarantee.

Mr. Dukakis has said he supports stronger enforcement of existing anti-trust laws, an increase in the SEC budget, a Senate bill to force raiders to make their efforts more public and that he would like to see a reduction of the 10-day period in which a company can acquire a block of another company's stock without disclosing whether it intends to attempt a takeover.

He said he opposes greenmail and using pension fund surpluses to repay debts incurred in takeover financing. ■

# Partners sue

*Continued from page 2*
Founded in 1984 to market a quantitative equity strategy to pension sponsors, Brignoli, Curley & Roberts' assets under management have grown to some $826 million from 16 tax-exempt clients as of Jan. 1. Among its pension sponsor clients, as of the beginning of the year, are Eastman Kodak Co. and Westinghouse Electric Corp.

None of the three suits makes any allegations concerning client accounts. The same law firm, Reavis & McGrath of New York, is representing the plaintiffs in each of the suits. Arie E. David of New York, who has his own law firm, represents Mr. Brignoli.

Mr. David and Glen Banks, a Reavis & McGrath attorney, confirmed the suits. Both said action is pending in all three.

"The real issue is credibility with clients," said Ann Nichter, attorney and partner in Mr. David's firm. "And Mr. Brignoli has retained credibility with clients."

"I think what you've got is some people (the suing partners) who are a little envious," she added. "Now they're out on a street corner doing nothing."

The three retain their interests as limited partners in Brignoli, Curley & Roberts. According to their suit, Mr. Curley owns 22.38%; Mr. Karanfilian, 9.1%; and Mr. Roberts, 4.55%.

Brignoli & Curley Inc. is the sole general partner of Brignoli, Curley & Roberts and as such manages the firm.

Mr. Brignoli owns 50.1% of Brignoli & Curley and is its president and chief executive officer. Mr. Curley owns 49.9%.

"(Mr.) Brignoli makes the day-to-day business decisions for both BCI and BCR," according to the suit by the three partners.

Brignoli Models Inc. holds 53.97% of Brignoli, Curley & Roberts, according to the suit. Mr. Brignoli is a principal of Brignoli Models, a firm in which the suing partners have no involvement.

Brignoli, Curley & Roberts' revenue last year totaled $1.9 million, according to the suit. That revenue amounts to an average of 23 basis points, based on the firm's latest asset figures.

Mr. Curley, whose title was chief investment officer, oversaw trading for Brignoli, Curley & Roberts, which he left last January. From its founding until last November, Mr. Curley also served as Brignoli & Curley's president and chief executive office; Mr. Brignoli since has assumed both positions. Mr. Karanfilian left Brignoli, Curley & Roberts in December.

The firm follows an investment strategy developed and licensed by Brignoli Models.

According to their suit, the "plaintiffs have instituted this action to redress breaches of fiduciary duty by the corporate general partner, BCI, which have benefited its principal, (Mr.) Brignoli, at the expense of the partnership."

Brignoli

The plaintiffs seek the removal of the corporate general partner, which is controlled by Mr. Brignoli, or, dissolution of Brignoli, Curley & Roberts. In addition, they seek to recover unspecified financial claims and costs.

"Plaintiffs, on behalf of BCR, also seek damages for such breaches of fiduciary duty and an accounting with respect to BCR," the suit continued.

The suit states that "by June 1988, it had come to the attention of plaintiffs that (Mr.) Brignoli was abusing his position as the person controlling the corporate general partner (BCI) to benefit himself."

The suit goes on to state Mr. Brignoli refused a "demand," made June 15, to permit the plaintiffs to exercise their right as limited partners to inspect the books and records of Brignoli, Curley & Roberts.

"Since November 1987, the general partner, BCI, and the person who controlled it, (Mr.) Brignoli, continually have rebuffed attempts by plaintiff limited partners to obtain information concerning the finances of the partnership," according to the suit.

Also, the lawsuit stated that in the first half of 1988, Mr. Brignoli caused the firm to pay approximately $250,000 to Brignoli Models for trading audit services and another $175,000 for trading cost analyses.

"There was no need for BCR to pay $425,000 to Brignoli Models for such purported consulting services because numerous other companies that were not affiliated with (Mr.) Brignoli were capable of providing such services at a lower cost," the lawsuit stated.

"However, no bids were solicited."

# Schools seeking

*Continued from page 1*
The Common Fund.

Few endowments now invest in leveraged buy-outs, largely because the amount they want to commit — from about $150,000 for small colleges to $10 million for large — could not provide them broad diversification in the asset class, said Mr. Keane.

The Common Fund helped set up Endowment Advisers of Fairfield in January to facilitate endowment investments in private markets. The name of the limited partnership is Endowment Partners 1.

Endowment Advisers established the new limited partnership to invest in seven leveraged buy-out funds that invest in a wide range of buy-outs, including Merrill Lynch Capital Partners, New York; Clayton & Dubilier, New York; and McCown de Leeuw & Co., San Francisco.

Believed to be the first program of its kind, the manager-of-managers setup will allow even small endowments broad diversification across leveraged buy-out investments. The partnership's first fund will total $125 million.

"They (endowments) want diversification away from the public securities market. Private market investments require a longer-term commitment and have a different pattern of price behavior than stocks and potentially much higher returns," Mr. Keane said. For instance, funds managed by the seven firms in the past have had annualized returns ranging from 74% to 160%.

"Prices paid today to acquire companies are somewhat higher, which will reduce the returns looking forward," Mr. Keane said. He still expects Endowment Partners 1 to earn 40% per year, however, because of their focus on smaller companies.

Forty-five institutions have expressed an interest in Endowment Partners 1, which is scheduled to close Oct. 15 and can only accept 99 participants. The second and final closing will be Dec. 31.

In addition to Mr. Keane, trustees of Endowment Advisers Inc. include Rodney H. Adams, Stanford University; William T. Spitz, Vanderbilt University; David K. Storrs, The Common Fund; David F. Swensen, Yale University; and John L. Temple, Emory University.

All the endowments of the trustees' universities are expected to participate in the fund, he said.

"For various types of private investment programs, 5% or a little more is certainly reasonable for endowments," Mr. Keane said.

"I think this will be the first in a series of private investment programs for endowments. We're already thinking about starting a venture capital investment pool in the first quarter of 1989 and an oil and gas investment program for 1989," said Mr. Keane.

The Common Fund, which has an endowment totaling $3.5 billion, invests mainly in publicly traded securities. It also has short-term investments totaling $7.5 billion.

They chose seven leveraged buy-out funds to make pure equity investments and one fund to make debt with equity investments. Assuming $100 million will be raised for the first fund, equity managers appointed will receive allocations of $7 million to $13 million each. Merrill Lynch Capital Partners (Capital Appreciation Fund II) and Clayton & Dubilier (Private Equity Fund IV), each will receive 13%. Gibbons, Green van Amerongen (Fulcrum IV) and Morgan, Lewis, Githens and Ahn, (MLGA Fund L.P.) will be allocated 10% each. Brentwood Associates (Brentwood Associates Buyout Fund), McCown de Leeuw (McCown de Leeuw & Co. II, L.P.) and Neuberger & Berman (NLF Partners), each will receive 7%.

Private placement debt securities will comprise one-third of partnership assets and will provide approximately 12% current yield, plus equity participation. The cash flow is important to most endowments.

The manager of the debt portion is Trust Co. of the West (TCW Special Placement Fund III).

The fund will invest mainly in small to midsized companies. "We think continuing opportunities are more likely to be in smaller and midsize companies. Megadeals are getting scarcer and scarcer. Also a lot of competitive bidding on those megadeals drives prices up and returns down. Smaller deals are negotiated usually — not put out to bid," Mr. Keane said.

All transactions will be friendly, with a long-term growth orientation. The goal is to improve operations and boost profitability, not to engage in "bust up" deals involving large asset sales.

Future leveraged buy-out funds probably will feature a different cast of managers, Mr. Keane said. The partnership looked at 30 different firms before selecting.

For Endowment Partners 1, Fairfield Advisers, Fairfield, Conn., will act as managing general partner; Amherst Capital Financing, Springfield, Mass., will be general partner. Both will be passive investors. Colleges, universities and independent schools will invest as limited partners.

The fund will have a 10-year term with periodic distributions of all income and sale proceeds.

Endowment Advisers' first private markets program was in commercial real estate. The program's first closing was in July, when it raised $250 million from 60 colleges. In the second closing slated for the end of October, Mr. Keane expects to raise another $200 million from about 80 colleges. By year end, the program should have raised $500 million to $600 million, "which is quite significant," he said. Six managers run the real estate assets. ■

# International takes off

*Continued from page 3*
million balanced account. The sole assignment put First Investment among the leaders in assets placed.

The sheer size of the California employees' allocation overshadowed other money managers, and styles, which found success in the third quarter.

Copley Real Estate Advisors, Boston, landed five new accounts totaling $68.5 million.

Invexco Inc., Houston, nabbed four clients in its oil and gas exploration endeavor, three of whom enumerated for *P&I Age* $94 million in new investments.

The Common Fund, Fairfield, Conn., also landed four new accounts for the quarter, receiving $25 million for real estate investment trusts, $2.5 million for a South Africa-free bond portfolio and $3 million for a fixed-income account.

Real estate should continue to be an area of strong attraction, with most new investors seeing it as a diversification play and investing directly rather than through pooled accounts, BARRA's Mr. Baker said. ■

## Goodyear targets equity managers

By Barry B. Burr

AKRON, Ohio — The Goodyear Tire & Rubber Co. pension fund wants to put all of its equity managers on performance-based fees by the end of the year, according to corporate executives.

The company's program is the latest by a pension fund as interest among plan sponsors in such fee arrangements appears to be growing.

The $3.2 billion Shell Oil Co. pension trust has hired its first international manager on a performance-based fee schedule and plans to adopt such schedules for almost all of its asset classes, said Leonard S. Chaikind, administrator-Shell Pension Trust/Provident Fund (*See related story*).

The $2.73 billion Xerox Corp. pension fund also is considering performance-based fees, said Jainel Buell, manager-trust investments. She declined to discuss details.

Executives at Wilshire Associates, Santa Monica, Calif., a major advocate of performance-based fees, also see increasing interest, according to Stephen L. Nesbitt, vice president. One-third of the firm's 60 tax-exempt clients use performance-based fees for some portion of their assets, he said.

Wilshire is assisting Goodyear in devising its new fee arrangement.

Goodyear will use the Standard & Poor's 500 stock index as a performance benchmark, rather than designing customized benchmarks for each manager's investment style, said Duane H. Smith, manager-benefits controls and investments.

The amount affected by Good-year's move is unclear. The pending termination of a salaried plan would reduce Goodyear's total pension assets to $641 million from the $1.57 billion, reported at the beginning of the year, based on a company filing with the Pension Benefit Guaranty Corp. But Mr. Smith said Goodyear would have some $900 million in assets remaining after the termination. He declined to elaborate.

With 55% of the fund allocated to equities as of

**. . . while Shell Oil is looking at plans to adopt performance-based fees for all asset classes, including its new international manager.**

## Shell plan opens with international

By Marlene Givant Star

HOUSTON — The $3.2 billion Shell Oil Co. pension trust is embarking on its first formal international investment program, and also plans to adopt performance-based fees for almost all of its asset classes, according to Leonard S. Chaikind, administrator-Shell Pension Trust/Provident Fund.

The Provident Fund is a combination of savings programs totaling $3.4 billion.

Shell, although late to enter the international arena, is a pioneer in many ways. Besides planning performance-based fees for its international managers — one of a very few plans to do so — Shell eventually will manage the cash portion of its international portfolio in-house, as it does for domestic investments.

In addition, Shell has started lending global securities through its new global custodian, Boston Safe Deposit & Trust Co., Boston (*See related story*).

Shell also is the first U.S. pension fund to hire AIG Global Investors Inc., New York; the 2-year-old firm received $50 million for international equities. Frank Russell Co., Tacoma, Wash., assisted in the search.

The firm was funded in one fell swoop through a program trade by Shell and future international managers will be funded in the same manner. Assets came from reductions in three domestic equity accounts Mr. Chaikind would not identify, leaving Shell's overall equity allocation unchanged.

The current asset mix is 52.2% domestic stocks; 1.6% international stocks; 13% real estate; 32.9% bonds; and 0.3% cash. By the end of next year, the fund expects to have an international stock allocation of between 5% and 10%. In 1990, fund officials plan to boost that equity exposure and diversify into foreign bonds.

On the performance-fee front, Shell has placed three equity managers under a fulcrum fee structure in which the firms will get a percentage reward over their minimum fee for adding value over their benchmarks.

# Global lending gathering speed

By Marlene Givant Star

Global securities lending activity has mushroomed in the past year with at least 21 U.S. tax-exempt funds lending Japanese stocks.

That compares with four funds a year ago.

The business is enormously profitable because demand for the securities far exceeds supply. Funds are attracted to securities lending globally because the spreads can be up to six times the spreads on domestic loans, exceeding 300 basis points. Funds use the gains to offset the high costs of investing overseas.

Funds participating in global securities lending now include American Information Technologies Corp., Chicago; the Illinois Municipal Retirement Fund, Chicago; Shell Oil Co., Houston; and such global lending pioneers as the College Retirement Equities Fund, New York; The Common Fund, Fairfield, Conn.; the Harvard University endowment, Boston; and the San Francisco City and County Employees' Retirement System.

At least five global custody banks, including Bankers Trust Co., New York; Boston Safe Deposit & Trust Co., Boston; Chase Manhattan Bank, New York; Northern Trust Co., Chicago; and Harris Trust, Chicago; offer the service.

Chase, the second-largest global custodian, just started lending Japanese equities in September. Officials at State Street Bank and Trust Co., Boston, the largest global custodian, would not return phone calls.

Many banks are working to introduce countries besides Japan, where demand is hottest now. Boston Safe plans to begin lending Hong Kong stocks in two weeks and British stocks in a month. In 1989, it will work on its own foreign bond lending program and might begin lending French securities. "As Sherman

## LATE NEWS

### Reversion-tax debate under way

WASHINGTON — House and Senate conferees were meeting last week to decide the fate of a Senate amendment that would sharply raise the federal excise tax on asset reversions from terminated overfunded pension plans.

Under the amendment, included in a technical corrections bill approved last week by the Senate, a 60% excise tax would be applied on reversions received from July 26, 1988, to May 1, 1989. After May 1, the excise tax would drop to the 10% rate that now applies on most reversions.

### Pension plan assets increase 4%

WASHINGTON — The assets of private non-insured pension plans grew 4% during the second quarter to $1.23 trillion at the end of June, the Employee Benefit Research Institute reports.

This places the assets of such plans still below their peak of $1.3 trillion at the end of the third quarter of 1987.

During the quarter, net withdrawals of $9 billion from equity portfolios, $3 billion from bond portfolios and $1 billion from other assets were offset by net cash contributions of $6 billion and total investment earnings of $50 billion.

### Alameda County hires executive

OAKLAND, Calif. — The $700 million Alameda County Employees' Retirement Association, Oakland, has hired Francis John Early as its retirement administrator beginning Nov. 1.

Mr. Early comes to Alameda from Dorn & Helliesen Inc., Corte Madera, Calif., which has been Alameda's asset allocation consultant, according to Helen Wright, deputy administrator.

He replaces Dave Tobias, who retired March 31.

### Copley pool raises $535.5 million

BOSTON — Copley Real Estate Advisors closed its Copley Institutional Investors Fund II recently after raising $535.5 million from 28 investors, according to Jack Phillips, a Copley managing director.

CIIF II is a closed-end blind pool that will be invested in joint venture real estate development deals nationwide; $25 million already has been put into undeveloped land in a Trammell Crow industrial park in Industry, Calif.

Among the 28 investors were the State of Connecticut Trust Funds; Illinois Power Co.; the Police & Fireman's Disability & Pension Fund of Ohio; Phelps Dodge Corp.; the Philadelphia Municipal Pension Fund; Rockefeller Foundation; the Alfred E. Sloan Foundation; Stanford University; and Wellesley College.

### Funds select managers, trustee

• MINNEAPOLIS — E F. Johnson Co., Minneapolis, has hired IDS Trust, Minneapolis, to manage its $20 million thrift/profit-sharing plan, said Ernest Glass, Johnson's chief financial officer.

Mr. Glass said IDS replaces Equitable Life Assurance Society of the United States, New York, for guaranteed investment contracts; Kemper Asset Management Co., Chicago, for equities; and Norwest Bank Minneapolis, as trustee. IDS will manage a common stock fund and a combined money market/GIC fund, and do the bookkeeping.

• KEWASKUM, Wis. — Regal Ware Inc. has selected a $1.4 million bank investment contract from Washington Mutual Savings Bank, Seattle, for a portion of its $25 million employee savings plan, said James G. Moran, plan administrator.

• KALAMAZOO, Mich. — The $730 million Upjohn Co. pension fund hired J.P. Morgan Investment Management Inc., New York, to manage an undisclosed amount in its open-end Real Estate Fund, said G. Jake Miller, trust investments manager.

Upjohn also increased its commitment to the open-end Prime Property Fund run by Equitable Real Estate Investment Management Inc., New York, he said. He would not disclose the amount of this commitment but said it and the J.P. Morgan hiring raise Upjohn's real estate allocation to 5% from 2%.

• FORT WAYNE, Ind. — Essex Group Inc. hired Northern Trust Co., Chicago, as master trustee for its $25 million pension fund, said David Owen, director of treasury services.

Essex Group and its pension fund recently were spun off from United Technologies Corp., Hartford, Conn., in a management-led leveraged buy-out. Northern Trust will be responsible for short-term investments, Mr. Owen said.

### Accountant acquires consultant

NEW YORK — Arthur Andersen & Co. has acquired GA/Partners, a Washington-based real estate consulting firm, in what the company called a reorganization of its real estate accounting practice.

GA/Partners, the successor firm to Gladstone Associates, will continue doing business as GA/Partners with 60 professionals.

# Realty deal of Heitman, Wisconsin off

By Steve Hemmerick

The $16 billion State of Wisconsin Investment Board, Madison, and Heitman Advisory Corp., Chicago, have parted company 10 months after signing a contract under which Heitman would have invested several hundred million dollars of Wisconsin's pension fund assets in real estate.

Heitman and Wisconsin officials claim to have fired each other first. Sources said Heitman officials claimed the firing was to protect their standards of fiduciary responsibility, while officials for the Wisconsin board said Heitman wasn't finding good property investments.

The afternoon of Oct. 11, Norman Perlmutter, chairman, and David M. Glickman, president, of Heitman, announced they were terminating Wisconsin's account.

Heitman officials said their board of directors had spent more than a month discussing terminating the Wisconsin account but formally decided Oct. 11. Wisconsin received written notice of the decision Oct. 12.

Wisconsin officials said that was one day before they had planned to visit Heitman's Chicago offices and terminate the relationship.

"This is the first active relationship that we have withdrawn from," Mr. Glickman said. "Heitman does perceive itself as a fiduciary and does have an obligation to invest for the beneficiaries for whom we invest," he said. Heitman has more than 50 tax-exempt clients and manages more than $4 billion in tax-exempt assets.

"Frankly, we consider ourselves to be fiduciaries in the highest sense and, in the last analysis, we are responsible for the investments of funds for millions of beneficiaries, and when we perceive that we may be asked to lower our standards we quit. And it may not be easy, but sometimes, you have got to do the hard thing. It was a plum account, but sometimes you have got to do the hard thing," said Mr. Perlmutter.

He would not discuss what the "lower" standards entailed.

Sources said Heitman considered Wisconsin a top account; 14 real estate money managers had competed for four contracts as separate account managers for the fund.

In response to Heitman's announcement, Marshall Burkes, executive director of the Wisconsin fund, said, "Paul Fanfera, our investment director, concluded that because of a lack of performance in both quality and quantity of deals shown us, that we should terminate the contract with Heitman.

Norman Perlmutter said Heitman Advisory has ended its account with Wisconsin.

"The (Wisconsin) board concurred (with the recommendation) . . . Oct. 6, and Paul and I volunteered to give full explanation to senior officers of Heitman this Thursday (Oct. 13) in Chicago.

"We have not accepted a single deal of theirs, and we have not paid them any money," said Mr. Burkes, who added Heitman had presented two deals to the fund.

He said he was "appalled" at the announcement by Heitman officials, and said it "raises major questions about their behavior." Mr. Burkes limited his comments because board officials had not

# NCCMA director out

## Green ousted by board over philosophy

By Fred Williams

NEWTOWN, Conn. — The board of directors of the National Corporate Cash Management Association forced Lawrence K. Green to resign as executive director after serving only nine months.

The action — on the eve of the organization's annual conference — was prompted by what board members describe as major differences in philosophy and personality conflicts between Mr. Green and committee chairmen and officers.

According to several NCCMA board members, Mr. Green resigned after a late September meeting with the board in Denver.

Contacted at his home in Salisbury, Md., Mr. Green said he is considering legal action in response to the board's asking him to step down and said if circumstances warranted he would like to return to his post as executive director.

Several NCCMA board members referred all questions about the situation to Paul Even, the organization's president and treasurer of National Gypsum Co., Dallas.

L. Green

Marsha Prentiss, manager of treasury operations at Avantek Inc., Santa Clara, Calif., who is an NCCMA board member and volunteer conference coordinator, said board members "have been requested to simply say he (Mr. Green) is no longer with the association. I'm not permitted to discuss it."

Mr. Even declined to discuss the circumstances surrounding Mr. Green's departure. He said a search committee is being formed to find a replacement and the post probably won't be filled until early next year.

But several other board members, who asked not to be identified, said Mr. Green was asked to leave because of repeated conflicts over management of the association and personality clashes with volunteer committee chairmen and elected officers.

"He wanted to take the association in one direction and the volunteer cash managers wanted to go another. It was a difference of philosophy," said one board member.

Another member said Mr. Green "irritated a lot of people" and "saw the world differently" than association officers. "There was a difference in philosophy on how to run the association," the board member said.

One board member who was at the September meeting said the differences "run deeper than personality conflicts. It was literally

# Broker-consultants gain niche

By Joel Chernoff

Investment management consulting to small institutions and wealthy individuals is providing as much as $600 million in revenues to brokerage firms hurting from the 1987 market crash.

Shearson Lehman Hutton, which has about half of the existing market share, has experienced "a 35% rate of growth in terms of accounts and assets in the last five years," said Len Reinhart, director of the firm's investment advisory program in Wilmington, Del.

Broker-consultants — securities-firm units set up to advise clients primarily on asset allocation, manager selection and performance measurement — represent a significant area of growth for beleaguered securities firms, whose revenues have been trimmed in the aftermath of last year's stock market crash and which might face another round of layoffs shortly.

If anything, however, the crash has boosted the broker-consultants' market, as wealthy individuals increasingly seek professional advice on asset allocation and proper diversification.

Some money managers, including Dreman Value Management Inc. and Oppenheimer Capital Corp., both of New York, aware of the declining source of new dollars going into larger retirement funds, have turned to broker-consultants as a source of revenue.

# Merrill Lynch is top underwriter

By Marcia Parker

NEW YORK — Merrill Lynch Capital Markets swept the first three quarters of 1988 underwriting rankings, clinching the No. 1 spot for domestic underwritings, including initial public offerings and common and preferred stock offerings.

During the first three quarters of the year, Merrill was lead underwriter for $29.1 billion worth of domestic debt and equity securities, up from $27.8 billion during the same nine-month period last year. Last year, Merrill was ranked third in cumulative domestic underwritings, according to IDD Information Services, Inc., New York.

Merrill took 14.1% of the total domestic underwriting business in the three quarters compared with 12.1% in the 1987 period.

Merrill Lynch also kept the No. 1 spot in the third quarter in both initial public offerings and total equity offerings. The investment bank had the same top spots in the first half of the year.

Grant Kvalheim, head of capital markets at Merrill Lynch, attributed his firm's strong performance to a "continuum of the momentum we've built up over the year. We have committed capital to the business and raised our profile with issuers."

Goldman, Sachs & Co. took second-place honors, underwriting $28.5 billion of domestic securities for the three quarters. Last year, Goldman was ranked fifth and was credited with underwriting $24.1 billion of securities. Goldman had a 13.8% slice of the market for the first three quarters of 1988 compared with 10.5% last year, according to IDD.

Salomon Brothers Inc., which was the top-ranked domestic issues underwriter for the cumulative 1987 period, has slipped to third place. Salomon served as underwriter of $26.2 billion of domestic securities, taking 12.7% of the market; down from $34 billion and 14.8% of the market in 1987.

First Boston also dropped two notches since last year to fourth place. The firm underwrote $23.9 billion of domestic securities, or 11.6% of the market. Shearson Lehman Hutton moved up one place, taking fifth place with $19.2 billion, or 9.3% of the market.

The filter-down effect of Black Monday is still being felt in the global markets. Investors and issuers still are worried about unsteady worldwide economic growth, interest and exchange rates, and unsolved problems such as the U.S. budget deficit and Third World debt. Across the

## CORRECTIONS & CLARIFICATIONS

• **Dennis J. Lenahan** of Realty Capital Markets Inc. was misquoted in the Sept. 19 real estate supplement, PROPERTY. Mr. Lenahan, who was speaking at a Northwest Center seminar, made the observation that vacancies were at an all-time high, but cap rates were at an all-time low. He went on to state, "The presence of so much equity capital has held the cap rates low, but tenant demand is independent of the availability of capital."

• In the Oct. 3 issue, the Department of Labor's position on **short sales** by pension fund investors was incorrect on two points.

Short sales are not per se imprudent under the department's current interpretation. The original story had said short sales are not prohibited, which according to a Labor Department official is misleading.

Also, one of the three conditions a plan sponsor must meet in order to get relief from Section 406(a)(1)(B) of ERISA under the 1975 prohibited transaction exemption was misstated. The condition the broker must receive no interest or other compensation for extending credit applies only if that broker is a fiduciary of the plan.

Now Might Be A Good Time To Review Your Retirement Plan.

The crush of recent events has revised the rules of retirement fund planning. But one rule stands firm: long term success means managing the bears as well as the bulls.

How? Ætna's Multiple Asset Portfolio.

We offer five distinct investment options within a single annuity contract. Risk and return are well diversified.

A network of local Ætna retirement specialists provides thorough, personalized service. Plus 24-hour telephone access to account information and free quarterly participant statements.

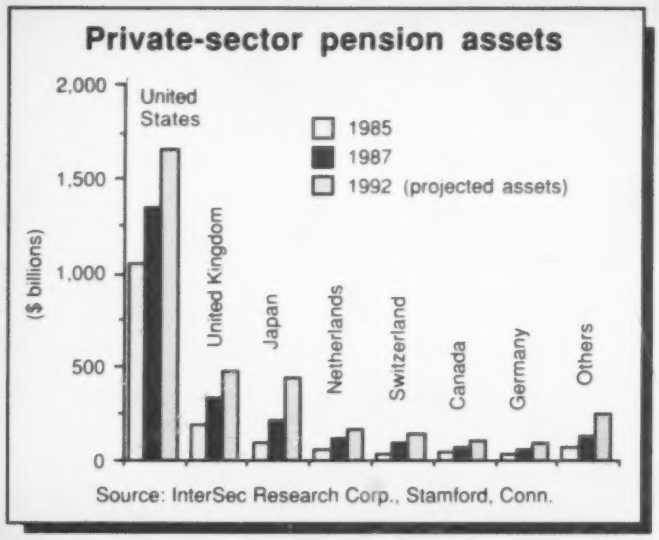
CONSULTANTS



# International interest keen

By Joel Chernoff

Trying to diversify their markets and build important new revenue bases, investment management consultants are setting up shop on foreign shores, trying to tap into the growing pool of foreign-based institutional assets.

During the past 10 years, at least nine firms have expanded operations, primarily to the English-speaking nations of Canada, the United Kingdom and Australia (*see related story on page 18.*). Now eyes are turning toward Japan and continental Europe and the lucrative consulting contracts that promise to be opened up shortly.

"The opportunity clearly is Japan," said Budge Collins, president of Collins Associates, Newport Beach, Calif.

The impact on the bottom line is clear. At Wayne, Pa.-based SEI Corp., foreign consulting is expected to grow to 25% to 30% of total consulting revenue in the next five years, from 10% of its $55 million in consulting revenue now, said Ed Loughlin, senior vice president.

For Frank Russell Co., the Tacoma, Wash., firm thought to be the industry leader, observers believe foreign-based consulting accounts for about half of the consulting revenue.

In terms of market penetration, the numbers don't tell the entire story. For example, there is no way of telling which of several services clients buy. While many include clients buying routine

# Handful affect over $1.5 trillion

By Trudy Ring

Tax-exempt assets of $1.583 trillion come under the influence of 13 of the nation's largest investment consulting firms.

These firms influence their clients' investment judgments through asset allocation studies and, in most cases, assistance with manager selection. (Two of the firms in the accompanying list, BARRA and Richards & Tierney, do no manager searches; another, TPF&C, has gone into the search business only recently.)

The total reflects asset levels reported by the consultants for all their U.S. tax-exempt clients, not just pension funds, which helps to account for the large number. Also, some funds may use different consultants for different tasks, possibly leading to some double-counting in the asset total.

Many consultants said they don't track the amount of money placed through the searches they perform. However, Eager Associates, Louisville, Ky., tracks this by looking at asset shifts publicized in *Pensions & Investment Age* and other industry periodicals.

According to Eager Associates, eight of the top consulting firms placed at least $8.4 billion during the 12 months ended June 30.

The firms and their numbers are SEI Funds Evaluation Services, Wayne, Pa., $1.8 billion; Wilshire Associates, Santa Monica, Calif., $1.8 billion; Callan Associates Inc., San Francisco, $1.2 billion; Rogers, Casey & Barksdale Inc., Stamford, Conn., $1.2 billion; William M. Mercer Meidinger Hansen Inc., Deerfield, Ill., $1 billion; Evaluation Associates Inc., Norwalk, Conn., $590 million; Frank Russell Co., Tacoma, Wash., $539 million; and DeMarche Associates, Kansas City, Mo., $322 million.

Eager Associates' figures are based on published reports, but consultants may have done additional placements in the period represented. One that did provide its own figures to *P&I Age*, Mercer Meidinger Hansen, stated it placed $2.3 billion in the year ended June 30. Another, Callan, announced it placed $3 billion.

SEI officials could not provide figures for that 12-month period, but said the firm placed $4 billion in 1987 and $3.1 billion in the first six months of 1988.

Wyatt Asset Services Inc., Boston, not represented in Eager Associates' data, placed $2 billion in the 12 months ended June 30, Wyatt officials said. Data on placements was not available from another firm in the accompanying list, Collins Associates, Newport Beach, Calif., nor was it in Eager Associates' data.

The degree of consultants' influence varies. Most say the final decision on asset allocation and manager hiring rests with the client.

"In the final analysis, this is their money," said Sandy Lincoln, managing director of Mercer Meidinger Hansen. "If a client says, 'Tell us who to hire,' this is not a question our consultants should answer."

"We are in an advisory capacity, and clients may or may not take our advice," said James F. Beasley, chief operating officer of Rogers, Casey & Barksdale. "Ultimately, it's the client (who makes the decision) — what we're trying to do is bring some expertise to bear."

Some clients want their consultants to be in more than an advisory capacity, however. Collins Associates actually has full discretion over about one-third of its accounts, doing all hiring and firing of managers, said Budge Collins, president.

This is an unusual situation, but the firm's influence is strong even in its other accounts, Mr. Collins said. "Our clients generally take our advice," he said. "If they don't, they usually don't stay clients."

The degree of influence can vary according to the fund size and in-house expertise. "The larger a plan you're dealing with, the less direct influence you have," said Asghar Alam, national director of Wyatt Asset Services.

"Our influence is very substantial with clients where they're looking for us to be the 'prudent expert,' " Mr. Lincoln said. These usually are clients who don't feel they have sufficient expertise in-house, he said.

The proliferation of investment strategies has increased clients' need for consultant expertise, said Ed Loughlin, senior vice president of SEI. "It's a confusing environment out there," he said. "They really do need the guidance and the advice, but they also want to know, what would we do," he said.

"Influence is knowledge, and we help the trustees have more knowledge," added Ron Peyton, president of Callan Associates.

Consultants serving large pools of assets had varying explanations for their prominence in the market. Most of them have some very large funds on their roster — for example, the average public fund client of Wilshire Associates has $5 billion in assets and its average corporate fund client has

# Bypassing consultants

## Funds looking for more from their managers

By Fred Williams

While the pension consulting business grows in size and influence each year, some larger pension plan sponsors either don't use a consultant or are turning to their investment managers and master trust banks to act in a consulting capacity in directing the assets of their funds.

The growing sophistication and development of pension plan managers in larger funds is in part responsible for their taking on more responsibility for directing their funds internally with data provided by their banks and specialty investment managers instead of pension consultants.

The use of investment managers in a consulting role was brought to the attention of the pension industry recently by Robert E. Shultz, vice president-pension asset management at RJR Nabisco Inc., Atlanta, and a key industry spokesman for large pension plan sponsors. The Nabisco plan has about $2.5 billion in total assets.

Addressing the Financial Analysts Federation earlier this year, Mr. Shultz said he favored having larger, but fewer, investment manager relationships and tapping managers for input "over and above the portfolio they own."

"In other words, beyond adding value, I would like to use the manager to serve as a consultant to help me do my job better. I would suggest that given the right combination of managers, the sponsor should have the best consultants available in the business," said Mr. Shultz.

Mr. Shultz may not have been the first to use the approach, but he has set the tone for other large plan sponsors who say they can and should use investment managers to help improve overall investment performance beyond just managing a portfolio. Even some pension consultants agree with the approach.

"We've observed that as corporate plan sponsors get smarter and the business becomes more complex many companies are using consultants for project-type work rather than for calling the shots," said Sam DeKinder, executive vice president at DeMarche Associates, Kansas City, Mo.

"We have a number of clients that use us as a data source and gather an opinion from us from their custodian, money managers and banks, then compile the information and make their decisions," said Mr. DeKinder. "We still have a strong input but what

*Continued on page 46*

# Few perceive chips stacked for favoritism

By Carol Wiley

Do consultants focus on a relatively small number of their favorite money managers during searches despite their claims they seek out the "right" managers for their pension fund clients?

Consultants, money managers and an investment adviser marketing firm unsurprisingly said no, as did pension executives for the most part, although all acknowledged some abuses in the industry. One public pension fund, however, had sworn off consultants for eight years until recently, when politics demanded that one be used.

In many cases consultants may recommend the same list of managers several times, particularly if the manager is one of only a few in a specialty; if the manager has supremely good performance numbers; or if the consulting firm is small and cannot afford the large manager data bases on which the larger firms rely. Those surveyed also warned of consultants who may recommend managers with whom they have brokerage or soft-dollar agreements.

However, a software data base system called Tracker sold by Eager Associates, a Louisville, Ky.-based consulting firm, indicates the five largest U.S. consulting firms showed no favoritism in about 2,800 manager searches during the past four years.

The five largest firms — those with the most manager searches in the data base — are, ranked by number of searches: SEI Corp., Deerfield, Ill., which recommended 119 different managers in 236 searches in the data base; William M. Mercer Meidinger Hansen Inc., Louisville, which recommended 94 managers in 142 searches; Wilshire Associates, Santa Monica, Calif., 88 managers in 137 searches; Callan Associates Inc., San Francisco, 68 managers in 86 searches; and Frank Russell Co., Tacoma, Wash., 55 managers in 75 searches.

The three managers hired most often upon recommendation by SEI were The Boston Co., hired 11 times; Sun Banks, Orlando, Fla., 10 times; and Denver Investment Advisors, eight times.

Managers hired most often in searches by Mercer Meidinger Hansen were Trust Co. of the West, Los Angeles, five times; Dimensional Fund Advisors, Santa Monica, four times; and Duff & Phelps Investment Management Co., Chicago, four times.

Managers hired most often in searches by Wilshire include Schroder Capital Management International, New York, five times; Baring International Investment Ltd., London, four times; and Mellon Capital Management, San Francisco, four times.

Managers hired most often upon recommendation by Callan include Bankers Trust Co. — Investment Management Group, New York, four times; and Loomis, Sayles & Co., three times for two different products. Thirteen managers were hired two times each in Callan searches.

Managers hired most often upon recommendation of Russell include Sanford C. Bernstein & Co., New York, four times; Chase Investors Management Corp., New York, four times; and Miller, Anderson & Sherrerd, Bala Cynwyd, Pa., four times.

Only four of the managers were recommended by more than one consultant. They were Loomis, Sayles, recommended by SEI and Callan; J.P. Morgan Investment Management Inc., New York, by Wilshire and Russell; Sanford Bernstein, by Callan and Russell; and T. Rowe Price Associates, Baltimore, by Mercer Meidinger Hansen and Russell.

The data show "consultants play favorites a lot less than the general public thinks," said David Eager, president of Eager Associates. "Most managers think it's difficult breaking in, that it's a closed club. Pension fund sponsors think that too, but it's not true."

"There are some smaller consulting groups that haven't been able to employ the data banks for one reason or another and still may tend to be more specialized, and, because of their situation, use a smaller range of managers," said Dick Silverness, president of Vestmark Inc., a Minneapolis firm that markets managers to consultants. "But that is a function of what they can afford."

Mr. Silverness, the first pension chief at General Mills Corp., Minneapolis, in 1968, was a consultant for 14 years, 10 of those as a partner at Wilshire. He has been president of Vestmark since 1984.

"Unfortunately, there are still some groups of consultants who

**Sydney is one of many cities in Australia where U.S. investment management consultants hope to gain a foothold in the growing pension industry.**

# Australia a star of U.S. hit lists

SYDNEY, Australia — Competition for investment management consulting contracts is heating up Down Under — including efforts by U.S. consultants eager to get a piece of the growing $80 billion Australian pension market.

One of the latest entrants into the consulting field, John A. Nolan & Associates, Melbourne, has ties to three U.S. organizations — William M. Mercer Inc., New York; Collins Associates, Newport Beach, Calif.; and Inter-Sec Research Corp., Stamford, Conn.

Founded in September 1987 by John Nolan, former director-finance and administration of the $1.1 billion State Electricity Commission of Victoria pension fund, the firm is targeting the 12 largest Australian funds — those typically with at least $500 million in assets.

That places Nolan in direct competition with such major consulting forces as Tacoma, Wash.-based Frank Russell Co. and Sydney-based Morrow Australia Pty. Ltd.

Russell officially entered the Australian pension market two years ago, although its organization had provided management consulting advice to Dick Dusseldorp, chairman of Australian real estate developer Lend Lease Corp., as far back as 1983.

Russell now has 11 Australian clients, nine of which are pension-type organizations and two are financial institutions. "Australian plan sponsors and money managers are much more accom-

# A new tug of war

## 2 groups attempting to woo consultants

By Curtis Vosti

Two organizations are waging a sometimes-acrimonious fight for the allegiance of the growing ranks of consultants interested in the middle-market investor.

While spokesmen for both the Investment Management Consultants Association, Denver, and the Institute for Investment Management Consultants, Scottsdale, Ariz., say their aim is to improve the professionalism of those providing investment services, their organizations have chosen different paths.

(The middle market investor is defined as trustees or individuals in charge of retirement assets between $500,000 and $100 million.)

The IMCA, formed in 1985, claims 350 members and recently certified 32 in its first certification program offered through the Wharton School of Business at the University of Pennsylvania in Philadelphia.

The IIMC, formed in 1986 by some who left the IMCA over a policy split, offered initial memberships this past spring, claims almost 100 members and soon will grant 24 certifications.

"There is no question that the two organizations are competitive and will continue to be competitive," said IIMC Executive Director Jim Johnson.

What they are competing for is the "perhaps 75%" of middle-income funds run by part-time trustees who do not use outside financial advisers, according to Jim Owen, IMCA executive vice president. "The middle-market fund is where the dynamic growth in our industry will occur," he said.

But that anticipated growth also could bring associated problems as brokers expand into consulting. Increasing business could also highlight the traditional problem of lack of standardization within the industry.

"Everyone's a financial planner but few are qualified," said Dan Bott, who helped form the IMCA, but left over a policy dispute on membership. He is now the IIMC's chairman of the board of trustees.

"The potential for abuses in this industry are tremendous," Mr. Owen said.

"Why hasn't our industry dealt with abuses — that we all know about — with managers reporting performance figures? If we don't watch out, the Securities and Exchange Commission is going to come down on us, like it did with mutual funds, and impose standards, and I don't think that's what the industry wants."

George Dunn, past president of the IMCA, agrees with the need for identification of qualified consultants.

"I have a concern that not all of those who call themselves consultants are prepared to be full-blown consultants," Mr. Dunn said. "Our goal is to continue to elevate the profession. We're trying to address the objective of professionalism in the industry."

To address those perceived problems, the two groups have what they say are different approaches, although there are similarities.

Both offer a certification program designed to recognize a certain level of qualifications; both stress the value of continuing education and acknowledge experience in some way. They are disputing title to the service mark "Certified Investment Management Analyst" and other designations, and have exchanged letters claiming those perceived property rights.

There are other, more tangible differences, some of them personal.

Mr. Bott left the IMCA after a disagreement with Mr. Owen over the direction of the organization.

"There was a philosophical difference of opinion between Jim and myself over how the organization should move forward," Mr. Bott said. With an eye toward a growing industry, Mr. Bott thought the IMCA was leaning toward benefiting money managers, like Mr. Owen, at the expense of broker/consultants, like himself.

"The involvement of money managers is important, but the direction has to be controlled by consultants," said Mr. Bott, a vice president and practicing consultant in the Scottsdale office of Shearson Lehman Hutton Inc. Mr. Bott stressed he speaks only for the IIMC.

"I think Dan felt that having money managers involved was somehow a conflict of interests," said Mr. Owen, managing director of NWQ Investment Management Co., Los Angeles.

"We don't agree with that," he said. "There are common problems we all (attorneys, CPAs, money managers and consultants) can meet on and discuss."

Of the eight members of IMCA's board of directors, Mr. Owen said, five are consultants, two are money managers and one an attorney.

There are also differences in the certification programs. While both seek to increase the education of the consultant, there are different qualifications to enter the programs.

The IIMC offers differing levels of certification mainly based on practical experience, according to Mr. Johnson.

Dues for the first year are $175

The firm also offers analysis of corporate responsibility for investments.

It provides an ethical pooled pension trust fund to the investment management industry.

A reputation for being a source of strength in troubled waters isn't built overnight.

In fact, the conservative, risk-averse financial principles that built Republic National Bank of New York have their origins in the practices of the century-old Safra family banking traditions.

This thread has also guided our investment philosophy which emphasizes investment in a portfolio of mutual funds–a most effective way to:

1. Reduce risk in today's volatile markets through a high level of diversification.
2. Preserve capital.
3. Provide a proven record of consistently rewarding investment results.

All the above is accomplished through careful asset allocation based on client guidelines and a disciplined selection of a portfolio of mutual funds representing the top money managers proven over a period of time.

Our service at RNB provides pension, thrift and profit-sharing funds with a secure harbor.

REPUBLIC NATIONAL BANK OF NEW YORK

A SAFRA BANK

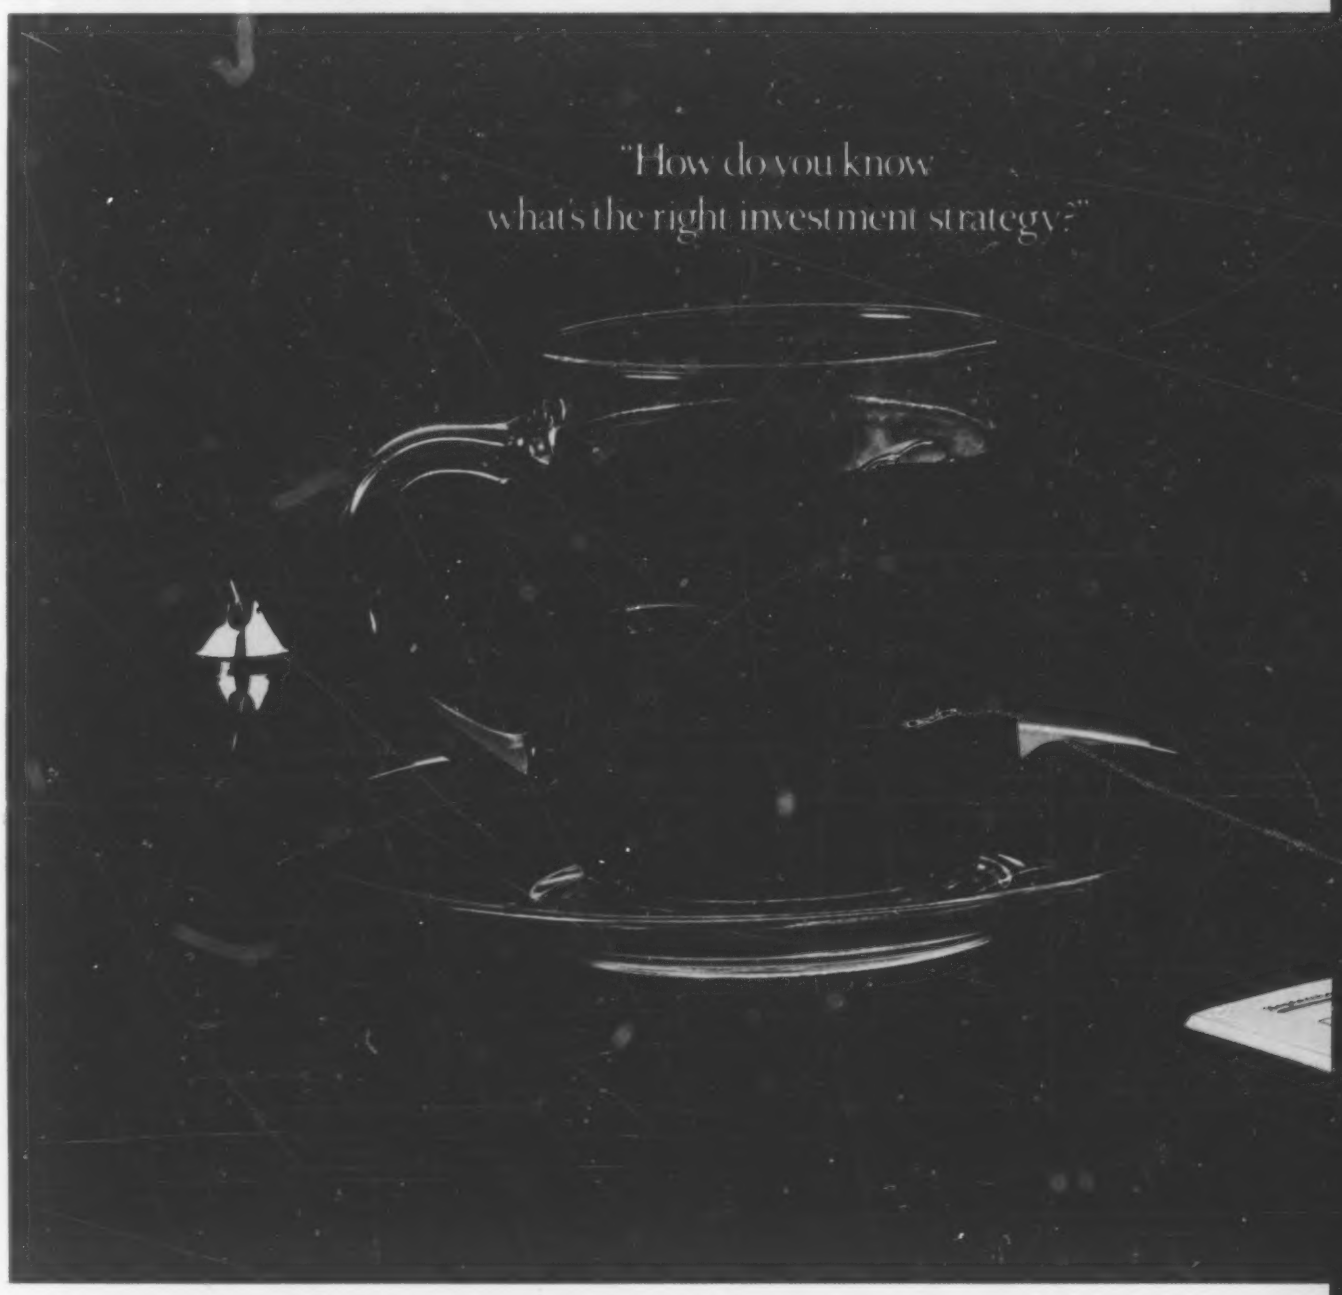
Davies Investment Associates Inc.



At Ætna, we have always maintained an unwavering commitment to the institutional investor: we never forget it's your money, not ours.

That's what makes us take extra care to match your investment performance to your risk tolerance. Even if that means our analysts have to dig deeply to identify the risks involved in alternative investment scenarios. And take the time to communicate these risks clearly and thoroughly to you.

Ætna Investment Management Group (Hartford)

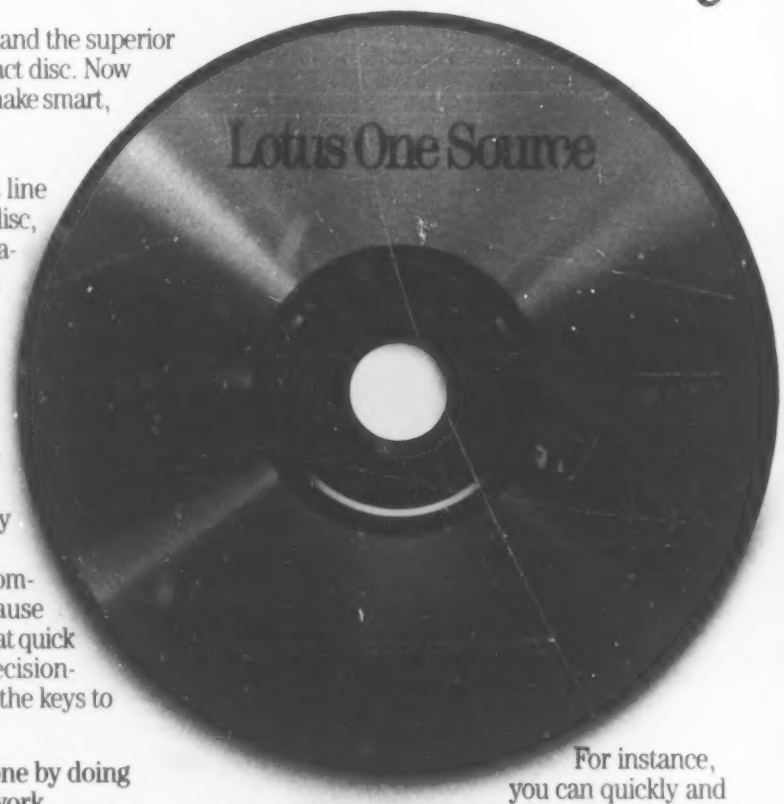
# How the same improves the sound of the soundness of yo

Music lovers have come to demand the superior quality of recorded music on compact disc. Now this same technology can help you make smart, fast business decisions.

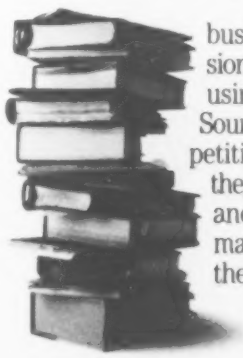
How? With Lotus One Source.®

The Lotus One Source product line uses CD ROM technology (compact disc, read-only memory) and powerful analytical software to deliver a collection of business and financial databases directly to your PC for analysis.

And you can get immediate access to all that information from within your 1-2-3® spreadsheet.



In fact, many business professionals are already using Lotus One Source to gain a competitive edge. Because they recognize that quick and informed decision-making is one of the keys to their success.



*Each Lotus One Source disc contains thousands of pages of information from the most respected business and financial information sources.*

**Get more done by doing less work.**

It's estimated that the average financial manager spends 70% of the time gathering data and getting it into the PC. Which leaves precious little time to analyze it, much less to act on it.

Lotus One Source changes all that. Because the databases and software are fully integrated, giving you a flexible, powerful analytical environment. This includes menu-driven screening and a broad range of reports and graphics.

For instance, you can quickly and easily pull up last year's income statement on a company. Then with a few keystrokes, bring the data into 1-2-3 for analysis.

And, to complete your research, pull up all the recent magazine articles or security analysts' reports written about the company.

So whether you're challenged with preparing an industry or competitive report overnight, in-depth investment research, or M&A analysis, Lotus One Source gives you the information you need, right when you need it.

# technology that your stereo can improve ur business decisions.

**Use it to plan a corporate takeover.**

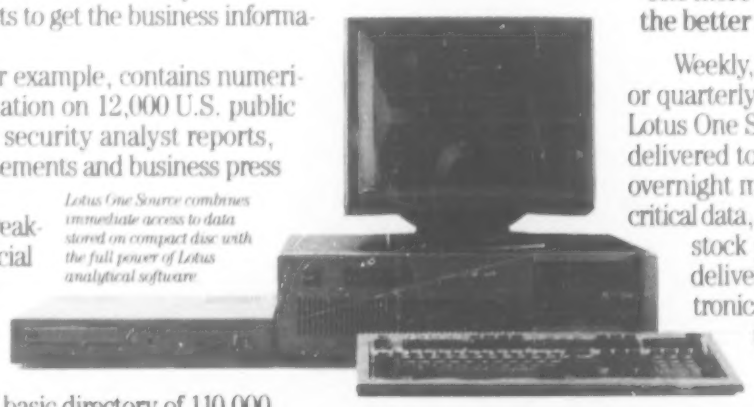
Or to avoid one. Because if, as they say, knowledge is power, few tools could make you as powerful as Lotus One Source.

Choose a single Lotus One Source product or combination of products to get the business information you need.

*CD/Corporate,*™ for example, contains numerical and textual information on 12,000 U.S. public companies, including security analyst reports, historical financial statements and business press excerpts.

If you need late-breaking business and financial news from Dow Jones News/Retrieval® databases, *CD/NewsLine*™ gives it to you.

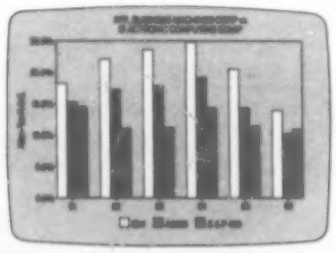
*Lotus One Source combines immediate access to data stored on compact disc with the full power of Lotus analytical software.*



*CD/Private+*™ is a basic directory of 110,000 private companies in nearly 1,000 lines of business.

And for hard-to-find data on more than 25,000 private and public high-tech companies, there's *CD/CorpTech.*™

*CD/Investment*™ offers comprehensive fundamental, stock price and valuation information on thousands of companies and industries.



*Create graphs from your own models with 1-2-3, or use one of the standardized formats included in the Lotus One Source applications library.*

And *CD/International*™ gives you fast access to information on 4,500 of the world's largest companies. The data is drawn from 24 countries and 27 industry sectors.

Finally, *CD/Banking*™ delivers complete financial performance information on banks as compiled by Sheshunoff Information Services—the leading provider of bank industry information.

**The more you hear, the better it sounds.**

Weekly, monthly, or quarterly updates to Lotus One Source are delivered to you by overnight mail. Time critical data, such as stock prices, is delivered electronically and updated daily. Plus unlike on-line information services—where the meter is always running—your subscription to Lotus One Source is a fixed cost no matter how often you use it.

Furthermore, you don't have to learn multiple methods to access different databases. Because Lotus One Source brings you all the data via a single access method.

And an entire department or company can use Lotus One Source on a local area network.

To learn more, call 1-800-554-5501* and ask for operator P117.

And see how the same technology that makes your favorite music sound better can help you better orchestrate your business strategies as well.

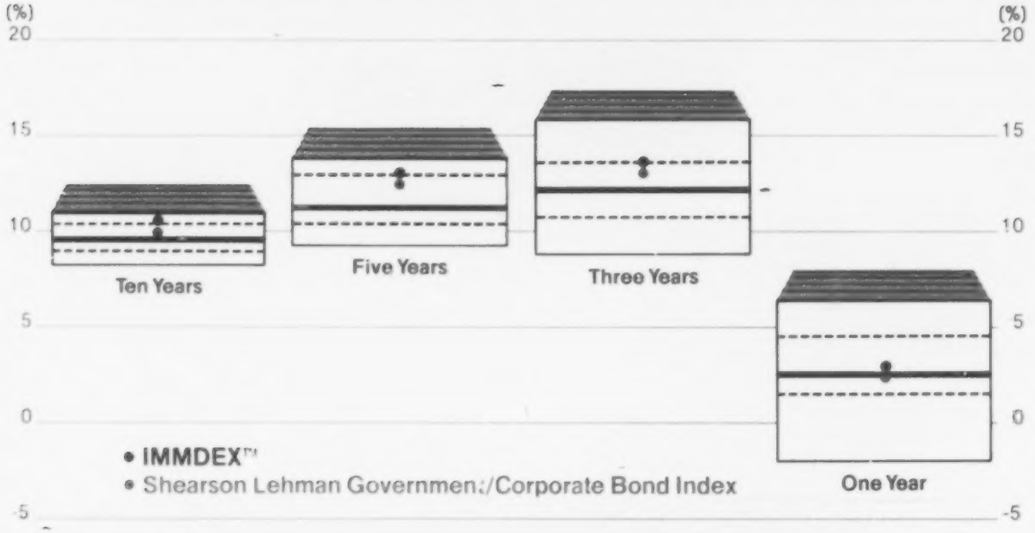
# Bond Indexation with the IMMDEX™ advantage.



Bond fund total rates of return for periods ended December 31, 1987. Source SEI.

**The Shearson Lehman Government/Corporate Bond Index has provided superior performance when compared to active fixed income managers. The Index has consistently provided first or strong second quartile returns over most time periods.**

**Immdex is a unique bond management system in which the annual return will match or exceed the index rate of return. On the basis of actual experience, IMMDEX has added an average of 65 basis points of excess annual return to the Shearson Lehman Government/ Corporate Bond Index.**

**Immdex accomplishes this objective through two strategies:**

- **The index rate of return is achieved through a proprietary duration-matching strategy.**
- **Immdex capitalizes on market opportunities to further enhance total return.**

**First Wisconsin Trust Company is a leader in the area of quantitative fixed income management and we believe that the Immdex advantage will prove to be an attractive alternative to your current bond management approach.**

**Let us review how Immdex provides positive tracking to the Shearson Lehman Government/ Corporate Bond Index and enhanced market returns through the use of bond management techniques. Call Robert Aubrecht at (414) 765-4906 or Charles Groeschell at (414) 765-4789 or write First Wisconsin Trust Company, First Wisconsin Center, Box 2054, Milwaukee, Wisconsin 53201.**

COMPREHENSIVE ASSET MANAGEMENT BEGINS WITH A GLOBAL PERSPECTIVE

We believe the key to achieving consistently good investment results in every market environment is a comprehensive approach toward investing. At Bessemer, we maintain a global perspective in making investments that includes an analysis of international investment opportunities as well as those available in the United States.

Our London-based international investment staff is devoted full time to analyzing the relative attraction of the World's markets and thoroughly researching investments throughout Europe, the U.K. and the Far East.

Bessemer manages over $5.3 billion for just over 500 individuals and institutions located in the United States and abroad. We create for our clients a comprehensive investment program that includes U.S. and international securities, real estate, oil and gas and private investments.

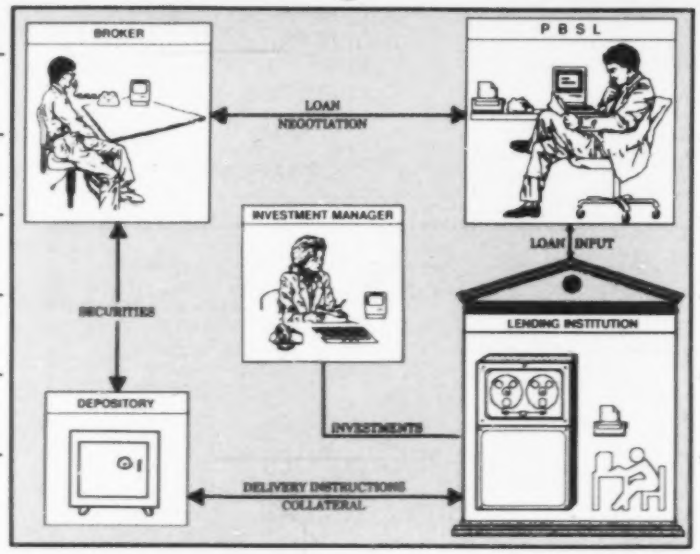
# OUTSTANDING OPPORTUNITIES
## from an outstanding soft-dollar broker



### INCREMENTAL INCOME
### Performance Based Securities Lending

Performance Based Securities Lending (PBSL), provides customized agency based securities lending services to banks and institutional investors. PBSL manages the lending program including all operational aspects with the exception of the actual transfer of securities and collateral between parties, which remains in client control at all times. Also, with PBSL, the client retains control over the management of cash collateral. Securities lending is an asset management technique used by managers of large portfolios to increase investment returns. All loans are fully collateralized and the collateral is marked to market daily. The program is controlled on the DML securities lending software which is the leading system amongst institutional lenders. DML offers comprehensive "street side processing", accounting for all broker activity, and "account side processing" affording the ability to account for loan activity discretely for multiple portfolios. PBSL offers easy entry into the market without any front end capital commitment. PBSL's approach offers significantly increased earnings from securities lending, through a combination of lower fees and improved lending performance. The company employs a unique pricing methodology aimed at maximizing profit not volume. PBSL's fees, which are lowest in the industry, are related only to lending income so there is no negative cash flow risk should market conditions change.

For further information, call Hastings Read or William Scott with Performance Based Securities Lending at 212-237-2712.

### BROKER
### Capital Institutional Services

CIS is the oldest and largest independent soft-dollar broker, providing services of over 200 independent research organizations to 800 institutional clients. At CIS, the soft dollar business is our only business, so doing it well is extremely important to us. We have been an innovator, introducing secondary bond trading for research credit in 1982, and adding a financial futures capability in 1984. Our client reporting gives the institutional money manager an accurate and timely monthly accounting of commissions and research provided. CIS marketing representatives have the product knowledge to help the client find the services that fits their needs.

Performance Based Securities Lending is just one of 200 outstanding services CIS can provide. Call your CIS representative at 800-247-6729 or 214-720-0055 for more information on PBSL or for our complete Directory of Research Services.

of investment policies, objectives and asset allocation; U.S. and foreign manager evaluation and selection; and U.S. and foreign performance measurement and analysis.

The firm also offers total investment supervision of tax-exempt and taxable assets and the creation of investment vehicles for financial intermediaries.

The firm provides establishment of pooled investment vehicles and participation in existing client funds to the investment management industry.

The firm has special expertise in equity, special real estate, manager evaluation and investment partnerships.

Significant developments at the firm in the past year include its acquisition by Lynch Corp.

There is one public retainer client and the firm also provided services to one corporate non-retainer client during the past year.

There are five professional consultants. Fees are payable in hard dollars.

Clients include the Town of Fairfield. Sandra Manzke is client contact.

## V

### Venture Economics Inc.

*16 Laurel Ave., P.O. Box 81348, Wellesley Hills, Mass. 02181; (617) 431-8100*

Venture Economics Inc. provides development of investment policies and objectives; U.S. manager evaluation and selection; and U.S. performance measurement and analysis.

The firm also provides consulting to refine investment criteria, research support, screening proprietary data bases and aggregate portfolio reports with industry benchmarks on investment status and performance. A separate service offers performance measurement guidelines for venture capital funds.

The firm provides manager directories, portfolio analysis and performance research to the investment management industry.

The firm has special expertise in venture capital and leveraged buy-out investing.

Fees are payable in hard and soft dollars.

Linda Vincent, vice president, and Ted Clark, associate, are client contacts.

## W

### Washington, Hackett, Smith

*147 Carondelet St., Suite 1125, New Orleans, La. 70130; (504) 865-1118*

Washington, Hackett, Smith & Co. provides development of investment policies, objectives and asset allocation; U.S. and foreign manager evaluation and selection; and U.S. and foreign performance measurement and analysis.

The firm also offers minority and women-owned investment manager evaluation and selection; implementation of minority and local investment manager "farm teams"; planning and implementation of affirmative action policies and legislation with regard to investment management.

The firm has special expertise in minority and women-owned manager evaluation, search and monitoring.

The firm, which is less than a year old, gained one retainer client, the Louisiana treasurer's office.

The firm also provided services to two public non-retainer clients during the past year.

There are three professional consultants. Fees are payable in hard and soft dollars.

Christian M. Washington is client contact.

### Wilshire Associates

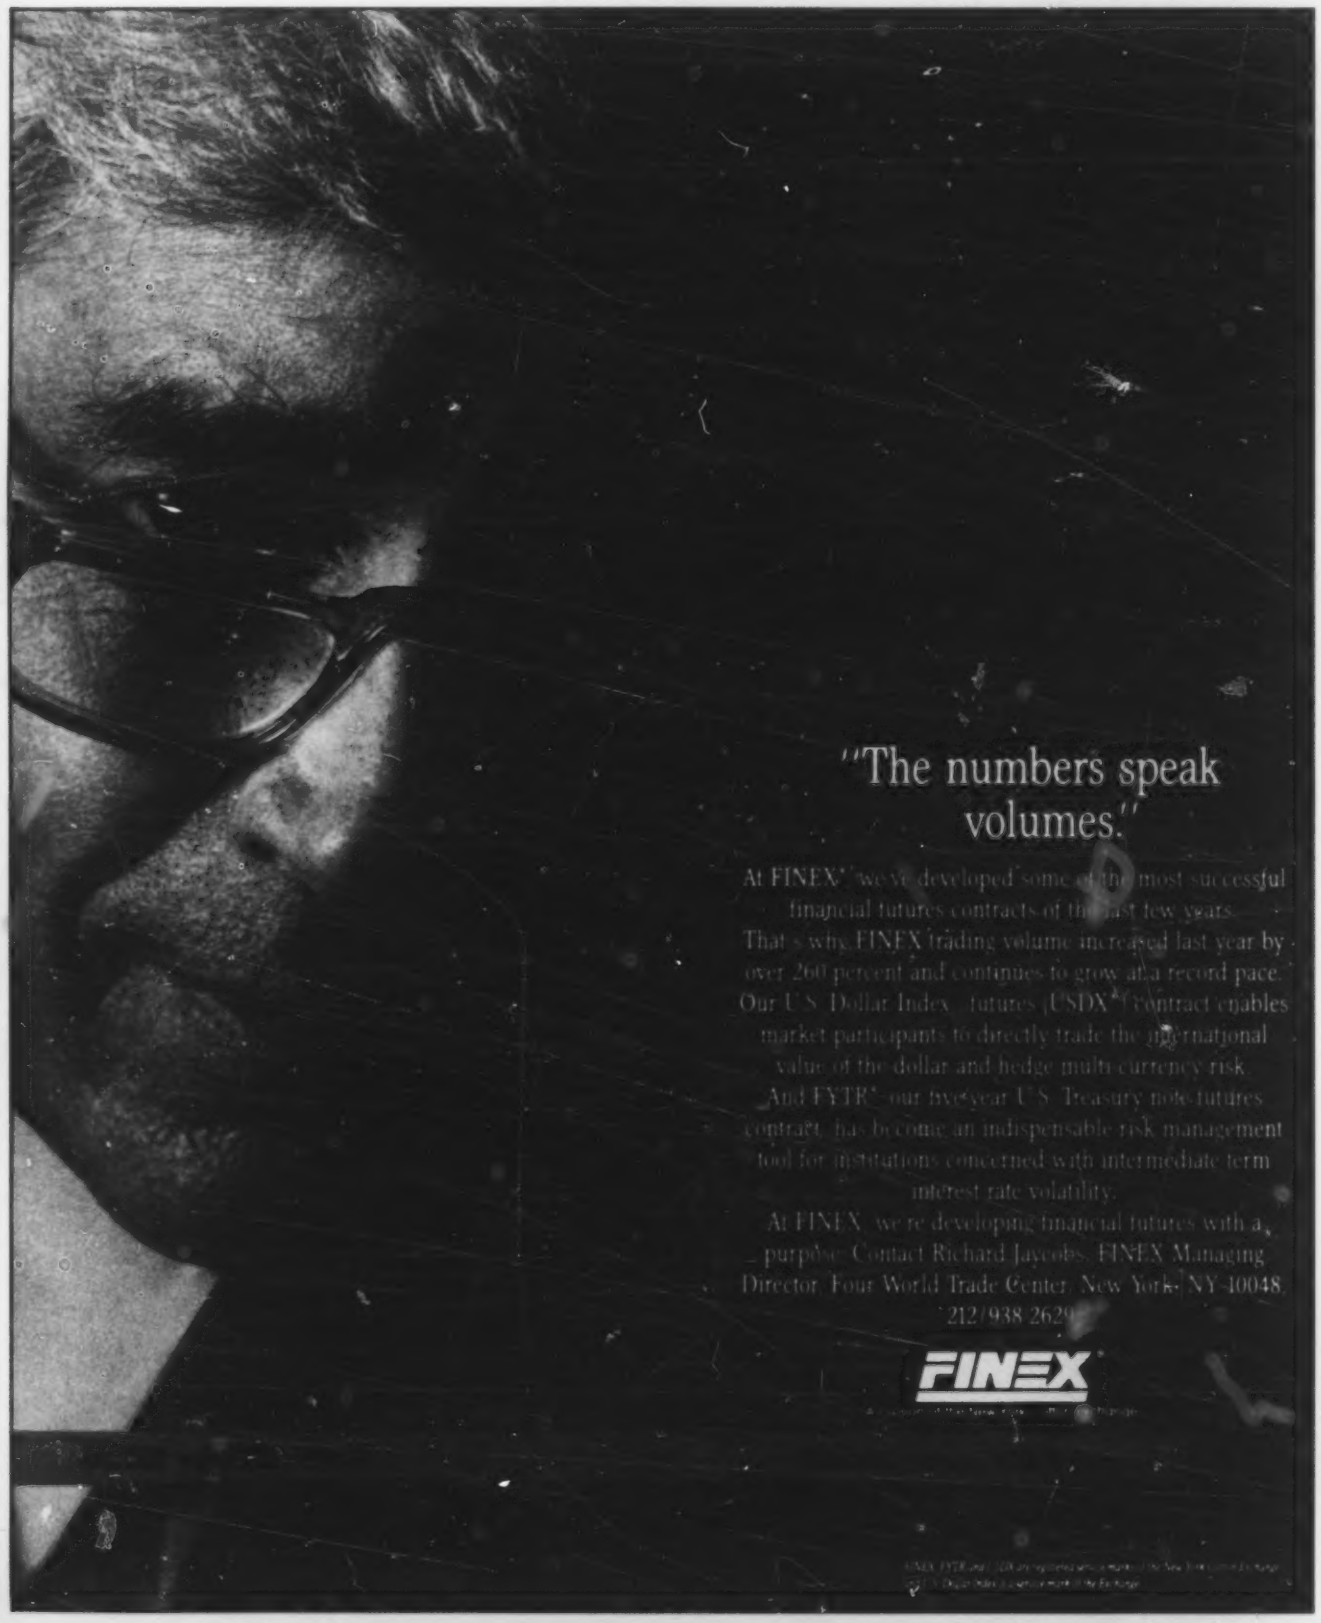
*1299 Ocean Ave., Santa Monica, Calif. 90401; (213) 451-3051*

Wilshire Associates provides development of investment policies, objectives and asset allocation; U.S. and foreign manager evaluation and selection; and U.S. and foreign performance measurement and analysis.

The firm also offers investment structure analysis, real estate consulting, transaction and trading analysis, special investments selection and monitoring (including venture capital, leveraged buy-outs and turnarounds) and cost reduction programs.

It offers the following to the investment management industry: asset allocation, equity management systems, fixed-income management systems, accounting, performance measurement and analysis, universal comparisons and client reporting systems.

Developments at the firm in the past



year are major additions to the consultant senior support staff and enhancement of its international data base and performance evaluation capability.

Of the 73 clients on retainer, 39 are corporate, 22 are public and 12 are endowments and foundations. The firm also provided services to two non-retainer clients during the past year; one was corporate and one, public.

There are 15 professional consultants. Fees are payable in hard and soft dollars.

The firm runs index funds and growth and value structured portfolios. It does not, however, provide both money management and consulting services to clients.

Clients include Avon Products, CBS Records, California Public Employees and the Pension Benefit Guaranty Corp.

Larry Davanzo, senior vice president, is client contact.

### The World Markets Co. PLC

*375 Park Ave., Suite 3207, New York, N.Y. 10152; (212) 593-4747*

The World Markets Co. PLC, a subsidiary of Bankers Trust Co., provides foreign investment performance measurement and analysis.

The firm provides performance evaluation and investment accounting services to the investment management industry.

The firm has special expertise in attribution analysis for international investments of U.S. pension plans.

Significant developments in the past year include the introduction of analysis of bond investments.

Of the 54 clients on retainer, 10 are corporate, two are public and 42 are managers and consultants.

Fees are payable in hard and soft dollars.

Linda McPherson, vice president-marketing, and Angela Docherty, client manager, are client contacts.

### Wurts, Johnson & Co.

*1111 Third Ave., Suite 1200, Seattle, Wash. 98101; (206) 622-3700*

Wurts, Johnson & Co. provides development of investment policies, objectives and asset allocation; U.S. and foreign manager evaluation and selection; and U.S. and foreign performance measurement and analysis.

The firm also offers asset allocation and liability studies.

Significant developments at the firm in the past year include the addition of Brian Cathcart, senior vice president, to the staff.

Of the 66 clients on retainer, 45 are corporate, two are public, 12 are union, seven are Taft-Hartley/endowment and insurance clients. The firm also provided services to eight non-retainer clients during the past year, of which six were corporate, one was public and one, union.

There are two professional consultants. Fees are payable in hard and soft dollars.

Clients include Nordstrom, Alaska Airlines, Washington Natural Gas and National Semiconductor.

Mr. Cathcart is client contact.

### Wyatt Asset Services Inc.

*80 William St., Wellesley Hills, Mass. 02181; (617) 237-3900*

Wyatt Asset Services Inc., a subsidiary of The Wyatt Co., provides development of investment policies, objectives and asset allocation; U.S. and foreign manager evaluation and selection; and U.S. and foreign performance measurement and analysis.

The firm also offers asset/liability modeling to determine the impact of different investment policies on pension contributions; modeling and consultation on FASB 87 expense and funded levels; GIC and annuity placements; and master trustee evaluation and searches.

The firm has special expertise in asset/liability modeling, U.S. and foreign performance measurement and GIC and annuity placements.

Of the 54 long-term, non-retainer clients, 49 are corporate, two are public and three are union. The firm also provided services to 34 non-retainer clients during the past year, of which 30 were corporate, two were public and two were union.

There are 15 professional consultants. Fees are payable in hard dollars.

Asghar Alam, practice director, is client contact.

# Your First Wachovia Master Trust Is As Individual As Your Company.

No matter what type of Master Trust your company needs, First Wachovia can offer one that's right for you.

Our service is built around one simple premise: package services based on customers' needs. Not ours. And we never lose sight of that objective.

We start with an extensive service offering. We build in the flexibility that lets your company select only what you need. Then we add an Account Manager, who's backed by the most sophisticated technology and innovative thinking in the field.

The outcome is a personalized program that meets your company's needs today, and can change to meet them in the future.

Our years of experience have made us a leader in the field. So if your company is ready to put the most advanced Master Trust service to work, call Jane Fisher at (919) 770-6348.

FIRST WACHOVIA

In addition to the Standard Master Trust services, we will custom design services to meet your individual needs. • Securities Lending • Global Custody • Performance Analytics • Trust Universe Comparison Service® * • Options/Futures Administration • Plan Sponsor On-line • Client Seminars • Investment Consulting • Participant Recordkeeping • 401(k) Administration • Real Estate Management • Venture Capital Management • PAYSOP Administration • Legal Administration • Timberland • Flexible Reporting • Fixed Income Management

*Continued from page 17*

performance evaluation work, others — notably Frank Russell — do not.

Two firms with sizable foreign practices declined to disclose figures. A spokeswoman from William M. Mercer Inc., New York, said its foreign actuarial and investment consulting clients are lumped in together, while Roger Bransford, national director-asset consulting for TPF&C, Atlanta, cited concerns about double-counting clients where work is performed out of multiple offices.

The double-counting issue is not unique to TPF&C: InterSec Research Corp., Stamford, Conn., frequently services clients out of more than one office. The firm has 102 retainer clients worldwide, although client data from its foreign offices would suggest a much higher total.

For some consultants, the push abroad started with the need to service U.S. pension clients who were easing into overseas markets a decade ago.

While setting up offices from scratch has led to business from foreign subsidiaries of U.S. multinational corporations that also are domestic clients, penetration of the foreign markets sometimes has proved tough.

The British have a strong financial tradition and have mounted "somewhat of a rear-guard action against American investment technology," said British-born Michael Phillips, Russell's director of consulting activities. Others cite resistance to U.S. fee levels.

The other chief way U.S. firms have achieved foreign market penetration has been through acquisition of foreign firms. William M. Mercer, for example, acquired Duncan C. Fraser & Co., a major London-based actuarial consultant, in 1986 and merged with two Australian firms in 1984 and 1985.

Consultants agreed the competition for foreign clients is heating up. In many countries, actuarial firms have longstanding relationships in which they also have given asset consulting advice. But, the ice is beginning to break in some areas as investors are seeking more sophisticated investment technology.

In Australia, the consulting market opened up after the October crash. "Suddenly, the crash occurred and people were concerned about risk," said Andrew Rudd, president and chief executive officer of BARRA, Berkeley, Calif. BARRA went from zero to 10 Australian clients virtually overnight, he said.

In the United Kingdom, the demand for BARRA's highly quantitative equity models took off following the Big Bang — the deregulation of the British securities markets in 1986 — as British firms scurried for new investment tools, he said.

Still, other markets are tough to pierce for firms making their first showing. The Wyatt Co., with 125 clients in Hong Kong, 70 in the Philippines, 20 in Malaysia, 100 New Zealand and 30 in Australia, probably has "a lock" on that part of the world, said Chris Nowakowski, president of InterSec Research.

Mr. Nowakowski said his firm provides advice to pension executives and financial institutions on the portion of the assets they invest outside of their native countries, with the exception of Japan, where it sells a performance measurement product to Japanese financial institutions.

One important factor boosting actuarial firms is the growing awareness of U.S. multinational corporations that they now must account for the pension liabilities of their foreign subsidiaries under FASB 87, said Asghar Alam, national director of asset services at Wyatt Asset Services Inc., Boston.

Added Sandy Lincoln, managing director of William M. Mercer Meidinger Hansen Inc., Deerfield, Ill.: "To the degree companies try to integrate human resources and financial functions, it works in our favor. To the degree they keep (those functions) separate, it works against us."

Some firms that seek to establish market niches are nonplussed. Russell's Mr. Phillips said efforts by other firms to encourage use of more sophisticated services actually helps his firm, which limits the size of its client list in each market it serves. "It makes our sale easier," he said.

Collins Associates is making its first major run at a foreign market by establishing a relationship with John A. Nolan Associates in Melbourne, Australia. Collins is trying to distinguish itself by being the pre-eminent consultant concerning small specialty managers.

Down the road, some are gazing toward Japan and continental Europe as the brightest lights on the horizon.

According to a recent study by the Organization of Economic Cooperation and Development, benefits levels in OECD countries will have to rise three to four times to meet inflation and demographic needs during the next 25 to 30 years, Mr. Nowakowski said.

The exception is Japan, where benefit levels will have to go up 13 to 14 times, he said. Added to that country's severe level of underfunding of its retirement plans, the indications are for explosive growth in pension assets.

Meanwhile, the Japanese government is moving to loosen investment restrictions on Japanese funds and toughen performance measurement standards. "Japan is far and away the most fascinating pension fund market in the world," Mr. Nowakowski said.

Others also see strong demand for consulting services in continental Europe. Changes in pension laws and investment practices is expected to boost activity in Portugal, Spain and the Netherlands.

In addition, the breakdown of financial barriers in the European Community in 1992 will cause European funds to "look favorably to investing in foreign markets" and to shift away from insurance companies and toward individual stock managers, said Wyatt's Mr. Alam.

Meanwhile, the trend in Canada threatens to go the other way, if proposed legislation shifts employer emphasis toward defined contribution plans, which heavily invest in guaranteed fixed-income products, said Michael McKay, vice president, GBB Buck Consultants Ltd., Toronto. ■

# Funds bypass

*Continued from page 17*

we are seeing is a maturation of a job (the pension plan manager) that didn't even exist 10 years ago."

Leonard S. Chaikind, pension plan administrator at Shell Oil Co., Houston, said he agrees with Mr. Shultz' approach and said "that is exactly what we try to do."

Chaikind

Mr. Chaikind said when new money managers are hired at Shell they also agree to provide "over and above their investment management function" assistance to Shell in managing its overall pension fund.

Shell uses Frank Russell Co. as its consultant but uses its investment managers to provide specialized input either in the form of studies on some aspect of asset management or in meetings to exchange information on trading techniques or special investment processes.

He said money managers provide asset allocation information for Shell and do special studies for the fund. "Since we manage money internally we share information on buying and selling and (money managers) have given us information on how to trade more effectively," he said. "We ask them to be creative."

The disadvantage to using money managers in a consulting role, said Mr. Chaikind, is "you don't have total call on them. With Frank Russell we have total call and they must be very responsive to our needs. The point of using managers is that they can give us specialized information. The Frank Russell people are good but they don't know everything. For example, they have no expertise in GICs and we are big GIC investors," he said.

General Motors Corp. pension executives also use their investment managers to provide consulting assistance and input in directing GM's $30 billion in domestic pension assets.

"We do use our money managers for more than just running their special funds," said Charles Tschampion, director-investment manager relations at GM. "We have a process of internally coordinating and determining our asset allocation and use our managers as a source of financial and market information," he said. GM also uses Frank Russell Co. as its consultant.

Mr. Tschampion said GM views its investment managers "as a resource of investment expertise."

"We pay a fee and we expect to get their thinking and help and the benefit of their understanding. It is a team approach in terms of information gathering and providing input," he said.

Ed Ehrlich, director of the ITT Corp. pension trust, said ITT does not use outside consultants and has "always felt free to use our outside investment managers for input. It (using managers in a consulting role) doesn't sound like anything new or different. We don't use consultants. We've been successful in doing it ourself. We've grown without them and have been in the upper deciles in performance," said Mr. Ehrlich.

Ehrlich

The pension fund of Kerr-McGee Corp., Oklahoma City, used an outside consultant, SEI Funds Evaluation Service, but let it go when fund executives found they didn't need all the data provided by SEI, said H.H. MacPherson, manager investments and financial analysis.

"I'm trying to do more things myself; we're doing more in-house things that consultants couldn't do for us like classifying money managers according to style where the information can be useful. Most consultant classifications don't make any sense. We couldn't get what we wanted from them."

"We used SEI and paid for the service. We got a lot of data, good data on performance and portfolio diagnostics . . . but it was too much and we were paying for data we didn't need," he said.

Roger Bransford, national manager-asset consulting at TPF&C, Atlanta, said the use of investment managers in a consulting role by large pension funds has been an evolutionary process.

"It is due to natural evolution rather than being caused by a specific incident like the market crash. But Oct. 19 and FASB 87 have caused some people to rethink how they manage and view the whole situation." ■

# Hit list

*Continued from page 18*
modating than in the U.K.," said Michael Phillips, director of consulting for Russell. As citizens of a young country, Australians "don't have too many preordained ideas about how things should be done," he said.

When Mr. Nolan neared the end of his 11-year stint with the State Electricity Commission, he and Nolan Director Peter Guy approached Bruce Cook, managing director and chief executive of Mercer Campbell Cook & Knight, the Melbourne-based subsidiary of William M. Mercer.

"We recognized what Nolan was offering as unique," said Mr. Cook. "For a consulting actuarial firm it is almost impossible to recruit top finance people because it'd be difficult to fit them into a salary structure like ours."

Instead, Mercer took a 15% position in the new company and provided office space and support, including access to performance surveys and research.

"We don't see it as a conflict of interests," Mr. Cook said. "Nolan's service is so personalized it's only offered to the top 12 people in the finance industry. It's a Rolls Royce service."

Nolan offers such services as strategic asset allocation and risk-reward portfolio analysis, and customizes them for his clients.

Mr. Nolan also has established ties with Collins Associates. Under a five-year contract, Collins will help Nolan's clients evaluate and select investment managers in the United States and United Kingdom. Nolan provides a reciprocal service for Collins.

Budge Collins, principal of Collins Associates, visited Australia in August, his fourth trip since December, to see clients and prospects. Through Nolan, he has picked up three clients, including the SECV.

Mr. Nolan also serves as the Australian agent for InterSec's range of international investment consulting services, selling InterSec performance measurement services of non-domestic managers on an Australian dollar-denominated basis.

InterSec's first Australian client was the $3.35 billion Superannuation Fund Investment Trust, Canberra.

The firm's client list has doubled to about 27 in the past six months, and includes four of Australia's 10 largest pension funds, said Chris Nowakowski, InterSec's president.

"We researched the market thoroughly and Australian fund managers are upfront about what they want," Mr. Nowakowski said. "The single major shortcoming in the eyes of these clients and prospective clients, at this stage, is that the software does not explicitly capture the impact of currency hedging," he added.

"Australian managers do much more hedging, using futures and options, than any other pension managers worldwide." ■

# Groups pulling

*Continued from page 18*
to join the association; for about $475, brokers wishing to become consultants can soon enroll in an IIMC home-study course being prepared in conjunction with academicians, Mr. Johnson said, and earn the title "accredited investment management consultant."

The Certified Investment Management Consultant designation from IIMC is granted, for an additional $200, to those who qualify under eight different levels of practical experience, stressing business with a variety of clients (at least 25) and money managers, with no more than 50% of the required $15 million in assets under consultation managed by the same firm.

"The essence of a consultant is that you are out there doing business with the people in the industry," Mr. Johnson said.

"The purpose is to identify the consultants who have seasoned capabilities — and for those who don't, they can learn most of the basic tools in our organization. They're going to have a mentor," Mr. Bott said.

The IMCA's approach differs in that it offers its "Certified Investment Management Analyst" designation only to those who complete a $3,000, one-week course at the Wharton School.

To enroll, one must have at least three years' experience in investment management or some equivalent combination of graduate course work and investment management.

"We rejected the idea that experience was enough," Mr. Bott said. "We wanted a class that was academically rigorous. You must be qualified before you go through the class," he said.

Perhaps not surprisingly, Mr. Bott is critical of the IMCA's approach.

"There is not easy access (in IMCA) for those who are not highly trained, highly seasoned, to come in," Mr. Bott said. "The elitist approach is not the way to go if the industry is going to grow. I want to see our profession legitimized to the point where it is restrictive, but it won't ever be successful if we shut out people who don't have experience."

Mr. Owen replies: "The other organization is more geared toward the fledgling (consulting) organization," he said. "Is that good or bad? I'm not going to comment. But how do you differentiate someone with 15 years' experience, as opposed to five months' experience?" ■

# $1.5 trillion

*Continued from page 17*
between $600 million and $700 million.

Some do not have a large number of clients. Richards & Tierney — which specializes in benchmark portfolios — has just 24 clients, but those clients have $55 billion in assets. "The type of work that we do has great appeal to very interested and active plan sponsors," said Tom Richards, principal. "They tend to be the larger ones."

Mr. Lincoln attributes some of his firm's size to its acquisitions: "Clearly, we've bought some market share," he said. The firm came out of the merger of William M. Mercer-Meidinger Inc. and A.S. Hansen Inc. in 1987. Since then, it has continued adding to its consulting capacity, with the number of people rising to 120 from 78 in the past several months, he said. This factor also has helped it win and retain business.

Some consultants were unable to provide data on client assets. For instance, one of the larger consulting firms, Hewitt Associates, Lincolnshire, Ill., does not track this data, a spokeswoman said.

Figures are limited to assets of U.S. clients that use the consultant on a retainer or otherwise long-term basis. One firm, Frank Russell, serves another $100 billion of foreign assets. ■

Who offers your defined contribution plan participants the flexibility of daily telephone transfers between funds?

The same company who offers excellent investment management.

As a leading provider of 401(k) and other defined contribution plan services to more than 1,000 corporations across the country, Fidelity Investments offers a wide range of investment management and client services designed to meet the needs of both you and your employees.

**A Wide Array Of Nationally Known Funds.** With more than $70 billion in assets under management, Fidelity offers a broad choice of professionally managed mutual funds ranging from equity funds to money market funds and GIC's. The funds are available on a ***no load*** basis to plans with more than 200 eligible employees. And, as market conditions or personal investment objectives change, plan participants have the flexibility to transfer their investments among available mutual funds by telephone on any business day.

**Comprehensive Recordkeeping.** Fidelity's recordkeeping services are designed specifically to reduce your administrative burden. Not only can your employees call us directly to transfer existing balances, they can also redirect future contributions by telephone. Our state-of-the-art system and experienced employee benefit professionals work to ensure timely and accurate reports for both you and your employees.

**Employee Communications Support.** Fidelity will work with you to develop the communication materials needed to support your employees from enrollment through retirement. We'll help you explain your program and the available investment options clearly and effectively. In addition, your employees can call toll-free 24 hours a day, seven days a week and talk with a knowledgeable Fidelity representative about available investment options.

sitions by the managers running those funds," she said.

Corporate pension funds have lowered their equity exposure to around 50% from a pre-crash high of 57%, according to Steve Einhorn, a partner in Goldman, Sachs & Co., New York.

"It's due to a combination of lower valuations and moderate liquidations," he said. "(It's) less a bearish attitude than selling those shares at a premium."

Liquidation of equities has been the big story since the crash, Mr. Einhorn said.

In the last quarter of 1987, he said, institutional investors were liquidating equities at a $29 billion annualized rate.

In the first quarter of this year, the annualized rate jumped to $37 billion, while in the second quarter, it was at $13 billion.

"Clearly, institutions are being net liquidators," he said. "The amount of liquidation is unusual. Going back to 1968, there has never been a full year of net liquidations."

The main reasons have been leveraged buy-outs, cash mergers and share buybacks, he said.

"Corporations believe the public market prices are below the private market values," Mr. Einhorn said, stressing it was a view with which Goldman doesn't necessarily agree.

The present-day popularity of tactical asset allocation is partly a result of the crash, accelerating structural changes that were under way among institutional investors, according to Eric Sorensen, director of quantitative analysis for Salomon Brothers Inc., New York.

The crash highlighted the tension developing between traditional fundamental analysis and the structural changes, such as the development of derivative strategies and the available liquidity from program trading, he said.

"The structural changes are in place and then you have the (market crash)," he said. "No matter what kind of portfolio diversification you had, you got hammered."

Scudder's Ms. Small also sees growth in the use of tactical asset allocation, which promises a "more conservative" participation in the equity markets.

"Caution is worldwide," she said. "Instead of creating reverberations through the real economy, the crash brought equity investors back to reality. It marked the end, but did not roll back, the 1980s' liquidity-driven bull market."

The end result, according to Sara Teslik, executive director of the Council of Institutional Investors, Washington, which represents 65 pension plans with about $300 billion in assets, is a greater realization on behalf of institutional investors that they can't perform independent of the market as a whole.

"They are much more tuned to look at market cycles, more passive investments," she said.

The shock of the market crash wasn't as powerful as might have been a few years ago, she said, before institutional investors realized their clout. "Now, we are so big we realize we are the market," she said.

For Wyatt's Mr. Scott, the crash should have no long-term impact. "Twenty years from now, when people are getting their pensions for the first time, the crash will have little effect," he said.

"Pension administrators look at the relationship between their assets and their long-term liabilities," Mr. Scott said. "The stock market crash will not change that view." ■

# LTV, PBGC dispute goes back to court

WASHINGTON — The months-long dispute between the Pension Benefit Guaranty Corp. and The LTV Corp. over responsibility for three LTV pension plans is headed back to court.

Even though the PBGC and LTV claim they are willing to negotiate a settlement, the PBGC — as expected — appealed a federal judge's ruling that the agency could not force LTV to resume responsibilities for the plans, which have liabilities of about $2 billion.

In September 1987, the PBGC restored the three terminated plans to LTV.

LTV spokesman Charles Palmer said the company will seek an expedited appeal process to move the company's bankruptcy proceedings forward. ■

# Merrill

*Continued from page 4*

board, volume growth was insignificant in every sector of the global debt and equity markets.

Total global market volume was up slightly to $368.1 billion, from $365.1 billion. First Boston/Credit Suisse, which held the No. 1 slot for the first three quarters of 1987, claimed the lead again this year. The firm was lead underwriter on $36.2 billion worth of securities, commanding 9.8% of the market. Merrill Lynch, which was in fourth place last year, moved up to second.

The U.S. debt and equity markets clearly have not recovered. Analysts attributed the sluggishness to investor and issuer wariness, helped along by rising interest rates and a lack of confidence in the future direction of interest rates. The equity markets are suffering the most.

Total taxable domestic underwriting volume for the three quarters of 1988 was $206.3 billion, down 10% from $229.2 billion for the same period last year. Equity volume also tumbled to $31.1 billion, from $55.4 billion.

Debt volume in the U.S. public markets during the three quarters picked up some, topping $175 billion, up from $173.8 billion last year.

Goldman, Sachs was No. 1 in debt offerings for the three quarters, underwriting almost $27 billion in securities and taking 15% of the market, up from $17.7 billion for the same period last year. Goldman jumped ahead of the pack; it was ranked No. 5 in the cumulative third-quarter 1987 rankings. Salomon Brothers, which was first last year, slipped to second this year, underwriting $25 billion of debt offerings, down significantly from $30.8 billion during the same period last year.

In the non-investment-grade debt market, Drexel Burnham Lambert Inc., the undisputed market leader, apparently hasn't been hurt by all the publicity surrounding the continuing insider trading scandal. Drexel was first for the first three quarters of 1988, underwriting $9.6 billion, with 50.2% of the market.

During the same period last year, Drexel also was the top-ranked underwriter, having underwritten $10.1 billion of the high-yield securities.

First Boston retained its second-place ranking all year, underwriting $2.4 billion, and claimed 12.6% of the market.

Goldman, Sachs finished first in mortgage-related securities, retaining the lead it has had all year, followed by Salomon Brothers, the traditional leader in the area. Goldman underwrote $12.9 billion of mortgage-related debt, or 17% of the market. Salomon underwrote $9.1 billion, or 12.7%, down significantly from $15.1 billion a year ago.

On the equity side, Merrill was first in initial public offerings, underwriting $3.8 billion of IPOs, up from $2.4 billion last year. The firm had a 20.2% slice of the market this year, nearly double the 11% it had captured during the same period last year.

Both second-ranked Shearson Lehman and third-ranked PaineWebber seized significantly bigger shares of the IPO market in the first three quarters of this year. Shearson, which underwrote $3.6 billion, commanded 19.1% of the market; up from $2 billion and 9.4% last year. PaineWebber underwrote $2.4 billion so far this year, or 12.6%, up from $812 million, and 3.7% last year.

The volume of common stock offerings also plunged to $23.8 billion from $35.9 billion during the same period last year. Preferred stock offerings dropped by nearly 50% to $5.2 billion from $10.1 billion last year. ■

# Congress ups reversion tax

By Joel Chernoff

WASHINGTON — Caving in to pressure by Sen. Howard Metzenbaum, D-Ohio, the Treasury Department has announced a six-month freeze on issuing determination letters affecting terminations of overfunded defined benefit plans.

Congress also agreed to a permanent increase to 15% from 10% in the excise tax imposed on reversions of surplus assets to employers, but rejected a temporary 60% excise tax sought by Mr. Metzenbaum. The provision, contained in a technical corrections bill, is expected to be signed soon by President Reagan.

Photo by Tom Reed

Sen. Howard Metzenbaum succeeded in obtaining a permanent increase in the surplus asset reversion excise tax as well as a six-month freeze on determination letters.

Employers frequently seek the Internal Revenue Service's blessing in the form of determination letters on such matters as plan amendments or terminations to ensure any changes adhere to tax law.

According to sources, Mr. Metzenbaum forced Treasury officials to agree to the freeze when he blocked ratification of a tax treaty between the United States and Bermuda Oct. 22, in the waning hours of the 100th Congress. The freeze does not require legislative approval.

During the time the freeze is in effect — Oct. 24, 1988, through May 1, 1989 — the Treasury Department and Congress will pursue the issues.

"This moratorium will give Congress time to come up with legislation that will make certain workers and retirees get a fair share of those funds," Mr. Metzenbaum said in a press release. He noted employers have obtained $19 billion in surplus assets from their pension plans since 1981

The freeze includes a broad exemption for terminations

# Equity sales binge of plans shows no signs of abating

By Fred Williams

Private pension plans have liquidated more than $284 billion worth of stocks from 1985 through the second quarter of 1988, according to Federal Reserve Board flow of funds data.

Using annualized figures as "rough estimates," Salomon Brothers Inc., New York, estimates net equity retirements for the four years ending 1988 could reach $331 billion.

Corporate pension plans have been net sellers of common stocks every year since 1985 and equity levels are at their lowest percentage of financial assets in 25 years, according to several Wall street financial analysts.

The selling of equities by private pension funds occurred at a record rate during the first quarter of this year with net liquidations totaling $40.7 billion. The trend continued into the second quarter of 1988, with stock sales totaling $22.9 billion, according to the Fed

# Ameritech blazes trail in rate swap

By Mike Clowes

CHICAGO — The $12 billion American Information Technologies Corp. pension fund has invested $100 million in a unique interest rate swap — exchanging a short-term variable-rate investment for a longer-term variable-rate indexed-based return.

The investment in the BIG Index Swap program, offered by Salomon Brothers Inc., New York, was made without assets actually changing hands, said Don Phillips, director-investment management at Ameritech.

The $100 million committed was part of the approximately $500 million Ameritech normally has in residual cash. This cash usually is invested in short-term securities.

Ameritech has contracted to pay Salomon Brothers the London interbank offered rate minus a spread, a short-term rate, on the $100 million and, in return, Salomon has contracted to pay Ameritech the total return of the Salomon Broad Investment Grade Index rate.

While neither Ameritech nor Salomon would say how much less than LIBOR Ameritech would pay, a typical spread now would be 20 basis points, said Richard Stuckey, director of hedge management at Salomon Brothers.

Each month, the difference between the rate paid by Ameritech and the rate paid by Salomon Brothers will be calculated on the $100 million. If the BIG Index total return is higher than the LIBOR rate minus the agreed upon spread, Salomon will send Ameritech the difference. If the index return is less than LIBOR minus the spread, Ameritech will send Salomon the difference. These monthly checks are the only amounts that will change hands between Ameritech and Salomon.

Because Ameritech already had $500 million in short-term investments throwing off a return similar to the LIBOR, it didn't have to make any changes in its investments to participate in the swap. It merely agreed to swap part of the returns from these short-term investments for the total return on the BIG Index.

Salomon Brothers introduced the swap as a simple way for investors to create a synthetic bond index fund that will match or beat the BIG Index return. The firm envisaged the swap as a simple and inexpensive way for pension funds to establish a core fixed-income portfolio.

At the same time, because Salomon pays the investor the total return on the BIG Index, most of the bonds of which Salomon has in inventory, the new vehicle serves as a way for the

## LATE NEWS

### TIAA-CREF relaxing transfer rule

WASHINGTON — The Teachers Insurance and Annuity Association — College Retirement Equities Fund has agreed to broaden fund transferability for participants as a result of its requests for exemptions under the Investment Company Act of 1940 for a recently introduced money market fund.

The agreement was reached with several higher education institutions and associations, a number of mutual fund companies and the Investment Company Institute. The organizations intervened when TIAA-CREF requested exemptions from the Securities and Exchange Commission regarding transferability and limiting the voting rights of participants in the money market fund.

TIAA-CREF "agreed in principle that a CREF transfer option will be developed to permit CREF participants to transfer existing and future accumulations to alternative funding vehicles that their employers may permit and to elect to take lump-sum distribution of accumulations, again if allowed by the employer's plan," said Clifton R. Wharton Jr., chairman and chief executive officer of the $66 billion system.

Details will not be released until Nov. 21.

### Ariel sets new-cash moratorium

CHICAGO — Ariel Capital Management Inc., Chicago, has notified its 50 clients it is capping its accounts and, for an indeterminate time beginning Feb. 1, no longer will accept additional money into its separate accounts.

The notice follows by about a year a pronouncement that Ariel would not seek new clients. The decisions don't affect Ariel's mutual fund, run through the Calvert Fund.

The moratorium reflects a concern that Ariel's portfolio of primarily small-capitalization stock is getting too large, said Darice Wright, Ariel senior vice president. Ariel has about $550 million under management and expects by Feb. 1 to have about $600 million, she said. It invests in 30 stocks.

### Fed official moving to NACHA

WASHINGTON — Elliott C. McEntee, associate director of the division of federal reserve bank operations at the Federal Reserve Board, has been hired as the president and chief executive officer of the National Automated Clearinghouse Association.

Mr. McEntee, a familiar name to most corporate cash managers and bank cash management executives because of his senior level involvement in the Fed's efforts to squeeze float and eliminate risks from the payment system, will replace William R. Moroney, who will leave NACHA at the end of 1988.

Mr. McEntee has worked for the Federal Reserve Board since 1973, most recently managing the Fed's oversight of the domestic payment mechanism and the financial services that Federal Reserve Banks offer U.S. financial institutions.

### Fixed-income manager moves

LONDON — Christopher Wyke, formerly an international fixed-income manager at N.M. Rothschild International Asset Management, London, has joined Bankers Trust Investment Management Ltd., London, as a director and head of fixed income.

Mr. Wyke spent seven years with Rothschild, which lost seven investment professionals about a year ago (*Pensions & Investment Age*, Sept. 7, 1987). From 1984 to 1987, Mr. Wyke managed Rothschild's New York office with responsibility for working with pension plans and captive insurance companies.

Rothschild replaced Mr. Wyke internally, although the replacement's name could not be learned by press time.

### Stormont-Vail switches advisers

TOPEKA, Kan. — Stormont-Vail Health Services Corp. hired Dean Investment Associates, Dayton, Ohio, as balanced manager for its entire $13 million pension fund and $3 million in general operating funds, said Vernon Long, vice president.

Dean replaces Reimer and Koger Associates Inc., Shawnee Mission, Kan., which also ran a balanced account, according to Mr. Long.

Shearson Lehman Hutton Inc., Kansas City, Mo., was the consultant in the move.

# Derivative plays lure bond assets

By Trudy Ring

Fixed-income managers that use futures and options are seeing a boom in business — picking up almost $2 billion this year alone — in marked contrast to the post-crash market for equity derivative strategies.

Among the managers seeing a spurt in business during 1988 are Lotsoff Capital Management, Chicago, whose assets under management have doubled to $800 million; Pacific Investment Management Co., Newport Beach, Calif., whose assets have grown by about $1 billion to $17.5 billion; Ward & Wissner Capital Management Inc., New York, whose assets have grown to about $800 million from $577 million; and Security Capital Management Inc., Stamford, Conn., whose assets have grown to $850 million from $561 million.

For all but Lotsoff Capital, the assets are largely tax exempt; for Lotsoff, about half the total is tax exempt, with the remainder from corporate cash and insurance company clients.

The increases came from new clients and increased commitments from existing clients.

The $220 million Equifax Inc. defined benefit plan, Atlanta, increased its allocation to Lotsoff Capital by "a significant amount" this year, said Roger Dailey, vice president. He would not give the exact figures.

Lotsoff Capital has been a manager for Equifax for several years, Mr. Dailey said. "They've basically done a good job for us, they're flexible and they're pretty innovative," he said.

Lotsoff Capital's assignment for the fund includes short-, intermediate- and long-duration strategies, with options used for downside protection.

The Madison, Wis.-based Credit Union National Association's $110 million money purchase plan increased its account with Ward & Wissner by about $8 million, to roughly $20 million this year. Ward & Wissner is one of five managers for the plan's fixed-income fund.

After participants direct their contributions to a certain fund, trustees decide which manager within the fund will receive the dollars, said Jim Cox, investment consultant for Credit Union Benefit Services Inc., the affiliate that

# Searches up slightly

## Fund allocation reviews spark activity

By Carol Wiley

Pension funds are searching for managers at only a slightly higher rate this year than during the pre-crash months of 1987, with most manager changes being precipitated by post-crash scrutiny of asset allocations rather than dissatisfaction with performance.

Pension funds also are using consultants slightly more often than last year in their searches, according to one firm's data.

A total of 612 managers searches have been conducted between Jan. 1 and Sept. 30, according to Eager Associates, Louisville, Ky. Of the total, 370 used consultants, 145 didn't or wouldn't indicate consultant use and 97 were conducted in-house. The searches resulted in 250 hirings.

During the same period in 1987, 551 manager searches were conducted. Of those, 313 made use of consultants, 69 searches didn't or wouldn't indicate consultant use and 169 searches were conducted internally. The searches resulted in 249 hirings.

For the first nine months of 1988, 56 consulting firms were used; in 1987, 48 firms were used.

Fewer searches this year were for defined benefit plans, according to Caroline Cummings Eager, partner in the consulting firm. In the first nine months of 1988, 36% of the searches were for defined benefit plans; in the same period in 1987, 40% were for defined benefit plans.

"We see pension funds hiring fewer specialists and moving to consolidate the number of managers," Ms. Eager said.

The number of searches for public funds increased, however. A total of 35% of the searches from January to Sept. 30 were for public funds; 30% of the searches in the same period last year were for public funds, Ms. Eager said.

In a spot check of 10 investment management consultants, many said most of the manager searches they've conducted this year were the result of analysis of the fund's asset allocation.

One gave Financial Accounting Standards Board regulations as a reason pension funds have been

# Investing for the future

## 3 traditional factors determine investment results

By Robert D. Milne

The success of any long-term investment program will depend upon the major forces that will be at work through 2003.

Investment returns in the future will be dependent upon the same three major forces that have governed since the dawn of investing: the supply and demand for capital; the economic and political environments; and the ability of corporate America to cope with these environments.

**Supply/demand for capital**

Looking first at demand, in 1960 the debt load increased at a 6% annual rate. The appetite for borrowing, however, has grown until it has reached levels above 10% in the 1980s.

The reasons for this increase are many, but they boil down to three major categories: the federal budget has gotten out of control; business has gone on a borrowing binge; and the consumer has been lulled into ever-increasing debt in all categories.

Are these factors likely to change greatly? Probably not. In each instance, the fundamental reasons are mostly psychological and are ingrained. Obviously, there are some limits to borrowing and the annual percentage change in debt can't go on increasing forever. In fact, total debt in this country is now more than 170% of gross national product, a higher debt load than in 1929.

In the history of most nations, however, the trend toward greater borrowing rarely has been reversed.

Looking at the supply side, for the first half of the past 25 years, the personal saving rate was about equal to the increase in the debt load. The trend during the past decade has been disappointing, with the personal saving rate falling to near 4%. If it weren't for pension funds — where the annual contribution is considered as personal saving by the employees — the saving rate picture would be even more dismal.

However, this ignores saving by corporate America in the form of retained earnings — as well as other factors.

The demand for credit has been high and increasing, while the supply of saving has been inadequate. Thus it is not really so surprising the return on U.S. Treasury bills during the past 10 years has been 9.2%, compared with a 3% rate during the preceding 50 years.

Perhaps there is some hope from Washington. Finally, there is some understanding that deficit financing can be overdone as evidenced by the Gramm-Rudman-Hollings Act. However, the federal deficit is running at double the initial Gramm-Rudman-Hollings targets. The commitment to the act isn't especially strong.

Before leaving the topic of supply/demand relationships the obvious must be noted — the demand for credit is supplied in some way. Japan and Europe have been financing almost half the federal deficit.

The Japanese, however, have a financial problem that is about the opposite of ours. They have a personal saving rate around 20%, far higher than is needed for their economy. Naturally this excess supply of savings results in a low price for the Japanese investor — with very low interest rates on Japanese bonds and almost unbelievable price-earnings ratios for stocks. The investor doesn't get treated very well when savings are high.

This excessive savings isn't a near-term problem in this country.

**Economic/political climate**

National income statistics were first compiled in the 1920s, and at the time corporate profits plus interest earned by all corporations amounted to 6% or 7% of GNP. After the worst of the Depression was over, corporate profits rebounded to the same level.

Despite the many challenges corporate America has faced, profits have held up well.

None of us knows what problems will come in the years ahead, but in the past, business has coped with myriad problems and still earned a reasonable share of the nation's output.

Inflation is no longer a problem now that it has slowed to the 4% level during the past five years, with a dip to even lower levels during the collapse in oil prices. In fact, the problem of inflation has been solved twice during the last decade and six times since World War II.

History shows the value of the dollar moves in only one direction — the only difference being that sometimes the drop is sharp and sometimes it is more moderate. Today, the Federal Reserve and other central banks debase currency in an efficient way.

C. Northcote Parkinson, famed for Parkinson's Law that "work expands to fit the time available," has said "Democracy equals inflation."

If debt in the United States is growing at nearly a 10% annual rate while the economy grows over a full economic cycle about 3%, one might infer the pressures for inflation in this country are for a 7% rate. This is no doubt some overstatement of the fundamental inflation rate in this country, but I believe the relatively low inflation rates of today are unlikely to persist. We are at a cyclical low point and are ready for the next cyclical upswing in inflation.

One of the most important elements of the economic environment is the monetary environment.

When money is tight, the price of money rises. The price of money is the interest rate. Interest rates on U.S. Treasury 91-day bills follow velocity almost immediately, with long-term interest rates following.

Although cyclical swings in Federal Reserve monetary policy are the main force leading the bond market, in the longer term the Fed is likely to provide an adequate amount of money supply to provide for economic activity.

During the last 25 years, the return on equities has averaged about 12%. There is some evidence of an upward drift in returns through 1980 in keeping with the supply/demand relationship for capital discussed earlier.

The acceleration of depreciation that occurred with the first Reagan tax cuts reduced reported earnings and, therefore, the reported return on equity. In any event, earnings reported on corporate tax returns are not likely to be overstated.

In trying to evaluate the prospects for returns on stocks, we know bull markets and bear markets make major actual earnings progress because of the changed supply/demand relationships as long-term interest rates more than doubled from 4.25% in 1960 to exceed the 10% mark in the 1980s.

Had it not been for this major change in interest rates, which affected the market prices for stocks and bonds, it is likely returns on stocks would have approximated the return on equity of the underlying corporations. Incidentally, the S&P 500 is used as the measure of corporate America because it includes more than 80% of the value of all stocks on the New York Stock Exchange.

**Summary**

The accompanying table indicates the forecasts for the year 2000.

I begin with an estimate that inflation will average 6% during the next 15 years. This is somewhat less than in the past decade and more in line with the record of the 25 years during which inflation proceeded at a 5.5% rate.

Forecasting inflation rates is really attempting to forecast the integrity of our friends in Washington. The winds of inflation will blow hot and cold, with some periods of help from oil-price wars and other periods when outside shocks exacerbate inflation.

The major force at work in a longer period is the need to monetize the national debt once the cost of servicing the debt becomes too burdensome. Interest on the national debt is running at more than $140 billion a year. If the value of the dollar were halved, the effective cost of paying the interest would also drop in half.

Although the process of monetizing the national debt doesn't proceed on a steady pace, in the longer term the national debt has been monetized in virtually every nation. On Sept. 22, 1985, the United States devalued the dollar on the international scene when the trade deficit reached intolerable levels. We will similarly be forced to devalue domestically unless the federal budget can be brought under control.

The forecasts of nominal real returns for 91-day T-bills and relatively small real returns for longer-term bonds follow from experience. I do have a greater sense of uncertainty about these forecasts because the supply/demand relationship for capital might well provide better returns for the long-term investor.

The stock market is likely to earn a rate of return equal to the return on shareholders' equity. The long-term record of the returns to corporate America holding constant as a share of GNP is a strong reason for believing investors in equities will continue to share fully in the longer term growth of America.

The conclusion is that investing in bonds is a vote of confidence in the integrity of our representatives in Washington, while investing in stocks is a vote of confidence in the ability of corporate America to continue to earn a reasonably constant share in the future growth of our economy.

Long-term investors have to make their decision to trust one group or the other; standing pat in U.S. Treasury bills will not get them anywhere. ■

**The past, the future**

| | 1960-1987 | 1938-'87 | 1962-'87 | 1979-'87 | 1987-2000 |
|---|---|---|---|---|---|
| Inflation | 2.2% | 3.2% | 5.5% | 6.4% | 6% |
| Treasury bills | NA | 3.5 | 6.7 | 9.2 | 6 |
| Long corp. bonds | 4.8 | 4.9 | 6.3 | 9.7 | 8 |
| S&P 500 | 9 | 9.5 | 9.9 | 15.3 | 12 |

# No slowdown

*Continued from page 4*

"you can't trust those other guys' numbers. They don't have the standards we have. They're lying." Now there is a vast improvement in accounting standards worldwide.

Fifteen years from now there certainly will be more sophisticated and much deeper markets in terms of hedging abilities. Today, long-dated swaps and long-dated hedges on currencies are very difficult to come by. I am sure that down the road you will be able to do a 15-year currency swap or 15-year hedge as easily as you can do a three-month one today. The markets will be that deep because we will be so much more globalized.

Again, globalization will be more a debt globalization than an equity globalization, so your equity play will be in a different form.

Perhaps de-equitization is happening because the U.S. corporations were somewhat bloated. Living closer to the edge makes people more concerned about their costs. That is a particular problem here, but also in many other countries.

The changes in financing will alter the way investment bankers serve companies. Already, investment bankers are dealing with corporations less on the equity side than on the debt side. Equities, both on the sales side and the trading side, will play a much lesser role in investment banking firms than they have.

Debt new-product development efforts will increase. When you get a truly global market with much more sophisticated hedging products, you certainly have to believe innovation is going to blossom. If you had long-dated swaps, long-dated hedges — currency and interest rates — available in a true global market, there would be a lot more sexy things you could be doing.

The barriers to true globalization are differences in the markets, differences in regulation and differences in trading policies that might trigger disputes between countries that would close down foreign entry or investment.

There also will be changes in the roles of commercial banks. The thin-margined lending business cannot continue. Banks are not going to put billions of dollars at risk for 10 basis points. Whether the fee business will increase I don't know, but the banks will move to more of a bigger margined longer-term lender.

Undoubtedly the U.S. banks will consolidate the way the Japanese have: we will have fewer, but larger, banks.

Under the de-equitization scenario, leasing may blossom. If you believe de-equitization is going to happen, there probably are going to be people still wanting quasi-equity plays, and maybe holding an asset like an airplane is equivalent to an equity play.

That is, those who used to play equities may now play equipment leases as a form of equity.

De-equitization may also argue strongly for real estate. If the equity markets diminish in size, perhaps this lack of availability of stocks will prompt increased use of real estate by investors.

Shorter term, what we are all waiting to see is the impact a major business downturn will have on what we have done in the past five years to the capital structures and the capital markets. That is the global event that will tell us what will happen in the future. This whole thing we have been through could just be the greater-fool theory.

The only thing that will stop this worldwide move to debt is if we come out of the next downturn and all of those companies that have leveraged themselves up have gone bankrupt. ■

# First Interstate lands 5 funds

LOS ANGELES — First Interstate Bank Ltd.'s trust and investment division has picked up five clients representing approximately $3.2 billion worth of assets.

The five new clients, all of whom hired First Interstate to replace Bank of America as their master trustee, are: The Southern California United Food and Commercial Workers Union and Food Employees, Cypress, Calif., $1.7 billion; Consolidated Freightways Inc., Menlo Park, Calif., $150 million; The Laborers Pension Trust Fund for Northern California, San Francisco, $500 million; The Operating Engineers, Local 3, Northern California, San Francisco, for $800 million of its $1.1 billion in assets; and Advanced Micro Devices Inc., Sunnyvale, Calif., $50 million. ■
